AMERICAN STATE PAPERS.

MILITARY AFFAIRS.

16th CONGRESS.] No. 176. [1st SESSION.

COMPLAINTS AGAINST THE MILITARY ACADEMY AT WEST POINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 27, 1819.

May it please the honorable the Congress of the United States:

THAT the undersigned, late cadets in the service of the United States, in pursuance of original powers extended to the said undersigned by one hundred and eighty cadets, in November, 1818, to act in their behalf, and, by all legal means, to relieve the corps of cadets from certain tyrannies which they hold to exist, would respectfully represent and declare:

That a true statement of the situation of the Military Academy has been withheld from the Congress of the United States.

That, in consequence, the said Military Academy has suffered under the abuses of an authority which was, and is, unrestrained by any fixed and certain laws.

That, although it has been officially asserted that the said Military Academy has been governed by the rules and articles of war, yet those laws have frequently been infringed in cases involving the reputation of individuals.

That courts of inquiry have been ordered by the superintendent of the academy for the purpose of trying cadets, who did not request, and did not desire, the convention of such courts: the superintendent thereby violalating the ninety-second article of war.—(See certificate No. 1.)

That unjust and unauthorized taxes have been levied on the cadets, at different times, under the pretence of a charge for the injury of class books; that the said taxes were levied without the consent of the cadets, and stopped from their pay without their being able to prevent the imposition.—(See certificate No. 2.)

That the cadets have been and are coerced to sign the pay-rolls of the academy, acknowledging the receipt of their pay, when such acknowledgment has been, and is, in effect, false, because they have not been and are not permitted to dispose of any portion, or to have any concern in the disposition, of the said pay.—(See certificate No. 3.)

That insults, gross, personal, corporeal, and degrading, have been offered to cadets as individuals, and to the corps as a body, with impunity; the officer offering such insults being abetted by his superior, the Superintendent, and permitted to join his regiment without a public punishment.—(See pamphlet attached to this petition, marked A.)

That charges against the said officer were preferred by an individual who had received a corporeal insult, and were not attended to by the superintendent; that charges were preferred by the undersigned petitioners against the said officer, (see A,) and were not attended to, but, as if to punish the humility that would beg when goaded past endurance, they were punished for thus complaining, by an unheard of arrest and persecution for nearly twelve months.—(See pamphlet A.)

That the present state of the academy is the same as at the time when the aforesaid injuries took place, and that those injuries might now be repeated with impunity.

That there is now in force an illegal order, whereby cadets are forbid to address the Department of War or Engineers on any occasion or emergency; this order being contrary to the genius of our laws, and in direct violation of the rules and articles of war.—(See certificate No. 4, Art. War 34.)

That cadets have been forced to resign by a public order, under pretence that they were not proficient in their studies, when it was known that the said cadets were prevented from making a proper progress in their studies by disadvantages resulting from the organization of the institution.—(See certificate No. 5.)

That cadets have been forced, *in effect*, to give evidence against themselves before a court of inquiry, which they did not request, by a high-handed violation of common law.—(See certificate No. 6.)

That, as an instance of the system of partiality and tyranny which exists at the academy, the superintendent has taken from the weekly class reports the names of those cadets who were reported as the most meritorious by the professors, and substituted the names of other cadets in their stead, for whom he had a private partiality.—(See certificate No. 7.)

That the present superintendent of the academy has been guilty of a gross dereliction from truth, in misrepresenting to the War Department the characters of four of the undersigned petitioners, terming them old offenders, and charging them with being the ringleaders of mutiny, the seducers of their fellow-cadets from duty, and the cause of those disturbances which are said to have occurred on the assumption of the superintendency by Captain Alden Partridge, in 1817.—(See pamphlet A, papers R and T.)

That, although the superintendent, the Secretary of War, and President, have declared that cadets are subject to military law, yet a report from the superintendent, received by the War Department, and approved by the Secretary and President, contained a counter assertion; that they were subject to the penalties of martial law, but denying "that they have rights as a corps of the army."

That the cadets are now forbidden to sign any paper without permission from the superintendent, under the vain idea that their spirits will thus become broken, and that all their sensibility will be stifled or destroyed.—(See pamphlet A.)

That it will be perceived by the honorable Congress, from the foregoing statement, that a system has been and is now in operation to suppress an honorable and virtuous pride among those who are to be reared for the calling of arms; that the most undue and illegal means are taken to cut off, from the Congress, the Executive, and the sovereign people, all knowledge on the state of an institution which exists in the bosom of the republic, tending to render it a very viper to the breast by which it is suckled; it is bound round from all complaints against the most galling tyranny, by the icy bond of official interdict, backed by the army laws; while, within, those laws are applied when it suits expediency, or perverted whenever they may afford protection to the oppressed.

That it has been attempted to place the cadets in the state of those miserable soldiers, who, before their eyes, at that very academy, have received between one and two hundred lashes at a time, on the bare back, without even the form of a trial, and in defiance of the American law, which preserves sacred, both to soldier and citizen, that great feature of liberty, a trial by jury.

That the undersigned petitioners most humbly hope that the honorable Congress will inquire into the manifold abuses which are here complained of; they most humbly pray that an investigation may be had on this said Military Academy, which, if allowed to be governed according to the monarchical ideas of its present ruler, will, in a short time, be so advanced in depravity as to require nothing less than its utter extinction.

That the undersigned petitioners would most humbly set forth that, although this petition may appear novel and unprecedented, yet it is the only resort for the cadets of the Academy who have failed in their efforts to gain partial or substantial redress. They want, and it is humbly hoped that Congress will extend to them, the protection of the laws in a fixed and certain code for the institution.

That the undersigned petitioners would most humbly represent that, as individuals, they are disinterested in the consequences of this petition; they are now citizens; their desires of becoming soldiers of the republic have been frustrated. A court, to which was confided the sanctity of the law, has violated that sanctity in order to condemn them; they may, even now, be laboring under censure and obloquy. They merely ask, in the name of and for their constituents, that which they were appointed to obtain, a riddance from tyranny.

All which is most humbly submitted to the honorable Congress.

NATHANIEL HALL LORING,
THOMAS RAGLAND,
C. R. VINING,
CHARLES RUTLEDGE HOLMES,
WILSON M. C. FAIRFAX.

WEST POINT, NEW YORK, *December* 20, 1819.

No. 1.

WEST POINT, NEW YORK, *December* 20, 1819.

Courts of inquiry were frequently ordered for the trial of cadets, without their requesting them, during the year 1818. Many cadets who were tried by those courts, were so tried contrary to their wish. The undersigned was, in that year, the post adjutant at West Point, and by order of the superintendent, Major Thayer, often issued orders for such trials. Some of the cadets who were tried were dismissed, some suspended and their pay stopped, and others were reprimanded.

THOMAS RAGLAND.

No. 2.

Amount of deductions from the pay of cadets for injuries done to class books, arms, &c. for the years 1818, '19.

For 1818.		
January,	$25 25	
March,	54 62	
April,	84 12	
May and June,	186 16	
June, in addition,	31 19	
July and August,	9 98	
October,	30 77	
November and December,	6 25	
		$428 34
For 1819.		
January and February,	$16 61	
March and April,	133 75	
May and June,	53 87½	
March and April,	57 00	
May and June,	574 63½	
July and August,	198 25	
		1,034 12
		$1,462 46

DECEMBER 19, 1819.

The above statement of deductions, as far as it goes, is accurately copied from accounts in the office of the Pay and Quartermasters' Departments; but it is probable that there are other items which would increase the sum, but these could not be examined. The charges for injuries to arms, &c. are trifling in comparison with those for class books.

WILSON M. C. FAIRFAX,
THOMAS RAGLAND,
N. H. LORING.

No. 3.

WEST POINT, *December* 20, 1819.

We certify that, from continual orders, and the constant practice of the post, we have been always obliged to sign the pay-rolls in token of receipt of pay, which we have never received, and which has been disposed of, without consulting us on the object or mode of appropriation, whenever our expenditures exceeded our pay; excepting, only, the allowance of five dollars, when our debts were within certain limits.

G. G. W. BUTLER,
A. P. DONELSON,
WILSON M. C. FAIRFAX, (*late cadet.*)

No. 4.

WEST POINT, *December* 20, 1819.

We certify that an order now exists in full force prohibiting any communication from a cadet to the War Department or Engineer's Office, except through the superintendent of the academy, and therefore subject to be stopped by him.

WILSON M. C. FAIRFAX, (*late cadet.*)
G. G. M. BUTLER,
A. P. DONELSON.

No. 5.

DECEMBER 20, 1819.

I certify, on honor, that some of those cadets who were forced to resign by an order issued by Major Thayer, under the pretence that they had not made sufficient progress in their studies, had had but very little opportunity of good instruction; for the section to which they belonged, for a considerable time, was attended to by a higher class, each member in this class instructing in turn; and there were no less than twelve or fifteen of such instructors to this section.

W. S. MAITLAND, *Cadet.*

No. 6.

DECEMBER 20, 1819.

We certify, on our honor, that a court of inquiry was convened at this post, by command of the superintendent, Major S. Thayer, to discover the individuals who flogged a teamster. It was not convened at the request of those implicated. Cadets Turnbull, Whetcroft, Van Wyck, Vanderburgh, and Karrick, all concerned conjointly, were brought before this court, and ordered to give evidence, each one of the other four, but not to speak of himself, unless voluntarily. They were all found guilty. Mr. Van Wyck was dismissed; the others suspended.

N. H. LORING,
THOMAS RAGLAND.

No. 7.

WEST POINT, *December* 20, 1819.

I certify that my number in the weekly class report has been changed by the superintendent of the academy, whereby my rank in my class, as given by my professor, has been lowered arbitrarily and unjustly.

DAVID MONIAC.

A.

AN EXPOSE OF FACTS CONCERNING RECENT TRANSACTIONS RELATING TO THE CORPS OF CADETS OF UNITED STATES' MILITARY ACADEMY, AT WEST POINT, NEW YORK.

PRELIMINARY OBSERVATIONS.

In November, 1818, Thomas Ragland, of Virginia, Charles R. Holmes, of South Carolina, Charles R. Vining, of Delaware, Wilson M. C. Fairfax, of Virginia, and Nathaniel Hall Loring, of Massachusetts, were elected by the cadets of the United States' Military Academy a committee to represent to the superintendent of the academy the treatment which they (the cadets) had received from Captain Bliss, an officer of the United States' infantry, then in command of the corps; and likewise to endeavor to prevent, by lawful measures, the repetition of those indignities which formed the subject of their complaint.

The manner of their election was as follows: Paper A was given from room to room, and was signed by those who thought it correct, without any advice, and from the free impulse of their feelings and judgment. In reality, there was but little wavering. Men of honor could not have been otherwise than indignant at such insults as had been offered them, and but few could or did differ in their ideas of the proper means for terminating them. No advice was pretended to be given to any one; men of honor do not receive advice on such occasions. There were no deliberative "assemblies," no "organized combinations." This will appear from the evidence adduced on the trial of Mr. Ragland. One hundred and eighty gentlemen can be called on to prove these assertions, by oath or otherwise. It is, therefore, not to be doubted.

The papers which are now printed complete all the correspondence prior and subsequent to the arrest of the committee. None are withheld. If facts are against them, they will submit without a murmur. But can it really

be believed that, when a soldier engages in the service of his country, he forfeits his right of remonstrating against tyrannical oppression and personal abuse! If such a sentiment should be upheld and persisted in, how forbidding a prospect would the profession of arms exhibit? What security would any officer have against the foulest indignities? The act forbidding *any* man, or *body* of men, to remonstrate against individual or collective injuries, must appear to the reflecting man in the highest degree perversive of those general principles of justice which are peculiar to no clime, but are rather among the first acquisitions of childhood.

These papers are not printed to produce public animadversion. They are intended for the friends of the accused. It were to be wished that the friends of *every* man accused of a crime should hear his statement as well as that of his accuser. In that case, it might be found that *the persecuted and despised sometimes, like the toad, carry a jewel of honor beneath their outward deformity.*

The letter of Mr. Ragland, marked T, is particularly referred to as a comment on the report of Major Thayer, marked R. Misstatements should always be corrected; and as Mr. Ragland's letter can be corroborated by a reference to the official documents of the academy, and by gentlemen of integrity, perhaps he may be believed, although laboring, with his friends, under the obloquy of official censure.

The committee, it will be perceived, were arrested, and continued in arrest nearly *twelve months.* During that period, a court of inquiry and a court martial were convened for their trial. The court of inquiry should be remembered. Its proceedings evince *a remarkable adherence to law and right reason.* The committee were tried when at their homes by this court. *They were not allowed the right of defence—the grand and universal right maintained in Europe, America, and almost the whole globe.*

A general court martial convened in May, 1819, and, after examining the case of Mr. Ragland, decided that they, according to their construction of the rules and articles of war, had no authority to try cadets. The Attorney General of the United States gave his opinion in September. The court then convened again, and confirmed the opinion they had before expressed. In October the court was dissolved. The committee were ordered to return to duty. This was after their class had been commissioned. They have since offered their resignations as cadets.

It may be additionally observed that the committee were charged by Major Thayer with disobedience of orders; the major specifying that they did not comply with an order coming, in fact, through an unofficial and illegal medium. The case stands thus: Major Thayer alleges that he gave cadet Ragland an order for Messrs. Loring, Fairfax, Holmes, and Vining, directing them not to hand him (Major T.) "*a second communication*," a "*second time.*" Here is an *error*, both *in the charge* and in *the application of the supposed order.* Mr. Ragland, according to military usage and law, could not communicate an order; and should he have transmitted one to Messrs. Loring, &c., *they were not bound to obey*, because Mr. Ragland had not any command, direct or implied, over them. If Mr. Ragland, therefore, had given the order, Messrs. Loring, &c. could not have been punished for its disobedience. But Mr. Ragland *most solemnly declares that he never received nor communicated such an order.* Major Thayer, the only witness on this charge, and, combining in himself the qualities of *witness* and *prosecutor*, merely swears, that he gave the order, either direct or implied, to Mr. Ragland, but knows nothing of its being received by Messrs. Loring, Holmes, Fairfax, and Vining.

But, for the sake of argument, suppose the order to have been given to Mr. Ragland; suppose him a proper channel for its transmission; suppose it to have been delivered to Messrs. Loring, &c.; wherein has it been disobeyed? There was handed to Major Thayer, in a private way, a paper, intended by the committee, if circumstances permitted, as a communication to him. This was a paper including two others, (F and G;) and it was, indeed, the second paper prepared for the purpose of being presented to him; yet it was only handed in by individuals, in the manner stated, and so handed only once. Therefore, Messrs. Loring, &c. have disobeyed no orders, even by the most forced and illiberal construction of their conduct. The Executive, however, in the general order of the 10th of November, 1819, censures Messrs. Loring, Ragland, Vining, Fairfax, and Holmes, for disobedience of orders, although Major Thayer was the only *witness* on the charge, and he proved nothing. May not Messrs. Ragland and Fairfax be deemed "*deliberate liars*," by the same mode of implication? May not the fairest character be stigmatized for rape, murder, or robbery, by the same manner of construction? Is the assertion of *one interested* man better than the solemn asseveration of *five* persons not more interested? If such proof can be adduced in one case as an evidence of the validity of crime, it may, with equal propriety, have weight in any other case, however destructive of character or reputation.

To detest virtue may be deemed a crime against morality; and to abhor vice is our bounden duty in every stage of existence. He who permits local prejudice to warp his estimation of virtue is wanting in a social duty. He who would not detest crime, even though it should appear robed in the dazzling habiliments of rank, surrenders the independence which alone can render him estimable, and stops the pulse of honor which nature has commanded to palpitate.

The committee have suffered for being properly proud of the ennobling title of Americans. They felt that, by a complacent endurance of gross personal insults, they would compromit that title; and they were unwilling to do so.

The committee have been and are patient. If their characters have been traduced, they answer by *facts.* If their proceedings have been misrepresented by the interested or ignorant, they answer by *facts.* If they have been stigmatized as mutineers, they demand an investigation of *facts.* Their friends can read these papers, and judge. They ask no partiality, conscious of being correct both in principle and action; and assured that real honor will never be despised, they remain, in spite of every shaft of detraction, and every act of injustice, "*independent* and *erect.*"

A.

UNITED STATES' MILITARY ACADEMY,
WEST POINT, *November* 22, 1818.

We, the subscribers to this paper, do vote for the five individuals opposite to our names, as a committee in our behalf, to represent to the superintendent of the academy the treatment we have received from the officer in the immediate command of the corps; and to take such other measures as they may deem urged by our peculiar situation.

Dehart.	Fairfax, C. Vining, Ragland, N. Loring, W. Hunter.	R. A. Thruston.	Vining, Ragland, Holmes, Fairfax, Loring.	Holmes.	Ragland, Fairfax, C. Vining, N. Loring, D. Tyler.

WEST POINT, *November* 24, 1818.

With a proper respect for their superiors, and after consulting the regulating laws of the army, a large majority of the cadets of the Military Academy beg leave to lay before the Superintendent a statement of their grievances.

The Military Academy has heretofore been considered the nursery of our army, where young gentlemen of the highest prospects in life should be proud and emulous to enrol themselves; in which the sentiments of honor should be cherished; so that its students might revolt equally at personal ignominy and national degradation. It is to this seminary that the American people have been taught to look for their protectors; protectors who should be too proud to be treacherous, and too noble to be cowards. And it has, with propriety, been believed, by the intelligent statesmen of our republic, that the field of warfare is the proper theatre of genius; that the profession of arms is that in which the highest qualities of the mind are exerted; where virtue flourishes best; and where the noble soul, jealous of its rights, preserves its purity separate from the sordidness of life. When the present cadets received their official passports to its duties, their parents permitted them to accept, under the impression that they were to be here nurtured in the rudiments of honor, and instructed in an abhorrence of disgrace: they thought their feelings were not to be trampled upon; and with confidence sent their children to an institution where an honest pride would be implanted in them, and where their spirits would not cower under injuries, to become the soldier of their country.

Under the influence of these ideas we embraced, with pride and alacrity, the military life; we came here, we formed friendships, we performed our duties, submitted cheerfully to necessary hardships, and were happy whilst we continued uninjured. But these flattering prospects, which gave a zest to our pleasures, have been in a measure clouded by the undeserved and unauthorized treatment which we have received from the commandant of the corps of cadets. The act of violently pushing from the railings of the barracks a cadet, and the subsequent forcible expulsion from his quarters of a young man of the first respectability and honor, may perhaps be deemed sufficient indications of the course which he intends pursuing. Such treatment is not authorized from an officer to a soldier in the ranks; and, with due respect, we consider ourselves as gentlemen cadets, and as members of families wronged and abused. On Sunday the 22d instant, on the forenoon drill, the commandant violently seized by the collar, shook, jerked, and publicly damned, one of our number. The conduct of this cadet was, to the conviction of those near, by no means disorderly, and hardly deserving the slightest reprimand; but we do conceive, that no possible conduct, other than mutiny, could afford the slightest pretence for the measures pursued by the commandant. On retiring to his quarters, the cadet was imprisoned in a dark room, and denied a light or books, until further orders, and, as we hear, under a charge of mutinous conduct.

That his conduct on drill was as we have stated; that he was, to all appearance, perfectly unconscious of having committed an offence; that he was entirely free from any mutinous conduct, will be testified by many whose veracity cannot be doubted. When the mind tamely acquiesces in personal indignities, it becomes weakened; the energies commence their decline, the virtues are enfeebled, and officers who are governed by blows must be destitute of all that should characterize a soldier or a man of honor. From these considerations, and from what we conceive to be the contract between the Government and ourselves, as its servants; from the principles of pride and

honor, which were inculcated by our parents, and in which we have been educated, we remonstrate, and ask redress of the only one, from whom we can confidently hope to obtain it, the superintendent of the Military Academy.

We are with respect,

WILSON M. C. FAIRFAX,
CHARLES R. VINING,
THOMAS RAGLAND,
CHARLES R. HOLMES,
NATHANIEL H. LORING,
Committee of Cadets.

D.

WEST POINT, *November* 24, 1818.

We do hereby certify, on honor, that, on or about the 26th of October, 1818, Captain John Bliss, without the least possible provocation, did throw stones at us, and at several other cadets of the Military Academy.

P. McCORMICK,
D. MONIAC.

WEST POINT, *November* 24, 1818.

I do certify, on honor, that Captain Bliss did, on Sunday the 22d of November, 1818, whilst on battalion drill, seize me by the collar, jerk me violently out of the ranks, and shake me for some time. When I asked him if this was the manner in which I should be used? he said "Yes, God damn you."

E. L. NICHOLSON.

WEST POINT, *November* 24, 1818.

I, Westwood Lacey, a cadet of the United States' Military Academy, do hereby certify, on honor, that, on or about the 15th day of October, 1818, I was sitting on the railing of the south barracks, at which time Captain John Bliss, of the 6th regiment of the United States' infantry, commandant of the corps of cadets, passed me, and on getting behind me, violently pushed me off. I had not saluted him; but I had barely sufficient time to do so: and that in any other manner than this I had not given him the slightest provocation.

W. A. LACEY.

WEST POINT, *November* 24, 1818.

I do certify, on honor, that the above statement is correct, and that Captain Bliss pushed cadet Lacey off the railing, without the appearance of passion much excited.

EDWARD C. ROSS, *Cadet.*

WEST POINT, *November* 24, 1818.

I certify, on honor, that Captain John Bliss did, on the morning of the 14th of November, order me from his quarters in an insulting manner, and with menacing gestures, and, without having given me time to obey his orders, he violently seized and thrust me out of his room.

JAMES T. WORTHINGTON, *Cadet.*

WEST POINT, *November* 24, 1818.

I do certify, on honor, that the above statement is correct.

MUSCO G. TALIAFERRO.

[Here should be entered copies of several certificates handed to the committee, which are mislaid; one from Mr. Cruger, in support of 1st specification of the charge against Captain John Bliss, and two others, from Messrs. Worthington and Nicholson, which are subsequently referred to.]

F.

SIR: MILITARY ACADEMY, WEST POINT, *November* 26, 1818.

One hundred and eighty cadets, through their committee, present the enclosed charge against Captain John Bliss, of the sixth regiment United States' infantry; and they confidently hope the superintendent of the academy will sufficiently notice the injuries they have received to do them justice.

They believe the rank of persons presenting charges not material; that it is only necessary to show the facts of import worthy the cognizance of a military court, and that those facts are supported by indisputable evidence.

Should the officer, to whom they have appealed, refuse them attention, they owe him the candor to say, that, although in *his* opinion it may be an adherence to military propriety, yet the impending degradation arising out of the impunity with which the officer complained of would insult and oppress them, must be avoided.

If we remain in our country's service, let the military law protect us; and if it be inexpedient that it should so, we would enjoy the rights of private citizens.

Our measures are not dictated by the effervescence of passion; they proceed from a determination founded on principle. We will proceed on that principle to the verge of right; supporting our views with all the influence attainable; and, if necessary, sacrifice our individual interest in the cause we have undertaken.

We are, with the highest consideration, your very humble and obedient servants,

CHARLES R. HOLMES,
NATHANIEL HALL LORING,
THOMAS RAGLAND,
CHARLES R. VINING,
WILSON M. C. FAIRFAX,
Committee of Cadets.

G.

WEST POINT, *November* 26, 1818.

A charge preferred against Captain John Bliss, of the sixth regiment of the United States' infantry.

CHARGE.—*Unofficerlike and ungentlemanlike conduct.*

Specification 1st.—In this, that he, the said Captain John Bliss, of the sixth regiment United States' infantry, did, on or about the 26th of October, 1818, without the least possible provocation, throw stones at several of the cadets of the Military Academy; which conduct produced the effect of rendering him less respectable as a commanding officer, and wounded deeply the feelings of those under his command.

Specification 2d.—In this, that he, the said Captain John Bliss, of the sixth regiment United States' infantry, did, on or about the 15th day of October, 1818, maltreat cadet Westwood Lacey, of his command, by violently throwing him off the railings of the south barracks of the cadets.

Specification 3d.—In this, that he, the said Captain John Bliss, of the sixth regiment United States' infantry, did, on or about the 14th day of October, 1818, order from his quarters, in an insulting tone and menacing manner, and, without allowing time for the obedience of this order, seize and thrust out of his room cadet James T. Worthington, of his command.

Specification 4th.—In this, that he, the said Captain John Bliss, of the sixth regiment United States' infantry, did, on or about the 22d day of November, 1818, whilst on battalion drill, in the presence of the corps of cadets, seize by the collar, jerk out of the ranks, and publicly damn, cadet Edward L. Nicholson, of his command.

THOMAS RAGLAND,
WILSON M. C. FAIRFAX,
NATHANIEL H. LORING,
C. R. VINING,
C. R. HOLMES,
Cadets, and Members of the Committee in behalf of the corps of cadets.

H.

MILITARY ACADEMY, WEST POINT, *November* 27, 1818.

ORDERS:

The major commanding feels himself called upon to notice the extraordinary proceedings which have taken place at this institution within a few days past, with a degree of astonishment which all men, not to say those of the military profession, must participate. He has witnessed the combination of a considerable number of the young men, forming themselves, as it were, into a deliberative assembly; corresponding with him through the medium of an organized committee, and even dictating to him the measures which they consider proper for him to pursue. It can scarcely be necessary for him to state that, proceedings of this kind are in direct violation of all military principles; and yet he would willingly indulge the belief, that a great portion of those who have given them their countenance and support, are not entirely aware of the danger to which they expose themselves by so doing. To promote, or even to join in any combination or system of measures, having in view the slightest opposition to the constituted authorities, is, not only in a military, but in a civil point of view, a crime of the first order; and it ought to be recollected, by every one here present, that the same code of laws which prescribes our individual rights, denounces death upon those who offend in this particular.

If the young men, who are said to have entered into the present combination, suppose that they have not offended in this particular, they have either misapprehended the instructions given to their committee, or that committee have exceeded those instructions; one or the other of these conclusions the major commanding is inclined to admit; for he cannot believe that they have intentionally adopted a step ruinous as this would be in its consequences to themselves. With respect to the committee, however, the same excuse cannot be pleaded. They appear to have erred knowingly and intentionally; and there is even reason to believe that their influence has been employed in seducing others from the path of duty.

What steps may be taken with respect to a dereliction so gross, remains to be determined hereafter; and, in the mean time, the persons here referred to, viz: cadets Holmes, Loring, Ragland, Vining, and Fairfax, will consider themselves in arrest, and will absent themselves from this post within six hours from this time, and proceed directly, without delay, to the places of residence of their respective guardians, where they will remain until further orders.

The major commanding cannot close this order, without cautioning the cadets against the repetition of the conduct, which, in a second instance, must draw down upon them the severe infliction of military law.

He enjoins it upon them to give a jealous and faithful attendance upon their academical and military duties; to abstain from all meetings and assemblies of cadets, for purposes of joint deliberation; to withhold their names from papers, and representations of any kind, and he forbids each and all of them, drawing up, or circulating such papers, or acting, on any occasion, as the committee of the cadets, without special permission so to do. The violation of these rules, although in a single instance it may be looked upon as the mere ebullitions of ardent and youthful feeling, will become criminal in the repetition; and the major commanding sincerely hopes that he may not hereafter be called upon to view it in this light. At the same time, should this be found necessary, and with the view of correcting any erroneous impressions on this subject, he hereby declares that any deviation from their true spirit and meaning, shall in every instance be dealt with according to the strictness of law martial.

By order, JAMES D. GRAHAM, *Lt. & Post Adj't.*

I.

Substance of an order.

NOVEMBER 28, 1818.

The residence of cadets Fairfax, Loring, Ragland, Holmes, and Vining, at Mr. North's, or in the vicinity of this post, is forbidden.

They will leave their present residence in one hour.

S. THAYER.

The committee were only waiting the arrival of the steamboat in the evening; and in the morning on which the order was issued it was raining very fast. The committee were refused a copy of the above order.

E.

WEST POINT, *November* 27, 1818.

It has been asserted in the orders read this day before the battalion, that the members of the committee appointed by us, had probably used their influence in persuading us to take the steps which we have taken. We, the undersigned, do therefore affirm, upon our word of honor, that no influence was ever employed in persuading us to take those steps, and that in so doing we did not think it was at all contrary to military discipline.

To Cadets W. M. C. FAIRFAX, C. R. VINING, THOMAS RAGLAND, NATHANIEL H. LORING, and C. R. HOLMES.

GENTLEMEN:

With feelings of the deepest regret we realize your departure from among us; but you go not alone: you have won our confidence and esteem, by conduct worthy of yourselves and the cause you have undertaken. In that cause you sacrifice nothing, if the wishes and exertions of fellow-students avail; we feel the same resolution which called forth that noble exertion of soul, and bade you offer your individual welfare in our behalf. Too deeply do we feel our obligation, when, with pain and mortification, we own our inability to make you that return we could wish; but we pledge our sacred word to aid you in the common cause, to withhold no exertions or sacrifice which our situation may require: we will animate each other to follow the path you have so nobly dared, for your honor's sake; and it is with grateful hearts we reflect, however debased our situation is, it is not in the power of an individual to blast *your* reputation. No! there are those who cannot be deceived, who will bear it up under the frown of the world, and with triumph proclaim it unsullied. Enjoy, then, the benefit of that firmness of soul, that rectitude of principle, with which you are so eminently endowed. We would each of us take an affectionate adieu. But we cannot suppress the hope that our separation will be as short as it is painful. We would, however, offer our sincere thanks for your steady adherence, your implicit obedience to our wishes, in every particular of your conduct as a committee, and to enjoin you to adhere to our cause, as long as consistent with that rectitude of conduct that has ever characterized you. After four years' acquaintance, to part with you would call forth tears sacred to friendship, were they not suppressed by a *noble feeling*—a resolution to sacrifice every thing but *that pride of spirit* which never can be broken by scourge—that feeling of honor which should ever distinguish the gentleman and the soldier. With this resolution, and with the firmest reliance on your exertions, we bid you adieu, with the feeling, love, respect, and esteem which we hope will ever be felt for such distinguished merit.

SIR: CITY OF NEW YORK, *November* 29, 1818.

Doubtless an official report has been made to the Department of War of the arrest, by the superintendent of the Military Academy, of the undersigned committee from the corps of cadets; and of the proceedings occasioning and attending their arrest.

Under orders to repair to our respective homes, and, consequently, obliged to separate from each other, we make use of the present opportunity, whilst still together, to present you with the following memorial and petition in behalf of the corps of cadets; trusting to the merits of a candid and plain statement of facts, which can be amply substantiated, and placing firm reliance in the justice of the Department, we pray the attention of the Secretary of War, and ask redress in their name for the wrongs which the corps has received. These injuries, arising out of the conduct of the immediate commanding officer, Captain Bliss, urge a relation not only of the *particular* instances of which we complain, but also of the *general* tenor of his conduct.

The conduct of Captain Bliss with respect to the corps under his command has been highly unofficerlike, and materially detrimental to the best interests of the academy. His opinions on the constitution of government necessary to the support of military order and discipline, (from which opinions have originated the measures pursued by him,) are in direct opposition to those views with which they should harmonize. An officer who maintains that the same means of coercion should obtain among the students of the academy as in the ranks of the army, that the ball and chain should be introduced as a punishment, is unacquainted with the nice feelings of honor which should rule in the breasts of those who are intended to direct the armies of our republic. Although it may seem somewhat irrelevant to the subject, yet, as an exemplification of the contracted ideas of this officer, we deem it proper to state that he has objected to the institution and existence of *literary societies* among us, inasmuch as they unite us *too strongly* in friendship and affection.

For an account of the particulars of his conduct we beg leave to refer you to the charge (G) and certificates (D) which show acts of violence, personal, gross, and degrading to the gentlemen of the academy, who are so unfortunate as to be under his command.

This treatment having remained unnoticed by the superintendent, although complaints have been made by the particular individuals injured, and having become so flagrant and outrageous as no longer to be supportable, the cadets appointed a committee to pray redress from the superintendent, of injuries which they could now but look upon as sustained equally by the whole corps.

This committee nominated in an open, orderly manner, and in a way incapable of being construed to violate any rule of military subordination, and which interfered not with any academical duties, after having consulted the rules and articles of war, and examined the provisions therein made for the redress of grievances, drew up the enclosed petition (C) as a general outline, with the intention to state particulars when they should be admitted to an interview with the superintendent. This interview, solicited on the part of the committee by a note, the major commanding declined, unless he should be previously made acquainted with the business they intended presenting for his consideration.

Being made acquainted, therefore, with our objects, and after reading the petition aforementioned, in a *private* and *individual* capacity, he returned answer, as superintendent, that he would neither receive us nor our communications.

Thus unexpectedly refused, where we confidently relied on redress, our appeal should have been made to you, sir, had not the standing orders of the post at West Point interdicted all immediate communication with your Department; thus rendering it impossible for us, consistent with our duty, to make known our ignominious situation to you, except through the superintendent of the academy; and it was not to be supposed that the officer, who himself refused to listen to our complaints, would forward them for consideration to higher authority.

Thus bereft of the most distant prospect of relief, from the odious and degraded situation in which we found ourselves, we were prompted to retire, however unwillingly in any other situation, from that profession on which

we had rested our hopes, in preference to doing violence to the sentiment which gives it all its glory, and which first induced us to enter the service of our country. The resignation of our warrants was accordingly written; not, however, under the influence of any determination entered into, as *members* of a *committee*, but as individuals of a corps, whose honor we conceived to be tarnished. The superintendent refused their transmission to the War Department, returned them unopened, and desired us to leave his presence.

On a perusal of McComb on Martial Law, we determined to present our complaint in the more powerful and pressing form of charges; as we knew it immaterial by what rank charges were preferred, provided they were predicated on sufficient evidence, and embraced complaints worthy the cognizance of a military tribunal. The charge (G) of unofficerlike and ungentlemanlike conduct, consisting of four specifications, to each of which certificates on honor (D) were obtained from respectable gentlemen of the academy, was made out. This charge, and its specifications, (which we consider as fully substantiated,) was enclosed in an envelope, (F,) setting forth its necessity, repeating our desire that they should be acted upon by himself, (the superintendent,) and candidly stating our determination to make application, through the medium of friends, to the Executive, if we should again be refused. They were presented in the same manner, as was our first communication, to know if the superintendent would receive them, as coming from the committee, in their capacity as such. We were informed that he *would not;* and he remarked to the individuals who presented them for the committee, that he had never refused hearing the complaints of *individuals* on their own particular grievances; but as a *committee from the corps in general* we had no right to call our commanding officer to account for injuries to particular individuals of his command; that the conduct of the committee, in thus pushing the affair, was *ill-timed* and *indelicate*, as well as highly reprehensible in a *military point of view;* that it was calculated materially to injure the interest of the academy, and that it was also likely to be attended with consequences to ourselves, as individuals of the committee, of which we had no idea, but which we should probably be made acquainted with. He concluded with saying that he would look at the papers last presented, and if they contained any information new to him, it was reasonable to suppose he would act upon them.

We submit to your determination, whether our conduct has been *ill-timed*, *indelicate*, or *unmilitary*. The enclosed (H) discovers the sentiments of the superintendent; and with the following one (I) contains something particularly relative to the undersigned, as individuals; but this being a matter of secondary importance we are willing to leave it to the ulterior consideration of the Department.

We are, sir, with the highest respect, your very humble servants,

CHARLES R. VINING,
NATHANIEL H. LORING,
CHARLES R. HOLMES,
THOMAS RAGLAND,
WILSON M. C. FAIRFAX,
Committee in behalf of the corps of Cadets.

To J. C. Calhoun, *Secretary of War.*

M.

Adjutant and Inspector General's Office, *December* 9, 1818.

GENERAL ORDERS.

A court of inquiry, to consist of Major C. Gratiot, of the engineers, president, and Captain J. Babcock, of the engineers, and Lieutenant Horace Webster, of the third infantry, members, will convene at West Point, on the 21st day of this month, to inquire into the late transactions and disorders at the Military Academy, which caused the order of the 27th November last, which will be laid before the court.

The court will examine such evidence as may be offered, and call for whatever information it shall deem important to a right understanding of the whole subject.

The president will direct one of the members to act as recorder, and the court will transmit to the War Department the evidence it may collect, with its opinion on the several points, as soon as practicable.

By order. D. PARKER, *Adjutant and Inspector General.*

N.

The case of the Cadets of the United States' Military Academy.

The ebullitions of the youthful mind may often wanton into error, and warmth of feelings, in seeking redress of wrongs, originate measures which may give occasion for censure: yet age should be cautious not to judge harshly of the actions of youth. They are not always the effect of the whim or the caprice of ill-directed or unstable opinion; nor the crude notions of warped or misled imagination. Judgment is sometimes the influencing power, and their deeds may emanate from mature reflection. If, when right, they are to sustain insult or injury, and are to be considered as wrong without an examination to determine, merely from the idea of their imbecility, and consequent liability to error, this is a criterion calculated to suppress the finest feelings of the heart, to cower the lofty spirit, and to dissipate the generous enthusiasm of aspiring minds.

Those, particularly, who are to be of the military profession, should be taught to shrink from even the semblance of degradation: for the passive submission of the soul to insult disqualifies the most efficient in science for the military life. Hence, we should look to the Military Academy to see there inculcated, cherished, and enforced, this essential requisite of the officer, by the strongest precepts and most strict example. But it is there that we discover young gentlemen of merit grossly and personally misused by their superiors. It is there that exists an organized system of violation; not only of the rules of common civility, but of the laws of our country; where expediency, to effect particular and private views, seems to sanction every procedure; and where it is deemed "a crime of the first magnitude" to complain.

It is proper that outrages of this nature should be exposed; that aberrations from rectitude of this order should be corrected; and, therefore, the necessity of the following statement of facts:

The Military Academy, established under an act of Congress in 1802, and augmented under the subsequent act of 1812, should, according to these acts, be under the control of the chief, and officered from the corps of engineers. This special provision was doubtless with a view to have it conducted by select officers of a regular military education; in order to insure the proper instruction, and afford the brightest examples of military worth to the students; that the unripened mind might unfold, by the light of science, with liberality of sentiment, and delicacy of laudable pride. Officers from the corps of engineers, educated at this seminary, have a recollection of the feelings of cadets, and know who they are; such only are the persons suited to instruct and govern them.

The present polity of the institution is, however, inconsistent with these views; officers from every arm of the service have there command; and several of these officers are without the slightest pretension to a regular military education. A large majority of the students are superior to them in the acquirements of literature, as well as in the particular branches taught at the academy. The selection of those officers were, and their continuance is, according to the will of the superintendent; a brevet major, on whose smile rests their prosperity, and at whose mandate law is contravened. By section 4th of the law of 1812, in relation to this institution, the officers of the academy are to determine on the merits of its graduates, and to designate the corps in which they should be appointed. The framers of that section could not have anticipated that this decision would be made by *such persons* as are above mentioned; and, indeed, there is no provision made for the station that several there hold, for officers of the engineer corps. The cadets are, therefore, under the command of persons of fictitious titles; some of whom, elated with the "pride and pomp" of newly acquired rank, disdain to allow the slightest appearance of social intercourse between themselves and a cadet, who is simply the gentleman, or, seemingly in their consideration, only of the grade of a *common soldier!* The consequence of which is a grievance of this nature: cadets have been ordered to leave a dinner table at West Point on the appearance of an officer of the institution to take his seat at the same.

Another prominent fact is the institution of courts of inquiry, to investigate the conduct of cadets, contrary to the 92d article of war, in which they are forbidden, unless ordered by the President of the United States, or demanded by the person charged with a military offence, "as they may be perverted to dishonorable purposes, and may be considered as engines of destruction to military merit in the hands of weak and envious commandants." Before these courts cadets have been *coerced* to give evidence on oath by the threat of *dismissal* if they refused; and induced, by a like threat, to inform against themselves in contradiction of every rule of law, civil or military, either in this, (See 5th art. amend. con. U. S.) or any other Christian country, except the law of the inquisition—the only parallel in existence. On the reports of those illegal tribunals cadets have been reprimanded, suspended, and dismissed.

The tyranny of the system is further exemplified, in the compulsion of many cadets to resign, by the threat of immediate dismissal in the event of their refusal to do so; and in the *discharge* of Cadet Symington for such refusal. These resignations were *forced under the pretext that those cadets had not made sufficient progress in their studies.* Cadet Pinckney, of this number, who had passed the examination with credit to himself, was, from the casual omission of an acting assistant professor to place him on the examination rolls, forced to resign; when it was notorious at the institution that he had passed, agreeably to the declaration of the academic staff, immediately after the examination. The Secretary of War restored this young gentleman to the academy on the representation, by his friends, of his particular case. Thus, according to the arbitrary will of an individual, of no higher grade than a captain of the army, many young gentleman of worth were, in the eye of the world, disgraced, without the shadow of cause, excepting it might be the desire of imposing on those who were allowed to remain at the seminary the consideration of his authority. This assumption of power was known to the Executive, and met with their disapprobation, but not their correction. It could not be that favor compromised error! No, it was only that some view of policy which, to those who suffered, at least, appeared strange and mistaken, forbade their correction; as if there could be any foundation of authority so well bottomed and so stable as on the idea of justice, correctly and strongly impressed on all concerned.

Another grievance is the exhorbitant charge for the injury of class books to those who receive them for the purpose of study; and the appropriation of the fines thus collected to purposes not sanctioned by any known or legal authority; in this manner imposing and collecting taxes in support of unauthorized expenditures.

The interdiction, by an order of the superintendent, of all communication from the cadets with the War Office, on any occasion whatever, contrary to the true spirit and intent of the 34th article of war, (wherein is provided for the redress of grievances, to those who have been refused it by their immediate commanding officer,) is in harmony with the existing government at West Point; isolating those there from the benefit of our established laws, it places them under complete military despotism; and the exercise of this despotism is shown by a reference to the recent refusal to hear the complaint of an individual who had been seriously aggrieved by a personal outrage; and the omission to act on another individual's complaints that he did receive, (see certificates of Cadets Nicholson and Worthington, in the memorial to the Secretary of War, which can be supported by abundant other testimony,) in violation of the 35th article of war.

After so long, and so patient an enduring of this system of oppression, which, far from being relaxed, had proceeded gradually, but rapidly, from infringement of abstract right, to a violation of personal security; it was that refusal and omission which prompted the cadets to the measure they adopted of appointing a committee to state their grievances at large, and, in the most orderly manner, to seek redress. This committee proceeded with guarded circumspection; sought, at every step, to be corrected, if in an error as to their mode; and expressed to the superintendent much anxiety to be instructed in the proper course of prosecuting their business, by communing with him in a private and individual capacity, and by showing him their papers unofficially in order to ascertain what ought to be their public steps, and whether or not they would be likely to meet his approbation. And on discovering that he disapproved of their papers they were withheld, nor were they ultimately offered to him in his public character.

It may here be remarked, that, if he considered the mode of acting by committee disorderly, this was the proper time so to declare; as, by his simple order, even verbally given, the committee would have been dissolved; but he suffered them to proceed to that point which, according to his order of the 27th of November, was considered so censurable, when he might come down upon them, with the thunder of martial law, in a sudden arrest, and order to retire to their respective homes, without paying that decent attention to their personal convenience which a removal so unexpected required. (See his order of the 28th November.)

Wherefore the conclusion is unavoidable that, if there really existed, in his opinion, even the slightest appearance of mutiny in the corps, he neglected his duty in not suppressing it in embryo.

The superintendent manifests a willingness to make, against the corps, the charge of a mutinous disposition, which is calculated to imbue, with the deepest stain, the soldier's reputation; this being the second instance in which he has exhibited it, much to the detriment of the institution. The credit due, however, to such a charge from him, will best appear by a recurrence to the proceedings of a court of inquiry held at West Point, to examine into certain alleged disorders at the academy; and composed of some of the most eminent officers of the army.

In the order of the 27th of November, above mentioned, the proceedings of the corps were denounced as flagrant violations of military order; they (the cadets) were imperiously forbidden to take any measures, or to sign any paper, in relation to their committee, or otherwise; and the superintendent refused to allow the latter a copy of the order relating to them, contrary to military usage; which, with his other acts, was calculated to impress on all persons unacquainted with existing facts (as are the people of the United States generally) an idea that it was for infamous conduct that they were arrested. It is understood the court of inquiry, lately held at West Point, adopting the same

idea, (probably founded on the oath which the superintendent was there allowed to take against them, whilst the members of the committee were not allowed to be present or to adduce testimony in their favor,) have reported the conduct of the committee of cadets to be "highly reprehensible, and bordering on mutiny." Had the members of that committee, according to the ninety-first article of war, been allowed to adduce testimony, to exhibit their conduct to the court in its proper light; had they been even brought before it, and suffered to raise the veil of mysterious and ominous secrecy which has covered all the proceedings relating to themselves, so contrary to the spirit of all our happy institutions, they would have shown that their appointment was essentially calculated to preserve order at the academy; that their best exertions were given to prevent the slightest infringement on the regulations at the post, although they might be deemed illegal; and that they actually suppressed a disposition and determination in several persons to violate the severe and unprecedented restrictions of the 27th of November. They could have adduced the most respectable precedents for such committees, particularly in the case of the officers of Washington's army, who appointed a committee to state their grievances to Congress; and so far from being discouraged therein by the commander-in-chief, that he even afforded them facilities for the purpose; in the more recent case in the late army, of the remonstrance from the officers of the twelfth regiment against the promotion of Colonel Coles; in the case of the late memorial from officers in the Mediterranean service, touching the personal outrage offered Captain Heath by Commodore Perry, which is an instance directly in point; in the usage at West Point of appointing committees, during the command of General Swift and Captain Partridge, upon numerous occasions, sanctioned by the respectful attention of those officers, and their readiness to redress the grievances complained of: all of which precedents, it was to have been hoped, would at least have served to save from censure the cadets and their committee, if not to show that in many cases the mode adopted by them is the most respectful and orderly, as well as best adapted to the purpose; and since it is not prohibited or proscribed, either by the letter or in the spirit of our military laws, it is not to be conceived why precedent should not be allowed its usual weight in this particular case, in which it may well be asked, how else could the corps act with order but by their committee, after a refusal to hear individual applications? and what case could require the promptest and most efficient means, consistent with respect, if not this one of personal outrage and violence? A soldier must bend to discipline, but a gentleman cannot endure indignities; and even the truest Christian character is not violated by manifesting a high-mindedness and tenacious attachment to that class of conventional rights that are too peculiarly personal to be relinquished without a loss of reputation, or worse, a loss of self-respect.

Among other injuries referable to the same source, namely, the abuse of power, is one which, though of little consequence compared with others aforementioned, deserves to be noted. The refusal of the major commanding to grant transportation to the arrested cadets when ordered home, when it was notorious that their slender funds would not have enabled them to comply with the order had they not been assisted by their sympathizing brother cadets; and great indeed should have been their criminality to have sanctioned the step pursued in thus ordering them away, as it must be obvious that the loss of time to those so near the completion of their studies is an injury to themselves, not to say to the country, which, from its nature, admits not of redress.

But to prevent the recurrence of such grievances, and to render the Military Academy what in its institution it was designed to be, a proper seminary for the future rulers and commanders of a free, enlightened, and polished nation, too conscious of its greatness to stoop to meanness, and too powerful to practise fraud, the want of a code of regulations, fixed and certain, has become notorious. If the cadets mistake in supposing themselves to be under the rules and articles of war, by misconstruing the ninety-sixth article, they are anxious to be informed in what character they stand, and to what laws they are subject. They dread not the penalties of the law martial if they can but enjoy its protection.

We are, sir, with the highest respect, your very humble servants,

CHARLES R. VINING,
NATHANIEL H. LORING,
CHARLES R. HOLMES,
THOMAS RAGLAND,
WILSON M. C. FAIRFAX,
Committee in behalf of the corps of Cadets.

To J. C. CALHOUN, *Secretary of War.*

O.

On the intimation of the Secretary of War, after the statement of the case of the cadets was handed to him, that a letter of acquiescence in the President's decision on the report of the court of inquiry held under the order of the 9th of December should be written by us, the following one was accordingly prepared and presented:

SIR: WASHINGTON, *January* 27, 1819.

From so much of the decision on the case whereon you lately ordered a court of inquiry at West Point as you have thought fit to make known to us, being given to understand that it is the pleasure of the President of the United States that we be recalled to the Military Academy so soon as the superintendent shall deem it expedient, and learning also that the corps of cadets are considered as having been incorrect in acting by their committee, of which we were members, we deem it proper respectfully to declare to you, sir, as head of the War Department, that, having been personally free from the injuries of which the corps has complained, nothing could have induced us to act in that capacity but a deep sense of the justice of those complaints, and a conviction that other means of redress were unavailable; that we acted deliberately, from the purest motives, and at the same time with a desire that there should not be the least violation of military order, of the propriety and necessity of which as a constant rule of action at the academy we have ever been fully impressed; and of this, sir, we think we give you a proof when we further declare, that, notwithstanding the respectable precedents which exist of similar committees, we cheerfully acquiesce in the President's condemnation of this mode of proceeding, if by that we are to understand a principle adopted by your Department applicable not only to our case, but to all similar cases in the military service.

With respect and consideration, we subscribe ourselves your very humble servants,

WILSON M. C. FAIRFAX,
THOMAS RAGLAND,
NATHANIEL H. LORING,
CHARLES R. VINING,
CHARLES R. HOLMES,
Committee in behalf of the corps of Cadets.

To J. C. CALHOUN, *Secretary of War.*

P.

The Secretary returned this letter, with a notice that he had laid it before the President, who wished the last sentence, in these words, "if by that we are to understand a principle adopted by your Department applicable not only to our case, but to all similar cases in the military service," might be struck out, and with an indirect assurance that our doing this would close the affair. It was stricken out accordingly, and the letter returned to the War Office. The letter, with its modification, was again laid before the President, who was still dissatisfied with its contents, and directed Mr. Calhoun to suggest and require a further alteration, namely, the erasure of the words "and a conviction that other means of redress were unavailable," and also the following, "notwithstanding the respectable precedents which exist of similar committees." Upon the requisition to do which the following answer was returned:

SIR: WASHINGTON CITY, *February* 1, 1819.

We have considered the further alteration suggested by you this day of our letter to your Department of the 27th of January last, and regret that we cannot adopt the same. To go further than the alteration before suggested, and agreeably to which it was handed in, would be to admit that *we only* have been wrong, as a committee, notwithstanding numerous precedents; or that the cadets, as a body, were in error, in acting in an extreme case by committee; when, at the same time, they are not allowed to consider your condemnation of this mode as a general principle, although the rules and articles of war, under which they are acknowledged to be, contain no distinction against them. The cadets who lately composed the committee are sensible, sir, that they are not to expect a change in their favor of the course which the Executive Government may have determined upon as correct; but they are too sensible of what belongs to themselves to make an acknowledgment of misconduct when they are conscious of having acted correctly, from pure motives, and with a disinterested aim, which, upon the most mature reflection, they cannot but approve.

We should, however, be unworthy of the cause in which we suffer, did we not experience unfeigned satisfaction in knowing that for the corps to which we belong substantial redress has been granted, with a fair prospect of being hereafter exempted from injuries such as those of which they were obliged to complain. It was for this that, without personal grievances, we consented to relinquish individual ease and comfort. It is for this that we yield ourselves a sacrifice to what the authorities (to which we are bound to submit) deem expedient; that we should remain under arrest without a formal exhibition of charges against us, and be condemned without a trial.

With respect and consideration, we are, sir, your obedient servants,

THOMAS RAGLAND,
NATHANIEL H. LORING,
CHARLES R. HOLMES,
WILSON M. C. FAIRFAX,
CHARLES R. VINING,
Committee in behalf of the corps of Cadets.

To J. C. CALHOUN, *Secretary of War.*

Q.

MEMORANDUM.

WASHINGTON CITY, *December* 3, 1818.

To-day we had occasion to wait upon General Parker, adjutant and inspector general of the United States' army. Our business was such as naturally led us to speak of the injuries the corps of cadets had received from their commandant. Without waiting for a statement of facts, he immediately took up the idea of a mutiny. From the order issued by Major Thayer, he was strengthened in this absurd idea, and, without hesitation, declared "that it was a principle in military affairs that junior officers, although *right*, were nevertheless *wrong;* that, although they should declare themselves *aggrieved*, and complain of *injuries*, yet the presumption was that the officer of whom they complained was in the right." When, to remove the precipitate and erroneous opinions he had conceived, we mentioned the certified facts and other papers in our possession, without paying regard to them, or making those natural and further inquiries which we expected, and on which we rested our hopes of vindicating the conduct of the corps, he proceeded to declare his opinion "that Captain Bliss had acted correctly; that his was a *delicate* command, where it was exceedingly difficult to *discriminate* between cases, in which it was proper to *treat as gentlemen* and those in which to assume the severity of the *schoolmaster*. Some of you," said he, "of the age of *nineteen* or *twenty*, should be treated with the respect of officers, and are as much entitled to it as captains in the army; but others among you, say of *fourteen*, &c., incapable, as they must be, of understanding military orders, *must have obedience exacted by the rod. In short, I can see no other way than now and then putting a switch into their jackets.*"

His opinion on the subject was, that the Secretary of War would not interfere at all in the business of our arrest and the conduct of the commanding officer of the corps. But, after hearing that many gentlemen of superior stations in Government, and, among the rest, *officers of high rank in the army*, had interested themselves in our cause, he changed quite round, offered himself to obtain an introduction for us to the Secretary, for which purpose we were *politely* invited to call on him to-morrow. He was unacquainted with the fact that the Secretary of the Treasury, Mr. Crawford, had taken our papers, to hand them to the Secretary of War, before the foregoing opinions were expressed. After hearing that this was the case, he was exceedingly anxious for us to *ask back* our papers from Mr. Crawford, and present them through his (the adjutant general's) hands.

Finding that men of *superior* influence had taken an interest in the affair, he became our *warmest friend*, and instead of having our "*jackets trimmed*," was exceedingly *anxious* for the *success of our petition.*

THOMAS RAGLAND,
W. M. C. FAIRFAX.

REMARKS.

For the purpose of explanation, it may be proper here to remark that the Secretary of War, although he had received, as early as about the 10th of December, 1818, from Major Thayer, the report of the proceedings of the corps of cadets and their committee, yet he refused either to show the committee the report, or to inform them of what it contained against them. The committee were unacquainted with the allegations set forth in that report till

the convention of a general court martial for their trial, in May following. And although a court of inquiry was ordered to sit, and inquire into all the transactions relating to the occasion of their arrest, and, as it was understood by them, partly at their own request, yet were they denied the right of appearing before that court, and, after the proceedings of the court were filed in the War Office, the common privilege of seeing what evidence had been taken against them, and in what manner their conduct had been investigated.

They were then forced to defend themselves, without a knowledge of what they were charged with; and, as it subsequently appeared, whilst they were vindicating their conduct on facts, they were secretly assailed, not by a false coloring of what had actually taken place, but by plausible and well connected falsehoods. This will be manifest when Major Thayer's report is compared with the letter in answer to it by cadet Ragland.

Perhaps it may be asked why the paper (B) was written after, and different from the one (A.) We anticipate this question to show that our disposition was to act, even in the minutest things, according to the strictness of military principle. This paper, (B,) in the concluding sentence, removes, and was written to remove, an ambiguity in the first, (A,) which paper, (A,) on an illiberal construction, admitted more enlarged powers than the cadets intended to grant. They intended to give ample powers, consistent with military propriety, and these only.

In the "*Case of the Cadets*," it will be observed, probably, that many things are spoken of, which do not, on a slight view of the subject, seem to be embraced in the list of grievances, for which the cadets intended that their committee should seek redress. But, when it is understood that the Secretary of War, and other officers having control over the concerns of the academy, supported the steps taken by Major Thayer, on the ground of his uniform correctness, it will be readily perceived that it became proper for us to enlarge our statement, and to rebut this argument against us, by showing that the abuses of which the corps of cadets had complained were by no means solitary instances of oppression, but only particular ones of the general system of abuse existing at the academy, which, from being more immediately humiliating and personal than others, had given rise to lawful resistance.

There are several things in this statement which to one having no knowledge of the present policy of the government at the military school, may appear to be of little moment, yet, if they could be accurately informed of their extent and importance, their indignation would be highly excited, and they would feel a painful astonishment at the toleration of them by those who have in charge the good of the institution. To illustrate this, we will here merely mention the particular of the "*exorbitant charge*," for the injury of class-books, &c. Will it be possible for one who is a stranger to the character of the present superintendent, Major Thayer, to believe that, at one payment of the cadets, there was taken from them, under this single head, a sum no less than "five hundred and twenty-six dollars?" Yet such is the fact, incredible as it may seem.

To what purpose has this money been appropriated? This money constitutes what is well known at the Military Academy by the name of the "Academic Fund;" and out of this academic fund, trees are planted, fences made, and whatever else is further done with it is not known to us.

The committee had, at the commencement of this work, determined not to insert the memorandum (Q,) but, on reflection, they have inserted it, because they consider that an insult offered them, so gross as this paper details, should suppress every feeling of lenity on their part, and also that views so illiberal require the caustic of public indignation.

R.

SIR; MILITARY ACADEMY, WEST POINT, *November* 30, 1818.

I have to inform you of some transactions, of a very disagreeable nature, which have taken place during the last week at the Military Academy.

After stating the facts, such as they have come to my knowledge, I will endeavor to trace some of the principal causes that have led thereto. On Sunday, the 22d instant, a cadet, of the name of Nicholson, was ordered from the ranks for disorderly conduct; but, neglecting to obey the order, Captain Bliss (commanding the parade) seized him by the collar, and forced him to retire. This occurrence appeared favorable to the views of certain cadets, who were old offenders, having been the instigators of the disturbances which took place the last year, and they availed themselves of it to excite the passions of the more youthful and inconsiderate portion of their companions. Papers were circulated; committees organized; and a regular combination formed, of which the first object was to remove Captain Bliss, their immediate commanding officer. Five cadets, calling themselves the committee of one hundred and sixty others, waited on me to demand the arrest of that officer, and even dared to threaten me with rebellion, in case of a non-compliance with their wishes.

In this state of things, an order was read to the cadets, calculated to bring them back to the path of duty, and five of the principal ringleaders were instantly ordered from the academy to their respective homes, there to wait the decision of Government with respect to them.

The persons referred to are cadets Ragland, Loring, Holmes, Vining, and Fairfax. It is with pain that I am obliged to name cadet Fairfax with the others, as his previous conduct had uniformly been very commendable.

The pretty general dislike of the young gentlemen to Captain Bliss arises, in part, from his strict discipline, forming, as it does, a complete contrast to that of former times, and is, in part, incident to the unpleasant situation which he fills; he being the person charged to watch over and report their conduct, and to inflict the punishments for all minor delinquencies. But the radical cause of the disturbances to which the Military Academy is liable is the erroneous and unmilitary impressions imbibed at an inauspicious period of the institution, when they were allowed to act as though they had rights to defend, as a corps of the army, and to intrude their voice and opinions with respect to the concerns of the academy. So long as these impressions shall remain, the academy will be liable to combinations and convulsions, and the reputation of the institution, and the officers connected with it, be put in jeopardy.

Notwithstanding the proceedings which I have been compelled to describe in great haste, I am happy in being able to assure you that there has been no positive act of mutiny or disorder, and that the operations of the institution have not been interrupted for a moment. But, as reports may be spread calculated to injure all concerned, I hope the Secretary of War will think proper to direct one of the principal officers of the corps of engineers to repair to this place, as soon as practicable, in the capacity of inspector, with orders to examine into the management of the institution, and authorized to take such other measures as circumstances may require.

I am, sir, very respectfully, your obedient servant,

S. THAYER,

Brevet Major, and Superintendent Military Academy.

Lieutenant Colonel W. K. ARMISTEAD,

Commandant Corps of Engineers, City of Washington.

S.

SIR: DEPARTMENT OF WAR, *January* 15, 1819.

The proceedings of the court of inquiry, which convened at West Point, under the order of this Department, of the 9th of December last, have been examined by the President; and I have the pleasure to state that your conduct, as superintendent of the Military Academy, in the unpleasant occurrences which induced that investigation, has been satisfactory and approved.

As Captain Bliss does not appear to have sufficient command of his temper, an order will be transmitted to you relieving him as instructor of tactics at the Military Academy, and a copy of the order detailing Captain Bell, of the light artillery, for that duty.

The course pursued by the cadets is highly reprehensible throughout the whole transaction, and particularly objectionable on the part of the young gentlemen who composed the committee.

The redress of military grievances must never be extorted or obtained by combinations, which are alike mutinous. If Captain Bliss acted unjustifiably or oppressively, his conduct was a proper object of complaint to the superintendent from the cadet who was personally aggrieved; and the youth and inexperience, alone, of the gentlemen, induces the President to overlook the insubordinate course pursued by the cadets, through their committee. But, however, as their youth and inexperience were probably the cause of their irregular conduct, you will restore the young gentlemen who were sent from the academy by your order of the 27th of November last, whenever, in your opinion, it can be done without injury to the discipline of the institution.

I have the honor to be your obedient servant,

J. C. CALHOUN.

Major S. THAYER,
Superintendent U. S. Military Academy, West Point, N. Y.

T.

SIR: WEST POINT, *June* 11, 1819.

To counteract a report now filed in your office, whose falsehood and malignity, should they have met with that reception intended by the reporting officer, cannot fail of inducing in your mind an injurious impression of my character, as a person in the service of the United States, I am induced to avail myself of my present opportunity (being detached from the Military Academy) to address myself to you. Although cadets at this post are *forbidden* to have any communication with your Department, on any occasion, yet be assured, sir, that, in so doing, I have not the slightest disposition to oppose legal authority.

The following extract, commencing with an unimportant reference, contains the charge which I intend to disprove.

"This occurrence appeared favorable to the views of certain cadets, who were *old offenders*, having been the instigators of the disturbances which took place the last year, and they availed themselves of it to excite the passions of the more youthful and inconsiderate portion of their companions."

This report is dated Military Academy, November 30, 1818, and signed by the superintendent of the academy. Its transmission to the judge advocate of the court martial, which sat here the last month, has presented me the opportunity of seeing behind that official curtain, where this man, (Major Thayer,) under specious pretences for the public good, would basely stab the spotlessness of private character.

Extract from an order, dated United States' Military Academy, 12th of October, 1817.

"Cadet Ragland, being relieved by Lieutenant Graham, will deliver to him the books and papers of the office, and will retire to his duty in the corps of cadets, having performed that of adjutant of the post with *honor* to himself, and to the *entire satisfaction* of the superintendent."

"S. THAYER, *Major commanding*."

My adjutancy, having commenced long before the disturbances of that year, (1817,) continued during the whole of the transactions in which Captain Partridge was concerned, which the report alludes to; and, as my cadetship was inseparably connected with my other duties, this order was issued on fresh impressions of my general and particular conduct, and, therefore, being entitled to the greater credibility of two contradictory representations, is ample vindication of my correctness, even though more positive and credible evidence is ever ready to be offered.

As to the rest of the "certain cadets" mentioned in the above scandalizing report, the absence of Messrs. Loring and Vining from the post did effectually put it beyond their power to have instigated that conduct; and it can be shown that it was only known to them after commission. Mr. Holmes was not a member of the Military Academy till Major Thayer was confirmed in the disputed superintendency of the institution. As to Mr. Fairfax, the acknowledgment of Major Thayer, in the report to your Department in November last, "that his previous conduct has uniformly been very commendable," relieves him from the previous charge of old offences, contained in the same page.

I would that my accuser could see the above statements; even he must acknowledge them to be facts.

Sir, yours with respect,

THOMAS RAGLAND.

To J. C. CALHOUN, *Secretary of War*.

U.

SIR: CHARLESTOWN, MASSACHUSETTS, *December* 20, 1818.

Having understood that a court of inquiry, of which you are President, will assemble at West Point, on the 21st instant, in conformity to an order from the Adjutant and Inspector General, bearing date the 9th December, 1818; and having observed, from a copy of the general order, the object of the court is to inquire *into the late transactions and disorders at the Military Academy, which caused the order of the superintendent of November last*, I conceive it necessary to state to the court my views on a subject which is so intimately connected with myself. The order of the superintendent bearing date the 27th of November, 1818, and alluded to in the general

order, which I have quoted above, was predicated on the proceedings of a committee of five cadets, of which I had the honor of being one; if, then, these proceedings alone caused that order of the superintendent, and if the court is ordered to inquire into the cause of that order alone, it is obvious that the court is ordered to inquire into the conduct of that committee; from which I would infer that my conduct is the subject of inquiry.

Before a court, constituted to inquire into my actions, I presume I have a right to appear; it is a right which every individual possesses, and I respectfully conceive it should not be withholden from me.

The order, which bears date the 27th of November, and which is to be laid before the court, (as will appear by the general order of the 9th of December,) contains charges against the committee, to which the committee do not assent. That order is virtually a charge against the committee, in which I am a party concerned; and as evidence is to be adduced, (and it can be but by one party, if but one party is present,) I do hold it as my right to offer evidence in my defence.

From these reasons, from the right which I have of defending my own conduct, I respectfully protest against any proceedings of the honorable court against me, or my conduct, unless I am allowed a hearing.

With high considerations of respect, I have the honor to be, sir, your very obedient servant,

NATHANIEL H. LORING.

To Major CHARLES GRATIOT, *of the United States' engineers, and President of the Court of Inquiry.*

V.

WEST POINT, NEW YORK.

We take the liberty of calling the attention of the President to certain transactions, which appear to demand his interference, in order that justice be not sacrificed to power and interest. We deem it unnecessary to enlarge on the propriety of our present measure, as it is a mere appeal to the highest Executive Magistrate, for his attention to our rights, which have been lawlessly trodden upon, by the very individuals who were appointed our judges. We therefore state facts, without comment, and rely upon the integrity and justice of the President for protection from further tyrannies.

1st. We were selected from among one hundred and eighty-nine cadets, in November last, accused in a public order with mutiny and seduction of our fellow cadets from their duty, arrested, and ordered to leave the post of West Point, in six hours; a length of time insufficient to procure either clothes or funds.

The charges against us, contained in the order referred to, are notoriously false. We would have proved them false had we been allowed a hearing before the court of inquiry, which, in a violation of law, passed a decision on us, in December last.

2dly. We were ordered to proceed to our homes immediately, without even being allowed to remain at a public house in the vicinity of the Point, until the regular steam-boat passed, when it was well known no other conveyance could be procured, an adjutant being sent with an order for us to leave the vicinity in an hour's time, under penalty of being punished for disobedience of orders.

3dly. A court of inquiry, consisting of Major Gratiot, a Captain Babcock, and a Lieutenant Webster, was convened at West Point, and, contrary to the rules and articles of war, contrary to the written law of our country, contrary to the law of savages, and to all other laws, this court tried, and condemned us, without our being summoned, or even allowed to appear, before it, in person, or by attorney, for defence.

4thly. We were, during the stay at our homes, continually requesting a termination of our business, and an opportunity to establish our innocence; our expenses were great; our situation was delicate and peculiar; our accuser aiming his shafts at our reputation, while we were denied an opportunity of proving that he alone was culpable; alterations in letters, which were addressed to the Secretary of war, were requested by that officer, and peremptorily refused, because an acquiescence would have been tantamount to a desertion of those rights conserved to the meanest citizen in this country, by the laws. We were willing to sacrifice private interest, for the public good; but we have been, and are determined, that no considerations shall induce us to abate one jot of right, in order that the guilty may be screened from popular detestation.

5thly. In March last, we were ordered to New York, for trial, where we were forced to remain nearly two months, awaiting orders, at a great expense, and contrary to the spirit of those laws, which make it necessary for the accused to be brought immediately to trial.

6thly. When ordered to this post, the court, after considerable procrastination, convened, examined the evidence on Mr. Ragland's case, permitted him to make a defence, and then determined that cadets are not amenable to military law.

7thly. It is now nearly three months since the decision was made by the court, and no steps have been taken by the War Department.

8thly. During the time we have been at this post, rooms in the very worst repair, situated in a nauseous and filthy spot, have been allotted us. We have not been allowed, at any time, to enter the barracks of the cadets. We have not been allowed to attend any studies, although the request was made so to do, and the situation of our rooms precludes almost the possibility of study.

9thly. The class to which four of us were attached has been commissioned. Our situations in the class have been occupied by others. Those commissioned have been ordered to their respective duties; while we, although our actions were in unison with the body of cadets, are kept here in arrest and suspense, under the frowns of the Government, without there being a possibility of substantiating a single charge against us.

10thly. Thus, sir, nine months have elapsed while we are kept under arrest. We are at the period of life when time is invaluable. The procrastination of Government is robbing us of that which can never be repaid. Our reputation may suffer by this suspense; (for we have reputation as well as our betters,) and our friends and relations, nay, all men of honor and honesty, are anxious that we be exculpated by a public order, or freely and publicly allowed to vindicate our character and conduct from the calumnies of our enemies.

11thly. We do not ask, at this time, for justice on our persecutor; that, we are in hopes, can be obtained hereafter, by a regular appeal to the laws; but we refer to the President of the United States for justice on ourselves. We wish to know whether the unheard of arrest, in which we have continued nine months, has not had sufficient duration; whether we alone, of all the people of this land, are to suffer, and suffer too, without a chance of protection.

Which is respectfully submitted, with the highest consideration.

N. H. LORING,
THOS. RAGLAND,
W. M. C. FAIRFAX,
C. VINING,
C. R. HOLMES, *Cadets.*

To the PRESIDENT OF THE UNITED STATES.

W.

SIRE: CHARLESTOWN, MASSACHUSETTS, *September* 14, 1819.

With emotions not easily to be described, I, with due deference, address the Chief Magistrate of this nation. Nothing could induce me, at this moment, to trespass on his valuable time, but the feelings of a father, whose happiness has been in the reflection that his children have invariably acted, to the satisfaction of those, who have been associated and connected with them. But, to his extreme regret, his son, Nathaniel Hall Loring, has been very unpleasantly situated, by being under arrest nine months, occasioned by some unhappy collisions at West Point.

It appears that, in the month of November, 1818, and before that period, Captain Bliss, stationed at West Point, was extremely severe with the cadets, so much so that it created a dissatisfaction among them, to such a degree, that they were determined to represent their grievances to Major Thayer, the superintendent of the academy; for which purpose they selected five cadets, of whom my son was one, to draw up a statement of facts and present them to Major Thayer, which they did; but he declared he would not receive them in his official capacity; of course, would not act on their complaints. They then tendered to him their resignations, in hopes of being discharged, which had been usual to grant at West Point; he saw fit not to accede thereto. They then made a formal complaint against Captain Bliss, in hopes that they would have justice done them; this was done, because they were not permitted to address any one, or make a complaint except through Major Thayer, agreeable to a standing order at the Point; but to their surprise, on public parade, the next day, they were arrested and ordered from the Point, and to repair to their homes; which order they, as far as practicable, obeyed, and only waited for the steam-boat to execute the remainder. But, as though they were the most abandoned on earth, they were not permitted to remain out of the limits of the Point, but were ordered from the vicinity, without the least attention to their convenience or health.

Cadets Ragland and Fairfax, on their arrival at Washington, were permitted to state their case, and a court of inquiry was ordered to sit at the Point; but none of the cadets charged were permitted to appear before that court; nor were they notified of there being one instituted, except by report; although my son (as well as myself) addressed a line, per mail, to Major Gratiot, the President, informing him of this fact, and requesting a hearing; but still there was no attention paid to this legal request. After the sitting and reporting of this court, Captain Bliss was removed, and Captain Bell, of the light artillery, was ordered to take his station.

Orders were then issued from the Adjutant and Inspector General's office, appointing and ordering a general court-martial to sit at West Point, to try cadets Ragland, Fairfax, Holmes, Vining, and Loring. Agreeably to this order, the court convened. Charges were made against them, and the court put cadet Ragland on his trial; he was regularly tried and made his defence; after which, as it is generally understood, they determined that the cadets were not amenable to the rules and articles of war.

These, honored sire, are the facts which have come to my knowledge respecting this unhappy affair. I have been further informed, that charges have been reported against my son, which are most certainly false, and those that reported them must have known them to be so at the time reported.

It is said that my son was concerned in the difficulty with Captain Partridge; the true fact was that he was on furlough to my family, and at that time he was on his return to West Point; and when Captain Partridge arrived at the Point, he was not there.

It is said that he was reported an *old offender;* how this can be supported in any degree, I am at a loss; when he has been acting in every honorary capacity ever since he has been at West Point. And in the summer of 1818, (a few months before the difficulty happened,) he was not permitted a furlough, but was retained at the Point to drill the second company, and teach them tactics, which company he then commanded, and did continue to command, until he was put under arrest. These appointments were all made by the approbation of Major Thayer.

I should not, sire, have so feelingly represented his treatment, had he not been deprived of his studies, and because when I consented to his acceptance of the appointment of cadet, I exerted myself to explain to him his duty to his Government; and I had the heartfelt satisfaction to find his sole aim was the support of the academy at West Point; a firm friend to its honor and dignity, and his whole pride appeared to be in his being enrolled a member of the institution.

But, sire, his feelings as a cadet and a soldier have been most violently trampled upon; he has seen his brother cadets, *in whose defence* he was *then* suffering, receive, before his eyes, the examination and honors of the academy; and also his class mates appointed to commissions in our army, by orders issued from the Adjutant and Inspector General's office, when he was not permitted to study for the good of himself and friends, nor even allowed a trial, whereby he could establish his innocence, although a court was ordered for that purpose by the highest authority of the nation.

In this country, I presume to hope, sire, every citizen is, or ought to be, governed by the laws; and if a father or guardian of a minor, consents to his entering on any situation under the Government, most undoubtedly he expects that justice will be done him, conformably to the legal rules and regulations by which it is governed, and not by the caprice of any subordinate officer.

This is the moment, honored sire, when my son needs every opportunity to prepare himself to begin the career of life, on which depends all his future happiness; but to be held in arrest, and deprived of liberty without the least semblance of a crime, is too much for a father to reflect upon.

Your philanthropy and watchfulness, in protecting the rights and liberties of every citizen under the Government of these United tates, over which you now preside, is a satisfactory consolation to a father, that these transactions will be properly investigated, and that my son, as well as his associates, (now in arrest at West Point,) will once more be at liberty, and receive that justice from their country, which the Government thereof have professed to do to the most obscure citizen.

With high consideration and respect, I am your most obedient,

JOSEPH LORING,
Late Colonel 40th regiment U. S. Infantry.

To the PRESIDENT OF THE UNITED STATES.

X.

Charges preferred against Thomas Ragland, cadet in the service of the United States.

CHARGE FIRST. *Mutinous conduct.*

Specification first. In this, that he, the said Thomas Ragland, cadet in the service of the United States, and acting assistant professor of mathematics in the United States Military Academy, did, on or about the 23d of No-

vember, 1818, at West Point, New York, excite disaffection in a large portion of the cadets of the United States' Military Academy at West Point, New York, and did advise them into a system of measures, the object of which was to dictate a course of conduct to their commanding officer, (Brevet Major S. Thayer, of the United States' corps of engineers,) and by the appearance of a co-operation of so general a combination of the cadets as he had effected, to over-awe him, (Brevet Major S. Thayer, of the United States' corps of engineers,) into a discharge of the measures dictated.

Specification second. In this, that he, the said Thomas Ragland, cadet in the service of the United States, and acting in the capacity of assistant professor of mathematics in the United States' Military Academy, whereby it became his duty, as far as his power extended, to suppress deliberative assemblies of the cadets, or combinations of the cadets of the nature aforesaid, on or about the time aforesaid, and at the place aforesaid, did suffer himself to be appointed a member of a committee, organized by the disaffected cadets, and did himself, or conjointly with the members of said committee, draw up and present to his commanding officer (Brevet Major S. Thayer, of the United States's corps of engineers,) a communication of the tenor and nature following, viz: dictating to his commanding officer, (Brevet Major S. Thayer, of the United States' corps of engineers,) the line of conduct he was to pursue; enlarging on the number of cadets who had combined and directed the proceedings of the committee; stating the oppressive conduct of the officer complained of must be avoided; and expressive of his determination, conjointly with the other members of the committee aforesaid, to have the objects represented carried into effect, even if his individual interest became a sacrifice in the cause he had undertaken.

CHARGE SECOND. *In the capacity of an accessory, joining in a combination against his commanding officer, the tendency of which was mutinous and subversive of subordination.*

Specification first. In this, that he, the said Thomas Ragland, cadet in the service of the United States, and acting assistant professor of mathematics in the United States' Military Academy, did, on or about the 23d of November, 1818, at West Point, New York, combine with a large portion of the cadets of the United States' Military Academy at West Point, New York, and join with them in a system of measures, the object of which was to dictate a course of conduct to their commanding officer, (Brevet Major S. Thayer, of the United States' corps of engineers,) and, by the appearance of so general a combination, to overawe him into a compliance with the measures dictated.

Specification second. In this, that he, the said Thomas Ragland, cadet in the service of the United States, and acting in the capacity of assistant professor of mathematics in the United States' Military Academy, whereby it became his duty, as far as his power extended, to suppress deliberative assemblies of the cadets, or combinations of the cadets of the nature aforesaid, did, on or about the time aforesaid, and at the place aforesaid, suffer himself to be appointed a member of a committee organized by the disaffected cadets, and did himself, or conjointly with other members of the said committee, draw up and present to his commanding officer, (Brevet Major S. Thayer, of the United States' corps of engineers,) a communication, of the tenor and nature following, viz: dictating to his commanding officer, (Brevet Major S. Thayer, of the United States' corps of engineers,) the line of conduct he was to pursue; enlarging on the number of the cadets who had combined and directed the proceeding of the committee; stating that the oppressive conduct of the officer complained of, must be avoided; and, expressive of his determination, conjointly with the other members of the committee aforesaid, to have the object represented carried into effect, even if his individual interest became a sacrifice to the cause he had undertaken.

Specification third. In this, that he, the said Thomas Ragland, cadet in the service of the United States, and acting in the capacity of assistant professor of mathematics in the United States' Military Academy, on or about the 24th of November, 1818, at West Point, New York, and within a short period after his commanding officer, (Brevet Major S. Thayer, of the United States' corps of engineers,) had refused to see him as a member of the committee of the disaffected cadets, as also to receive the communication presented in that capacity, did appear before his commanding officer, (Brevet Major S. Thayer, of the United States' corps of engineers,) in a body with the other members of the committee aforesaid, who assembled for the same purpose, to tender his resignation of the appointment of cadet he held in the service of the United States.

CHARGE THIRD. *Disobedience of orders.*

Specification. In this, that he, the said Thomas Ragland, cadet in the service of the United States, and acting in the capacity of assistant professor of mathematics in the United States' Military Academy, did, on or about the 25th of November, 1818, at West Point, New York, a second time present to his commanding officer, (Brevet Major S. Thayer, of the United States' corps of engineers,) a communication from the committee, organized by the disaffected cadets; notwithstanding he, the said Thomas Ragland, cadet in the service of the United States, had been informed by his commanding officer, (Brevet Major S. Thayer, of the United States' corps of engineers,) in the first instance of the impropriety of his conduct, and positively ordered by him not to present a second communication another time.

CHARGE FOURTH. *Ungentlemanlike conduct.*

Specification. In this, that he, the said Thomas Ragland, cadet in the service of the United States, and acting in the capacity of assistant professor of mathematics in the United States' Military Academy, to deceive his commanding officer, (Brevet Major S. Thayer, of the United States' corps of engineers,) and for the purpose of conveying into his hands a communication from the committee organized by the disaffected cadets, did, on or about the 25th of November, 1818, at West Point, New York, tell to his commanding officer, (Brevet Major S. Thayer, of the United States corps of engineers,) a deliberate falsehood; saying in the words to the effect following, to wit: that the communication he presented was not from the committee aforesaid, but simply an exposition of some facts, coming from himself, conjointly with cadet Wilson M. C. Fairfax, as individuals, and without any relation whatever to his character as one of the representatives of the cadets.

By order of

S. THAYER,
Brevet Major of the corps of Engineers, and
Superintendent of the U. S. Military Academy.
G. W. GARDINER,
Lieutenant of Artillery, and Post Adjutant.

REMARKS.

Saving the specification of the third charge, all the charges and specifications under those charges which were alleged against Mr. Ragland, were preferred against Mr. Fairfax.* In the specification under the third charge, laid against Mr. Fairfax, he is accused of disobeying the order which Mr. Ragland, under the same charge, is said to have disobeyed; but this order is there stated to have been communicated to him through Mr. Ragland. The charges and the specifications under them, which were preferred against Messrs. Loring,† Vining, and Holmes, were identical with those against Mr. Fairfax, omitting the fourth charge and its specification.

Many references in this pamphlet have been made to the trial of Mr. Ragland. The committee of cadets did intend to have published that trial with these papers; but this gentleman has not been granted a copy, although it has been repeatedly asked for by him in the most respectful manner, and according to the form prescribed by law. The evidence taken on the trial nearly alike affects the whole committee, from the very nature and similarity of the allegations against them. They (the committee) had fondly rested their hopes of vindicating their conduct to their friends, by presenting to them copies of the official documents of the general court-martial before which Mr. Ragland was arraigned. Such a vindication would, they are firmly persuaded, have been full and satisfactory. But, in addition to all their other persecutions, they are deprived of the privilege of doing this; of a right guarantied by law, and grounded on every principle of justice. Under these circumstances, it is difficult to believe *that the President of the United States* or the *Secretary of War* have had a proper understanding of their case. It is to be hoped that men so universally esteemed, and so highly entrusted as they are, have more correct principles, and a more enlarged magnanimity, than to impose, or suffer to be imposed, such injuries as the committee of cadets have received from the Executive Government, except from an erroneous view of their proceedings.

The committee have sought nothing but their rights; they have been faithful to their duty; and, were they properly heard, "they should doubt the being of a Providence, if they doubted of success."

Y.

OFFICE OF THE ATTORNEY GENERAL,
UNITED STATES, *August* 21, 1819.

SIR:

I have examined, with careful attention, the question you have submitted to me, as to the subjection of the cadets at West Point, to the rules and articles of war, and to trial by courts-martial; and now proceed to give you the result of that examination.

It is proper to observe, in the threshold of this inquiry, that the genius of our constitution and laws favors the trial by jury. Before the revolution, we had learned from Great Britain to consider that form of trial as the great palladium of our most sacred rights; and, on the adoption of the constitution, the privilege was deemed sufficiently important to be secured to the people by positive and repeated provisions in that instrument. Thus, by the second section of the third article of the constitution, it is provided that "the trial of all crimes, except in cases of impeachment, shall be by jury, &c.," and, by the fifth amendment to that instrument, it is further provided that "no person shall be held to answer for a capital, or otherwise infamous, crime, unless on a presentment or indictment of a grand jury, except *in cases arising in the naval or land forces*, or in the militia, when in actual service, in time of war, or public danger, &c., nor be deprived of life, liberty, or property, without due process of law, &c." The seventh amendment, looking to the questions of property, even of trivial value, provides that "in suits at common law, where the value in controversy shall exceed *twenty dollars*, the right of trial by jury shall be preserved," &c. So that Congress has not power to pass a law which shall deprive a person accused of a criminal, or otherwise infamous offence, of his right of trial by jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, or in time of war or public danger.

Even in relation to the land and naval forces, (including the militia when in actual service,) Congress have never considered the mere act of stamping on those bodies a military character, by ordering them to be raised, organized, and called into service, as being sufficient, of itself, to subject them to trial by courts-martial, under the rules and articles of war; because this would be to abrogate a high constitutional privilege by implication. In every instance, therefore, in which Congress have impressed a military character on any body of men, whom they intended to divest of the right of a trial by jury, besides the impressment of that military character, they have uniformly and expressly declared that they should be subject to the rules and articles of war. With a view to test the accuracy of this position, I have collated all the laws on the subject, to which I beg leave to refer you.

See the resolve of the old Continental Congress, of the 12th of April, 1785, 1st volume of the laws of the United States, page 669, in a note; that of the same body, 3d of October, 1787, pages 668, 669, and 670, concerning the military establishment; also, the act of the 29th of September, 1789, referring to the last mentioned resolve, 2d volume of the laws of the United States, page 74, section 4; the act of the 30th of April, 1790, for regulating the military establishment of the United States, section 13, 2d volume, page 102; the act of the 3d of March, 1791, for raising and adding another regiment, &c., section 10th, idem, page 234; the act of the 5th of March, 1792, for making further and more effectual provision for the protection of the frontiers, section 11, idem, pages 257, 258; the act of the 9th of May, 1794, providing for raising and organizing a corps of artillerists and engineers, section 4, idem, page 404; the act of the 3d of March, 1795, for continuing and regulating the military establishment of the United States, &c., section 14, idem, pages 490, 491; the act of the 30th of May, 1796, to ascertain and fix the military establishment of the United States, section 20, idem, page 559; the act of the 27th of April, 1798, to provide an additional regiment of artillery and engineers, section 2, 3d volume, page 43; the act of the 28th of May, 1798, authorizing the President to raise a provisional army, section 2, idem, page 50; the act of the 16th of July, 1798, to augment the army of the United States, section 8, idem, page 108; the act of the 2d of March, 1799, giving eventual authority to the President to augment the army, section 3, idem, page 261;

* Cadets Ragland and Fairfax were appointed acting assistant professors under the following order:

ENGINEER DEPARTMENT, WASHINGTON, *April* 15, 1818.

MILITARY ACADEMY ORDERS.

The Superintendent of the Military Academy is authorized to detail not exceeding four cadets, to discharge the duties of acting assistant professors of mathematics; each cadet, so detailed, will receive ten dollars per month as a compensation for the extra duty. The appointment will be considered an honorable distinction.

J. G. SWIFT,
Brigadier General and Chief Engineer.

† Cadet Loring was, at the time of his arrest, captain of the second company of the corps of cadets. He was appointed to this situation from that of adjutant of the corps.

the act of the 16th of March, 1802, fixing the military peace establishment of the United States, idem, page 453; the act of the 28th of February, 1803, in addition to the act last quoted, section 3, idem, page 531; the act of the 2d of April, 1808, to raise, for a limited time, an additional military force, section 5, volume 4, page 163; the act of the 8th of January, 1812, authorizing the President to raise certain companies of rangers for the protection of the frontier, section 4, idem, page 366; the act of the 11th of January, 1812, to raise an additional military force, section 10, idem, page 367; the act of the 8th of April, 1812, in addition to the act to raise an additional military force, section 2, idem, page 404; the act of the 16th of May, 1812, making further provision for the army of the United States, section 2, idem, page 433; the act of the 29th of January, 1813, in addition to the act entitled an act to raise an additional military force, section 6, idem, page 492; the act of the 5th of July, 1813, to amend the act in addition, &c., section 2, idem, page 541; the act of the 28th of January, 1814, to cause certain regiments to be enlisted for five years, section 2, idem, page 644; the act of the 10th of February, 1814, to raise three regiments of riflemen, section 4, idem, page 645; the act of the 27th of January, 1815, to authorize the President to accept the services of State troops and of volunteers, sections 1 and 4, idem, page 778; the act of the 3d of March, 1815, to fix the military peace establishment of the United States, section 7, idem, page 825; the act of the 24th of April, 1816, for organizing the general staff, and making further provision for the army, section 6; session acts of 1815, 1816, pages 71, 72.

On turning to these laws, it is remarkable that, in every instance in which troops have been raised, or their number has been augmented by any accession, however trivial, or in which their number has been reduced to a peace establishment, or in which a new and distinct destination has been given to any portion of them, Congress has cautiously introduced a provision that they shall be subject to the rules and articles of war; and what is still more remarkable is, that, even after the general act of 1806 had passed, declaring the rules and articles of war, and containing the permanent provision that the armies of the United States should be subject to these rules and articles, Congress, not content to leave after-raised troops to the operation of that general provision, have, in every instance, repeated their subjection to military law. A course of legislation, so long continued and so uniform, marks the sacred respect in which Congress have ever regarded the right of trial by jury, and will justify us in assuming it, as their sense, that this right is never to be taken away by implication; never by the mere impressment of a military character on a body; never without a positive provision to that effect.

In relation to the cadets at West Point, then, in order to prove their subjection to the rules and articles of war, and trials by courts-martial, it is not enough to show that Congress has stamped on them a military character: for, if we respect the opinion uniformly expressed by the practice of Congress, it must also be shown to have been expressly provided that those cadets shall be subject to the rules and articles of war.

With these principles in view, I shall proceed to examine all the laws which bear on the question submitted, expressing my opinion on the legal construction and operation of each law as it occurs.

The *nucleus* of the military institution at West Point was a corps of engineers, raised under the act of Congress of the 15th of March, 1802. (Laws of the United States, volume 3, pages 456, 457, sections 26, 27, 28.)

In order to apprehend more distinctly the intention of Congress in relation to this corps, it may not be amiss to examine the previous laws relative to the troops of this description, and to compare them with the two laws bearing directly on the question. Neither of the two resolves of the Old Congress, nor the acts of 1789, 1790, before stated, say any thing of engineers. The first time they are mentioned in our laws is the act of the 9th of May, 1794, volume 2, page 403, entitled "An act providing for raising and organizing a corps of artillerists and engineers," by which seven hundred and sixty-four non-commissioned officers and privates, &c. were directed to be engaged for three years, by voluntary enlistment, and incorporated with the previous corps of artillery, then in the service of the United States, the joint body being thereafter to be denominated "*The Corps of Artillerists and Engineers*;" the entire number, exclusive of commissioned officers, being nine hundred and ninety-two. By the third section of this law, the whole body was organized into four battalions, each battalion consisting of four companies, and to each company were attached, among others, *two cadets*, with the pay, clothing, and rations of sergeants. The fifth section made it the duty of the Secretary of War to provide, at the public expense, under the direction of the President, the necessary books, instruments, and apparatus, for the use of the corps. The sixth section authorized the President to cause such proportion of the said corps, as he should deem consistent with the public service, to serve in the field, on the frontiers, or in the fortifications on the sea-coast. The 4th section expressly provided that the whole body should be governed by the rules and articles of war, which have been, or may, by law, be established.

Hence, there is nothing in the character of the service, or the circumstance of their being *cadets*, nor in that of their being furnished with the necessary books, instruments, and apparatus for study, which, at that time, was deemed sufficient to exempt cadets, among the rest, from the operation of the rules and articles of war. The act of the 3d of March, 1795, continues this incorporation and organization of the corps of artillerists and engineers, and, in the 14th section, repeats their subjection to the rules and articles of war. The act of the 30th of May, 1796, makes no change in the situation of the corps of artillerists and engineers. The act of the 27th of April, 1798, "to provide an additional regiment of artillerists and engineers," directs that three battalions, of four companies each, be raised for this purpose, by enlistment for five years, unless sooner discharged, attaches two cadets to each company, directs the Secretary of War to furnish all necessary books, instruments, and apparatus, and, in like manner, subjects the whole corps to the rules and articles of war. The act of the 16th of July, 1798, to augment the army of the United States, and for other purposes, after authorizing the raising and organization of twelve additional regiments of infantry and six troops of light dragoons, proceeds, in the seventh section, to authorize the President to appoint any number, not exceeding four, teachers of the arts and sciences, necessary for the instruction of the artillerists and engineers, at the monthly pay of fifty dollars, and two rations per day. The eighth section subjects the officers, non-commissioned officers, and privates, raised by virtue of this act, to the rules and articles of war, but does not embrace, in that provision, the teachers appointed by the President, unless they come under the denomination of officers, non-commissioned officers, musicians, or privates, which I do not think was intended; because the previous sections of the law sufficiently indicate who were meant by those terms.

Next in order comes the act of the 16th of March, 1802, by which the establishment at West Point was created. As this act bears directly on the subject of inquiry, it will be necessary to give it a more minute attention. It is entitled, "An act fixing the military peace establishment of the United States," and the first section declares, "that after the 1st day of June next following the date of the act, the military peace establishment of the United States shall be composed of one regiment of artillerists and two regiments of infantry, with such officers, military agents, and engineers, as are hereinafter mentioned." The second section is employed in organizing the regiment of artillerists, (not of the artillerists and engineers,) and the regiments of infantry; all the succeeding sections are confined exclusively to those regiments of artillery and infantry, (with the appendages of paymasters and military agents, and their assistants, and of surgeons, with their mates,) till we come down to section ninth, by which the President is required to cause to be arranged the officers, non-commissioned officers, musicians, and

privates, of the several corps of troops now in the service of the United States, in such manner as to form and complete, out of the same, the corps aforesaid, (that is to say, the corps composed of the regiment of artillery and two regiments of infantry;) and the next section, the tenth, provides that the officers, non-commissioned officers, musicians, and privates of the said corps shall be governed by the rules and articles of war. This section, therefore, does not embrace the engineers, of whom as yet nothing had been said. The sections succeeding the tenth are wholly employed, as the preceding ones had been, in regulations confined to the regiments of artillery and infantry, till we come down to section twenty-sixth, when, for the first time, the subject of the engineers is taken up. That section authorizes and empowers the President, when he shall deem it expedient, to organize and establish a corps of engineers, to consist of one engineer, with the pay, rank, and emoluments of a major; two assistant engineers, with the rank, pay, and emoluments of captains; two other assistant engineers, with the pay, rank, and emoluments of first lieutenants; two other assistant engineers, with the pay, rank, and emoluments of second lieutenants; and ten cadets, with the pay of sixteen dollars per month and two rations per day; with the power to make promotions, so as not to exceed one colonel, one lieutenant colonel, two majors, four captains, four first lieutenants, and four second lieutenants, and so as that the corps shall at no time exceed twenty officers and cadets. The twenty-seventh section provides that the said corps, (composed solely of officers and cadets,) when so organized, shall be stationed at West Point, in the State of New York, and constitute a military academy, and that the engineers, assistant engineers, and cadets of the said corps, shall be subject at all times to do duty in such places, and on such service, as the President of the United States shall direct. The twenty-eighth section assigns the superintendence of the academy to the principal engineer; and authorizes the Secretary of War, under such regulations as the President should direct, to procure the necessary books, &c. for the use of the institution. The twenty-ninth section is a repealing one, and here the law stops. There is no provision that this corps shall be subject to the rules and articles of war.

It is here worthy of observation, that this is the first time that a separate corps of engineers had been raised by our laws; that there is no other instance in the annals of Congress, in which a new description of troops has been authorized without an express provision that they shall be subject to the rules and articles of war; that in this very law there is, in the preceding part of it, such a provision in relation to the artillerists and infantry, which gives this omission, in regard to the engineers, tenfold significance; and that although a military character has been impressed on their corps, as well by their name as their being fixed as a part of the peace establishment, yet that character is, comparatively speaking, rather of an equivocal cast; whereas, in every other case, when the most distinct and unequivocal military character has been impressed on a new raised corps, the provision which is wanting here has, nevertheless, been added. It seems to me very difficult to conceive why, in this identical law, it was thought necessary that the provision should have been so expressly introduced as to the regiment of artillery and infantry, (which were most clearly of an equivocal military character,) and yet that it should have been so palpably omitted in relation to the engineers, a new corps, who were constituted an academy, and liable to military duty only when called on by the President, unless Congress intended the exemption in regard to the latter corps. But, whether they did in fact intend it or not, a review of all the analogous laws which they have passed, the component parts of this very law, and the principle that the trial by jury is not to be ousted by implication, do, in my opinion, justify the conclusion that, so far as the question rests on the act of the 16th of March, 1802, the members of this military academy were not subject to the rules and articles of war.

Next in order follows the act of the 25th of February, 1803, in addition to the preceding act, in the third volume of the Laws of the United States, page 530. The first section of this act contains merely a provision in relation to the regiment of artillerists. The second section authorizes the President to appoint one teacher of the French language, and one teacher of drawing, to be attached to the corps of engineers, whose compensation shall not exceed the pay and emoluments of a captain in the line of the army. The third section provides that the commanding officer of the corps of engineers be authorized to enlist, for not less than three years, one artificer and eighteen men, to aid in making practical experiments, and for other purposes; to receive the same pay, rations, and clothing as are allowed to the artificers and privates in the army of the United States, and the same bounty when enlisted for five years, and to be subject to the rules and articles of war. Who are to be so subject? Most clearly those who are the exclusive objects of the rest of the provisions in this section, to wit, the artificers and eighteen men. If it should be asked what reason there can be why these men should be more subject to the rules and articles of war than the engineers and cadets who had before constituted the corps, it would be sufficient to answer that Congress have so provided; but it seems to me that, if it were necessary to assign a further reason, one might be found, without difficulty, on the different footing, in other respects, in which the two parts of this corps stand. For it is observable that the act of the 16th of March, 1802, does not require the engineers and cadets to be enlisted at all, much less to be enlisted for a particular time. The language of this section is, that the President may, when he shall deem it expedient, organize and establish a corps of engineers; not from the army then on hand; for if it had been so intended, it would have been so expressed, as it was in the ninth section of the regiments of artillerists and infantry; but there is a further reason why it could not have been intended to be drawn from the army then on hand; for, by the ninth section of the law, all the officers and privates of that army, who were not taken into the regiments of artillerists and infantry, were directed to be discharged on the 18th of April, 1802, whereas the corps of engineers were to be organized and established whenever thereafter the President should deem it expedient. Were they to be drawn from the regiments of artillerists and infantry, authorized by the previous sections of the acts of 1802? It is not so said, and the inference is excluded by the precision, in point of number, and the compact and separate form into which those regiments had been previously organized. I understand the twenty-sixth section, then, as authorizing the President to organize and establish this corps by a new and original contract with the members who were to compose it. They were not then to be enlisted, but engaged for the price stipulated by law. It is not said for what length of time they were to be engaged, nor is it even said that they were to be commissioned. They were rather an anomalous species of body, to be called into being whenever the President should deem it expedient, and to be formed into a school; an academy for military instruction; whereas the artificers and eighteen men, here authorized, are enlisted for three years, and put, in all respects, on a footing with the artificers and privates of the army. Why is the provision of subjection to the rules and articles of war expressly made as to those men, and again omitted as to the engineers and cadets, as well as the teachers of French and drawing, here authorized, unless the omission was intended? Would it not be a most arbitrary construction to impute to Congress the intention to subject the original corps of engineers and the masters now added to military law, when, on two occasions, most obviously inviting them to the expression of that intention, if it existed, they should, nevertheless, decline that expression, and leave it to be gathered by inference—an inference, too, unwarranted by the whole course in analogous cases? I cannot think that such an interpretation of the law would be sound; and, therefore, as yet, I see nothing that subjects the engineers, cadets, and teachers at West Point to the rules and articles of war. Before I leave this part of the subject I will observe that, if I am wrong in supposing that the original corps of engineers at West Point was not to be drawn either from the existing army or from the regiments of artillery and infantry which were thereafter to constitute the peace establishment of

the United States; and if, on the contrary, they were (according to Colonel Hindman's suggestion,) to be drawn "from the different arms of the army," (composing the peace establishment, I suppose he meant,) it would not yet follow, that, because while belonging to the artillery and infantry they were subject to the rules and articles of war, they would therefore be subject in their new character of engineers; on the contrary, every inference would still follow from the very palpable omission of Congress so to subject them; and, not to multiply instances of the manner in which Congress have legislated in parallel cases, I will call your attention to one only; it is that which you will find in chapter 532, volume fourth of the Laws of the United States, page 541. This act, providing for the destination of a part of the troops authorized to be raised by a previous law, (and by this previous law expressly subjected to martial law,) because it so far changes that destination from the general purposes of war as to limit it to the defence of the seaboard, expressly repeats their subjection to the rules and articles of war, lest, from the mere change of destination, they should be considered as being absolved from the liability to those rules and articles under the original law.

We come now to the act of the 10th of April, 1806, "for establishing rules and articles for the government of the armies of the United States." The ninety-sixth article of these rules and articles is in these words: "All officers, conductors, gunners, matrosses, drivers, or other persons whatever receiving pay or hire in the service of the artillery or corps of engineers of the United States, shall be governed by the aforesaid rules and articles, and shall be subject to be tried by courts martial, in like manner with the soldiers and officers of the other troops in the service of the United States." At the passage of this law there was no corps of engineers except that at West Point; they must, therefore, have been intended; and this is rendered more clear by the consideration that the article in the old rules and articles, from which this is copied, has not the words "or corps of engineers." (See 181. Gray. Appendix, p. 155, sec. 16, art. 1.) These words, therefore, being in the year 1806 for the first time interpolated by Congress, and there being no body to fit the description except the corps of engineers at West Point, I do not see how the conclusion can be fairly avoided that it was intended to apply to them. They were a corps of engineers; they received the pay of the United States; they were in the service of the United States, as much as any other troops on the peace establishment; and therefore that corps, and all other persons in its service, now became subject to martial law; not only the engineers, cadets, artificers, and eighteen privates, who constituted the corps, but the masters or teachers of French and drawing, who were in the service of that corps. So stood the law when the act of the 29th of April, 1812, was passed, entitled "An act making further provision for the corps of engineers." This act, by the first section, provides that certain officers be added to the corps of engineers, and that there be attached to this corps a company of bombardiers, sappers, and miners. The second section provides that the Military Academy shall consist of the corps of engineers, (including, of course, the ten cadets who had been originally attached to it, and who formed a part of it,) and certain new professors, in addition to the teachers of the French language and drawing already provided. I will merely remark, in passing, that these new professors then attached to the corps of engineers come within the description of the ninety-sixth article of the permanent act of 1806, establishing the rules and articles of war, as persons receiving pay in the service of that corps. The third section of the act of 1812 provides that "the cadets heretofore appointed in the service of the United States, whether of artillery, cavalry, riflemen, or infantry, omitting in the enumeration those that had been theretofore appointed in the service of the corps of engineers, or that may in future be appointed, as hereafter provided, shall at no time exceed two hundred and fifty; that they may be attached, at the discretion of the President, to the Military Academy, and be subject to the established regulations thereof; that they shall be arranged into companies," &c. The section, after going on to describe the discipline of the cadets, proceeds to direct the manner of appointment and qualifications of the cadets thereafter to be appointed.

If it were material to the decision of the question which you have submitted to me, I should say that I differed from Colonel Hindman and the court martial in the opinion that, by the third section, the cadets, who had been previously constituted a part of the corps of engineers, were abolished, or amalgamated with the two hundred and fifty authorized by that section to be attached to the academy; for by the second section it is expressly declared that the Military Academy shall consist of the corps of engineers, that is, the existing corps, expressly composed, in part, under the act of 1802, of the ten cadets, which, so far from being abolished, is hereby confirmed; and when you come to examine the component parts of the two hundred and fifty new cadets, who are authorized by the third section, you will find no part of the description which applies to the ten cadets who had been previously attached to the corps of engineers, for these ten had not heretofore been appointed in the service of the United States, either of artillery, cavalry, riflemen, or infantry; the corps of engineers having been, by the previous laws, erected into a corps distinct from them all, and known by a different name; nor were those ten cadets already appointed included in the only remaining part of the description of those "who may in future be appointed, in the manner hereinafter provided." Whatever might have been the intention of Congress, it is very clear to my judgment that they have by this section authorized the President to add to the establishment two hundred and fifty cadets, exclusive of the ten who had been already appointed under the act of 1802. But to proceed directly to the point in question. The cadets embraced in the third section were to be attached, at the discretion of the President, to the Military Academy, and, when so attached, they were to be subject to the established regulations thereof. What is the meaning of this phrase, "attached to the Military Academy?" Does it mean the buildings in which the military art was taught? No; Congress have not left us in the dark on this point; they have expressly defined what they mean by the phrase "the Military Academy." By the twenty-seventh section of the act of 1802 they have expressly declared that the corps of engineers shall constitute this Military Academy; and by the second section of the act immediately under consideration, they have repeated "that the Military Academy shall consist of the corps of engineers," &c. By attaching these cadets, therefore, to the Military Academy, is clearly meant attaching them to the corps of engineers, with their train of professors, who constitute that Academy; and, while so attached, they compose a part of this corps. Being thus identified with the corps, if this were a case in which implication could be suffered to speak, it might be fairly held that they became, by irresistible consequence, subject to all the laws which bound that corps. Congress, however, with their habitual caution, have saved us the necessity of collecting their intention by inference in this respect, by expressly declaring that the cadets thus attached to the pre-existing military body known by the name of the Military Academy should be subject to the established regulations of that body. What were these regulations? One of them was, (under the act of 1802,) that that body should be subject to do such duty, in such places, and on such service, as the President should direct. Another was, (under the act of 1806,) that that body should be subject to the rules and articles of war, and be subject to be tried by courts-martial; and the section under consideration expressly declares that the two hundred and fifty cadets shall be subject to the same regulations.

It is said, however, by Colonel Hindman, that the ninety-sixth article of the rules and articles of war embraces only the case of cadets in the service of the artillery and corps of engineers; and that these cadets, not being in the service of either of these corps, are not comprehended by that article. In answer to this, it might be very fairly insisted, that those cadets, after their attachment to the corps of engineers, come within the very description of the ninety-sixth article, being persons who receive pay in the service of the corps of engineers. But let it be

admitted that the new cadets are not within the description of the ninety-sixth article; can it be denied that the original body who composed the Military Academy were within that description? for, if they were, the act of 1812 places the new cadets precisely on the same footing, by subjecting them expressly to the same established regulations.

Lest it should be thought that this phrase, "established regulations," has a narrower sense than that which I have assigned to it; that it allows, for example, to the allotment for the hours of study, for exercise, for relaxation and refreshment, &c.; it may not be amiss to observe that "the same rules and regulations" are the very terms employed by Congress in parallel cases, with an unquestionable reference to a subjection to martial law. In support of this, see chap. 376, sec. 2, vol. 4, p. 405; chap. 532, sec. 2, p. 541. In chap. 599, sec. 4, vol. 4, p. 645, the phrase here is, that the new troops "shall be placed, in every respect, on the same footing as the other regular troops of the United States." But if this phrase, "established regulations," is to have the strictest sense which I have supposed, then the new cadets are not subject to do duty, where, and when, and how the President may direct. The construction which would subject them to do duty cannot fairly avoid the other.

It is suggested by Colonel Hindman, on behalf of the court-martial, that these cadets are merely students. In one sense they are so, and so was the old corps known under the name of artillerists and engineers; so was the original corps of engineers, who constituted the Military Academy; for both "books, instruments, and apparatus for study," were expressly provided by law; yet this character of students did not exempt them from liability to martial law. But if the suggestion is intended to place cadets on the footing of civil students, clothed with all their civil privileges and immunities, it is proper to remark, that those cadets occupy a very different ground; they are enlisted soldiers; they engage, like soldiers, to serve five years, unless sooner discharged; they receive the pay, rations, and emoluments of sergeants; they are bound to perform military duty, in such places, and on such service, as the commander-in-chief of the army of the United States shall order; and, finally, by the act of the 3d of March, 1815, fixing "the military peace establishment of the United States," the corps to which they are attached, and of which they form a part, is expressly recognised as a part of that military establishment. See the act in the Laws of the United States, vol. 4, p. 825.

I have given you all this trouble, sir, from my respect for the court-martial, with whom I have been obliged to differ, as well as from the real delicacy and importance of the question; and after every allowance for the genius of our constitution and laws, and after rejecting every thing like implication and inference from the consideration of this question, I come to the conclusion that the corps at West Point form a part of the land forces of the United States, and have been constitutionally subjected by Congress to the rules and articles of war, and to trial by courts-martial.

I have the honor to be, sir, with the greatest respect, your obedient servant,

WILLIAM WIRT.

To the Hon. JOHN C. CALHOUN, *Secretary of War.*

Z.

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *November* 10, 1819.

GENERAL ORDERS.

The President, having considered the proceedings of the general court-martial which, by his order of the 23d of September last, was reassembled at West Point, to proceed in the trial of Thomas Ragland, W. M. C. Fairfax, N. H. Loring, Charles Vining, and C. R. Holmes, cadets of the Military Academy, disapproves the decision of the court in declaring that its jurisdiction was not competent to the trial of cadets, and orders it to be dissolved.

The President is of opinion that the professors, teachers, and cadets are governed by the rules and articles of war. Although the institution is intended for instruction, and is preparatory for military promotion, it is nevertheless evidently governed by martial law.

He disapproves, also, the conduct of the cadets in the instances stated by the Secretary of War in his letter of the 15th of January last to Major Thayer, which, with this order, he directs to be read by the major to the officers of the station, the professors, teachers, and cadets, who are to be further assembled for the purpose.

If military orders are not promptly obeyed, all discipline is at an end; and if any order is supposed to impose onerous conditions, the objections to it will always be heard, and will have more weight when urged by a cadet giving proof of his obedience to the order and of his attachment to discipline.

In consideration, however, of the long suspension of the cadets, which, from their age, has operated as a severe penalty, he orders that their suspension be removed, and that they be restored to the academy. He adopts this measure in the expectation that these young men will, by their future conduct, give such an example of obedience to orders and of discipline as to meet the approbation of the Executive.

By order: D. PARKER, *Adj. and Insp. Gen.*

In consequence of the unmerited severities imposed by this last order upon Messrs. Fairfax, Ragland, Vining, Loring, and Holmes, and also from the approval, which it contains, of those measures and abuses which formed the subjects against which the cadets complained, Messrs. Fairfax, &c. forwarded, a few weeks since, their resignations to Washington. They have been accepted.

DECEMBER 16, 1819.

16th Congress.] No. 177. [1st Session.

EXPEDITION TO THE MOUTH OF THE YELLOW STONE RIVER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 3, 1820.

Mr. Smyth made the following report:

The Committee on Military Affairs have, according to order, inquired into the expenditures which have been, and are likely to be, incurred in fitting out and prosecuting the expedition ordered to the mouth of the Yellow Stone river, on the Missouri, and concerning the objects intended to be accomplished by the expedition. The movement of the troops, made and intended to be made, and the incurred and estimated expense, appear by the letter of the Quartermaster General to the Secretary of War, marked A, and the statements numbered 1, 2, 3, and 4; the objects of the expedition are fully explained by the letter of the Secretary of War to the chairman of the military committee, marked B. The committee have also obtained a statement of the distribution of the army of the United States, its total strength, and the strength of garrisons and posts, marked C.

All which is respectfully submitted.

A.

Letter from the Quartermaster General to the Secretary of War.

Sir: Quartermaster General's Office, *December* 28, 1819.

In obedience to your order, requiring a statement of the expense incurred by the movements on the Missouri, and an estimate of the sum which will be required for the ensuing three years, I have the honor to report, that several of the accounts connected with those movements have not yet been received, particularly that of Colonel James Johnson, who was employed as a transporter of troops, provisions, and stores. But, on the most liberal estimate, I am convinced that the whole expense of the movement for the present year, including all the supplies furnished by the Quartermaster's Department, cannot exceed one hundred and sixty-three thousand dollars. From that sum should be deducted the expense which would have accrued had the troops remained at their former stations, as well as the entire value of the barges, batteaux, and other means of transportation, (the property of the Government) attached to the expedition; and the remainder will be the amount of expense actually incurred. As the establishments on the Mississippi are included in the plan of defence for the western frontier, it is thought that a statement of the movements made, of the works established, and of the expense incurred, might not be unsatisfactory.

By a reference to the accompanying statements, it will be seen that the expenses of the establishments, both on the Missouri and the Mississippi, will diminish every year. Those statements are predicated upon arrangements already made for the supply of a part of the provisions, all the forage, fuel, and quarters, and, after the next year, the greater part of the transportation, by the troops, and at but trifling expense to the public.

No. 1 shows the movements made, and the works established by the troops, on both rivers.

No. 2 is a statement of the *expense incurred by the movement on the Missouri*, and an *estimate* of the probable expense for the ensuing three years. You will perceive that the two regiments have cost sixty-four thousand two hundred and twenty-six dollars more than they would have cost had they remained at their original stations. With that additional expense, one of the regiments has been moved nearly three thousand miles, barracks have been erected for a thousand men, and an important work has been established, which will enable us to hold in check *five powerful and warlike nations of Indians.*

No. 3 is a statement of the expense incurred in making the establishment on the Mississippi, with an estimate of the amount required for the next three years. The troops on that river have cost less than they would have cost at their former stations, in consequence of their having provided boats, fuel, quarters, &c. without expense to the Government. The greater part of the transportation on the Mississippi will be done, in future, by the troops, by which a considerable sum will be saved.

No. 4 is a statement of the works on which it is proposed that the troops be employed. It is believed that those works may be accomplished in less than three years; they will be important in any plan of defence, particularly the roads, and the avenue formed by the Fox and Ouisconsin rivers, which will be necessary to afford a communication between the several frontier posts, and between those posts and our settlements.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Q. M. G.*

The Hon. J. C. Calhoun, *Secretary of War.*

No. 1.

Statement showing the movements of the troops composing the Missouri and Mississippi expeditions, in the course of the year 1819.

CORPS.	Whence the movem'ts were commenced.	Routes by which the movements were made.	Present station of the troops.	Distance from the points of departure to the present stations.
				Miles.
6th regiment of infantry,	Plattsburg, N. York,	N. York, Pittsburg, and St. Louis,	Council Bluffs,*	2,628
Detachment of riflemen,	Philadelphia, .	Pittsburg and St. Louis, .	Council Bluffs,	2,350
Detachment of riflemen,	Prairie du Chien, .	Belle Fontaine and Missouri, .	Council Bluffs,	1,270
Detachment of riflemen,	Belle Fontaine, .	Missouri River, . .	Council Bluffs,	670
Detachment of riflemen,	Martin Cantonment,	Missouri River, . .	Council Bluffs,	280
Detachment of 5th infantry,	Philadelphia, .	Pittsburg and St. Louis, .	Prairie du Chien,†	2,180
Large detachment of the 5th regiment.	Detroit, . .	Green Bay, Fox, and Ouisconsin, rivers, to Prairie du Chien, thence by the Mississippi, . .	St. Peter's,‡ .	1,270

* At Council Bluffs a strong work has been erected by the troops, for the security of the cantonment, and barracks sufficient for the accommodation of one thousand men. Provisions, clothing, stationary, and camp equipage, for one year, and ordnance and ordnance stores, to complete the establishments, have been forwarded to the respective posts.

† At Prairie du Chien the barracks have been repaired by the troops, and the wheat in cultivation secured, sufficient for the subsistence of the garrison for the ensuing winter.

‡ At St. Peter's barracks have been erected for the accommodation of the troops, and a work commenced for the security of the post.

No. 2.

Estimate of the expenses of the troops composing the Missouri expedition, for the year 1819, *with what their expense would have been had their stations not been changed, and the amount which will be required for the succeeding three years.*

Estimated cost of the transportation of provisions, ordnance, ordnance stores, camp equipage, and the troops, in the year 1819,		$152,994 00	
Estimated cost of fuel and stationary, for the troops, and forage for public horses and oxen, and incidental expenses,		10,000 00	
		162,994 00	
From which deduct the average cost of the two regiments composing the expedition, had they remained at Plattsburg, and Belle Fontaine,	$78,768 00		
Also, the estimated value of the means of transportation attached to the expedition, consisting of barges, batteaux, horses, oxen, &c.	20,000 00		
		98,768 00	
Extra expense incurred by the movement, in the year 1819,			$64,226 00
Will be required for the year 1820,		100,000 00	
1821,		53,300 00	
1822,		50,140 00	
			203,440 00
Extra expense incurred in 1899, and the amount which will be necessary for the succeeding three years,			267,666 00
From which deduct the estimated cost of the two regiments composing the expedition, had they remained at their stations, for the years 1820, 1821, and 1822, at an average of $39,384, per regiment, per annum,			236,304 00
Extra expense incurred by the movement, in the course of four years,			31,362 00
Which, deducted from the amount saved on the Mississippi, results in a saving, in the course of four years, in the two expeditions, of			$42,485 84

No. 3.

Estimate of the expenses of the troops composing the Mississippi expedition, for the year 1819, *with what their expenses would have been had they remained at their former stations, and the amount which will be required for the succeeding three years.*

Estimated cost of the transportation of provisions, ordnance, ordnance stores, camp equipage, and the troops, in the year 1819,		$37,068 16	
Estimated cost of fuel and stationary for the troops, and forage for public horses and oxen, and incidental expenses,		6,500 00	
			$43,568 16
From which deduct the average cost of the regiment composing the expedition, had it remained at its former station in 1819,		39,384 00	
Also the estimated value of the means of transportation attached to the expedition, consisting of barges, batteaux, horses, oxen, &c. belonging to the public,		5,000 00	
			44,384 00
Estimated saving in the year 1819, by the movement,			815 84
Estimated cost of a regiment, stationed at Detroit for three years, at an average of $39,384 per annum,		118,152 00	
From which deduct the amount which will be required for this expedition,			
for the year 1820,	$23,120 00		
for the year 1821,	12,000 00		
for the year 1822,	10,000 00		
		45,120 00	
			73,032 00
Total estimated saving by this expedition, in the course of four years,			73,847 84
From which deduct the extra expense incurred by the Missouri expedition in four years,			31,362 00
Results in a saving to the Government, in the course of four years, by the two expeditions, of			$42,485 84

No. 4.

Summary of the movements which will be made by the troops composing the Missouri and Mississippi expeditions, in the course of the ensuing season, and the manner in which it is proposed to employ them.

It is proposed to move the rifle regiment from the Council Bluffs to the Mandan villages, and to erect barracks there, properly defended, for five hundred men.

To remove some of the principal obstructions to the navigation of the Missouri river, such as planters, sawyers, and rafts; this work may be accomplished by the troops on the Missouri, in the course of three winters.

To open a road from Chariton, in Missouri Territory, to the Council Bluffs, and thence to the Mandan villages.

To open a road from the Council Bluffs to the post at the mouth of St. Peter's, on the Mississippi.

To improve the navigation of the Ouisconsin and Fox rivers, and connect them by a canal, or good road, in order to facilitate the communication between Fort Howard, at Green bay, and Prairie Du Chien, on the Mississippi; those rivers are navigable for batteaux, within one mile of each other.

B.

Letter from the Secretary of War to the Chairman of the Military Committee.

SIR: DEPARTMENT OF WAR, *December* 29, 1819.

In reply to your letter of the —— ——, requesting to be informed of the expenditures which have been, and which are likely to be, incurred in fitting out and prosecuting the expedition ordered to the mouth of the Yellow Stone, on the Missouri river, and of the objects intended to be accomplished by the expedition, I have the honor to make the following statement:

The enclosed report and estimates from the Quartermaster General, marked Nos. 1, 2, 3, 4, and 5, with a statement of the duty performed, and that which is contemplated, exhibits the expense of the expedition up the Missouri, for the last, and the next succeeding three years, with a similar statement in relation to that on the Mississippi. Though the last is not referred to in your letter, yet, as the two movements constitute a part of the same system of measures, I believed that it would not be unacceptable to the committee to receive a statement of the whole expenses incurred, or likely to be incurred, in its execution.

The expedition ordered to the mouth of the Yellow Stone, or rather to the Mandan village, (for the military occupation of the former, depending on circumstances, is not yet finally determined on,) is a part of a system of measures, which has for its objects, the protection of our northwestern frontier, and the greater extension of our fur trade. It is on that frontier only that we have much to fear from Indian hostilities. The tribes to the southwest are either so inconsiderable, or so surrounded by white population, and, what is of not less importance, so cut off from intercourse with all foreign nations, that there are reasonable grounds to believe, that we shall, in future, be almost wholly exempt from Indian warfare in that quarter. Very different is the condition of those on our northwestern border. They are open to the influence of a foreign Power, and many of the most warlike and powerful tribes, who, by the extension of our settlements, are becoming our near neighbors, are yet very little acquainted with our power. To guard against their hostility, it has been thought proper to increase our forces on that frontier from one to three regiments; and to occupy new posts, better calculated to cut off all intercourse between the Indians residing in our territory, and foreign traders or posts; and to garrison them with a force sufficiently strong to overawe the neighboring tribes. With this view, measures have been taken to establish strong posts at the Council Bluff and the Mandan village, on the Missouri; at the mouth of the St. Peter's, on the Mississippi; and the falls of St. Mary's, between Lakes Superior aad Huron. The posts at Green Bay, Chicago, Rock Island, and Prairie du Chien, will still be continued. The posts at the mouth of the St. Peter's, and at the Council Bluff, have already been occupied; and that at the Mandan village will probably be the next summer. The position at the falls of St. Mary's has been reconnoitered, and it is intended to make preparation the next summer to occupy it. The occupation of these posts with an adequate force will, it is believed, by establishing over the various tribes in that quarter the influence of our Government, and preventing or diminishing that of others, have the most beneficial effects. The position at the Council Bluff is a very important one, and the post will consequently be rendered strong, and will be occupied by a sufficient garrison. It is about half way between St. Louis and the Mandan village, and is at that point on the Missouri which approaches the nearest to the post at the mouth of the St. Peter's, with which, in the event of hostilities, it may co-operate. It is, besides, not more than one hundred and eighty miles in advance of our settlements on the Missouri, and is in the centre of the most powerful tribes, and the most numerous Indian population, west of the Mississippi. It is believed to be the best position on the Missouri, to cover our flourishing settlements in that quarter, and ought, if it were wholly unconnected with other objects, to be established for that purpose alone.

The position at the Mandan village has been selected for a military post, on account of the many advantages which it is supposed to possess. At that point the Missouri approaches nearest to the establishment of the Hudson Bay Company, on the Red River of the Lakes, near the mouth of the Assinaboin, and, at the same point, it takes a direction to the south, which, in the event of hostilities, would render it more difficult for any force which might be brought against it from the possessions of our northern neighbors to interrupt the communication with the posts below. It is besides well situated to protect our traders, and to prevent those of the Hudson Bay Company from extending their trade towards the head-waters of the Missouri, and along the rocky mountains within our limits, which tract of country is said to abound more in fur, and of a better quality, than any other portion of this continent. The post at the mouth of the St. Peter's is at the head of navigation on the Mississippi, and, in addition to its commanding position in relation to the Indians, it possesses great advantages, either to protect our trade or to prevent that of foreigners. The post contemplated at the falls of St. Mary's will, it is believed, be of very great importance. The position, as has been stated, has been reconnoitered, and it is found that the communication between the two lakes can be commanded from our side, as the channel passes close under the western shore. The post may be established and maintained at very little additional expense. When these posts are all established and occupied, it is believed, with judicious conduct on the part of our officers, that our northwestern frontier will be rendered much more secure than heretofore, and that the most valuable fur trade in the world will be thrown into our hands.

Trade and presents, accompanied by talks calculated for the purpose, are among the most powerful means to control the action of savages; and so long as they are wielded by a foreign hand our frontier must ever be exposed to the calamity of Indian warfare. By the treaty of 1794, Great Britain obtained the right of trade and intercourse with the Indians residing on our territory; which gave her nearly a monopoly of the trade with the various tribes of the lakes, the Mississippi, and Missouri, and a decided control over all of their measures. The effects of this ascendancy over them must be remembered and lamented so long as the history of the late war shall be perused. The most distressing occurrences and the greatest disasters of that period may be distinctly traced to it. This right of intercourse and trade with the Indians which has proved to us so pernicious terminated in the war, and was not reserved by the treaty of Ghent; and, in the year 1816, Congress passed a law which authorized the President to prohibit foreigners from trading with the Indians residing within our limits, and instructions have been given under the act to prevent such trade; but it is obvious that the act and instructions to Indian agents can have but little efficacy to remedy the evil. Without a military force properly distributed the trade would still be continued, and even if it were prevented, that which is more pernicious would still remain—Indian talks at the British posts, accompanied with a profuse distribution of presents.

This intercourse is the great source of danger to our peace; and until that is stopped our frontier cannot be safe. It is estimated that upwards of three thousand Indians from our side of the lakes visited Malden and Drummond's island the last year; and that, at the latter place alone, presents were distributed to them to the amount of ninety-five thousand dollars. It is desirable that this intercourse should terminate by the act of the British Government; and it is believed that it has been continued by its agents in Canada, rather in consequence of the practice before the late war under the treaty of 1794, than by the direct sanction and authority of that Government. Its

attention has, however, been called to it through the proper Department; and, as it is wholly inconsistent with the friendly relations between the two countries, it is hoped that it will not be permitted in future. The occupation of the contemplated posts will, in the mean time, put in our hand the power to correct the evil. The posts on the lakes will enable the Government not only to check effectually all trade with foreigners in that quarter, but also to restrain the Indians from passing our limits. On that side the remedy will be complete. On the Mississippi and the Missouri the posts at the St. Peter's and Mandan village are well selected for the same purpose. From the Lake of the Woods, westwardly, the 49th parallel of latitude is the boundary established by the late convention between the United States and the British possessions. The Hudson Bay and the Northwest Companies have several posts and trading establishments which are believed to be much to the south of this line, and, consequently, within our territory. When the boundary is ascertained and marked, the policy of the act of the 29th April, 1816, already referred to may, by means of these posts, be effectually enforced; and in that quarter, as well as on the side of the lakes, we will have the power to exclude foreigners from trade and intercourse with the Indians residing within our limits. The facility of communication by the Mississippi and Missouri with our posts on those rivers, is so much greater than that between Hudson's Bay or Montreal, (particularly without passing through our territory,) and the British posts north of ours, that our ascendency over the Indians of those rivers both as to trade and power ought, with judicious measures on our part, to be complete.

I deem it my duty respectfully to suggest to the committee, as it is intimately connected with the subject of the present inquiry, that the present system of Indian trade is defective; and that, besides endangering the peace of our country, it cannot meet, on equal terms, the well-organized trading associations of our northern neighbors. I will, however, forbear from presenting any additional observations on this point, as the report which I had the honor to make to the House of Representatives on the 5th December, 1818, contains my views in relation to it.

The ultimate success of the contemplated measures must necessarily depend very much on the manner in which they are executed. With this impression great care has been taken to select officers every way well calculated to effect the objects of Government. Strict orders have also been given to use every effort to preserve peace with the Indians, and impress them favorably with our character; and it affords me much pleasure to state to the committee that the conduct of Colonel Atkinson, (who has received every aid in the Indian Department from Major O'Fallan, the agent,) and Colonel Leavenworth, the former of whom commands the troops on the Missouri, and the latter those on the Mississippi, as well as that of their officers and men, has been very satisfactory, and has fully justified the confidence reposed in them. There is every reason to expect that, under their judicious conduct, the posts will be established and maintained without exciting the hostility or jealousy of the Indians.

I have the honor to be your most obedient servant,

J. C. CALHOUN.

Hon. A. SMYTH, *Chairman of the Committee on Military Affairs.*

C.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *December* 21, 1819.

I have the honor to lay before you an abstract return of the army by regiments and corps, and a return by posts, taken from the last returns on file in this office.

When the returns due at the close of this year are received at this office I shall be able to present a more perfect report of the army.

I have the honor to be, sir, with perfect respect, your obedient servant,

D. PARKER, *Adjutant and Inspector General.*

To the SECRETARY OF WAR.

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *November* 30, 1819.

Strength of the army of the United States, by regiments and corps, taken from the last returns on file in this office.

Divisions.	Regiments and corps.	Commiss'd officers.	Non-commissioned officers and privates.	Aggregate.	Remarks.
North Division.	General staff,	42	-	42	Head-quarters, Brownville, New York.
	Regiment of light artillery,	41	585	626	Head-quarters, Boston, Massachusetts.
	First battalion, corps of artillery,	19	380	399	Head-quarters, Baltimore, Maryland.
	Second battalion, corps of artil'y,	18	401	419	Head-quarters, Fort Constitution, Portsmouth, New Hampshire.
	Third battalion, corps of artil'y,	19	350	369	Head-quarters, Fort McHenry, Baltimore, Md.
	Fourth battalion, corps of artil'y,	13	276	289	Head-quarters, New York harbor. No return of Stockton's company; not included in aggregate.
	Second regiment of infantry,	35	675	710	Head-quarters, Sackett's Harbor, New York.
	Third regiment of infantry,	32	377	409	Head-quarters, Fort Howard, Green Bay.
	Fifth regiment of infantry,	33	381	414	Head-quarters, Prairie du Chien, Missouri.
	Total,	252	3,425	3,677	
South Division.	General staff,	54	-	54	Head-quarters, Nashville, Tennessee.
	First battalion, corps of artillery,	22	216	238	Head-quarters, Charleston harbor, S. Carolina.
	Second battalion, corps of artil'y,	23	237	260	Head-quarters, Norfolk, Virginia.
	Third battalion, corps of artil'y,	18	336	354	Head-quarters, New Orleans, Louisiana.
	Fourth battalion, corps of artil'y,	19	235	254	Head-quarters, Huntsville, Alabama territory.
	First regiment of infantry,	33	344	377	Head-quarters, Baton Rouge, Louisiana.
	Fourth regiment of infantry,	37	532	569	Head-quarters, Montpelier.
	Sixth regiment of infantry,	34	460	494	On Missouri river.
	Seventh regiment of infantry,	34	199	233	Head-quarters, Fort Scott, Alabama.
	Eighth regiment of infantry,	20	400	420	Head quarters, near New Orleans.
	Rifle regiment,	24	608	632	On the Missouri river.
	Military convicts,	-	107	107	Near New Orleans.
	Total,	316	3,676	3,992	
	Aggregate by regiments and battalions,	568	7,101	7,669	
	Engineer Department,	18	102	120	Academic staff and cadets not included.
	Ordnance Department,	41	354	395	
	Army aggregate,	627	7,557	8,184	

NOTE.—Although the recruiting service has generally been successful, this return exhibits an aggregate of several hundred less than those of preceding quarters. This may be explained by the following considerations: The terms of the last of the war men, many of whom were enlisted in 1814, expire about this time; to which must be added the unusual number of desertions, (from one regiment they have exceeded one hundred men in six months.) To balance this, however, there are more than six hundred recruits on their march to join, which, together with detachments not included in the monthly returns made at the head-quarters of regiments and corps, and the recruits at different rendezvous, will, it is believed, make the aggregate of the army 9,000 at the close of this year.

Distribution of the army of the United States, showing the strength of posts and garrisons.

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *November* 30, 1819.

Taken from the last returns on file in this office.

D. PARKER, *Adjutant and Inspector General.*

16th Congress.] No. 178. [1st Session.

NUMERICAL FORCE OF THE ARMY IN EACH YEAR SINCE 1814.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 3, 1820.

War Department, *December* 31, 1819.

Sir:

Conformably to a resolution of the House of Representatives of the 28th instant, requiring this Department to report the aggregate amount of the military peace establishment actually in service for each and every year since 1815, designating the number of officers, non-commissioned officers, musicians, and privates, I have caused an abstract of the general returns to be prepared, which is herewith respectfully transmitted.

I have the honor to be, sir, your obedient servant,

J. C. CALHOUN.

To the Speaker *of the House of Representatives, Capitol.*

Adjutant and Inspector General's Office, *December* 31, 1819.

Abstract from the annual general returns of the army since the peace, in 1815, *showing the number of officers, non-commissioned officers, musicians, and privates, in each year, as reported by the latest returns received at this office, at the close of each year.*

RETURNS.	Commissioned officers.	Non-commissioned officers.	Musicians.	Privates.	Aggregate.
December, 1815, - - - -	638	1,109	325	7,341	9,413
December, 1816, - - - -	726	1,071	356	7,871	10,024
December, 1817, - - - -	640	923	320	6,338	8,221
December, 1818, - - - -	644	887	306	5,839	7,676
December, 1819, (from the last returns,) -	641	826	326	6,295	*8,688
Recruits on their march to join, - -				600	

Note.—These returns show the number of troops on duty with their corps at the several periods; but it must be observed that the number is constantly fluctuating, by discharges, casualties, and enlistments; the actual number being greater than can be returned at any given day; it being impracticable to show, by a general return of the army, of any period, all the previous casualties.

D. PARKER,
Adjutant and Inspector General.

* Some of the returns of this year bear date several months back; and it is known that more than six hundred recruits are on their march to join, which, together with the several detachments and recruiting parties not included, makes an estimated aggregate, at the close of this year, of *nine thousand.*

16th Congress.] No. 179. [1st Session.

EXECUTIONS AND OTHER PUNISHMENTS ILLEGALLY INFLICTED IN THE ARMY SINCE THE YEAR 1815.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 10, 1820.

Washington, *January* 8, 1820.

To the House of Representatives of the United States:

In compliance with a resolution of the House of Representatives of the 14th December, 1819, requesting me "to cause to be laid before it any information I may possess, respecting certain executions which have been inflicted in the army of the United States, since the year 1815, contrary to the laws and regulations provided for the government of the same," I transmit a report from the Secretary of War, containing a detailed account in relation to the object of the said resolution.

JAMES MONROE.

SIR: WAR DEPARTMENT, *January* 6, 1820.

I have caused the records of this Department to be examined for all the information it possesses "respecting certain executions or other punishments which may have been inflicted in the army, since the year 1815, contrary to the laws and regulations provided for the government of the same," conformably to a resolution of the House of Representatives of December 14, 1819; and I now have the honor to state, that, as soon as it was reported to this Department that "Colonel King, of the fourth infantry, while commanding at Pensacola, had given orders to shoot down deserters if found within the limits of Florida," I directed the enclosed order, marked A, to be sent to him. His answer to this order was received during my absence last summer. The colonel reported that such order had been given by him, and that it was given in conformity with the established usage of service, when other means of checking desertion, which had become so frequent as to threaten the total reduction of the force under his command, had failed. He also stated that no deserter was shot during his command; but that the order was kept up by his successor, and that a man was shot by the party sent in pursuit of him. The colonel's report was made the basis of a military investigation.

The enclosed orders, marked B and C, were issued by this Department on the 10th of August, and, by the last reports, the general martial were still in session, on the 4th of December, at Cantonment Montpelier, in Alabama.

It was also reported to this Department, in August last, that a commissioned officer at West Point had improperly punished several soldiers by flogging. Major Thayer, the commanding officer at that post, was immediately ordered to inquire into and report the facts. His inquiry established the fact of whipping, without trial; on which the enclosed order, marked D, was issued, and no further complaints have been made. All the other cases which are known to this Department are found among the records transmitted after they have been acted on by the commanding generals, "to the end that the persons entitled thereto may be enabled, upon application, to obtain copies thereof," and are embraced in the report of the Adjutant and Inspector General herewith enclosed, marked E.

I have the honor to be, very respectfully, your obedient servant,

J. C. CALHOUN.

To the PRESIDENT OF THE UNITED STATES.

A.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *March* 29, 1819.

It has been reported to the War Department, from a source entitled to credit, that since you have had the command in Florida, and at Pensacola, "*orders have been given to the military to shoot down deserters, if found within the limits of Florida; and that such orders emanated from Colonel King, military commandant, and have accordingly been executed.*

The Secretary of War directs, that you forthwith make a particular and detailed report, stating the orders, by whom given, by whom executed, on whom executed, and the time when executed; with such other facts as you may deem important on this subject.

I have the honor to be, sir, your obedient servant,

D. PARKER,
Adjutant and Inspector General.

Colonel WILLIAM KING, *4th inf., Tensaw Post Office, Alabama.*

B.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *August* 10, 1819.

The commanding general of the south division has, this day, been ordered to detail and organize a general court-martial for the trial of Colonel William King, of the fourth infantry. You will, therefore, relieve Colonel King in his command, put him in arrest, and direct him to remain at such place as you shall deem most convenient, to meet the orders of the general of division. You will report his arrest and station to General Jackson as soon as practicable.

By order: D. PARKER,
Adjutant and Inspector General.

Major General GAINES, *United States Army, Augusta, Georgia.*

C.

Extract of a general order, dated

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *August* 10, 1819.

GENERAL ORDER.

The commanding general of the south division will detail and organize a general court-martial, as soon as practicably consistent with the interest of the service, for the trial of Colonel William King, of the fourth infantry. Such charges, documents, and communications as the War Department possess, are herewith transmitted, to be put into the hands of the judge advocate of the south division, or such officer as may be detailed for that duty, in case he cannot attend the court.

D.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *September* 30, 1819.

The President directs me to state that he has examined your report of the 2d instant, and the several communications referred to, relative to the troops attached to your command.

The corporal punishment inflicted on the men at West Point, being contrary to law, is not justified by the reasons given for it. It is a cause of much regret to see an officer of merit and discernment give his sanction to a

proceeding so highly improper. If evils attain an alarming height, they should be stated to the Department, that such remedies as the laws authorize, and the means of the Government are equal to, may be applied to them, but in no case should an officer take the remedy into his own hands, especially in a manner positively prohibited by law.

These acts are disapproved, and the President directs that you prevent their recurrence.

I have the honor to be, sir, your obedient servant,

D. PARKER,
Adjutant and Inspector General.

To Major S. THAYER, *Sup. Military Academy, Com. West Point, N. Y.*

E.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *January* 3, 1820.

On your order, requiring me to state all "executions, or other punishments which may have been inflicted in the army since the year 1815, contrary to the laws and regulations for the government of the same," if any such are known to have occurred, all the proceedings of court-martials, on file in this office, have been referred to; from which I have made the extracts herewith enclosed.

A general court martial, ordered by General Gaines, in February, 1816, sentenced a soldier to receive *fifty cobs, or lashes, on his bare skin.* This sentence was confirmed, but, by the orders of the general in other cases, of which extracts are enclosed, pointedly disapproving whipping, it appears that he makes a distinction between *cobs* and "*stripes and lashes,*" which last are only mentioned in the act of May 16, 1812, repealing a part of the eighty-seventh article of the rules and articles of war.

It also appears, that, soon after the peace, two general courts-martial, ordered by General Macomb, sentenced several soldiers to receive *fifty lashes each*, which sentences were approved by the general, and ordered to be carried into effect. As such sentences have not since occurred, it is presumed that an impression prevailed in that command, at that time, that the act fixing the peace establishment, by generally repealing the laws enacted during the late war, restored the provision which authorized punishments by stripes and lashes before the war.

These are the only cases I have been able to find on the records; and it will be observed that all, except that of Major McGlassin, were within the jurisdiction of the commanding generals, and never came up to the War Department, but as a place of deposite for the records of courts, "to the end that the persons entitled thereto may be enabled, upon application, to obtain copies thereof." In this case the sentence of the court was approved by the President, and the major was accordingly dismissed the service.

I have the honor to be, sir, with perfect respect, your obedient servant,

D. PARKER,
Adjutant and Inspector General.

To the SECRETARY OF WAR.

Extracts.—From the proceedings of Courts-Martial, since the peace in 1815, *on file in the Adjutant and Inspector General's Office.*

It appears, by the record of a general court-martial, held at Detroit, on the 11th of September, 1816, that Lieutenant Dake, of the fifth infantry, was charged with, and found guilty of, "flogging John Meldrum," a private of Captain Pelham's company, and sentenced to be "reprimanded in general orders."

It appears, by the original record of a general court-martial, held at Montpelier, in April, 1817, that privates Samuel Dean and J. V. Mounce were both severely whipped, by order of their commanding officer, after having been brought in from desertion, for having fired on the party which was sent in pursuit of them; the fact of which was substantiated by evidence.

Extract from the order of Major General Gaines, in which he approved the sentence.

[They were found guilty of desertion, and sentenced to hard labor.]

The general takes this occasion to observe, that the punishment of a prisoner, before trial, beyond what may be unavoidable, in putting on irons and keeping him in close confinement, is irregular, and cannot be tolerated.

Thomas Coles, a matross of company "F," regiment of light artillery, was tried by a general court-martial, in December, 1817, on the following charge, viz:

"Making a false and malicious complaint against Captain George N. Morris, regiment of light artillery, to Lieutenant Colonel Abraham Eustis, on the 22d of November, 1817."

GEORGE N. MORRIS, *Capt. Lt. Artillery.*

To which the prisoner pleaded not guilty.

Lieutenant Colonel ABRAHAM EUSTIS, being sworn, testified, in relation to the charge exhibited against the prisoner, as follows:

On the 22d of the last month, the prisoner came to my office, and stated that Captain Morris had been beating him. Perceiving that he was very much irritated at the moment, I would not listen to his complaint, but directed him to come to me immediately after guard mounting the next morning; at that hour I sent for Captain Morris, to be present to hear the complaint. The prisoner came at the appointed hour. He then stated to me, in the presence of Captain Morris, that he (Captain Morris) had beaten him very severely with a club, and, I think, said he had knocked out, or loosened, all the teeth on one side of his head. I questioned him as to the provocation given for such treatment; he denied any disrespect in his conduct, and said, he had merely objected to receiving a great coat which had been branded on the back. I read to him the article, among the rules and articles of war, which relates to complaints made by soldiers against their commanders, in order to inform him of the course necessary for me to pursue. Captain Morris denied the statement made by the prisoner, and the complaint not being withdrawn, the subject was referred to a regimental court-martial; from the decision of which the prisoner appealed.

Captain MORRIS, being sworn, testified as follows:

On the evening of the 22d of November, 1817, I ordered the orderly sergeant to march the company to my quarters, to receive the great coats. The company was paraded directly in front of my quarters, the orderly sergeant and one of the men, the inside. The fixed numbers were then called, for the men to receive their great coats; when the prisoner's name was called, he came to receive his coat, immediately went out, and was gone about two minutes; he then rushed into my quarters, came very near me, appeared much agitated, and asked me if that was the coat he had paid for the last pay day. I told him it was. What, said he, holding the coat out, marked in that way? Yes, said I, repeating his words, marked in that way! I told him to take the coat and be off; he spitefully threw the coat down, and said, he would be *damned* if he would take it, or accompanied the act with some oath; said he would as willingly be branded on the forehead as on the back, and was going out of the door. I ordered him into the next room; he refused. I clinched him, and pulled him into the room; I ordered him to pull off his coat, which he refused to do. I took a small stick, about two feet long, half an inch thick, and from an inch and a half to two inches wide, and struck him two or three times. He was then pulling the coat off, and offered to take the great coat, if I would not strike him again, which I did not do, when I found he meant to obey me. I then told him to take his great coat and go to his quarters. He did so.

The court find the prisoner guilty of the charge exhibited against him, and sentence him to be confined to the black hole on bread and water for thirty days, and one year to hard labor, with a ball and chain attached to his leg.

Extract from the "Department order" of General Miller, on the foregoing case.

The commanding general disapproves the proceedings in the case of Thomas Coles, a matross of the regiment of light artillery, and directs that he be released from confinement, and returned for duty.

It appears, from the records of a general court-martial, convened at Plattsburg, New York, for the trial of Brevet Major George McGlassin, of the sixth infantry, on the 23d February, 1818, that said Major McGlassin was charged with, and found guilty of, "unnecessarily and cruelly whipping soldiers, of his company," and sentenced to be "cashiered," which was approved by the President.

It appears, by the original proceedings of a general court-martial, held in the harbor of Boston, in November, 1818, that Joseph Ham, a private of the fifth infantry, was arraigned on a charge for desertion, and pled as follows, viz:

The prisoner pleaded guilty. The prisoner pled in justification of the crime, that he had been compelled, by cruel and illegal punishment, to desert, and called on Sergeant William Kelly to prove the fact; who was accordingly cited before the court and duly sworn.

Question. Do you know any thing of the prisoner's receiving, prior to his desertion, severe or cruel punishment?

Answer. Yes. The prisoner, a short time previous to his desertion, being suspected of writing some observations relative to the soldiers not receiving their pay, was severely flogged for two or three mornings in succession; he was flogged with a raw hide, fifty or sixty lashes at a time, and was threatened with a repetition of the punishment until he would acknowledge the offence; during which time he was kept in close confinement, from which he at length escaped.

Question by the court. By whose order was he thus punished?

Answer. By order of Captain Foster, of the fifth infantry.

Question. Were you then stationed at Detroit?

Answer. I was, and was quarter-master-sergeant of the regiment.

Question. What was the prisoner's character before this?

Answer. His character was very good.

The court, after mature deliberation in the case of Joseph Ham, find him guilty, and do sentence him to hard labor, with a twelve pound ball and chain attached to his leg, during his term of enlistment, and make good the time lost by desertion. But in consequence of mitigating circumstances appearing to the court in favor of the prisoner, the court recommend him to the commanding general for a full pardon.

Extract of the "Department order" of General Porter, on the foregoing case.

The sentence of the court in the case of Joseph Ham is remitted; he will return to duty.

It appears by the record of a general court martial, held at Trader's hill, Georgia, in August, 1819, that John Best, Claudius Thornton, Benjamin Brandige, Jacob Betiz, and Hiram Atkins, all privates of the United States' army, were severally tried by said court, for desertion, and proved on trial that they had been flogged (after being apprehended,) for desertion, without a trial, and severally pled that they "*had once been punished and should not be punished twice for the same offence.*

They were severally found guilty of desertion, and sentenced to hard labor.

Extract from the order of Major General Gaines, in which he approved the sentences in the preceding cases.

The commanding general is constrained by a sense of duty to protest against the gross irregularity which is evident from the testimony in the cases of the prisoners, previous to their trial. It appears that they were *severally flogged* by the orders of *commissioned officers*, without the least shadow of authority, in open contempt and defiance of law, and who have not only usurped the powers of courts-martial, which alone have the authority of awarding punishment, but have ordered the infliction of punishments which no military tribunal has power to award. A prisoner in actual confinement may, if disorderly, be ironed, and even chained to a block, but no conduct of his can justify his receiving a blow, nor can he be otherwise punished until regularly tried and convicted.

A repetition of such unauthorized punishments will be immediately followed by the arrest of the officer ordering it.

16th Congress.] No. 180. [1st Session.

CLOTHING THE ARMY WITH DOMESTIC FABRICS.

COMMUNICATED TO THE SENATE, JANUARY 11, 1820.

To the Senate of the United States: WASHINGTON, *January* 8, 1820.

In compliance with a resolution of the Senate, of the 20th of January, 1819, requesting me "to cause a report to be laid before them at their next session of such facts as may be within the means of the Government to obtain, showing how far it may be expedient, or not, to provide by law for clothing the army with articles manufactured in the United States," I transmit a report from the Secretary of War, which, with the accompanying documents, comprehends all the information required by the Senate in their resolution aforesaid.

JAMES MONROE.

DEPARTMENT OF WAR, *January* 7, 1820.

The Secretary for the Department of War, to whom the resolution of the Senate of the 20th of January, 1819, was referred, requesting the President of the United States "to cause a report to be laid before the Senate, at their next session, of such facts as it may be within the means of the Government to obtain, showing how far it may be expedient, or not, to provide by law for the clothing of the army with articles manufactured in the United States," has the honor to transmit, herewith, a report of the Commissary General of Purchases, comprehending the details of the subject upon which information is requested.

From this report it appears that the clothing of our army, with the exception of blue cloths and blankets, is made of domestic fabrics. It also appears, by the statement of the Commissary General of Purchases, that to purchase blue cloths or blankets of domestic manufacture would add considerably to the expense of clothing the army, and that these articles of domestic fabric are inferior in quality to those of the foreign.

To the PRESIDENT OF THE UNITED STATES.

SIR: COMMISSARY GENERAL'S OFFICE, PHILADELPHIA, *June* 3, 1819.

Your letter of the 29th of March last, covering a copy of a resolution of the Senate of the 20th of January, relative to clothing the army with domestic fabrics, was duly received, and would have been answered earlier but for your known absence from the seat of Government, and a belief that no inconvenience would result by deferring a reply for a short time; on the contrary, that the commerce and business of the country, generally, would become more settled, and I should thereby have it in my power to answer your inquiries more satisfactorily, and in manner more to be relied upon, as regards the future. In the latter expectation I have been disappointed, and cannot think of deferring my answer longer.

I have now the honor to transmit, herewith, a statement which exhibits the total of each article, and of the materials necessary to have made the different articles constituting an annual suit, or supply of military clothing, with the prices annexed, distinguishing those of foreign from those of domestic fabric.

In forming this statement, I have estimated for the number of men requisite to complete the regiments and corps to the establishment as authorized by law.

This statement shows that but a small sum annually has been expended in the purchase of foreign, compared with the disbursements on account of domestic fabrics, and I think will be admitted as conclusive evidence that American manufactures have received all the encouragement from me, as agent of the War Department, which could, or ought to have been afforded them, consistently with my duty as an officer, and the instructions under which I have acted; and I embrace this opportunity of remarking that, if equal encouragement has been given by other Departments to domestic fabrics, no just ground of complaint, for want of suitable protection, can exist against Government on the part of manufacturers.

The statement exhibits also a comparative view of the cost of blankets and blue cloths of domestic and foreign fabric, the only articles, or materials for clothing, (threads and a few pieces of scarlet cloth excepted,) which have been procured, in part, of foreign manufacture, for several years past.

The foreign blankets are large, heavy, and excellent; were made to order. Such three and three and a half point blankets as are usually imported could be purchased at much lower prices than have been paid for blankets; but they are light, flimsy, and altogether unsuitable for army purposes.

The foreign blue cloths purchased are also made to order; are stout, well manufactured, durable, and uniform in color to a shade. Cloths of inferior quality, light, and wanting perfect uniformity of color could be purchased considerably lower in the market; but such are not suitable for the army.

The domestic blankets are also large, heavy, and well made. The only objection to them is, that the nap is not sufficiently raised upon them, but this defect is attributable to the short staple of American wool. Very little wool is grown in our country which is altogether calculated for blanketing.

The domestic blue cloths are durable and very well manufactured. They are, however, defective in their finishing and dying, and want uniformity of color; on which account objections have been made to them by officers of the army. These defects are lessening annually, and, in a short time, I am of opinion, will be entirely remedied.

All other articles and materials embraced in the statement are of domestic origin and fabric, and I doubt whether they could be procured of equally good quality, of foreign fabric, on so much more favorable terms as would be any object, than they can now be purchased at.

A very material difference in the relative cost of domestic and foreign goods may take place in the course of a few months, and before the next meeting of Congress, and, if so, I will not fail to apprize you of it. My estimate for 1820 will be transmitted early enough to enable me to communicate such additional information as I may receive resulting from those anticipated changes.

The domestic kerseys, the principal article of wool for army clothing, have been brought to high perfection; and I feel confident that foreign kerseys of equal quality with the domestic cannot be imported at a less price than is paid for the latter

Admitting for the moment that purchasing officers, who are subject to the orders of the War Department, have neglected to afford suitable encouragement to domestic manufactures, I doubt both the expediency and necessity of making it obligatory, by law, on the War Department to cause the army to be clothed with articles manufactured in the United States, exclusively. I doubt the expediency of the measure because the manufacturers who are now engaged in making cloths for Government experience considerable difficulty in procuring wool of suitable kind, and in sufficient quantities, at fifty cents per pound; and if any occurrence shall occasion an increased demand for domestic coarse woollen fabrics, there will be a deficiency of American wool for a few years to come, and the prices of army materials must be greatly advanced in consequence. Add to this a desire felt by most men to promote their interests when an opportunity to do so may offer, and from which feeling, it is to be presumed that manufacturers are not exempt; and, I think, we may reasonably conclude that, if it shall be made obligatory to clothe the army in domestic fabrics, exclusively, the expenses of the Government will be considerably increased in the procurement of clothing.

I doubt the necessity of the measure, because if true policy dictates the propriety of clothing the army exclusively with materials of domestic manufacture, the order of the Secretary of War, whose station and means of acquiring information enables him to decide the question most correctly, will at once accomplish the object, without the aid of a law upon the subject.

Of the policy of the proposed law, I have given you my opinion so fully in a former communication that I will not trouble you with additional remarks on that head now.

Friendly as I am, and have ever been, to domestic manufactures, and, as I trust, is clearly evinced by the accompanying statement, I consider it to be my duty to communicate to the Department of War my decided conviction, (the result of experience during the late war,) that, should our intercourse with European nations be cut off, or rendered precarious by war, or should our imports be lessened or prohibited, in certain articles, by the measures of our own Government, with a view of affording protection to domestic fabrics, it is upon manufacturers who are engaged on a small scale and with very limited capitals we must rely for materials with which to clothe the army, as was pretty much the case during the last war; and not upon manufacturers having extensive establishments, with machinery got up originally, and calculated only, for making the finer cloths; who are, and have been since the peace, desirous to engross all the public contracts, but who, during the war, with two or three exceptions, when the finer cloths commanded very high prices and great profits, would not make a yard of cloth for our suffering troops, and who, by the by, under similar circumstances, would turn their attention to the fabrication of that article by which they could realize the largest profit.

I have the honor to be, sir, with great respect, your most obedient servant,

CALLENDER IRVINE, *Commissary General.*

J. C. Calhoun, Esq., *Secretary of War.*

P. S. There is but one blanket manufactory in the United States that I know any thing of. The proprietor of it informed me that he met with no encouragement, excepting that received from this Department, and that the obstacles were so numerous he feared he would be obliged to abandon the establishment. Wool is not grown in this country yet, either of proper kind, or in sufficient quantities, to justify a reliance wholly on American made blankets for the army, even in time of peace.

Statement exhibiting the materials, &c. required for army clothing for the year 1819, *presuming the army for that year will embrace twelve thousand seven hundred and eighteen men, privates, musicians, and non-commissioned officers.*

Articles.	Price.	Amount.	Remarks.
10,630 leather caps, with trimmings complete,	$2 18	$23,173 40	Domestic.
1,548 leather caps, with trimmings complete,	2 30	3,560 40	Domestic.

Same quantity of British cloths, at $2 30, will cost $38,138 60			
Deduct duties at 25 per cent. commission, 9,534 65		28,603 95	
Difference in favor of British cloths,		$13,277 55	

16th Congress.] **No. 181.** [1st Session.

CLOTHING THE MILITIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 12, 1820.

Mr. Cannon made the following report:

The Committee on the Militia, to whom was referred the resolution of the House of Representatives, to inquire into the expediency of clothing the militia when called into the service of the United States, or allowing them the amount in money in lieu thereof, have, according to order, had the same under consideration, and have endeavored to bestow on it some of the attention to which the subject is entitled. They believe that the militia is the only sure and safe reliance for the defence of the Government, and that it is the duty of the Congress of the United States to endeavor, by every means in their power, consistent with the provisions of the constitution, to qualify them for the most efficient discharge of that highly important trust. This, however, they think cannot be done, although every other provision respecting their organization and discipline should be adopted, unless at the same time some provision is made, by which they would be enabled to have sufficient clothing to encounter the various

climates and inclement seasons of the United States. The experience of the late war, it is thought, has shown, at least in some parts of our country, that some provision on this subject is necessary; besides, it is worthy of some consideration, that, unless they are furnished clothing, or allowed an equivalent, they will not be on an equal footing, as respects their emoluments, with the regular army; but it is also thought, were the Government to undertake to furnish, it would be attended with much difficulty, and perhaps often disappointment, as well as expense; when, to compel them to furnish themselves with clothing sufficient for the service without compensation would be oppressive on the poorer part of the community. Entertaining this view of the subject, the committee have inclined in favor of making it the duty of the militia, who may be called into the service of the United States, to furnish themselves with sufficient clothing for the term or tours of duty they may be required to perform, and pay them the amount in money in lieu of the same; for which purpose they have reported a bill.

16th CONGRESS.] No. 182. [1st SESSION.

COMPARATIVE VIEW OF ARMY EXPENDITURES SINCE THE REDUCTION IN 1802.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 20, 1820.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *January* 13, 1820.

By your order, I have the honor to lay before you a comparative view of the current expenditures of the peace establishment of the army, since the reduction in 1802, marked A and B.

In making these tables, I have been governed by the appropriation laws of the different years, the various army organizations, the general returns of the army for the same years, and the estimates reported to Congress for 1820.

Although my last general return of the army, printed in a report of the military committee of the House of Representatives, explains pretty fully the data on which I estimate the average army aggregate of this year at ten thousand, it must be observed, that the term of enlistment being five years, the number of discharges after this year will be about one-fifth of the whole force annually, and will require two thousand recruits to keep up the establishment. But, as the number entitled to discharge in 1820 does not exceed three hundred, there having been no enlistments after the peace till 1816, and more than four thousand having been recruited during the last year, it appears the same success would make the army aggregate near thirteen thousand at the close of this year.

From this, however, must be deducted the deaths, desertions, and other casualties. The desertions alone, during the last year, in some regiments, exceeded one-fifth of the whole, and have kept the army far below the organization. A detachment of one hundred recruits, wanting to fill up a regiment, when officers were put on that service, have not, on joining, increased the strength of the corps; thus more men are always paid than can be included in a general return.

I have confined myself, as required, to the peace establishments since 1802; but I do not deem it improper to observe, that, when all Indian wars had been successfully terminated by the troops under General Wayne, there were left in service, besides a regiment of artillerists and engineers, and a squadron of cavalry, four regiments of infantry, which composed the peace establishment of 1797.

I also take the liberty to mention a fact, which may deserve notice, in considering the items of the quartermaster's and medical departments, in the required appropriation for this year. The destructive consequences of the campaign on the Mississippi, in 1809 and 1810, (designated the *Terre au Bœuf campaign*,) were attributed to the want of supplies, officers, and money, in those departments. That campaign was made a subject of investigation by Congress. I have no copy of the documents, but it is distinctly in my recollection that the deficiencies in the quartermaster's and medical departments made a strong point in the defence of the commanding general.

The enclosed tables give a concise view of the expenditures of the peace establishment from 1802, and show distinctly the several organizations since that time. The deductions proposed in the note to the table marked A, show that the army will cost three hundred and two dollars and eighty-eight cents per man, including officers, under the present organization, for the year 1820; more than eighty dollars per man less than for the three years preceding the war, and only ten dollars seven and a half cents per man more than in the earlier period, stated in table B, when every thing was at the minimum, and the men seldom marched out of sight of the garrison where they enlisted, during their five years' service.

I have the honor to be, sir, with perfect respect, your obedient servant,

D. PARKER,
Adjutant and Inspector General.

To the SECRETARY OF WAR.

A.

Comparative view of the army expenditures before the late war, and the required appropriations for the year 1820.

Organization of the army before the late war.				Organization of the army since the peace in 1815.			
Regiments and corps.	Commissioned officers and cadets attached to corps.	Non-commissioned officers, musicians, artificers, and privates.	Aggregate.	Regiments and corps.	Commissioned officers.	Non-commissioned officers, musicians, artificers, and privates.	Aggregate.

Camp equipage, fuel, tools, and transportation,	270,000 00	270,000 00	270,000 00
Purchasing horses and equipments for the light artillery and dragoons, and forage for the same,	62,520 00		
Purchasing maps, plans, books, &c.	2,500 00	2,500 00	2,500 00
Contingencies,	50,000 00	50,000 00	50,000 00
Salary of clerks employed in the military agent's office, and in the office of the adjutant and inspector of the army,	3,500 00	3,500 00	3,500 00
Total,	$2,315,876 35	$2,319,928 05	$2,269,060 05

Average appropriations for these years,	$2,301,621 48
Annual expense per man, including officers,	383 60

Required appropriations for the current expenditures of the army for the year 1820.	
	1820.
Pay of the army,	$1,274,784 00
Subsistence,	822,048 20
Forage,	26,496 00
Clothing,	449,716 00
Recruiting service, bounties, premiums, &c.	183,925 00
Medical and Hospital Department,	42,145 76
Quartermaster's Department,	526,500 00
Contingencies of the army,	40,000 00
Total,	$3,365,614 96

Expense per man for the year 1820, including officers,	$336 56

NOTE.—These tables and demonstrations are taken from the appropriation laws, and the official army returns, except the estimate of ten thousand for the average strength of the army during 1820, which is warranted by the last returns, and the facts that more than four thousand men were enlisted in the last year, and that only three hundred are entitled to discharge this year, being the last of the war men; for whose retained bounty, and that due the heirs of deceased soldiers, the item of fifteen thousand dollars is estimated, and is not a current expenditure.

The fortifications and ordnance are omitted in all the years before the war, as well as in the estimate for 1820; and as there was no ordnance corps before the war, the expense of that corps should also be deducted from the current expenditures of the army for this year, amounting to one hundred and one thousand four hundred and ninety-six dollars, and sixty cents. If to this are added the Auditor's reported balance on hand, of the last year's appropriation, on account of pay, $235,296 58, and the two sums are deducted from the required appropriation, it will be seen that the cost per man, including officers, will be $302 88, for the year 1820. As the estimate for pay is made for the full organization, and the average strength through the year is stated at ten thousand, including officers, a balance may remain, authorizing the conclusion, that the future current expenditures will not exceed *three hundred dollars per man, annually.*

FORTIFICATIONS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 20, 1820.

To the House of Representatives: WASHINGTON, *January* 19, 1820.

In compliance with a resolution of the House of Representatives, requesting me "to lay before it, at as early a day as may be convenient, an account of the expenditure of the several sums appropriated for building fortifications, from the year 1816 to the year 1819, inclusive, indicating the places at which works of defence have been begun; the magnitude of the works contemplated at each place; their present condition; the amount already expended; and the estimated amount requisite for the completion of each; also, the mode by which the fortifications are built, by contract or otherwise," I now transmit to the House a report from the Secretary of War, to whom the said resolution was referred, which, with the documents accompanying it, contains all the information required.

JAMES MONROE.

DEPARTMENT OF WAR, *January* 15, 1820.

The Secretary of War, to whom was referred the resolution of the House of Representatives of the 21st of December, 1819, requesting the President of the United States "to lay before the House, at as early a day as may be convenient, an account of the expenditure of the several sums appropriated for building fortifications, from the year 1816 to the year 1819, both inclusive; indicating the places at which works of defence have been begun; the magnitude of the works contemplated at each place; their present condition; the amount already expended; and the estimated sum requisite for the completion of each; also, the mode by which the fortifications are built, whether by contract, or otherwise," has the honor to transmit a report of the Chief Engineer, which comprehends all the information required.

J. C. CALHOUN.

The PRESIDENT OF THE UNITED STATES.

SIR: ENGINEER DEPARTMENT, *January* 12, 1820.

In pursuance of your order of the 22d ultimo, I have the honor to furnish herewith the information required by the following resolution of the House of Representatives, viz: "That the President of the United States be requested to lay before this House, at as early a day as may be convenient, an account of the expenditures of the several sums appropriated for building fortifications, from the year 1816 to the year 1819, both inclusive, indicating the places at which works have been begun; the magnitude of the works contemplated at each place; their present condition; the amount already expended; and the estimated sum requisite for the completion of each; also, the mode by which the fortifications are built, whether by contract or otherwise."

That part of the information relating to accounts has been derived from the offices of the second and third auditors; and will appear in the accompanying statements, from those offices, which have been just received. Those statements could not be so dissected as to exhibit, from them, the exact amount of expenditure at each work. I am enabled, however, from the reports of the local engineers, to furnish that information with regard to works now under construction.

General statement of the fortification account.

Balance, 1st January, 1816,		204,690 30
Appropriation for the years 1816, 1817, and 1819,		2,176,000 00

8. Rigolets,	1819	308	64	70,000 00	194,517 52

For their present condition, see Note E.
For the mode by which the fortifications are built, whether by contract or otherwise, see Note E.

Numbers 1 and 2, in the above table, like the other works under construction, are intended to be permanent, and are, therefore, introduced in this report, although they were commenced previously to the date limited in the resolution.

NOTE E. No. 1, Fort Diamond, on Hendricks' reef, which projects into the channel on the Long Island side of the Narrows, in New York harbor, is nearly completed; a small portion only of the masonry, platforms, &c. remain unfinished. No expenditure by contract, except for a part of the timber.

No. 2. Pea Patch, Delaware river, is a pentagonal castellated fort, with two tiers of casemates. The wall is now about ten feet above the level of the parade. Materials and workmanship are provided for by special contracts, but not labor and contingencies.

No. 3. Fort Washington, Potomac river, is an irregular work. On the river side is a regular front of fortification, including a ravelin. The faces and flanks are casemated. The branches terminate at the rear in demi-bastions, where they are joined by the gorge, which is a straight wall, with a bastioned redan in the centre. A very small portion of masonry, laying platforms, and removing some earth, being finished, will complete the work. The only contract is for lime.

No. 4. Fort Monroe, Old Point Comfort, Hampton Roads, is a regular work, with seven fronts. Wharves, roads, machinery, workshops, and barracks have been built, and large quantities of materials collected, preparatory to the commencement of the work. All expenditures, except contingent, are provided for by special contracts.

No. 5. Fort Calhoun, on the Rip Rap Shoal, Hampton Roads, is a tower battery, with three tiers of casemates, to be built upon a foundation, *à pierre perdue*, in a depth varying between one and a half and three fathoms. Forty or fifty thousand perches of stone have been applied to the formation of the foundation, which now shows between two and three thousand perches above high-water mark. All expenditures, except contingent, by special contracts.

Nos. 6 and 7. Mobile Point and Dauphine Island, are two regular pentagonal forts. Excavations had been commenced at each, but were suspended, in order that no part of the force should be diverted from the fabrication and collection of materials, in the preparation of which were presented difficulties not at first anticipated. The brick-yards and other establishments have yielded, during the last season, materials in such quantities as to afford a prospect of an early resumption of the excavations. The entire completion of those works is provided for by one contract for each.

No. 8. The Rigolets, Louisiana, is a crescent battery, with the gorge closed by two short fronts of fortification. The want of tenacity of the soil at the site at which the construction was commenced, occasioned the relinquishment of that site for another having a more firm and consistent soil. The progress at the latter is not known, further than that a considerable quantity of materials have been prepared for, and a portion delivered at, it. The entire completion of this work is provided for by single contract.

It is thought the resolution was not intended to embrace a detail of repairs, and therefore they have not been noticed in this report.

All which is respectfully submitted.

W. K. ARMISTEAD, *Col. of Engineers.*

16th CONGRESS.] No. 184. [1st SESSION.

MILITARY ACADEMY AT WEST POINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 31, 1820.

SIR: DEPARTMENT OF WAR, *January* 28, 1820.

Pursuant to a resolution of the House of Representatives, directing the Secretary of War to lay before the House "a statement showing the whole amount of money that has been expended by the General Government on the Military Academy at West Point, in the State of New York; also, the number of cadets that have been educated there, from each State, District, or Territory, and their names; also, an estimate of the sums necessary to be appropriated for said institution for each of the next succeeding three years," I have the honor to transmit, herewith, a report of the chief engineer, which, with its accompanying documents, contain all the information required.

I have the honor to be, your most obedient servant,

JOHN C. CALHOUN.

Honorable HENRY CLAY, *Speaker of the House of Representatives, U. S.*

SIR: ENGINEER DEPARTMENT, *January* 27, 1820.

I have the honor to transmit, herewith, statements A and B, from the second and third auditors, showing the amount of moneys "expended by the General Government on the Military Academy at West Point;" C, showing "the number of cadets that have been educated there from each State, District, or Territory, and their names;" D to I, showing "the sums necessary to be appropriated for said institution for each of the next succeeding three years;" the whole comprising the information required by a resolution passed in the House of Representatives on the 27th ultimo.

Which are respectfully submitted.

W. K. ARMISTEAD, *Colonel of Engineers.*

Hon. J. C. CALHOUN, *Secretary of War.*

A.

A statement exhibiting the several sums expended for the Military Academy at West Point, for the years 1816, 1817, *and* 1818, *in pursuance of a resolution of the House of Representatives of the United States, of the* 27*th ultimo.*

		BOOKS AND APPARATUS FOR THE MILITARY ACADEMY.		
1816.				
May	25,	For warrant, No. 4419, to Brigadier General Joseph G. Swift, advanced him on account of the purchase of instruments for the Military Academy,	$668 84	
June	24,	For amount expended by Samuel Perkins, assistant deputy quartermaster general at West Point, in the first quarter of 1816, for sundry books purchased for Military Academy,	609 33	
July	24,	For amount expended by Samuel Perkins, assistant deputy quartermaster general at West Point, in the second quarter of 1816, for the purchase of books,	994 75	
August	28,	For warrant, No. 4703, to Brigadier General J. G. Swift, advanced him on account of books, &c.	923 00	
September	21,	For warrant, No. 4778, to Samuel Campbell, bookseller at New York, being amount of his account for books, instruments, and stationary, for the use of the Military Academy, between 20th March, 1815, and 2d July, 1816,	141 75	
November	12,	For warrant, No. 4925, to Brigadier General J. G. Swift, advanced him on account of maps, plans, books, &c.	3,200 00	
December	7,	For warrant, No. 4989, to Lieutenant Thomas J. Leslie, on account of books, maps, &c.	1,500 00	
1817.				
November	24,	For amount expended by Lieutenant George Blaney, on account of the Military Academy at West Point,	182 19	
December	18,	For balance due J. G. Swift, brigadier general, on settlement of his account, for the purchase of sundry books, maps, papers, instruments, &c. for the use of the Military Academy, between 19th August, 1815, and 31st December, 1816,	2,848 26	
				$11,068 12
		MILITARY ACADEMY.		
1816.				
June	19,	For warrant, No. 4483, to Major C. Vandeventer, on account of the Military Academy,	5,702 00	
September	14,	For warrant, No. 4759, to Brigadier General J. G. Swift, on account of expenditures on the academic buildings at West Point,	10,000 00	
1817.				
February	13,	For warrant, No. 5173, to Brigadier General J. G. Swift, on account of building the Military Academy at West Point,	6,000 00	
December	23,	For this sum allowed Major C. Vandeventer, being one per cent. commission on $46,723 54, paid over by him to General J. G. Swift, on account of disbursements for the Military Academy at West Point,	467 23	
December	23,	For this amount paid over by Major C. Vandeventer to General J. G. Swift, being part of the above sum of $46,723 54,	7,974 82	
1818.				
May	21,	For amount expended by Major C. Vandeventer, in 1816, for backs and jambs, doors and frames, &c. for buildings at West Point, including his commission,	236 26	
September	4,	For amount expended by General J. G. Swift, on account of the Military Academy,	35 84	
				30,417 15
				41,485 27
		FROM WHICH DEDUCT		
		This sum, being the amount of moneys refunded out of advances made by "books and apparatus for the Military Academy," and by "Military Academy," during the year 1817,		9,232 19
				$32,253 08

TREASURY DEPARTMEMT, SECOND AUDITOR'S OFFICE, *January* 18, 1820.

WM. LEE.

B.

A statement exhibiting the several sums appropriated for the Military Academy at West Point, from the year 1809, *to the year* 1819, *inclusive, and of the application thereof, in pursuance of a resolution of the House of Representatives of the United States of the* 31*st ultimo.*

			MAPS, PLANS, CHARTS, &c.		
Prior to the act of 29th April, 1812, for the Military Academy at West Point, the expenses of maps, plans, &c. annually appropriated for the military department, was, in part, applied to those objects for that institution; the annexed items are selected as appertaining to that establishment. Prior to the passage of the act of 3d March, 1809, no specific account was kept of the expenses at West Point, and the accounts having been destroyed by the enemy to the year 1812, a complete selection could not be made from the books of the office. So far as the items could be collected they are also attached to this statement.	May 29,	1809,	For warrant 1,538 due to Samuel Campbell, for sundry stationary furnished, for the use of the corps of engineers,	$777 75	
	October 6,	"	For warrant 1,954 due to Benjamin Dearborn, for a theodolite and sundry other articles purchased of him by the Secretary of War,	110 00	
	December 30,	"	For amount expended by Jacob Eustis, for cleaning a theodolite,	10 00	
	February 21,	1810,	For amount expended by Tench Coxe, for sundry mathematical instruments, paints, &c.	119 25	
	March 12,	"	For warrant 2,448 due to Samuel Campbell, for sundry articles furnished for the use of the Military Academy,	513 90	
	December 19,	"	For warrant 3,084 due to Samuel Campbell, for sundry articles furnished for the use of the Military Academy,	596 40	
	May 28,	1811,	For amount paid by Joseph G. Swift to Samuel Campbell, for sundry articles furnished the Academy,	290 00	
	April 20,	1803,	For amount expended by Jonathan Williams, Lt. Col. for sundry instruments for the use of the academy,	565 00	
	April 21,	"	For amount expended by Jonathan Williams, for sundry articles purchased for the use of the Academy,	57 12	
	June 10,	"	For warrant 6,926 to Jared Mansfield, for sundry books furnished for the Academy,	115 25	
	August 31,	"	For do. 7,066 to H. Caritat, for sundry books for the use of the Academy,	116 50	
	May 21,	1804,	For amount expended by William A. Banon, for sundry books for the use of the Academy,	86 50	
	June 21,	"	For amount paid to sundry persons for sundry books for the use of the Academy,	226 45	
	April 15,	1805,	For warrant 8,230 to Samuel Campbell, for books and stationary for the Academy,	70 50	
	July 29,	"	For do. 8,431 to Campbell and Mitchell, for sundry articles of stationary for the Academy,	260 22	
	April 8,	1806,	For do. 9,008 to Campbell and Mitchell, for sundry stationary, &c. for the Academy,	122 66	
	May 24,	"	For amount paid by Colonel Jonathan Williams for a quadrant and sundry other articles,	51 38	
	May 14,	"	For warrant 9,123 to Campbell and Mitchell, for stationary, &c. furnished for the use of the Academy,	633 76	
	October 6,	"	For do. 9,378 to Campbell and Mitchell, for sundry books, stationary, &c. for the Academy,	949 88	
	May 9,	1807,	For do. 9,916 to Campbell and Mitchell for sundry articles of stationary for the Academy,	254 26	
	July 24,	"	For do. 10,107 to Campbell and Mitchell, for mathematical instruments, &c. for the Academy,	208 00	
		1808,	For do. 306 to Campbell and Mitchell, for books and stationary for the use of the corps of engineers,	392 36	
				$6,527 14	
			BOOKS AND APPARATUS, &c.		
Per act 3d March, 1813, $12,000,	January 19,	1814,	For warrant 113 transmitted to Samuel Campbell, for books and stationary for the Academy,	2,488 38	
	July 15,	"	For do. 1,118 to Joseph G. Swift, for the purchase of apparatus for the Military Academy,	548 00	
	December 6,	"	For do. 1,723 to Joseph G. Swift, on account of expenditures chargeable to this appropriation,	1,165 30	
	January 27,	1815,	For amount advanced to Joseph G. Swift, by the corporation of New York, on account of the purchase of books, apparatus, &c.	1,800 00	
	August 18,	"	For amount paid Samuel Campbell, for books and apparatus, &c. agreeably to the orders of Colonel Bomford and General Swift,	479 02	
Per act 29th April, 1816, $22,171,	January 5,	1816,	For warrant 3,461 to Joseph G. Swift, on account of the expenditures chargeable to this appropriation,	5,000 00	
	April 30,	"	For do. 4,288 to William Tatham, being the amount of his account for mathematical instruments, &c.	500 00	
	May 5,	"	For do. 4,307 due to Philip H. Nicklin, for ninety copies of Tousard's Artillerist,	900 00	
	April 8,	1817,	For do. 182 to Joseph G. Swift, on account of expenditures chargeable to this appropriation,	3,255 00	
	June 17,	"	For do. 564 to John M. O'Connor, on account of certain copies of the Treatise on the Science of War,	5,000 00	
	September 23,	"	For do. 990 to Sylvester Thayer, on account of maps, plans, &c. for the use of the Military Academy,	5,000 00	
	December 15,	"	For amount expended by Joseph G. Swift, on account of debts anterior to 1st July, 1815,	664 63	
	December 1,	"	For amount expended by George Blaney, on account of the Military Academy,	205 10	
Per act 29th April, 1812, $25,000,	April 20,	1814,	For warrant 746 to Joseph G. Swift, on account of work and materials for the Military Academy at West Point,	3,333 00	
	June 2,	"	For do. 887 to do. on account of do. do. do.	3,333 00	
	July 8,	"	For do. 965 to do. on account of do. do. do.	3,334 00	
					37,005 43

16th Congress.] No. 185. [1st Session.

TRANSPORTATION ON THE YELLOW STONE EXPEDITION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 3, 1820.

SIR: DEPARTMENT OF WAR, *February* 2, 1820.

In compliance with a resolution of the House of Representatives of the 24th ultimo, "that the Secretary of War be directed to report what sums of money have been actually paid to Colonel James Johnson, in virtue of articles of agreement entered into on the 2d day of December, 1818, and also report what sum is now claimed by him, in virtue of said articles of agreement, specifying particularly the several items; and that he also report whether public notice was given when proposals would be received for a contract to furnish transportation to the troops ordered up the Missouri river;" I transmit a report of the quartermaster general, containing a statement of the sums claimed by Colonel James Johnson, in virtue of his contract with the quartermaster's department, and the mode in which that contract was formed; and a report from the third auditor of the sums which have been advanced under it to the contractor; with an extract of a letter from the President of the United States, of the 5th of July, 1819, under authority of which the advances of a subsequent date were made, and which discloses his views in ordering the advances.

It will be proper to be observed that several of the charges of the contractor have not been admitted. The charge for the detention of the Johnson and Expedition, previous to the sailing of the expedition up the Missouri, has been refused, on the ground that it was caused not by any act of the Government but the delay to fulfil his engagement on the part of the contractor; and the charge for the detention of the Johnson, Expedition, and Jefferson up the Missouri, owing to the lowness of its water not permitting their return, has also been refused on the ground that it was not provided for by contract. The charge for the transportation on the Missouri has not been admitted, from a belief that the price charged is greater than what ought to be allowed. These points of difference have, under the provision of the contract, been referred to persons chosen by the parties as arbitrators; and it is expected that a decision will be had in a few weeks.

In relation to the amount of the advances it may be proper to observe, that the contract with Colonel James Johnson extended to the transportation of the troops and military stores to their respective destinations on the Mississippi and Missouri, and that the preparation of the contractor, and the expenses incurred by him, and the advances under his contract, were governed by the supposition that the troops would have reached, during the last season, the points of their ultimate destination. But, from the difficulty of navigating the Missouri, the lowness of its water during the whole of last summer from the extreme drought, and the detention in the sailing of the expedition, it only reached Council Bluff, which is rather less than half the distance from St. Louis to the Mandane Villages. Had the expedition reached the latter place the claims of the contractor against the Government would have been increased by a sum probably not less than fifty thousand dollars. For the transportation actually performed it is probable that the advances to the contractor considerably exceed his just claims against the quartermaster general's department, and should that prove to be the fact, by the decision of the referees the excess will be applicable to the transportation which, under the contract, remains to be performed this year.

I have the honor to be, your most obedient servant,

J. C. CALHOUN.

Hon. H. CLAY, *Speaker of the House of Representatives.*

SIR: TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *January* 28, 1820.

I have the honor to enclose a statement of warrants, issued by the Secretary of War, chargeable to the account of James Johnson, on account of the quartermaster's department. The warrants are not expressive of the fact of their being on account of his contract for transportation, but it is believed that they were for that purpose. The amount, 229,762 dollars, is at his debit on the books of this office, independent of his account as contractor for supplying provisions. With great respect, your obedient servant,

PETER HAGNER, *Auditor.*

The Hon. J. C. CALHOUN, *Secretary of War.*

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *January* 27, 1820.

PETER HAGNER, *Auditor.*

SIR: QUARTERMASTER GENERAL'S OFFICE, *January* 31, 1820.

In obedience to your order requiring "a report of the sum claimed by Colonel Johnson, in virtue of his contract of the 2d December, 1818, and also whether public notice was given when proposals would be received for a contract to furnish transportation to the troops ordered up the Missouri river," I have the honor to state that Colonel Johnson has exhibited an account, of which the enclosed is a copy, amounting to *two hundred and fifty-six thousand eight hundred and eighteen dollars and fifteen cents;* in addition to which, his agent has given notice that he shall present a claim for the detention of the steamboats Jefferson, Johnson, and Expedition, on the Missouri.

Public notice was *not* given. It has never been the practice with this Department to resort to that mode of providing for the movement of troops, or the transportation of supplies. Such a measure would be productive of delay, which, in most instances, would be highly injurious to the service.

I have the honor to be, sir, your obedient servant,

TH. S. JESUP, *Quartermaster General.*

The Hon. JOHN C. CALHOUN, *Secretary of War.*

United States' Quartermaster's Department, to James Johnson, Dr.

1819.

						$256,818 15

THOMAS S. JESUP, *Q. M. General.*

DEAR SIR: LEXINGTON, *July* 5, 1819.

To prevent the loss, embarrassment, and disappointment to the Government and to the country, which would be the inevitable consequence of the failure of the expedition destined for the mouth of the Yellow Stone river, it will be necessary to make additional advances. I have therefore to request that you will advance to Colonel James Johnson fifty thousand dollars on account of the contract made by him with Brigadier General Jesup for transportation on the Mississippi and Missouri rivers; and that an additional advance of fifty thousand dollars be made whenever he shall transmit to you a transfer, regularly authenticated, of the four steamboats which he has now employed in the expedition to the mouth of the Yellow Stone river, as a further security.

The people of the whole Western country take a deep interest in the success of the contemplated establishment at the mouth of the Yellow Stone river. They look upon it as a measure better calculated to preserve the peace of the frontier, to secure to us the fur trade, and to break up the intercourse between the British traders and the Indians, than any other which has been taken by the Government. I take myself very great interest in the success of the expedition, and am willing to take great responsibility to ensure it.

With great respect, I am your obedient servant,

JAMES MONROE.

P. S. On the receipt of the transfer of the steamboats, you will make the advance fifty-seven thousand five hundred dollars, instead of fifty thousand, as above stated.

JAMES MONROE.

J. C. CALHOUN, Esq., *Department of War.*

16th Congress.] No. 186. [1st Session.

LOANS OF GUNPOWDER AND LEAD.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 18, 1820.

WASHINGTON, *February* 18, 1820.

To the House of Representatives of the United States:

In compliance with a resolution of the House of Representatives of the 24th January, 1820, requesting me "to inform the House what loans (if any) have been made since the peace to private citizens of powder, lead, and other munitions belonging to the Government, by the officers of any department of the army or navy; specifying the times, terms, objects, and extent of such loans; the names of the persons by whom and to whom made; the different times of repayment; and also the amount of the ultimate loss (if any) likely to be incurred by the Government in consequence thereof;" I now transmit a report from the Secretary of War, which, with the accompanying documents, contains all the information that can be furnished on the subject.

JAMES MONROE.

DEPARTMENT OF WAR, *February* 12, 1820.

The Secretary of War, to whom was referred the resolution of the House of Representatives of the 24th January, 1820, requesting the President of the United States "to inform the House what loans (if any) have been made since the peace to private citizens of powder, lead, and other munitions belonging to the Government, by officers of any department of the army or navy; specifying the times, terms, objects, and extent of such loans; the names of the persons by whom and to whom made; the different times of repayment; and also the amount of the ultimate loss (if any) likely to be incurred by the Government in consequence thereof;" has the honor to transmit herewith a report of the colonel of ordnance, which comprehends all the information which can be furnished by the Department of War.

SIR: ORDNANCE OFFICE *February* 12, 1820.

In answer to the resolution of the House of Representatives, dated the 24th ultimo, inquiring what loans have been made since the peace to private citizens of powder, lead, and other munitions belonging to the Government, I have the honor to state, in relation to the Ordnance Department, that loans of powder and lead to a considerable extent were made in the years 1815 and 1817. The accompanying paper, marked A, contains a statement of the particulars.

These loans having been authorized anterior to the period of your entering upon the duties of the War Office, as well as during my absence from the seat of Government, I thought it incumbent on me, when I became acquainted with their magnitude, to bring the subject under your notice, by a report which bears date the 18th July, 1818.

Lieutenant Colonel Bomford, who was charged with the business of the Ordnance Office during my absence in the years above mentioned, has been instructed to give the necessary explanations of the motives by which the officers of the Government were actuated, and of the benefits expected to be realised from these loans.

His answer, marked B, accompanies this communication.

Messrs. Dupont & Co., of Wilmington, were called on in the early part of last year for the return of one thousand barrels of the powder lent to them; and between three and four hundred barrels have already been received, and a further quantity is ready to be delivered on the opening of the Delaware. These gentlemen propose to repay the residue of their loan at the rate of two hundred barrels a month.

It was not thought advisable to reclaim the whole quantity due from them before the magazine at Frankford should be finished, otherwise a temporary deposite of the powder must have been made at the magazine on Schuylkill, which is situated in the centre of the storehouses occupied by the Commissary General of Purchases for the clothing of the army, and where, consequently, we should rather wish to avoid keeping a large supply of powder, except in a case of necessity. The magazine at Frankford having been completed about the close of the last year, there is no longer any reason for wishing the repayment to be delayed. We shall be satisfied, however, with receiving it at the rate of two hundred barrels a month agreeably to their proposal.

I have not been able to discover that the loan made on the 25th of October, 1815, to George W. Murray, of twenty-eight tons, &c. of pig lead was authorized or sanctioned by the Ordnance Office. It appears to have been made on the individual responsibility of Captain Tyler, late of the ordnance corps, who, in the course of the last year, was dismissed from the service. The previous loan of twenty-three tons, &c. of lead made to the same person on the 16th of March, 1815, as well as all the loans of powder detailed in the statement A, had the sanction of authority from the Ordnance Office.

The repayment of the lead delivered to George W. Murray, amounting to a little more than fifty tons, is considered to be rather precarious; at least some delay and difficulty is to be apprehended.

A similar observation may be made in relation to the powder lent to Peter Baudrey, amounting to five hundred barrels. The principal in that concern, Mr. Baudrey himself, now resides at the Havana, and the competency of his security is considered as a little doubtful. In relation to the two last mentioned claims, such measures as may seem to be the most eligible will of course be adopted.

Of the loan of powder made to Stull & Williams, consisting originally of six hundred barrels, about two hundred have been repaid; and, for the sake of obtaining better security for the residue, a new agreement has been entered into, which is now in a course of execution.

I have the honor to be, very respectfully, sir, your most obedient servant,

DECIUS WADSWORTH, *Colonel of Ordnance.*

The Hon. JOHN C. CALHOUN.

B.

SIR: WASHINGTON, *February* 9, 1820.

In reply to your inquiries of the 8th instant on the subject of United States' loans of lead and gunpowder, I shall, in compliance with your suggestions, confine myself to a statement of the reasons which influenced at the time the War Department to authorize the transaction.

The loan of lead was made to George W. Murray, the proprietor of a white lead manufactory in New York, at the intercession of Captain Tyler, late of the ordnance, and upon the ground that it would have a tendency to reduce the price of white lead from one to two dollars per hundred weight; at this time also a quantity of white lead was required for the public use, and for which the most extravagant price was demanded; and as a considerable supply of lead was then in the public stores, and no immediate demand expected, the loan was considered as aiding the public interest, and, at the same time, benefiting an important branch of domestic manufacture.

When the loans of gunpowder were made to Dupont and Baudrey the public magazines were filled with gunpowder, a part of which was damaged, or of an inferior quality, and the whole subject to constant deterioration from the imperfect state of the buildings; it had also become necessary in many cases to remove the gunpowder, not only for its preservation but also for the repairs of the magazines; at this period Messrs. Dupont and Baudrey proposed (separately) to take from the War Department gunpowder of an inferior quality and return for the same, at specified times, an equal quantity of proof or standard gunpowder of the first quality; these proposals, so promising to the interest and convenience of the United States, were accepted by Mr. George Graham, acting Secretary of War, and the loans accordingly made; and it may not be improper further to remark, that an additional motive for acceding to these loans was that of aiding a domestic manufacture of great national importance.

Some doubts I understand are now entertained of the entire solvency of one or more of the parties. Upon this point I have only to observe that, at the time the loans were made, particular instructions were transmitted to the officers charged with the delivery of the gunpowder, directing them to obtain the most unexceptionable security to double the amount of the current value of the article, and in every case to advise with the district attorney of the United States or other public officers resident, upon the credit and ability of the persons who might be presented as sureties.

Repectfully I remain, sir, your most obedient and humble servant,

G. BOMFORD, *Lieut. Col. of Ordnance.*

Colonel D. WADSWORTH, *of the United States' ordnance.*

SIR: NAVY DEPARTMENT, *February* 10, 1820.

A copy of the resolution of the House of Representatives of the 24th ultimo was referred to the Commissioners of the Navy, with a request that they would state whatever information was in their possession respecting the said resolution; and I have now the honor to transmit to you a copy of their reply, showing that no loan of powder, lead, or other munitions belonging to the navy has, to their knowledge, been made to any private citizens since the peace, by any officer of any department of the navy.

With the highest respect, I have the honor to be, sir, your most obedient servant,

SMITH THOMPSON.

The PRESIDENT OF THE UNITED STATES.

Copy of a letter from the Commissioners of the Navy, in relation to the subject of a resolution of the House of Representatives of the 24th of January, 1820.

SIR: NAVY COMMISSIONERS' OFFICE, *February* 8, 1820.

The Board of Navy Commissioners have the honor to acknowledge the receipt of your letter of this day's date, enclosing a copy of a resolution of the House of Representatives of the 24th ultimo, calling for information as to "what loans have been made since the peace to private citizens of powder, lead, and other munitions, belonging to the Government, by officers of any department of the army or navy; specifying the times, terms, objects, and extent of such loans; the names of the persons by whom and to whom made; the different times of repayment; and also the amount of the ultimate loss (if any) likely to be incurred by the Government in consequence thereof;" and, in reply, beg leave to state that no loan of powder, lead, or other munitions belonging to the navy has, to their knowledge, been made to any private citizen since the peace, by any officer of any department of the navy.

I have the honor to be, &c.

JOHN RODGERS.

Hon. SMITH THOMPSON, *Secretary of the Navy.*

16th Congress.] No. 187. [1st Session.

COST OF RATIONS BY CONTRACT AND BY THE COMMISSARIAT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 24, 1820.

Sir: Department of War, *February* 23, 1820.

Pursuant to a resolution of the House of Representatives of December last, directing me to report to the House "a statement of the expense of furnishing the army of the United States with rations for the term of one year, ending on the 14th of April, 1818, exhibiting the average cost per ration; and also of the expense of furnishing the army with rations, exhibiting also the average cost per ration for the term of one year, under the provisions of the law passed on the 14th of April, 1818, entitled 'An act to regulate the staff of the army,'" I have the honor to transmit herewith a report of the Third Auditor and of the Commissary General of Subsistence, which contains the information required.

I have the honor to be your obedient servant,

J. C. CALHOUN.

The Hon. the Speaker *of the House of Representatives.*

Sir: Treasury Department, Third Auditor's Office, *February* 9, 1820.

I have the honor to transmit you, enclosed, in pursuance of a resolution of the House of Representatives of December, 1819, viz:

Statement showing the expense of furnishing the army of the United States with rations for the term of one year, commencing on the 1st of June, 1817, and ending 1st of June, 1818, the period for which all the contracts were made for that year.

Statement showing the number of rations issued, and the cost, including sundry contingent expenses, and independent of the expenses of the Commissary Department, from 1st of June to 31st August, 1819.

I have the honor to be your most obedient humble servant,

PETER HAGNER, *Auditor.*

The Hon. John C. Calhoun.

Office of the Commissary General of Subsistence,

Sir: Washington, *February* 22, 1820.

Pursuant to your order, I have the honor to lay before you statements A and B, prepared by the Third Auditor of the Treasury, of the expense of furnishing the army with rations for the term of one year, under the contract system, exhibiting the average cost of the ration, and also the expense of furnishing the army with rations; exhibiting, also, the average cost per ration for one quarter of the year, commencing on the 1st of June, 1819, under the system of supplying rations established by the law passed on the 14th of April, 1818, entitled "An act to regulate the staff of the army."

By statement A, the average cost of the ration furnished in the year commencing 1st of June, 1817, and ending 31st of May, 1818, is stated at 18 cents $9\frac{9}{10}$ mills.

The system of supplying rations under the law of the 14th of April, 1818, did not go into operation until the 1st of June, 1819, and returns for one quarter only have been received and adjusted at the Third Auditor's office; consequently, the annual average cost of a ration cannot be ascertained. The statement B, therefore, only shows the average cost of a ration for three months, which must be considered higher than the annual average cost; for in this statement are embraced all the extra expenses of organizing the Commissary's department, which would not (being permanent) recur for years, and which very considerably increases the average cost of the ration for these three months beyond what would be the annual cost if the expenses of organization were charged to the issues of one year or five years. Hence, in this stage of the operations of the department, it is impossible to render an accurate statement of the average cost of a ration under the law of the 14th of April, 1818. It appears, however, by statement B, that the average cost of a ration for the first three months of its operation, including every expense except transportation and the pay of the officers, is 16 cents $5\frac{3}{10}$ mills; add to this 8 mills per ration for the pay of the Commissary General, his assistants, and the expenses of the office, and $7\frac{8}{10}$ mills per ration for transportation, and the average cost of the ration, embracing all expenses, appears to be 18 cents $1\frac{8}{10}$ mills; from which, however, ought to be subtracted, to make the comparison correct, one cent, being the amount in value of peas or beans, added to the vegetable part of the ration since the new system of supplying the army has gone into operation, and not furnished under the former system; to which might be added the improved quality of the ration. And it may be proper to remark here, that the last year of the old system has been selected, when it had attained all the improvement that mode of supply was susceptible of.

But in the commencement of the new system the commissariat had to encounter many difficulties; the officers of the department entered on the performance of their duties without previous experience; hence has arisen much of the waste accounted for, and included in the cost of the first quarter's issues, and which, it is confidently believed, will in future be prevented by the knowledge and experience acquired by the Assistant Commissaries of Subsistence; to which add that, the system being new, men of capital were deterred from bidding; and hence the competition for that year has not been so great as for the present. I am therefore of opinion that a comparison of the probable cost of the ration, including all expenses, from the 1st of June, 1820, to the 31st of May, 1821, would present more correctly a comparative view of the operation of the two systems; and I have accordingly made out a statement, marked C, from which it appears that the price of the rations, including transportation, pay of all the officers of the department, expenses of the office, and wastage, will not exceed 14 cents $7\frac{6}{10}$ mills; from which deduct one cent difference in the value between the old and new ration, will leave 13 cents $7\frac{6}{10}$ mills, which being subtracted from 18 cents $9\frac{9}{10}$ mills, the price of the ration in the year commencing the 1st of June, 1817, will make a difference of 5 cents $2\frac{3}{10}$ mills; by which sum multiply 3,095,644 rations, the whole number issued in one year, makes the sum of $161,902 16.

In making up the cost of transportation, I have omitted the newly established posts on the Missouri, above Fort Osage, and St. Peter's, on the Mississippi, above Prairie du Chien; at none of which places were rations issued under the old system.

With great respect, your obedient servant,

GEORGE GIBSON,
Commissary General of Subsistence.

The Hon. JOHN C. CALHOUN, *Secretary of War.*

Estimate of the annual expenses of the Commissariat Department, viz:

Pay and emoluments of the Commissary General and of his assistants and military storekeepers, -	$21,500 00
Salaries of two clerks, fuel, stationary, &c. - - - - - -	3,500 00
	$25,000 00

This sum of $25,000 will add to the cost of the ration 8 mills.

GEORGE GIBSON,
Commissary General of Subsistence.

A.

Statement showing the expense of furnishing the army of the United States with rations for the term of one year, commencing on the 1st of June, 1817, and ending on the 1st of June, 1818, the period for which all the contracts were made for that year.

Contractors' names.	Places contracted for.	Periods.	No. of rations issued.	Amount.

The above statement does not comport with the precise time directed by the resolution of the House of Representatives under which it is submitted. The system of supplying the army with rations by contract terminated on the 1st of June, 1819, the accounts for which not being fully rendered, it was found impracticable to ascertain with precision what the average cost of the ration would be under these contracts; but as it was believed that the object of the resolution was intended to ascertain the average cost of the ration for one year under the old system, to be compared with the present, the next preceding year to the last under the contract system was taken, (the accounts being all complete,) and the foregoing statement accordingly shows the average cost of the ration for the year commencing on the 1st of June, 1817, and ending on the 1st of June, 1818.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *February* 9, 1820.

PETER HAGNER, *Auditor.*

* Including an allowance of twelve and a half per cent. for wastage, and one per cent. per ration for issuing provisions from deposites made by the former contractor, including also an increase in the price of the ration, in lieu of transportation, as provided by the contract.

† Including an allowance of twelve and a half per cent. for wastage, and one cent per ration for issuing from deposites made by the former contractor.

‡ Including the allowances for wastage, and premium, as aforesaid.

‖ Making an average of eighteen cents, nine mills and nine-tenths per ration.

Amount of loss sustained by the United States on provisions delivered by the contractor, Moses Bliss, to Lieutenant Roswell Lee, assistant commissary at Springfield, Massachusetts, on 23d June, 1819, and which were afterwards ordered to be sold at public auction, in consequence of no troops being stationed at that place,				673 26
Add sundry expenses incurred by assistant commissaries for the purchase of weights, measures, stationary, &c. and for loss sustained on the sales of damaged provisions,				4,507 45
				127,934 60
Making an average of 16.5.$\frac{3}{10}$ cents per ration, exclusive of transportation, pay and emoluments of assistant commissaries, military storekeepers, expenses of the commissary general's departments, &c.				

The foregoing statement does not comport, in the period nor the time, with that directed by the resolution of the House of Representatives of December, 1819. The system of contracts under which the rations were supplied to the army, prior to the establishment of the commissariat, did not terminate until the 1st June, 1819, and, consequently, the present system by commissaries did not commence before that day. It was, therefore, not practicable to furnish the average cost of the ration for the entire year under the present system, and as the posts at which supplies were made are so distant and dispersed, the accounts for any longer period than the three first months could not be calculated upon being all rendered. That period was therefore selected, and the foregoing statement shows the average cost of the ration independent of the expenses of the Commissary's Department.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *February* 9, 1820.

PETER HAGNER, *Auditor.*

16th Congress.] No. 188. [1st Session.

MILITARY ACADEMY AT WEST POINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 25, 1820.

SIR: DEPARTMENT OF WAR, *February* 23, 1820.

In compliance with the resolution of the House of Representatives of the 26th of February, 1819, "that the Secretary of War be instructed to report to the House, at an early period of the next session of Congress, a copy of such rules and regulations as shall have been adopted for the government of the Military Academy, together with a list of the cadets who were attached to the academy on the 1st of January, 1815, and of such as shall have been appointed between the said 1st of January and the 30th of September, 1819, exhibiting the date of their several appointments, with the States and Territories from whence they came; a list of such as shall have resigned or have been dismissed, and at what period; also, a list of such as shall have been commissioned in the army, with the date of their commissions, and of such as shall have resigned, with the date of their resignations; also, that the said Secretary be instructed to report, as aforesaid, whether any, and, if any, what, legislative provisions are necessary for the more convenient organization and government of the said academy, the better to ensure a strict obedience to all proper orders, and a suitable respect for all the rights of those whose duty it may be to yield obedience;" I have the honor to transmit a report from the Engineer Department, marked A, which contains the rules and regulations for the government of the academy, and a list of cadets, as required.

In reply to so much of the resolution as relates to the better organization and government of the Military Academy, I would respectfully submit a copy of a report from the Academic Staff to this Department, marked B, and a copy of a report of the superintendent of the Military Academy, containing propositions for its new organization, marked C, with a copy of a report of General Bernard and Colonel McRae, containing remarks on the plan proposed by the superintendent, marked D. The improvements of which the Military Academy is thought to be susceptible are so fully discussed in these reports, as to render unnecessary many additional observations; and the few which I propose to make will be principally confined to the propositions to separate the academy from the corps of engineers, to increase the number of professors and assistants, and to equalize the compensation of the former.

The Military Academy has acquired a character and importance which seem not to have been contemplated in its original institution. It originated in the act of the 16th of March, 1802, which created the corps of engineers. By that act the President was authorized to establish a corps of engineers, to consist of one principal engineer of the rank of major, with six assistant engineers of the rank of captains and lieutenants, to which were added ten cadets; and the act directed that the corps thus organized should be stationed at West Point, and should constitute a Military Academy. The principal engineer, and in his absence the next in rank, was made superintendent of the academy; and the Secretary of War was authorized to purchase such books, implements, and apparatus, as should be necessary for the use of the institution. In the next year, by the act of the 3d of February, 1803, the President was authorized to attach to the engineers two teachers, one of the French language, and the other of drawing. The institution remained without any change in its character until 1808, when, by the act of the 12th of April of that year, authorizing the raising of an additional military force, two cadets were attached to each company of infantry, riflemen, and artillery, authorized to be raised under it; making, in the whole, with the ten cadets originally attached to the corps of engineers, one hundred and fifty cadets. The institution was further enlarged, and changed in its character, by the act of the 29th of April, 1812. Three professors were then added, one of natural and experimental philosophy, another of mathematics, and the other the art of engineering in all of its branches, with an assistant to each professor; and the cadets, including those that were authorized to be appointed in 1808, were increased to two hundred and fifty, without being attached to any particular corps. The act also provides that the cadets, after passing through the respective classes, should receive regular degrees from the Academic Staff, and should be promoted into any corps, according to the duties which they may be deemed competent to perform. The academy was thus increased from ten cadets to two hundred and fifty; and, instead of being constituted wholly of the corps of engineers, as at its original institution, and being intended to educate officers exclusively for that corps, it now comprehends within its scheme of education officers of every arm of the service. Under its present organization it is, in fact, as intimately connected with one corps of the army as another; yet the provision of the act of the 16th of March, 1802, which places the superintendence of the institution under the charge of the chief of the corps of engineers, and, in his absence, the next in command, still continues. It is obvious that the organization would be more simple, and would correspond more perfectly with its present character, if the academy were wholly separated from the engineer corps, and the President were authorized to select the superintendent from any corps of the army in which the most suitable character might be found. The field of selection for so important an office would thus be enlarged, and the institution be brought more directly under the control of the Government. An additional reason will be found for the change proposed in the fact that the station originally assigned to the corps of engineers at West Point, since the enlargement of that corps and the great increase of its duties, is not the most suitable. Experience has proved that, in time of peace, the chief of the corps should be stationed at the seat of Government, to superintend, under its immediate control, the great and important duties assigned to the corps. Most of the officers belonging to it are, in fact, assigned to important duties at a distance from the academy. The original connexion with the corps has thus become almost nominal; and the interest of the institution would, it is believed, be promoted, as has been stated, by their entire separation.

The number of professors and assistant professors is believed to be too few for the wants of the academy; and the two additional professors, one of chemistry, and the other of artillery, with the increase of the assistant professors and teachers recommended in the report of General Bernard and Colonel McRae would greatly increase the usefulness and respectability of the academy. The professor of chemistry might perform the duties of post surgeon, as in our country the medical profession and that of chemistry are usually united. The number of assistant professors is found to be so inadequate at present, that cadets are appointed to perform the duties of assistants. The objections against the employment of cadets for that purpose, contained in the report of the Academic Staff, are deemed satisfactory.

I entirely concur in the opinion of the superintendent of the academy that the pay of the professors ought to be equalized, and that the compensation of the other professors ought to be made equal to that of those of natural and experimental philosophy, who receive the pay and emoluments of a lieutenant colonel. Neither the difference in the duties of the professors, nor the difference in the capacity to perform those duties, is so considerable as to justify

the present difference in their pay; and less compensation than that proposed, it is believed, will not always command suitable talents. The compensation proposed in the report of the superintendent for the teachers and assistant professors appears to be just and proportionate to that of the professors. The pay of the superintendent of the academy depends at present on his commission and rank; and as the most suitable officer for the post may hold an inferior rank, and as his duties and expenses as superintendent are the same, let his rank be what it may, it is conceived that it would be proper to allow the superintendent the pay and emoluments of a colonel, provided his rank does not give him a greater compensation. The present superintendent, who has performed his duties with zeal and ability, receives only the pay and emoluments of a major of engineers; and it is known that his compensation is inadequate to meet the expenses to which he is subjected, as superintendent, in a place so frequented by strangers as West Point.

The additional number of professors and assistants, and the change in the compensation which has been proposed, will add something to the expenses of the institution; but the great improvement which it will make will much more than compensate the public. The pay of superintendent and professors constitutes but a small portion of the expense of the academy. The pay and subsistence of the cadets, the cost of buildings, fuel, stationary, books, &c. constitute the body of the expenses; yet it is manifest that these, without a suitable number of able and experienced professors, are of little avail. The annual expenses will be but little affected, whether the number and pay of the professors are adequate or inadequate; but the prosperity of the institution must necessarily depend almost wholly on their number and ability. Without a sufficient number of professors every branch of knowledge necessary to perfect an officer to discharge his duties cannot be taught, and without a sufficient compensation adequate talents and experience to teach that well which may be directed to be taught cannot be commanded. A just degree of liberality in the compensation of the superintendent, professors, and teachers, is thus necessarily connected with true economy, by rendering the other and most heavy expenses of the institution in the highest degree effective.

It will not be necessary to appoint an additional quartermaster or paymaster, as recommended in the report of the superintendent, as one of the assistant deputy quartermasters has been assigned to West Point, and no great inconvenience is experienced in making payments to the officers and cadets belonging to the institution under the present law.

The change of the age for admission, from fourteen to twenty-one, the periods now fixed by law, to that proposed in the report of the superintendent, namely, from sixteen to twenty, would, for the reason assigned, be proper; and the other changes proposed, with the alterations contained in the remarks of General Bernard and Colonel McRae, appear judicious, and would doubtless improve the condition of the academy. Many of them may, however, be made, perhaps advantageously, the subject of regulation rather than law.

In addition to the alterations in the organization of the Military Academy proposed in the documents which accompany this report, I am of opinion that the rules and articles of war are not suitable to the institution, and that a system ought to be formed for its government. Whether the cadets are, under the existing laws, subject to the rules and articles of war appears in some degree doubtful. The court-martial in the case of Ragland, Fairfax, Holmes, Vining, and Loring determined that they were not; and, although the Attorney General dissented from that opinion, yet the court, on its being reassembled to reconsider its opinion, adhered to its original decision, notwithstanding the opinion of the Attorney General. The interposition of Congress to settle a point of so much importance would seem to be necessary. The duties and rights of the superintendent, professors, and cadets ought to be rigidly defined, or collisions of the most dangerous character to the institution must occur. But should Congress remove the present doubt, by subjecting the professors and cadets expressly to the rules and articles of war, it is believed that much uncertainty would still exist as to their respective duties and rights. Many of the provisions contained in the rules and articles of war appear not to be applicable to the Military Academy; and of these, which of themselves appear to be so, it might be doubtful, under the rigid construction which an act so highly penal as that which contains the rules and articles of war ought to receive, whether, as the professors and cadets are not named in any of the provisions, and as most of them expressly refer to officers or soldiers, they could be so construed as to comprehend the former. Besides this uncertainty, other objections of a weighty character exist against extending the rules and articles of war to the professors and cadets. Many of the provisions, which a system for the government of the institution ought to contain, are entirely omitted; and the punishments, both as to kind and degree, which are necessary for the government of the army, are not required for that of the Military Academy. To remove these objections, I would respectfully suggest that the President be requested to prepare a suitable system for the government of the Military Academy, to be laid before Congress at their next session for their approval.

I cannot refrain from observing, on a subject of so much importance as the education of those who may be charged with the defence of the country, and on whose skill and fidelity our honor and security must so much depend, that, whatever degree of perfection may be given to the Military Academy at West Point, as an elementary school, yet our military education, in the higher branches of the art of war, must remain imperfect without a school of application and practice. The education at the Military Academy will be full and complete for officers of infantry; but those who may be promoted into the artillery and the corps of engineers ought to have the means, in a school of application and practice, to complete their theoretical knowledge in the higher branches of the science connected with their profession, and to apply the knowledge acquired to practice. It ought never to be forgotten that the military science, in the present condition of the world, cannot be neglected with impunity. It has become so complicated and extensive as to require for its acquisition extensive means, and much time to be exclusively devoted to it. It can only flourish under the patronage of the Government, and without such patronage it must be almost wholly neglected. A comparatively small sum expended, in time of peace, to foster and extend the knowledge of military science, will, in the event of war, be highly beneficial to the country, and may prove the means of its safety. A school of practice and application, with the exception of the cost of the necessary buildings, would be attended with but a small expense; and, with such an institution, officers would be trained who would be masters of every branch of knowledge connected with their profession, and who, by their science, would be not only highly useful, but an ornament to their country. Without pursuing the subject any further, I would respectfully refer the House to a report on this interessing subject made in obedience to its order, on the 15th of January, 1819.

I have the honor to be your most obedient servant,

J. C. CALHOUN.

Hon. H. CLAY, *Speaker of the House of Representatives.*

A.

SIR: ENGINEER DEPARTMENT, *February* 23, 1820.

I have the honor to enclose a copy of the rules and regulations that have been adopted for the government of the Military Academy, together with the list of cadets at the Military Academy on the 1st January, 1815, as called for by the House of Representatives on the 26th February, 1819.

I have the honor to be, very respectfully, your most obedient servant,

By order,

J. L. SMITH,
Lieut. Corps of Engineers.

Hon. J. C. CALHOUN, *Secretary of War.*

RULES AND REGULATIONS FOR THE GOVERNMENT OF THE MILITARY ACADEMY AT WEST POINT.

ORGANIZATION OF THE ACADEMY.

1. The commandant of the United States' corps of engineers is the inspector of the Military Academy: he is responsible to the Department of War for the correct progress of the institution. He will furnish the requisite estimates and reports to, and will receive orders from, the Secretary of War, relative to the academy. From the inspector only will the superintendent receive orders, and to him only will he make all returns and communications appertaining to the institution.

2. A permanent superintendent of the academy shall be appointed who will direct the studies, field exercises, and all other academic duties; and all professors, academic officers, and cadets, shall be under his command.

3. The officer of the corps of engineers, who may have charge of the military exercises of the academy, shall have the immediate control of the institution, and be held responsible for the correct management of it.

4. The inspector is authorized to appoint a suitable person to act as treasurer of the cadets, under regulations approved of by the Secretary of War.

5. The superintendent of the Military Academy is authorized to detail not exceeding four cadets to discharge the duty of acting assistant professors of mathematics; and each cadet, so detailed, will receive ten dollars per month, as a compensation for extra services. The appointment will be considered as an honorable distinction.

6. No member of the academic staff (except he be a commissioned officer or cadet) shall be liable to be ordered upon any duty beyond the line of his immediate profession as an instructor; and every professor and teacher, at the head of a separate department, shall have the selection of the books and instruments intended for the use of his department.

7. The professors, teachers, and assistants, who have no families, shall eat with the cadets, and shall be so distributed that one of them shall be attached to each of the houses kept for that purpose.

8. A board of visitors shall be constituted to consist of five gentlemen versed in military and other science, of which Board the superintendent shall be president. The president and members of this Board shall be present at the academy, during the general examination, for the purpose of ascertaining the progress and improvement of the students in the various branches of science and instruction; and, also, for the purpose of examining into every thing relative to the internal organization, management, and police of the institution.

9. There shall be two general examinations in each year; the first to commence on the first day of January, and the second on the first day of June. At these times the students shall be examined by the professors in all the branches of science and instruction, through which they have passed, in presence of the Board of Visitors, and such other literary gentlemen as may be invited to attend.

10. Two reports shall annually be made out by the Board of Visitors; one, immediately after each of the general examinations, in January and June; which shall contain a full development of the actual state and progress of the institution, and suggestions for its advancement and improvement, as the Board may think necessary; the reports to be transmitted by the inspector to the Secretary of War.

11. No officer of the army, of any rank whatever, shall exercise command at West Point, unless subordinate to the inspector or superintendent of the academy.

12. The ordnance department, near Albany, will furnish the Military Academy with ordnance and ordnance stores on the order of the inspector.

13. The quartermaster at West Point shall furnish books, stationary, and all other articles wanted for the use of the Military Academy, upon the requisition of the superintendent; and the quartermaster shall forward to the War Department timely estimates for funds, approved by the inspector.

14. No books, instruments, or other public property at West Point, attached to the academy, shall, on any account, be removed therefrom.

COURSE OF INSTRUCTION AND STUDIES.

1. The following branches of science and instruction shall be considered as comprising a complete course of education at the Military Academy.

The English and French languages, and a review of the Latin and Greek; mathematics; military drawing; natural and experimental philosophy, including astronomy; engineering; geography; history; ethics; military instruction, and the sword exercise.

English Language.—A course of English shall embrace English grammar and composition.

French Language.—A course of French shall consist in pronouncing the language tolerably, and translating from French into English, and from English into French, with accuracy.

Latin and Greek Languages.—A course of Latin and Greek shall embrace a review of the Latin and Greek authors usually taught in academies; but no cadet shall be compelled to study these languages, who shall not have studied them previous to his appointment.

Mathematics.—A complete course of mathematics shall embrace the following branches: viz. the nature and construction of logarithms, and the use of the tables; algebra, to include the solution of cubic equations, with all the preceding rules; geometry, to include plane and solid geometry, also ratios and proportions, and the construction of geometrical problems; application of algebra to geometry; practical geometry on the ground; mensuration of planes and solids; plane trigonometry, with its application to surveying and the mensuration of heights and distances; spherical trigonometry, with its application to the solution of spherical problems; the doctrine of

infinite series; conic sections, with their application to projectiles; fluxions to be taught at the option of the professor and student.

Drawing.—A complete course of drawing shall include the elementary drawing of figures; rules and practice of perspective; profiles of permanent fortifications; of every kind of field works, and also of topographical plans.

Philosophy.—A complete course of philosophy shall embrace the following branches: the principles of mechanics, with their general application; hydrostatics; hydraulics; pneumatics; optics; the elements of chemistry; electricity; magnetism, and astronomy.

Engineering.—A complete course of engineering shall embrace the following branches: military and civil architecture; permanent and field fortification; field works generally; rules for the calculation of the time, labor, and materials necessary for the construction of different kinds of works; also rules for the construction of all the appendages necessary in field works; the construction of mines and fougasses, and the different modes of attacking and defending fortified places; also castramentation.

Geography.—A complete course of geography shall embrace the solution of the several problems of the spheres usually prefixed to treatises on geography by means of the globes; a knowledge of the grand divisions of the earth; of the extent, boundaries, and relative situations of the several counties in each of those grand divisions; likewise a knowledge of the natural productions, commerce, manufactures, government, naval and military strength, relative importance, and the use of maps.

History.—A complete course of history shall embrace a course of universal history; the history of America generally; the history of the revolutionary war; a history of the United States, and of such particular States as the professor of that branch shall judge proper.

Ethics.—A course of ethics shall include the elements of moral science, and of natural and political law.

Military Instruction.—A complete course of military instruction shall embrace a general course of tactics; a knowledge of infantry duty, to commence with the elementary drill of the soldier, and to include the discipline and police of the battalion and platoon in all their parts; a knowledge of artillery duty, including the artillery drill, practical gunnery, and also the performances of all the regular duties of the camp.

Sword Exercise.—Under the sword exercise shall be included the broad sword exercise, and the cut and thrust or small sword exercise, either or both, according to circumstances.

2. Each professor and instructor shall be limited in the discharge of his official duties to his own department, so as not to interfere with any other. Each professor and teacher at the head of a separate department shall be the judge of the proper mode of conveying instruction in his own department, and shall be held responsible for the correctness of this mode.

3. To complete the preceding course of studies will require four years; the branches to be pursued, and the course to be completed in each year shall be as follows:

First year. English grammar and composition, and the French language, logarithms, algebra, and plane geometry, to include ratios and proportions.

Second year. A continuation of the French language, the geometry of planes and solids, and the construction of geometrical problems; the application of algebra to geometry; the mensuration of planes and solids; plane and spherical trigonometry, with their applications; conic sections; practical geometry and drawing, with their applications.

Third year. Natural and experimental philosophy, astronomy, engineering, and drawing, continued.

Fourth year. Geography, history, and ethics; the review of the English grammar, and of the Latin and Greek languages; also a general review of the most important branches in each of the departments.

4. The particular course of studies to be completed by the classes between the general examinations in each year shall be determined by the superintendent and the academic staff in such manner as experience shall point out to be most conducive to the interests of the institution.

5. The military instruction of the cadets shall be under the immediate direction of the superintendent of the academy, and shall be attended to at such times as will the least interfere with their other academic duties.

6. The superintendent of the academy and the academic staff shall be at liberty to propose to the Secretary of War such alterations and amendments to the foregoing course of studies as they shall at any time conjointly deem necessary for the good of the institution; the whole, or a majority of them, agreeing to such alterations and amendments.

7. Should it be found by experience that too large a portion of study or instruction is assigned in the preceding course to any particular year, the superintendent and the academic staff conjointly shall be at liberty to transfer from the course of one year to that of another such particular portions of study or instruction as may appear necessary to produce an equality; the whole, or a majority of them, agreeing to such transfer, which shall be reported to the Secretary of War.

8. There shall be an annual encampment of the cadets, to commence on the 1st day of July, and end on the 31st day of August.

Cadets.

1. Each cadet, previous to his being admitted a member of the Military Academy, must be able to read distinctly, and pronounce correctly, to write a fair legible hand, and to perform with facility and accuracy the grand rules of arithmetic, both simple and compound, of the rules of reduction, of simple and compound proportion, and also of vulgar and decimal fractions.

2. All newly appointed cadets will be ordered to join the Military Academy for examination by the 25th day of June in each year; and no cadet shall be examined for admission after the 1st day of September following unless he shall have been prevented from joining at the proper time by sickness or some other unavoidable cause, in which case he may be examined with the fourth class at the general examination in January, and if then found qualified to proceed with that class, may be admitted accordingly.

3. The superintendent is authorized to grant furloughs to the cadets at the request of their parents during the period of their encampment; provided that not more than one-fourth part of the whole number be absent at any one time: and provided, also, that every cadet, previous to his receiving a furlough, shall have been present at not less than two entire encampments.

4. The pay and subsistence of all cadets who neglect to join the Military Academy on the expiration of their furloughs shall be stopped; nor will the pay and subsistence so stopped be issued to them unless they can assign the most satisfactory reasons for their absence.

5. Any cadet who shall be absent without leave for a longer period than two months from the academy, shall be dismissed from the service of the United States.

6. The superintendent will annually in the month of November report to the War Department the names of such cadets as have most distinguished themselves in the examinations, not exceeding five in each class, specifying the studies in which they excel, that their names may be published in the Army Register.

7. Whenever a cadet shall, on examination, be deemed qualified for a commission, he shall receive a diploma, signed by the superintendent and professors; and his name shall be presented to the Secretary of War by the inspector, with a recommendation for commission in such corps as the diploma may authorize.

8. In the promotion of cadets the lineal rank of each graduating class shall be established, in conformity to the principle of general merit, ascertained by a competent board of examiners.

9. The distribution of cadets to the different corps of the army at the time of promotion shall be made according to their particular talents and qualifications, ascertained in like manner; provided that this distribution be allowed in no instance to interfere with the principle of rank according to general merit.

10. No cadet can be promoted from the academy until he shall have completed his course of studies at the same, and received the diploma of the academic staff to that effect.

11. No cadet who shall resign his warrant, or otherwise be separated from the academy before the completion of his studies, shall on any account receive an appointment in the army of the United States until after the promotion of the class to which he belonged; nor then if such appointment interfere in the smallest degree with the rank of any member of that class.

12. Any cadet who shall have been reduced to a lower class, and shall, upon a second examination, be found unqualified to advance with his class to the next higher grade, shall (unless he shall have been prevented from attending to his studies by sickness, necessary absence, or some other evident necessity,) be reported to the Secretary of War by the academic staff, stating the branches of science in which he is most deficient, those in which he has made the greatest progress, as well as the general inclination, temper, and habits which appear to predominate in his actions; and especially whether his propensities impel him to the profession of arms. Upon this report he may be dismissed or retained at the will of the President.

13. No cadet who shall be dismissed from the institution, or compelled to resign on account of idleness, neglect of study, or any species of bad conduct, shall be eligible to any office or post in the army of the United States until at least five years after the promotion of the class to which he may have belonged.

B.

A list of additional professors, assistant professors, teachers, and other officers, deemed necessary for the United States' Military Academy.

Four additional assistant professors of mathematics.

Remarks.—The actual number of cadets on the class-rolls of the academy amounts to one hundred and eighty-one, of which twenty-four are of the first class, forty-one of the second class, fifty-four of the third class, and sixty-three of the fourth, or lowest class. In supposing the whole number of cadets present to be two hundred, it is calculated that the first class will generally consist of from thirty to forty; the second class from forty to fifty; the third class from fifty to sixty; and the fourth class from sixty to seventy. The numerical inferiority of the higher classes will proceed from resignations and other casualties, and from the number who will be retained in the lower classes, in consequence of not passing their examinations.

Mathematics constitute the *principal* course, and the French language the *collateral* course, for the third and fourth, or the two lower classes. The average number of those two classes is estimated at one hundred and twenty, who are to be taught mathematics every day at the same hours. Experience has proved that one teacher cannot instruct a greater number than twenty or twenty-five, in pursuing the practical method of instruction which has been adopted at the Military Academy, and which differs essentially from the method pursued at most of the colleges and universities in the United States. It is believed, therefore, that the third class will never be divided into less than two sections, and the fourth class into three sections, for mathematical instruction, each section requiring an assistant professor. I do not speak of the professor, because it is supposed to be understood that his duties, as professor and lecturer, embrace the whole department of mathematics, and should not be limited to the instruction of any particular section.

The present practice of employing cadets as assistant professors is very objectionable:

1st. Because it is extremely difficult to find a sufficient number who are capable.

2d. Because they perform, with great reluctance, a duty, for which they receive no compensation, and which deprives them, in a great measure, of the benefits of instruction in their own classes.

3d. Because, being the equals and familiars of those whom they instruct, they are unable to inspire the respect so necessary to their duties.

4th. From the frequent changes which it induces, as a cadet no sooner acquires the experience which is so valuable in the art of instructing, than he receives a commission, and quits the unprofitable post of a teacher without pay.

Two additional teachers of French.

Remarks.—The third and fourth classes, estimated at one hundred and twenty, are, by the regulations, to be taught French daily. In regard to our present deficiency of teachers in that department, and to the necessity of supplying it, I beg leave to refer to my communication to the War Department, dated the 2d of October, 1817. In case a suitable number of teachers shall be allowed, I believe that a competent knowledge of the French language can be acquired by a daily attendance during the first year, and an attendance every other day during the second year. This arrangement would require two teachers of French for the fourth class, and one teacher (who would be the principal) for the third class. This class would *then* be divided for the *collateral* course into two divisions, which would recite alternately to the principal teacher of French, and to a professor of the languages and oratory, or to a professor of ethics, geography, and history, should one or the other or both of those professors be hereafter provided by Congress.

An additional assistant professor of natural and experimental philosophy.

Remarks.—The third class is taught philosophy for the *principal*, and elementary drawing for the *collateral* course of studies; and, as it will usually consist of from forty to fifty cadets, it should always be divided, as it actually is, into two sections for philosophical instruction, requiring as many teachers or assistant professors. The professor is now compelled to act the part of an assistant himself, by teaching one of the sections. He is, therefore, unable to deliver lectures, and thus to extend to the whole class the benefit of his talents as professor. It is important to relieve him from the duty of an ordinary teacher by allowing him another assistant.

A professor of chemistry and mineralogy.

Remarks.—Chemistry and mineralogy have not heretofore constituted a part of the instruction at the Military Academy. They are, however, a necessary supplement to the course of sciences now taught, and when a professor shall be provided, he will give lectures to the two senior classes of the institution.

A chaplain, to be also professor of ethics, geography, and history; also a professor of the languages and of oratory.

Remarks.—To the foregoing, it would be desirable to add a professor of the languages and of oratory, to instruct those cadets who may be deficient in the knowledge of their own language, or who may be desirous of extending their knowledge in the learned languages. There now is, and ever must be, a number of cadets more capable and more advanced than the rest, who can devote a part of their time, without neglecting their classical studies, to other branches of science and literature. To afford all such the aid of suitable instructors, would increase the usefulness and enhance the reputation of the institution.

A teacher of military drawing.

Remarks.—Elementary drawing, *with its applications*, constitutes the collateral course for the two senior classes, for which one teacher of drawing is not sufficient. Numerous models of drawing are wanting to that department, and cannot be supplied until another teacher shall be employed.

A quartermaster.

Remarks.—The purchasing and issuing of the books, stationary, instruments, wood, and other supplies, the protection of the public lands from depredation, the repairing of the public buildings, and the preservation of other public property at this post, are duties requiring the immediate and exclusive attention of an officer, to whom no other duties should be assigned, with the exception of such as relate to the clothing and equipment of the cadets.

Respectfully submitted to the honorable Secretary of War,

By his most obedient and very humble servant,

S. THAYER, *Brevet Major,*
Superintendent Military Academy.

ENGINEER DEPARTMENT. A true copy:

J. L. SMITH, *Lieutenant Corps of Engineers.*

WEST POINT, *January* 20, 1818.

We, the members of the Academic Staff of the United States Military Academy, do hereby certify that, in our opinions, a quartermaster, two additional teachers of the French language, and four additional assistant professors of mathematics are absolutely necessary to that institution; and that the additions of a professor of chemistry and mineralogy, a professor of ethics, geography, and history, (being also chaplain,) a professor of the languages and oratory, another assistant professor of philosophy, and a teacher of military drawing, would be highly advantageous.

JARED MANSFIELD,
Professor of Nat. and Ele. Philosophy, Military Academy.

ANDREW ELLICOTT,
Professor of Mathematics, United States' Military Academy.

C. CROZET,
Professor of Engineering.

CLAUDIUS BERARD,
Teacher of French.

C. E. ZOELLER,
Teacher of Drawing.

D. B. DOUGLASS,
Brevet Captain and Assistant Professor of Philosophy.

CHAS. DAVIES,
Brevet Lieutenant and Assistant Professor of Mathematics.

C. M. EAKIN,
Lieutenant and Assistant Professor of Engineering.

G. W. GARDINER,
Lieutenant corps of Artillery and Inst. Artillery.

C.

Propositions in relation to the United States' Military Academy at West Point.

1st PROPOSITION. The academy to consist of the academic staff, and other officers and cadets doing duty therewith, and to be under the superintendence of an officer of the army, specially designated for that purpose by the President of the United States.

Remarks.—By the laws of 1802 and 1812, the Military Academy is made to consist, in part, of the corps of engineers; and the senior officer of that corps, present at West Point, is *ipso facto* the superintendent of the institution. This provision, which appears to have been originally made with a view of economizing officers, has latterly been rendered, in a great measure, nugatory, by the great increase of duties in the engineer department. The officers of that corps, comparatively few in number, have, for some years past, been principally engrossed with the performance of their own proper duties; and the academy, though not entirely deprived of their services, has generally been able to derive but casual and uncertain advantages from them. The superintendence, also, according to the rule on that subject, is evidently exposed to all the contingencies of an ordinary command, and it has not unfrequently happened, that a subaltern officer of very low grade has been called upon to discharge the duties of that important station. The inconvenience arising to the academy from these circumstances has suggested

the necessity of adopting an organization distinct from that of the corps of engineers, and such is the object of the first proposition. It is contemplated, however, as will be seen by a future proposition, to secure to the officers of engineers all the advantages of study and instruction at the academy which they now enjoy; and, also, to constitute the chief engineer inspector of the institution.

2d PROPOSITION. The academic staff to be so increased as to consist of the following officers, viz: One professor and two assistant professors of natural and experimental philosophy; one professor and four assistant professors of mathematics; one professor and one assistant professor of engineering; one professor of geography, history, and elements of civil law, to be also chaplain; one professor of languages, oratory, and belles-lettres; one principal and two assistant teachers of the French language; one teacher of elementary drawing; one teacher of military drawing; one riding and sword master.

Remarks.—The reasons which have suggested the increase of the staff, as contemplated in this proposition, are given at large in a separate *projet* relative to that particular subject.

3d PROPOSITION. The additional professors, assistant professors, and teachers above mentioned, to be appointed from the army or otherwise; and all future vacancies in the academic staff to be supplied in the same way.

Remarks.—By the present law, the assistant professors must be taken from the corps of engineers or cadets. The appointment from cadets, for reasons given in the *projet* above referred to, is considered as generally exceptionable; and the selection of officers of engineers, in the present numerical state of that corps, is, even now, attended with considerable inconvenience; and still more would this be the case should the staff be increased to the extent contemplated in the second proposition. On these accounts, therefore, as well as for the sake of the institution itself, it is desirable that the field for selection should be extended, and that in as great a degree as possible.

4th PROPOSITION. An instructor of tactics, and an instructor of artillery, to be selected from the army and attached to the academic staff.

Remarks.—These officers are proposed to be selected from the army for the purpose of acting not only as instructors, but as subordinate officers in the command of the cadets; an arrangement which will obviate the necessity of appointing or selecting other officers for this particular purpose.

5th PROPOSITION. The other officers attached to the academy, to be the following: One surgeon; one paymaster and treasurer; one quartermaster; and one adjutant.

These three last to be allowed a clerk each, with the pay and emoluments of an artificer.

Remarks.—There is a post surgeon already attached. The duties of paymaster and treasurer are at present performed by the paymaster of engineers. Should the academy be separated from the corps, however, it would be advisable to transfer the paymastership to the former, as, in the event of such a separation, there would be little or no duty for a paymaster to the corps.

The establishment of a quartermaster's department at the academy may be considered as absolutely indispensable; in proof of which it would only be necessary to refer to the extent of the public lands and public buildings the amount of public property, of various kinds, at the place, and the quantity of fuel, and stationary, and books, necessary to be supplied.

The present adjutant is provisionally attached.

6th PROPOSITION. The compensation of the several officers of the academy to be as follows, viz: To each professor, the pay and emoluments of a lieutenant colonel of engineers; to the principal teacher of French, the instructor of tactics, and the surgeon, the pay and emoluments of a major of engineers; to the instructor of artillery, to each assistant professor and assistant teacher, to the two teachers of drawing, and to the sword and riding masters, the pay and emoluments of a captain of engineers; to the paymaster and quartermaster, each, the pay and emoluments of a regimental paymaster; and to the adjutant, the pay and emoluments of a regimental adjutant: provided, that, to each of the professors be permanently assigned a good and sufficient dwelling house and garden; and, in like manner, suitable quarters to the other instructors, severally.

Remarks.—The pay and emoluments of a lieutenant colonel are at present allowed to the professor of natural philosophy, and those of a major to the professors of mathematics and engineering, a distinction which does not appear to rest upon just and equitable grounds. The relative importance of the several professorships, as parts of the institution, is considered to be so nearly equal as not to justify any difference of endowment on that account, and the proportion of labor, if taken into consideration, would be found to give at least as great claims to the chairs of mathematics and engineering, as to that of natural philosophy. It is therefore proposed to allow to the former the same compensation that is at present allowed to the latter, and the same also to the additional professors, recommended in the second proposition. The pay and emoluments of a lieutenant colonel of engineers, together with the consideration of a house and garden, is calculated to be about equal to the compensation usually allowed to the professors of our colleges and universities, and it is believed that a lower salary for the professors of this institution would not enable it to command such a degree of talent as would be desirable for the supply of vacancies. The compensation of the other officers mentioned in the proposition is conceived to be in a suitable ratio with that of the professors.

7th PROPOSITION. The number of cadets to continue at two hundred and fifty, the same as heretofore; and the pay and emoluments to continue also the same, viz. sixteen dollars per month pay, and two rations per day subsistence.

Remarks.—Two hundred and fifty cadets, when properly organized into classes as hereafter proposed, is judged sufficient, and even more than sufficient, for supplying the vacancies in the present military establishment; and it is not recommended that a greater number should ever be kept in service than can be provided with commissions at the conclusion of their studies. At present, the greatest excitement to diligence and application, and probably the greatest which could be employed, is the prospect of being promoted into the army, the field of their future exertions, according to merit. But, should the number of cadets be increased, so as to exclude any considerable proportion of them from promotion, that ambition, which is now the peculiar spirit of this institution, would, in all probability, be checked; and even the obligation to remain in service, which is now felt, would, it is feared, be in a great measure done away.

8th PROPOSITION. The cadets to be subject to the established regulations of the academy; to be organized into companies for police and military instruction, at the discretion of the superintendent, and to be taught and exercised in all the various field and garrison duties of an officer, non-commissioned officer, and private.

Remarks.—The provisions of this proposition are, in effect, nearly the same, as those of the present law, such alterations only having been made as were rendered necessary by the new organization suggested in the former propositions. By the law of 1812, for example, the cadets are arranged into companies, according to the directions of the commandant of engineers, and officered from that corps. By the proposition here offered, however, the

companies of the cadets are to be *organized* at the discretion of the superintendent. With respect to military instruction, it has been thought advisable to comprehend it under the general expression of *field* and *garrison* duty, and leave the time and period of encampment, which at present is fixed by law, to be made rather a subject of regulation.

9th PROPOSITION. The professors of the institution, the principal teacher of French, the instructor of tactics, and the instructor of artillery, to constitute an academic board, or council, of which the superintendent should always be president, and whose duty it should be to fix and improve the system of studies and instruction; to conduct and decide upon all examinations; and to specify, in detail, the duties of the several instructors.

Remarks.—This board, or council, is intended to be equivalent to the *conseil de perfectionnement* of the French polytechnic school, and in some respects similar to the Faculty of Arts of our colleges. The heads of the departments of instruction are selected as its members in order that its meetings may interfere as little as possible with the ordinary recitations of the cadets, which, if it were constituted of the whole staff, would generally have to be suspended for that purpose. A selection also is desirable, on account of the greater facility and despatch with which business may be transacted by a small number of persons.

10th PROPOSITION. The course of study at the academy to embrace a period of four years; and the cadets to be kept, by gradations of one year, in four corresponding annual classes.

Remarks.—The system here proposed differs in no respect from that which has been adopted, and is now acted upon, at the academy. It is suggested, however, in this place, as a proper subject of law or of permanent regulation.

11th PROPOSITION. No cadet hereafter to be appointed who shall be under sixteen or over twenty years of age, nor until he shall have been examined and found well versed in reading, writing, orthography, English grammar, and arithmetic; which are to be considered as the pre-requisites for commencing with the fourth or lowest class.

Remarks.—The principal study of the cadets, during the two first years of their course, is mathematics, and the experience of the professors has proved that most young men, at the age of fourteen, are neither sufficiently matured in mind, nor sufficiently grounded in the previous studies, to proceed to the higher and more abstruse parts of that science. The consequence, therefore, generally is, that, at the second or third examination, they are liable to be turned back, and though, by the help of good natural talents, they may ultimately accomplish their course, they seldom acquire an adequate knowledge of mathematics, or of the sciences connected with it; to obviate this evil, it is proposed to alter the minimum age of the cadets, from fourteen to sixteen years; an alteration the more to be desired, as it will enable the candidates to acquire a previous knowledge of English grammar, which is therefore inserted among the pre-requisites.

12th PROPOSITION. Cadets, who pass a satisfactory examination, after having gone regularly through all the classes, to receive a degree from the academic council, designating the corps in which they are respectively judged qualified for promotion.

Remarks.—This proposition is offered merely in the language of the present law, a slight variation having been admitted with a view of establishing the final examination of the cadets, and the manner of designating the corps in which they are recommended for promotion.

13th PROPOSITION. When any cadets, not exceeding two in a class, shall be distinguished, in a remarkable degree, for their scientific attainments, that fact to be particularly set forth in their diplomas, and such cadets, and such only, to be recommended for promotion in the corps of engineers.

Remarks.—The provision here proposed is calculated not only for the purpose of supplying the corps of engineers with scientific and meritorious officers, but as a stimulus to the exertions of the cadets, both of which are objects of such obvious importance as not to require a very lengthy remark. The care with which it is proposed to guard the corps of engineers against the admission of any member not duly qualified, is thought to be not inconsistent with the scientific character of that corps, and the importance of its duties; and, at the same time, it is not forgotten that the competition thus offered to the cadets must, of course, be attended with the greatest advantages to every corps of the army into which they may be promoted.

14th PROPOSITION. Every cadet receiving the degree of the academy to be considered a condidate for promotion in the corps therein designated, and in case there shall not be a vacancy in such corps at the time he may be attached to it, at the discretion of the President of the United States, by brevet of the lowest grade, as a supernumerary officer, with the usual pay and emoluments of that grade, until a vacancy shall happen: *Provided*, that there shall not be more than one supernumerary officer attached to a company at one time.

Remarks.—This proposition is given in the language of the present law, and is attended with only one objection, as a member of the present series. The corps of engineers, in its present organization, being liable to fewer vacancies than any other corps of the army, the graduates who are assigned to it will more generally be attached by brevet than those assigned to other corps. Hence it will not unfrequently happen that the contest for personal distinction, contemplated in the preceding proposition, will be attended with a sacrifice of rank on the part of the successful candidate. As this is a result to be guarded against, if possible, I would here suggest the propriety of making such an additional number of vacancies in the corps of engineers as would always admit of its graduates being commissioned. I am the more ready to make such a suggestion, from a belief that an increase of the corps in question is loudly called for by the present state of the service. The following plan to that effect is respectfully submitted, viz: the addition of two majors, four captains, eight first lieutenants, and eight second lieutenants. The higher grades to be filled by selections made in the present corps, and the lower by the gradual promotion of cadets, as already proposed.

15th PROPOSITION. Cadets, upon the recommendation of the academic council, to be attached as such to regiments or corps; but not in this case to be promoted, until the class to which they belonged shall have been promoted.

Remarks.—There have sometimes been cadets at the academy, who, though unable to go through with the course of studies to advantage, have nevertheless exhibited a prospect of their becoming useful and active officers, with proper cultivation, in the field. The present proposition is intended to provide the means of promotion to such, and at the same time to guard against a facility in this respect which might interfere with the promotion of their companions.

16th PROPOSITION. No cadet to be promoted from the academy until he shall have completed his course and been graduated in the manner above specified.

Remarks.—The object of this and the following proposition, as will be seen, is to guard carefully the point of rank in favor of those who persevere in their studies.

17th PROPOSITION. Cadets who resign to be ineligible to any office in the army until after the class from which they resign shall have been promoted.

18th PROPOSITION. Persons who shall have been dismissed from the academy to be ineligible to any office in the army for five years thereafter, and for ever, if dismissed for any act in itself dishonorable.

19th PROPOSITION. A number of waiters for the cadets, not exceeding one for every twenty, to be employed by the quartermaster.

20th PROPOSITION. Such a number of musicians to be enlisted for the use of the academy as the President shall direct.

21st PROPOSITION. The chief engineer to be inspector of the academy, and to visit it as often in that capacity as the President of the United States shall direct.

Remarks.—As the Department of War has already appointed an officer to perform the duty of inspector, the necessity of such an officer appears to have been admitted; and the proposition to confer it upon the chief engineer arises not only from his claim as chief of a scientific corps, but from his being the officer already designated for that duty. It was proposed also in the remarks to the first proposition to offer this as an equivalent, in part, for the separation of the academy from the corps.

22d PROPOSITION. Four scientific men, to be selected by the President of the United States, and constitute a board of visitors, of which the inspector shall always be chairman, and whose duty it shall be to attend at the general examinations, and to inquire into and report accurately to the War Department the state and progress of the institution; such compensation being allowed them, while so acting, as the President shall direct.

23d PROPOSITION. Officers of engineers, residing at the academy by permission of the chief of that corps, to be allowed quarters not interfering with the officers on duty at the academy, and access to the library and lectures of the professors, under such restrictions only as are applicable to the officers of the academy.

Remarks.—This proposition is anticipated in the remarks to the first, being intended, like the twenty-first, as an equivalent for the separation of the academy from the corps of engineers.

24th PROPOSITION. So much of the law fixing the military peace establishment, passed in 1802, as relates to the Military Academy, also the second section of an act passed on the 28th of February, 1803, and the second, third, and fourth sections of an act making further provision for the corps of engineers, passed in 1812, to be repealed.

Remarks.—All the provisions of the laws here proposed to be repealed are embraced in the present series of propositions, except that requiring the cadets to sign articles of obligation to remain five years in service, which, as it has never been carried into effect, and is not calculated to produce an equal effect, is not recommended for renewal.

Respectfully submitted.

S. THAYER, *Brevet Major, Sup. Military Academy.*

ENGINEER DEPARTMENT.

A true copy:

J. L. SMITH, *Lieutenant Corps of Engineers.*

D.

Remarks on "the propositions in relation to the Military Academy at West Point."

1. The school at West Point to be under the superintendence of an officer of the army, especially appointed for that purpose by the President of the United States. The superintendent will communicate directly with the Secretary of War on all subjects relating to the instruction, administration, &c. of the school.

Remarks.—The school at West Point now furnishes officers indiscriminately to the whole army; there is, consequently, no good reason why the corps of engineers should any longer exercise an exclusive control over the institution. The Secretary of War alone should be vested with a general control, and with the only intermediate authority between the superintendent and the President of the United States.

2. The academic staff to consist of the following professors, &c.: One professor, and two assistant professors, of natural and experimental philosophy; one professor, and four assistant professors, of mathematics; one professor, and two assistant professors of chemistry, &c.; one professor, and one assistant professor, of *fortification* and *descriptive geometry;* one professor, and one assistant professor, of artillery; one teacher, and two assistant teachers, of the French language; one teacher of drawing, and two assistants; one riding and sword master.

Remarks.—As it is proposed to perfect the system of instruction at the academy, by gradual ameliorations, it is important that all changes or additions that are made in relation to it should be confined to what is strictly necessary; and not to hazard the introduction of accessories, which might encroach upon the time required for the acquisition of more valuable objects. Geography, history, jurisprudence, the languages, belles-lettres, are considered as among the number of these accessories. It is conceived that the creation of professors for these branches may be advantageously deferred until experience and the improved condition of the school shall show how far they can be useful, and in what way they can be rendered most so.

In the original propositions no mention is made of a professor of artillery for teaching the theory of gunnery, fabrication of arms, constructions, &c., although a professor for these branches is as indispensable for the cadets destined for the artillery as one of fortification is to those destined for the engineers.

Fortification and descriptive geometry are now taught by the same person, and it is believed essential that he should continue to profess them both, as a knowledge of descriptive geometry is equally necessary to the teacher and student of fortification. It is to mark the necessity and insure the permanency of the union of both these branches at the school at West Point, that the appellation is here given of "professor of fortification and descriptive geometry."

What is termed military drawing being attendant, and but a secondary qualification in a teacher of drawing at a military school, it is believed that the same individual should profess all the branches of that art; and, that two assistants will enable him to divide these branches, if necessary, and conduct them to greater advantage than if each branch was confided to a separate professor.

3. The professors, assistant professors, teachers, and their assistants, to be appointed from the army or otherwise, and all vacancies to be supplied in future in the same way.

Remarks.—The corps of engineers is altogether insufficient to supply the school with professors and assistants; and the academic staff would suffer the most serious detriment in its composition, by restricting the selection of its members to the narrow limits of a corps, insufficient in its numbers to discharge its own professional duties.

4. An instructor of artillery, and an instructor of infantry, to be selected from the army, and attached to the Military Academy.

Remarks.—It is proper that these two instructors should be taken from their respective arms, the first will instruct in artillery exercises, the service of the piece, of the mortar, &c.; the second will instruct in the infantry drill and evolutions, according to the regulations established for the infantry of the United States. They can also be advantageously employed as subordinate officers in the command of the cadets, as stated in the propositions.

5. The other officers attached to the academy, &c.

Remarks.—These additional officers appear to be strictly necessary.

6. The compensation of the several officers of the academy to be as follows, &c.

Remarks.—The propositions contained in this article are equitable, in placing all the professors on the same footing as to emoluments; for the relative importance of their talents and labors must be considered too nearly equal to admit of a just discrimination. It is desirable, for the same reason, that the instructor of artillery should also be placed on an equal footing with the instructor of infantry.

It is believed that the pay and emoluments of the professors, and the rest of the academic staff, mentioned in the original article, are placed as low as they well can be, without incurring serious injury to the institution. The inducements to individuals should be such as would enable the Government to command, at all times, the degree of talent and other requisites, suitable and necessary to those stations, and to this end we believe, that the pay, &c. of the academic staff should be raised a grade higher than is stated in the original article six.

7. The number of cadets admitted annually to the school, (allowance being made for casualties,) should not exceed the number of graduates that may be annually required to fill the vacancies in the army. The total number of cadets in the school should be regulated according to this principle.

The cadets will continue to receive sixteen dollars per month, and two rations per diem.

Remarks.—Whether the school at West Point be destined to supply the whole, or part of the vacancies which may annually occur in the army, it is believed essential to the interests of the institution, that the number of graduates should not exceed the annual number of promotions.

It would perhaps be more advantageous to the cadets, for the Government to furnish them their board and clothing, and deduct the amount from their pay and rations. This arrangement would relieve them from the necessity and embarrassment of providing for themselves, and all their time and attention might then be exclusively devoted to their academical pursuits.

8. The cadets will be organized into companies, &c., at the discretion of the superintendent, &c.

Remarks.—It is a matter of course, that the cadets should be subjected "to the established regulations of the academy." Their organization into companies should be left entirely to the discretion of the superintendent. The number of these companies, their force, and the cadets who should compose them, depending upon circumstances that are continually changing, such as their size, age, degree of proficiency in the infantry instructions, &c. The original article eighth should therefore be maintained.

9. The professors of the institution, the principal teacher of the French language, the principal teacher of drawing, to constitute an academic board, or council, of which the superintendent should always be president.

It will be the duty of the Board to conduct and decide on all examinations of the different classes, at the end of each academical year; to determine the relative proficiency of the cadets, in the studies of their respective classes; to make out and forward to the War Department the necessary merit-rolls, accompanied with such remarks, &c. as may be requisite to make known the results of these examinations.

The Board will also assemble periodically, or at such times as the Secretary of War may direct, and will report to him on the progress and state of the academy; embracing its organization, police, course of instruction, administration, &c. and suggesting such ameliorations in these departments as may appear to them either necessary or expedient.

Remarks.—The original propositions, under the ninth article, which vests the Board with the power "to fix and improve the system of studies and instructions," and "to specify in detail the duties of the several instructors," appear to have a tendency, incompatible with the nature and objects of a military school, and to require the modifications here suggested.

According to the original propositions above cited, the degree and kind of instruction that the cadets would receive at the school, is to be confided, without reserve, to the discretion of the very individuals who are employed to teach, and who would be empowered at the same time to prescribe their own duties. The Government would seldom be acquainted with the actual condition of the interior of the school; and would be stripped of that immediate control over its operations, which is essentially necessary to the interests and success of the institution.

Agreeably to the modifications here recommended, the Board is charged with the duty of proposing ameliorations, &c. which must receive the sanction of the Government, before they can be carried into effect. With this check upon the operations of the Board, the changes that may in future take place in the instruction, &c., will most probably be fortunate, and the institution kept in a constant state of improvement. Without these modifications, the progress of the instruction will be subjected alternately to the caprices of novelty and abuses of routine.

To obtain, therefore, for the school at West Point, the degree of perfection which it is capable of receiving, it becomes of the first importance to prohibit any change whatever from being made in relation to it, without the knowledge and express approbation of the Government.

10. "The course of study at the academy to embrace a period of four years, and the cadets to be kept by gradations of one year, in the four corresponding classes."

Remarks.—This article should be maintained, at least, until experience shall enable us to determine whether the period of four years is sufficient to give to the cadets the degree of instruction which it is the object of the institution to furnish.

11. "No cadet hereafter to be appointed, who shall be under sixteen," &c.

Remarks.—The age of sixteen appears, in all respects, preferable to that of fourteen. The body and mind are better fitted for the change of habits that take place on joining the school, and to the abstract nature of the studies they are required to pursue. At the age of sixteen, the previous education of the cadet will be more advanced, and the acquirements requisite for admission to the school will be more perfect. It is therefore, believed, that the original article eleventh should be maintained.

12. At the termination of each scholastic year, all the classes will be examined, and the names of the cadets composing each class will be entered on a merit-roll, according to their relative proficiency in the studies of the classes to which they respectively belong. These examinations will be made by the board or council mentioned in the ninth article, and in the presence of such persons as the Government may appoint for that purpose. The

relative rank of the cadets, when promoted, will be the same as their relative rank or order on the merit-roll of the fourth or graduating class; and each cadet shall be entitled to choose the corps or regiment in which he is to be commissioned (provided there be a vacancy at the time in such corps or regiment) according to his rank, or the order of the name on the merit-roll of the graduating class to which he belongs, the first in rank upon that roll having the first choice, and so on successively.

Remarks.—It would be advantageous to the institution, and equally so to the professors, that they should not be exclusively charged with fixing the final relative rank of the cadets composing the graduating class. But the difficulty of finding at hand individuals competent to this duty, imposes the necessity, for the present, of confiding it to the board of professors. The measure here proposed, however, of causing the examinations, &c. to be made by the Board, in the presence of one or more persons appointed for that purpose, will diminish, as much as possible, the causes of complaint which might otherwise exist; and is offered as a substitute for an examining committee, which ought to be composed of individuals entirely unconnected with the institution.

The annual examination of the cadets, of which the results are to be made known to the War Department by the merit-roll of each class, which shall exhibit the relative proficiency of each cadet in the studies of his class; the fixing the rank of each cadet in the army, according to his relative rank upon the *merit-roll of the graduating class;* the giving to each cadet, according to his rank upon this roll, the choice of entering any corps or arm of the military establishment, in which there may be a vacancy at the time, are considered as the most proper, perhaps the only means, which are admissible, to produce emulation among the cadets, and at the same time to exclude, as far as possible, occasions of partiality or injustice towards individuals. The disadvantage of unpleasant and unnecessary distinctions in favor of any particular corps will hereby be avoided, while all the desirable advantages will be equally attained, in leaving to each cadet, according to his relative merit, the choice of the arm which may best accord with his inclinations.

13. "When any cadets, not exceeding two in a class, shall be distinguished in a remarkable degree for their scientific attainments, that fact to be particularly set forth in their diplomas."

Remarks.—In case the twelfth article should be modified as recommended, that part only of the original thirteenth article here inserted should be retained; the remainder to be suppressed.

14th PROPOSITION.

Remarks.—The twelfth article as recommended leaves to the cadets, according to their degree of merit, the choice as to the corps or arm in which they shall be commissioned; they will, consequently, be at liberty to enter as supernumeraries in the corps of engineers, in case it should have a similar class of officers attached to it hereafter. The original article fourteen should therefore be suppressed.

15th PROPOSITION.

Remarks.—The same objectionable feature prevails in the original article fifteen as in nine and fourteen. Article ninth vests the board of professors with the power of regulating their own duties, the course of studies and instruction, and of changing or modifying them at will. Article fourteenth grants them the power of designating the particular corps or arm in which the graduates shall respectively serve and be commissioned; and, finally, article fifteenth authorizes them to send any cadet from the school to be attached to any corps or regiment they think fit.

The ostensible case for which the article fifteenth is designed to make provision, would be better provided for by allowing a year of grace at the school to the cadet, who may have been able to qualify himself in the regular term of four years, and if this should prove insufficient he should then leave the school. The Board should report the circumstances of his case to Government, at whose disposal he would be left, to be attached to such corps or regiment or not as might be deemed most advisable at the time. In the event of the promotion of a cadet thus situated, the latter part of the fifteenth article should take effect.

16. "No cadet to be promoted from the academy until he shall have passed through all the classes and regularly graduated."

17. 1st. No appointment to be made to the lower grades of the military establishment in time of peace but from the Military Academy; provided that the number of graduates at the school shall equal the annual number of vacancies in the army.

2d. In the event of the annual vacancies to be filled exceeding the number of graduates furnished by the academy, the cadets who shall have regularly graduated will take rank on their promotion, over all appointments that may have been made to the vacancies in the lower grades of the army during the year immediately preceding the promotion of such cadets; except in the case of individuals receiving previous appointments, who shall have submitted to and passed the same examinations as the graduates of the school are subjected to.

Remarks.—The article here inserted is suggested as a substitute for the original article seventeenth. In case the number of graduates furnished by the school should be equal to the annual wants of the military establishment, the case for which the original article seventeen is intended to provide cannot occur if the present article should be adopted.

If the annual number of vacancies, however, should exceed the number of graduates furnished from the school, the cadets will find additional and powerful motives to exertion in the advantages and recompense here held out to their application and industry, without depriving the army of the acquisition of members who may have equally well qualified themselves at their own expense.

The advantages offered to such of the cadets who shall have completed their course of studies at the school, will be sufficient to deter any of them from resigning with a view to subsequent appointment in the army; and it is not conceived necessary to deprive those cadets who may resign (from ordinary and not disreputable causes) of the rights and privileges allowed to all their fellow-citizens who have not even studied at the school. Moreover, the Government possess and would doubtless exercise the power, so far as it might be equitable and expedient of preventing resignations, or of refusing to appoint to vacancies in the army any or all of the cadets who may leave the school, according to the nature and circumstances of each particular case.

The *first part* of the present article is believed to be just, and, indeed, necessary. The provision made in the *second part* is, in effect, to give rank in the army to the cadets (*in relation to all* who may be appointed without possessing equal qualifications) from the date of their entrance or commencement in the graduating class. If it should be deemed objectionable in its present form and extent it may be advantageously limited in its operation and confined to a certain number of the graduating class, who shall be most distinguished for their acquirements.

18th PROPOSITION.

Remarks.—The intention of the original article eighteen appears necessary and should be provided for; but the article in its present shape is objectionable.

It is understood to be the superintendent who at present judges of the degree of offence or guilt of a cadet, and suspends or dismisses him from the academy at discretion and without trial. The article, as it now stands, empowers the superintendent to inflict a punishment that shall endure with the life of the supposed culprit.

Crimes which would merit and require the punishment prescribed by the article in question ought to be *defined*, as well as the penalties awarded them; and individuals accused of those crimes should have the right of trial by a competent and legal tribunal.

19. "A number of waiters for the cadets, not exceeding one for every twenty, to be employed by the quartermaster."

Remarks.—There appears to be no objection whatever to this article.

20. "A band of music," &c.

Remarks.—This article is considered to be not without advantage to the establishment, and should be retained.

21. Whenever the Secretary of War shall judge it necessary he will appoint one or more suitable persons to be taken from the army or elsewhere for the purpose of inspecting the academy. The superintendent and board of professors will be held to furnish to such inspector or inspectors any information connected with the various departments of the academy they may require; whose duty it will be to attend at the general examinations of the cadets, and to report on the condition of the institution both as it relates to its organization and administration direct to the Secretary of War.

Remarks.—It is conceived, as stated in article first, that no permanent intermediate authority should exist between the President of the United States and the superintendent of the school but the Secretary of War; who will appoint, from time to time, an individual or a commission, to be taken from the army or elsewhere, as he shall judge most expedient, for the purpose of inspecting the establishment, and reporting on its state and progress. It is this individual or commission who should be present at the examinations, and particularly of that of the graduating class as mentioned under the twelfth article; the period of these examinations should consequently be that of the operations of this commission of inspection, although it is not supposed necessary to *restrict* it either to that or any other period of time. The duties of the inspection ought not, it is believed, to be confided permanently to any one individual or commission; nor exclusively to any particular corps or arm of the service.

22. "Four scientific men to be appointed by the President," &c.

Remarks.—In case the articles twelve and twenty-one should be adopted, as heretofore recommended, the original article twenty-two will be unnecessary.

23. Any officer of the army who shall obtain permission of the Secretary of War to reside at West Point, or to follow the course of studies at the school, will be allowed quarters not interfering with officers on duty at the academy, and will be admitted to the same means of instruction as are allowed to the cadets, with access to the library under such restrictions only as are applicable to the officers of the academy.

Remarks.—It is believed that the original article twenty-three should be modified as here stated, in order to extend the advantages given by it to the corps of engineers to the whole military establishment; the service in general, as well as a particular portion of it, will be thereby benefited.

The same motives of general utility that rendered it expedient, and indeed necessary, to locate the corps of engineers at West Point, and to constitute it a Military Academy in 1802, now require the complete separation of that corps from all exclusive connexion with the military school and the place of its location. It may become necessary to make some other provision for the corps, but it certainly can possess no rights which the proposed arrangement would violate, or which would require an indemnity at the expense of any interest of the Military Academy or of the army in general.

24. "So much of the law fixing the military peace establishment," &c.

Remarks.—The entire article twenty-four should be carried into execution.

All these dispositions may be considered as forming the first degree of amelioration, of which the school is at this moment susceptible of receiving. They only offer, however, the *means* of instruction and administration, without specifiying the particular mode of their employment or application; which is equally essential, and which may be considered as a second degree of amelioration, which remains to be given to the school to render it adequate to the objects of its establishment. It is therefore desirable that the superintendent and board of professors should present, by the month of November, 1819, a programma of the instruction, which would make known—

1st. What is taught to the cadets of the fourth, third, second, and first classes, respectively.

2d. In what manner the hours of study are arranged both as to the division of study and of time.

3d. What are the methods employed of teaching the cadets.

4th. The manner of conducting the examinations of the different classes, and particularly of the fourth or graduating class; and the mode of determining the final relative rank of the different graduates.

All the objects embraced under these heads should be established by regulations; and, when fixed, no alteration should be suffered to take place without the approbation and order of the Secretary of War.

A third degree of amelioration relates to the administration of the expenditures, &c. of the establishment in general embracing the clothing, subsistence, &c. of the cadets, and to the system of police and general regulations for the government of the institution.

It is equally desirable that a project embracing all these points should also be presented at the same time.

We submit it to the Government as our opinion that the pay and emoluments of the superintendent of the school ought to be and should be made independent of his rank in the army; because his expenses will necessarily be the same whatever may be his rank; and as, from the very nature of the command, the expenses of the superintendent must exceed those of any commandant of a post, it is believed that both justice and good policy require that his pay and emoluments should be placed upon the footing of a colonel of cavalry or ordnance commanding a separate post.

Most respectfully, &c.

BERNARD, *Brigadier General.*
W. McREA, *Major of Engineers.*

Hon. J. C. CALHOUN.

ENGINEER DEPARTMENT.

J. L. SMITH, *Lieutenant Corps of Engineers.*

List of Cadets attached to the Military Academy at West Point, New York, on the 1st of January, 1815, and of such as have been appointed between that time and the 30th of September, 1819; exhibiting the States from which they were appointed; the dates of their admittance to the Military Academy; the dates of their promotions, resignations, dismissals, deaths, &c. from that institution.

No.	Names.	State or Territory.	Date of admission.	Date of resignation.	PROMOTIONS.				
					Date of promotion.	Rank.	Corps or regiment.	Age.	Remarks.
1	James M. Spencer,	Indiana,	January 1, 1812,	- -	July 17, 1817,	3d lieutenant,	Artillery,	19	Promoted to 1st lieutenant, June 26, 1819; now in service.
2	Isaac A. Adams,	District Maine,	October 1, do.	- -	July 17, do.	3d lieutenant,	Artillery,	19	Promoted to 1st lieutenant, July 31, 1819; now in service.
3	Milton Partridge,	Vermont,	March 11, 1813,	October 1, 1817.					
4	James K. Armstrong,	New York,	April 5, do.	April 30, do.					
5	Robert C. Brent,	Maryland,	April 14, do.	- -	March 2, 1815,	3d lieutenant,	Artillery,	18	Promoted to 1st lieutenant, March 5, 1819; now in service.
6	Benjamin Bonneville,	New York,	April 14, do.	- -	Jan. 15, 1817,	2d lieutenant,	Light artillery,	19	Transferred to 8th infantry, 2d lieut. March 10, 1819; do.
7	Thomas Gardner,	New York,	April 14, do.	- -	Jan. 1, do.	2d lieutenant,	Light artillery,	19	1st lieutenant, December 31, 1819; now in service.
8	Wm. B. G. Taylor,	North Carolina,	April 14, do.	- 1815.					
9	John A. Webber,	Massachusetts,	April 14, do.	- -	Sept. 30, 1816,	2d lieutenant,	Light artillery,	18	1st lieutenant, October 31, 1819; now in service.
10	W. C. N. Armistead,	Dist. Columbia,	April 15, do.	Nov. 7, 1817,	- -	- -	- -	-	1st lieutenant, February 24, 1818; in service.
11	Henry H. Loring,	Massachusetts,	April 15, do.	- -	July 24, 1818,	2d lieutenant,	6th infantry,	19	Transferred to 3d infantry; in service.
12	Samuel McKenzie,	North Carolina,	April 15, do.	- -	July 24, do.	2d lieutenant,	Artillery,	18	In service.
13	John McKenzie,	North Carolina,	April 15, do.	- -	July 1, 1819,	2d lieutenant,	8th infantry,	21	In service.
14	William H. Swift,	New York,	April 15, do.	- -	July 1, do.	2d lieutenant,	Artillery,	-	In service.
15	Nathaniel H. Loring,	Massachusetts,	May 8, do.	Nov. 30, 1819.					
16	Cornelius A. Ogden,	Ohio,	May 8, do.	- -	July 1, do.	2d lieutenant,	Engineers,	20	In service.
17	Robert F. Scott,	Virginia,	May 8, do.	- -	March 2, 1815,	3d lieutenant,	Artillery,	18	Prom'd to 2d lieut. June 15, 1817, and resign'd Nov. 4, '18.
18	Edmund Brook,	Virginia,	May 11, do.	- -	- -	- -	Marines.		
19	Wolvert E. Williams,	New York,	May 20, do.	- -	March 2, do.	3d lieutenant,	Ordnance,	17	2d lieutenant, June 30, 1818; in service.
20	Samuel Cooper,	New York,	May 25, do.	- -	Nov. 15, 1817.	2d lieutenant,	Light artillery,	21	In service.
21	Henry Smith,	New York,	May 28, do.	- -	March 2, 1815,	3d lieutenant,	Artillery,	18	2d lieutenant 2d infantry, June 17, 1816.
22	Nicholas Gray,	New York,	May 29, do.	- 1816.					
23	William Rigal,	New York,	May 29, do.	- -	March 2, do.	3d lieutenant,	Ordnance,	18	Dropped, January 1, 1818.
24	William Graham,	Virginia,	June 11, do.	- -	July 17, 1817,	3d lieutenant,	Artillery,	18	1st lieutenant, July 31, 1819; in service.
25	William W. McIntyre,	Dist. Columbia,	June 11, do.	- -	- -	- -	- -	-	Died May 26, 1818.
26	Alexander Smoot,	Dist. Columbia,	June 11, do.	June 5, 1816.					
27	Stephen Herberger,	Pennsylvania,	June 16, do.	- 1815.					
28	Thomas W. Lendrum,	Dist. Columbia,	June 16, do.	- -	March 2, 1815,	3d lieutenant,	Artillery,	20	1st lieutenant, May 30, 1819; in service.
29	George W. Swift,	Dist. Columbia,	June 16, do.	Nov. 7, 1817.					
30	M. F. Vandeventer,	New York,	June 17, do.	- -	March 2, do.	3d lieutenant,	Artillery,	21	2d lieutenant 2d infantry, July 22, 1817; in service.
31	James D. Graham,	Virginia,	June 19, do.	- -	July 17, 1817,	3d lieutenant,	Artillery,	18	1st lieutenant, September 8, 1819; in service.
32	Thomas P. Gwynn,	Virginia,	June 19, do.	Sept. 30, 1818.					
33	Henry Brewerton,	New York,	June 19, do.	- -	July 1, 1819,	Brevet 2d lieut.	Engineers,	18	In service.
34	John B. Duffy,	New York,	June 24, do.	- 1816.					
35	Allen H. Jackson,	New York,	June 24, do.	- 1816.					
36	George Brewerton,	New York,	June 25, do.	Nov. 8, 1817.					
37	John R. Sloo,	Ohio,	June 25, do.	- -	March 2, 1815,	3d lieutenant,	Artillery,	18	2d lieutenant, April 20, 1817; resigned April 30, 1818.
38	Thomas I. Leslie,	Pennsylvania,	July 5, do.	- -	March 4, do.	Brevet 2d lieut.	Engineers,	18	1st lieutenant, March 31, 1819; in service.
39	George Blaney,	Massachusetts,	July 7, do.	- -	March 4, 1817,	Brevet 2d lieut.	Engineers,	19	1st lieutenant, November 12, 1818; in service.
40	Thomas Denny,	Massachusetts,	July 7, do.	- -	- -	- -	- -	-	Died September, 1815.
41	Ward Marston,	Massachusetts,	July 7, do.	October 31, 1818.					
42	Joseph Smoot,	Maryland,	July 7, do.	Nov. 29, 1816.					

LIST OF CADETS—Continued.

No.	Name.	State or Territory.	Date of admission.	Date of resignation.	PROMOTIONS.				
					Date of promotion.	Rank.	Corps or regiment.	Age.	Remarks.
43	Alexander Cochrane,	Dist. Columbia,	July 8, 1813,	- -	March 2, 1815,	3d lieutenant,	Artillery,	20	1st lieutenant, April 7, 1719: in service.
44	Alonzo Brewer,	Vermont,	July 13, do.	- -	March 2, do.	3d lieutenant,	Artillery,	20	2d lieutenant, March 2, 1815; resigned October 16, 1816.
45	Henry R. Dulany,	Maryland,	July 13, do.	- -	March 2, do.	3d lieutenant,	Artillery,	18	1st lieutenant 4th infantry, February 10, 1818; in service.
46	William A. Dulany,	Dist. Columbia,	- -	- -	- -	- -	- -	-	Dismissed, 1815.

ENGINEER DEPARTMENT.

JOHN L. SMITH,
Lieutenant of the Corps of Engineers.

16th Congress.] No. 189. [1st Session

TROOPS RAISED WITHOUT THE CONSENT OF CONGRESS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 28, 1820.

Mr. Storrs, from the committee appointed on the 10th day of December last to inquire and report to the House of Representatives whether any of the public moneys appropriated by Congress for the pay and subsistence of the regular army of the United States since the 4th day of March, 1815, have been applied to the support of any army or detachment of troops raised without the consent of the House or the authority of Congress, reported:

That, on the 11th day of January, 1818, Colonel David Brearly, of the 7th regiment of United States' infantry, who was about to proceed from Hartford, in the State of Georgia, to the Creek Agency on public service, was, by an order from Major General Edmund P. Gaines, authorized to receive into the service of the United States not exceeding five hundred Indians of the Creek nation; and should they volunteer their services, to muster, inspect, and provision them, and direct their march to Fort Scott. In obedience to this order, Colonel Brearly shortly after his arrival at the Agency proceeded to fulfil the intentions of the commanding general. The necessary measures were taken for assembling the warriors of that tribe; and it being ascertained that nearly the whole effective force of the nation would consent to serve, arrangements were made for mustering them into service, and organizing them. These arrangements were, that the whole force was to be denominated a regiment to consist of eighteen companies, to be officered according to the regulations of the army of the United States; that William McIntosh, the principal war chief of the nation, should rank as full colonel, and the two chiefs, George Lovett and Noble Kennard, as majors. This arrangement was communicated to General Gaines, then at Hartford, who approved of the proceedings of Colonel Brearly, informing him by a letter of the 29th day of January, 1818, that he would cheerfully accept the services of all the Indians who might be disposed to join him; which disposition Colonel Brearly was directed to encourage as far as practicable. Pursuant to these instructions, one thousand five hundred and thirty-seven warriors were mustered into the service of the United States on or about the 24th day of February, 1818, and served until the early part of the month of May thereafter. Including Onir Hanjo, a chief of the Creek nation, and seventy-five warriors who had been mustered into the service on the 8th day of December, 1817, the whole number of Indian forces employed during this period amounted to one thousand six hundred and thirteen men. William McIntosh held the rank of brigadier general, and received in that capacity one hundred and four dollars per month pay, seventy-two dollars per month for subsistence, forty dollars per month for forage, and forty-two dollars and twenty-seven cents per month allowance for servants; having received for two months and fifteen days' service from the 24th day of February to the 9th day of May, 1818, the sum of six hundred and forty-five dollars and seventy-two cents. George Lovett, Noble Kennard, Samuel Hawkins, and —— Blue, were assigned to the rank of majors, in which capacity they served from the 24th day of February until the 11th day of April, when the American army under the command of Major General Andrew Jackson, then having arrived near to Suwaney river, after the capture of Fort St. Marks, in the Spanish province of East Florida, Lovett and Kennard were promoted to the rank of full colonels, and Hawkins and Blue to the rank of lieutenant colonels, in which capacities they respectively served until they were discharged from service. These persons received for their services during these periods the full allowance made for pay, subsistence, forage, and servants, to officers of like rank in the regular army. The vacancies occasioned in the regimental field and staff by these promotions were on the 12th day of April, 1818, partially filled by the promotion to the rank of majors of two chiefs, John Barnard and —— Mattey, who had served as captains from the 24th day of February until that time. The general field and staff further consisted of one assistant adjutant general, who received per month sixty dollars pay, twenty-four dollars for subsistence, twenty-four dollars for forage, and twenty-eight dollars and eighteen cents allowance for servants. Four assistant commissaries of purchases were also appointed, who respectively received salaries at the rate of thirteen hundred dollars per annum. In addition to these, twenty-eight captains, twenty-eight first lieutenants, and twenty-eight second lieutenants were appointed; the whole force having been divided into twenty-eight companies. These officers were at the first organization of the corps appointed by the Creek nation of Indians, under the sanction of the commanding general. By what authority the original arrangement for the organization was changed, the rank of several of the chiefs raised, and an additional number of field and staff officers appointed, the committee have not been able conclusively to ascertain; but as these various transactions appear on the regular pay-rolls of the corps, which have been passed to the credit of the officer who made the disbursement, and have been recognised at the War Department, it is presumed that they must have occurred with the sanction of some public agent. The promotions which took place near Suwaney river on the 12th day of April, 1818, were made by order of Major General Jackson.

The sums paid to these Indian forces for their services amount to thirty thousand one hundred and twenty-seven dollars and forty-nine cents, including the sum of three thousand five hundred and forty-eight dollars and forty-eight cents paid to the general field and staff. To ascertain out of what fund these disbursements were made, a letter was addressed to the Second Auditor of the Treasury, in whose office these accounts were audited, which, with his answer thereto, dated on the 14th ultimo, is submitted with this report. By this communication it appears that it became questionable out of what fund these forces were to be paid; but, after examination, it was concluded by the Secretary of the War Department, for the reasons stated in the said letter, to carry the expenditure to the charge of the appropriation made by Congress for the pay of the army of the United States for that year.

For the purpose of determining with certainty by what authority these forces were raised, the Secretary of the War Department was requested to furnish to the committee "copies of any orders (if any such existed) which might have issued from the War Department" to the commanding officers of the southern division of the army, "by virtue of which" these Indian forces were "raised, officered, and taken into service." The answer of the Secretary of that Department, dated on the 22d ultimo, referring the committee to the documents therein stated, contains all the information relating to the subject of inquiry existing in the War Department. After careful and deliberate examination of these documents, the committee cannot discover that any orders whatever are therein contained which, by the most forced or artificial construction, could be deemed even to imply an authority from the War Department to muster into service, organize, or employ the Indian forces under the command of William McIntosh andt he chiefs of the Creek nation. The papers referred to contain no orders whatever addressed to General Gaines, and only one bears date previous to the issuing of the orders by that officer to Colonel Brearly for employing the Indian warriors. This order is addressed to Major General Jackson, and, so far as this com-

munication and the answer of General Jackson thereto of the 29th day of January, 1818, furnish any aid to this branch of the inquiry, it is strongly to be inferred that the employment of these forces was neither in accordance with the views of the War Department, nor justified by any existing necessity. In the communication of the Secretary of War to General Jackson of the 26th day of December, 1817, directing him to assume the command of the forces employed in the vicinity of Fort Scott against the Seminole Indians, he was informed that "the regular force now there was about eight hundred strong," and "one thousand militia of the State of Georgia were called into service;" that "General Gaines estimated the strength of the Indians at twenty-seven hundred." The answer of General Jackson to the War Department of the 26th January, 1818, informed that Department that "the troops assembled on the southern boundary, reinforced with the Tennessee volunteers called into service," would enable him "to inflict speedy and merited chastisement on the deluded Seminoles." These Indian forces were not mustered into service until the 24th day of February thereafter. In the judgment, therefore, of the commanding officer of the southern division of the army of the United States, the addition of this extraordinary force of sixteen hundred and thirteen Indian warriors was not deemed necessary to the execution of the orders which had been issued for "a speedy and successful termination of the Indian war." In confirmation of the opinion that the employment of these forces was viewed in that light by the commanding general, the committee submit with this report the proceedings of a court-martial convened by his order for the trial of Colonel David Brearly, who was arrested on the application of General Gaines on charges of alleged neglect of duty in not forwarding certain supplies from the Creek agency destined for the use of the troops of the United States and Georgia militia stationed near the Chehaw village, and at Fort Scott. To these charges exhibited by General Gaines was added, by order of Major General Jackson, a charge of "unmilitary conduct," under which was specified an alleged offence, "that the said Colonel David Brearly did, in the month of February or March, 1818, muster into the service of the United States a large body of Indian warriors at or near Fort Mitchell, thereby consuming a large quantity of the supplies laid in and destined for the relief of Fort Scott, and to furnish the Tennessee volunteers," which act is therein alleged to have "tended manifestly to the injury of the service."

After an investigation of several days, Colonel Brearly was honorably acquitted of all the charges preferred against him. The commanding general, by an order of the 5th day of August, 1818, approving the sentence of the court on this specification, observed "that they had, from the documents produced, properly found him not guilty, as it appeared from General Gaines's letter bearing date 29th January, that he was ordered to accept all the Indians that might be disposed to join him." Notwithstanding the commission of this act, so "manifestly injurious to the service," was thus directly traced to the superior officer of Colonel Brearly, no proceedings have been since instituted to fix the responsibility of the alleged offence on the officer from whom the order emanated.

The committee further report that it appears from the documents to which they have been referred by the letter of the Secretary of War of the 22d ultimo, that Major General Andrew Jackson having been directed by that Department on the 26th day of December, 1817, to assume the command of the forces in the vicinity of Fort Scott, was ordered to call on *the Executives* of the adjoining States for such additional *militia* force of the said States as he should deem it requisite to raise for the execution of his orders, to terminate the conflict then commenced with the Seminole tribe of Indians. Instead of obeying this order, he proceeded to levy an army from the people of the States of Tennessee and Kentucky by circular letters privately addressed to individual citizens of his own selection. In this circular address, dated on the 11th day of January, 1818, the aid of one regiment only to be composed of one thousand men, was requested. At a meeting, however, of the citizens who were to command as officers this corps of levies, on the 19th day of January thereafter, General Jackson accepted the services of two regiments to be raised by voluntary enlistments, which were accordingly assembled together, consisting of one thousand two hundred and eighty-six citizens of those States, who were organized as auxiliaries into an army of mounted gunmen. The organization of the officers commanding these regiments was made under the authority and sanction of the commanding general, and consisted of one assistant adjutant general, one assistant inspector general, one assistant deputy quartermaster general, one judge advocate, one chaplain, two colonels, four lieutenant colonels, four majors, four adjutants, one forage master, one assistant forage master, two surgeons, four surgeons' mates, two quartermasters, and eight non-commissioned staff. To this organization of the general and regimental field staff were added twenty captains, twenty first lieutenants, twenty second lieutenants, eleven third lieutenants, and seventeen cornets. The additional lieutenant colonel and major to each regiment was made in consequence of an agreement for that purpose originally made by General Jackson. The ruinous tendency of these unauthorized proceedings is forcibly illustrated by the fact that, on the assembling of these forces for the purpose of being mustered into service at Fayetteville, they brought with them into camp not less than forty captains. The reason given by the inspector general of the southern division of the army, who mustered them into service by order of General Jackson, for appointing an extraordinary number and grade of company officers, appears in a letter addressed to the Secretary of War by that officer on the 9th February, 1818. In this letter Colonel Hayne observes that to "merge the lesser fractions into the greater, and thus amalgamate them into single companies, to cut down captains, to leave out subalterns, and yet to satisfy and secure to us all the men, has been a very difficult task indeed. To effect this object, I have been obliged in a number of cases to give an additional lieutenant and cornet to the companies. On the assembling of these troops General Jackson proceeded to direct the disposition for their use of the funds placed in the hands of the regularly appointed officers of the army of the United States, imposed on Major Fanning, of the corps of artillery, the temporary duties of deputy quartermaster general, and vested him with authority to draw on the quartermaster general for any additional sums wanted for supplies. To facilitate their march, he also authorized the inspector general of the southern division of the army to draw either on the Secretary of War or the quartermaster general at Fort Scott for such funds as might be found necessary. These troops, thus mustered into service and organized, served from the 31st day of January, 1818, until the 25th day of June thereafter, and have received from the public funds the pay and allowances made to the regular armies of the nation.

The committee further report that two companies of rangers, under the command of Captains Boyle and Gist, consisting of about one hundred and forty-five men, were called into service by order of Major General Jackson during the Seminole war. It does not appear that these forces were mustered into service pursuant to any requirement on any civil or executive officer of any State or Territory. By the letter of William W. Bibb, Governor of the Alabama Territory, dated on the 15th day of April, 1818, it appears that at that date he was "ignorant of the views of the Government with respect to Florida;" that he "knew not the orders which had been issued to General Jackson," and that he was "not acquainted in any degree with the arrangements on the part of the United States for prosecuting" the war against the Seminole Indians. The answer of the Secretary of War to Governor Bibb, communicating the information of those arrangements in reply to his inquiries, was transmitted from the War Department on the 13th day of May, 1818. No muster or pay rolls of these forces have yet been received at the War Department, and no documents can be furnished in the public offices by which the number of these forces, the period of their enlistment or discharge, the mode in which the officers were appointed, or by whom, can be

satisfactorily determined. The communication addressed to the committee by the Secretary of War on the 19th instant contains all the information existing in the War Department relative to these companies of rangers. The object for which these forces were raised appears in the letter of General Jackson to the War Department, dated on the 2d day of June, 1818, and the instructions issued to them were to scour the country between the Mobile and Apalachicola rivers, exterminating every hostile party who should dare resist and would not surrender and remove with their families above the thirty-first degree of latitude. Excepting this letter, the only information relative to these forces which exists in the War Department is found in the papers referred to in the letter of the Secretary of War of the 19th instant. From them it appears that Captain John B. Hogan, paymaster of the 4th regiment of infantry, was directed by Colonel King, on the 18th day of September, 1818, to prepare an estimate for the amount of funds necessary to pay them off. This estimate is submitted with this report, and it appears thereby that the sum required for this purpose amounts to nineteen thousand eight hundred and sixty-seven dollars and ninety-two cents, including eight thousand five hundred and sixty-three dollars for pay, seven hundred and twenty dollars for subsistence, and ten thousand five hundred and eighty-four dollars allowance for the use and risk of horses.

These various forces forming no part of the military establishment of the United States authorized by Congress, and not having been called into service by virtue of any law providing for calling forth the militia of the several States, the committee, in obedience to the resolution of the House, which has imposed on them the duty of reporting whether any of the appropriations for the pay and subsistence of the regular army of the United States have been applied to the support of any army or detachment of troops raised without the consent of this House, or the authority of Congress, deeming that on the preservation of the constitutional powers of Congress the chief security of the people of these United States against all encroachments on their liberties must forever depend, and that on the firmness, independence, and fidelity of their immediate representatives, they justly rely for the protection of the solemn trust confided to their charge, do unreservedly express to the House their opinion, that the levying of these forces, their organization and employment in the public service, was in violation of the constitution of the United States, and a dangerous infringement on the powers of Congress.

To attempt seriously to establish, by argument, that Congress alone possesses the power to raise armies, instead of partaking of the nature of an inquiry how extensive the breach sustained by the constitution has been, would rather imply that it might be doubted whether we have any constitution at all. In no instance of the delegation of sovereignty to the federal Government have the people manifested greater caution and wisdom than in confiding to their immediate representatives the exercise of this power, which, above all others, is susceptible of the most alarming abuses in every Government. The experience of all nations had uniformly taught them that their only security from violence and rapacity was to be found in the careful restraint of its exercise. In the elective franchise an adequate remedy was provided for the redress of most of those abuses which originate from the temptations of avarice and the love of power; but they well knew that, whenever their liberties should be directly assailed, the physical force of the Government alone could be resorted to for the successful accomplishment of the designs of ambition. The unlimited power of supporting any military establishment whatever is denied even to Congress; and the term of appropriations for this object has been wisely restricted to the constitutional period of service of the members of this House. So highly fraught with danger has the raising of troops, and their maintenance, been considered, that, except in time of war, actual invasion, or imminent danger, those powers have been withheld from the State Legislatures; sovereignties whose jurisdictions are more comprehensive and indefinite than any known to our institutions. To levy armies, without the authority of Congress, is, therefore, to substitute the arbitrary pleasure or caprice of individuals in the place of the national will, and to violate all those securities which the people have provided for their safety.

The nature or character of this assumption of power derives no exemption from the application of these principles, by reason of the particular description of the forces originally called into service by General Gaines, and subsequently commanded by General Jackson. As lawfully might a commanding officer in the army, of his own authority, receive into the service of the United States, as auxiliaries, the forces stationed in the neighboring provinces of Great Britain, as to embody and organize into regular armies, and associate with his command, the Indian tribes residing within our jurisdictional limits. In relation to forces of this latter description, the constitution has heretofore received a practical exposition from Congress; which, whether we consider the period of its enactment, or the character of the distinguished patriot and statesman, from the history of whose administration this illustration is derived, is entitled to the greatest consideration and respect. So clearly does it seem to have been at that time considered that the power of employing Indian forces in the public service, even for the protection of the frontiers, had not been vested even in the Executive Department, that in the act entitled "An act making further and more effectual provision for the protection of the frontiers of the United States," approved on the 5th day of March, 1792, it was found necessary to derive that power from the authority of Congress; and the President of the United States was, by the fifteenth section of the said act, authorized by Congress to employ, in the public service of the nation, that description of forces, in case he should deem the measure to be expedient. This act was repealed by Congress, and the authority, thus conferred, ceased on the 3d day of March, 1795.

The appointments of the officers of this corps of Indians, and the promotions which took place by order of General Jackson, were also, in the opinion of the committee, an infringement on the powers confided to the Executive of the United States and the Senate. It is scarcely more than to repeat a mere political truism, to say that the exercise of all power whatever, not derived from the will of the people, is not only in itself unlawful, but contrary to the fundamental principles of every free Government, and the orderly administration of its public concerns. The declared will of the nation has entrusted to the President and Senate alone the power of appointment to all offices, not otherwise provided for by the constitution. The prudence and wisdom of these eminent and distinguished functionaries of the Government were the guarantees on which the people relied for the careful selection of those subordinate agents to whom the sword of the nation was to be entrusted. The assumption, therefore, by others, of the responsibility of exercising this power, is self-created, unrecognised by our institutions, and tends to the most pernicious and alarming disorders in the administration of the Government. In the case of military appointments the most powerful as well as the most obvious considerations especially demand that this power should not be wrested from the hands of those on whom alone the constitution has imposed this high responsibility.

The Congress of the United States alone is vested with the general authority to organize the militia, and to provide for calling them forth for the purposes expressed in the constitution. These powers have been executed. Not only the organization, but the rank and description of the officers of the militia have been prescribed by the act of Congress of the 8th day of May, 1792, and the act of the 2d day of March, 1803. Neither of these acts contain any authority for the appointment of those descriptions of officers selected for the command of the corps of volunteers, who were respectively invested with the rank of assistant adjutant general, assistant inspector general, and assistant deputy quartermaster general. These offices have been created only in the regular army of the United States.

The extraordinary assignation of an additional lieutenant colonel and major to each regiment, and a third lieutenant and cornet to each company, is also unknown to the laws providing for the organization of the militia. With whatever force the propriety or necessity of varying these laws may be urged until the Congress of the United States, who are the constitutional judges of the utility of such a measure, and who have the exclusive right to provide for calling forth the militia, and the sole power to establish regulations for their government, shall, by the authority with which they have been thus invested, revise the present system, there is no power known to our institutions which can lawfully execute any schemes of reformation or improvement in the established organization of the military force of the nation.

By the further provisions of the constitution the appointment of the officers of the militia is expressly reserved to the States. The object of this reservation of power was to provide for the security of the people against the success of any design which might be formed to alienate the militia from the allegiance which they owed to their respective States. So "necessary to the existence of our union, and of free Government, has the preservation of the rights of the individual States, in their full extent, according to a just construction of the principles of our constitution," been considered by Congress, that the utmost extent of power to call forth the militia, conferred by the act of the 28th of February, 1795, even on the Executive, has only authorized the issuing of orders for that purpose to the "officers of the militia." Neither the Executive, by virtue of any authority which has been conferred by this act, or much less an officer of the regular army, of his own authority, can, without the assumption of powers repugnant to the principles of the constitution, and of the most dangerous tendency, proceed to levy armies by enlistment from the citizens of the respective States. When it is further considered that the authority of the States over their militia "ceases when they are called into the service of the General Government;" that they "constitute a part of the national force for the time as essentially as the troops of the regular army;" that, "like the regular troops, they are paid by the nation; like them, their operations are directed by the same Government," and that their superior commander may be designated by the Executive of the United States, it is evident that the chief reliance of the States for the preservation of this great bulwark of their liberties must essentially consist in scrupulously retaining the selection of those officers to whose authority their citizens are to be immediately subjected. From whatever source, therefore, the officers selected for the command of these volunteer forces might have received their rank, the power to appoint them was self-assumed, inasmuch as the appointments were not made, and they held no commissions by virtue of any authority for that purpose derived from any of the States.

The committee submit to the House with this report a vindication of the proceedings of General Gaines, addressed by that officer to the Department of War, dated at Augusta, in the State of Georgia, on the 17th day of October, 1819. This document chiefly relates to the result of the measures adopted by the Senate of the United States at the last session of Congress, and although the committee do not consider that subject to be directly connected with their duties, as prescribed by the resolution of the House, yet they are impelled by a sense of that justice which is due to an officer, whose proceedings are the subject of inquiry, to furnish all the information within their power, however remotely affecting the investigation confided to their charge.

It does not appear to the committee at what time General Gaines made known to the War Department his proceedings in relation to the assembling and organization of the Creek warriors, under the command of William McIntosh. In a letter addressed to that Department, on the 15th day of December, 1817, he observes that the steps which he had taken were "known to the Department of War," but the date of this letter was several days antecedent to the first order issued to Colonel Brearly, for the mustering of these forces.

That a crisis of such great public peril and imminent danger to the nation might exist, as to palliate, if not in a great measure justify, a commanding general in departing from the strict rules of subordination and obedience, the committee most readily admit; but they believe that a careful examination of the circumstances under which these Indian forces were assembled, must lead to the conviction that any necessity which might have been supposed to exist, for resorting to this extraordinary proceeding, is rather to be imputed to the premature commencement of hostilities by the commanding general than to any unforeseen or inevitable events not within his own control, and which a cautious and prudent foresight of the probable result of his own measures would not have enabled him to avoid.

The waste of the public resources which has resulted from these various assumptions of the power of raising armies is not among the least of the pernicious disorders which have originated from these unauthorized measures. The committee submit to the House with this report an abstract of the muster-rolls of the militia, volunteers, and Indian warriors, employed in the public service, during the late operations of the army against the Indians, on the southern frontier of the United States. It appears from this document, furnished from the office of the paymaster general, that the whole number of such forces, (including the rangers under the command of Captains Boyle and Gist,) employed during the war with the Seminole Indians, exclusive of the troops of the regular army, amounted to six thousand and fifty-eight men, of which number four hundred and twenty served in the general and regimental field and staff, and as company officers. The whole number of forces of all descriptions, actually in service on the 1st day of April, 1818, amounted to upwards of five thousand six hundred men. From the state of the accounts it is impossible, at this time, satisfactorily to ascertain the whole amount of public expenditure on the object for which these forces were raised. The disposition, however, of the appropriations made by Congress for the support of a brigade of militia, amounting to four hundred and forty-six thousand seven hundred and forty-three dollars, appears, by the annexed statements, furnished from the office of the Second Auditor of the Treasury Department. The pay-rolls of only four companies of the Tennessee volunteers have yet been received. From an examination of these it appears that the paymaster of those forces, Captain John B. Hogan, has paid to the men respectively the sum of fifteen dollars and fifty cents each as an allowance for clothing. Should the same disbursement for this allowance have been made to the whole number of the non-commissioned officers and privates of this corps, the total amount of this item will exceed the sum of eighteen thousand dollars. The amount of these pay-rolls (twenty-seven thousand eight hundred and fifty-five dollars and forty-five cents) having been carried to the charge of the appropriations for a brigade of militia, in the annexed abstract from the office of the Second Auditor of the Treasury, and appearing thereby, also, to have been deducted from the balance remaining due from the paymaster, on account of this fund, a letter was addressed to the Second Auditor requesting that officer to inform the committee by virtue of what law of the United States or regulation relating to this subject, the paymaster was entitled to credit at the Treasury for a disbursement of this nature. From the answer of the Second Auditor, herewith submitted, dated on the 5th instant, and from an inspection of the books of that office, it appears that the accounts of the paymaster, which include this item, have not been acted on at the Treasury, nor has any part of them been passed to his credit. This disbursement being directly contrary to the act of the 28th day of February, 1795, and totally unauthorized, the officer cannot receive credit therefor under any circumstances whatever.

It appears further to the committee, that the accounts for the moneys paid to the Creek warriors, composing the general field and staff of that corps, for forage and servants, have been passed to the credit of the disbursing officer in the office of the Second Auditor of the Treasury, without any evidence whatever that the number of

horses and servants allowed for were actually kept or employed by those persons. The explanation which the Second Auditor relies upon as a justification of this departure from the established regulations of the Treasury Department is contained in the communication of the 5th instant, addressed by that officer to the committee. In their opinion, this deviation from those regulations which have been adopted as salutary and indispensable restraints on improper expenditures of the public moneys by the disbursing officers of the Government, or any other persons acting in such capacity, and which in all cases should be impartially applied, was irregular and unauthorized.

The House having authorized the committee to report by bill, they have devoted their attention to the devising of some legislative remedies against the recurrence of these disorders. To prescribe the principles of the constitution by legislative enactments might tend to impair its high and uncontrollable sanctions, and the faithful discharge of the duties of the several committees of the House furnish an adequate remedy against all abuses in the public expenditure. The committee, therefore, submit the facts contained in this report, and the documents which establish them, referring them to the discretion of the House.

SIR: HEAD-QUARTERS, HARTFORD, *January* 11, 1818.

You will repair to the Creek Agency with a detachment of cavalry, (Georgia militia,) for the purpose of superintending the construction of boats and forwarding supplies to the troops below. You will require of the acting assistant deputy quartermaster general, Lieutenant Kieser, such tools and supplies as will enable you to carry into effect this order with the least possible delay.

Enclosed you will receive an account of the provisions now at the Agency, and you will order thither such other supply as may now be at Fort Hawkins, not exceeding thirty thousand rations, to be forwarded to the troops below, as soon as the boats are completed.

You are authorized to receive into the service of the United States not exceeding five hundred friendly Indians. Should they volunteer their services, you will muster, inspect, and provision them, and direct their movement to Fort Scott, where I hope to have the pleasure of seeing you in the course of the present month.

Wishing you health and an agreeable command, I am, with great respect, your obedient servant,

E. P. GAINES.

Col. DAVID BREARLY, *7th regiment United States' infantry.*

SIR: FORT HAWKINS, *January* 27, 1818.

Captain Melvin having arrived at the Agency, I felt at liberty to visit this place, which I was solicited to do by Lieutenant Kieser, in order to hand him a part of the public money in my possession, should he fail to procure it elsewhere. I shall wait his return from Milledgeville to-morrow, and then return to the Agency; by which time, I trust, a boat will be complete. From the best information I can obtain of the navigation of the Flint river, I am induced to believe that it will be impracticable to navigate a covered boat above the Chehaw shoals, to which place little danger of the Indians is to be apprehended. We have by this time one hundred and thirty barrels of flour, and I suppose two thousand weight of meat. The Indians are to assemble at Fort Mitchell for enrolment on the 17th of February. I used every means in my power to effect the meeting at an earlier period. It was several days after my arrival before the agent gave his decision whether or not they should go, during which suspense the warriors manifested great anxiety. They are now in high spirits, and I have no doubt the effective force of the nation will be assembled that day. The arrangements, as I have been informed by the agent, (who did not suffer me to be present in any of their deliberations on the subject,) are, that the whole force is to be denominated a regiment, to consist of eighteen companies, to be officered agreeably to the regulations of the army. McIntosh is to rank as full colonel; Lovett and Kennard as majors. Should this arrangement meet your views, be pleased to let me be informed. I have no doubt of the integrity of those Indians, and believe they will answer every purpose of militia, at a much less expense.

Captain Bowers arrived at the agency two days before I left it. I did not learn that he had joined his last gang of negroes to the first. I am induced to believe, however, that he had them in the neighborhood, and intends managing them different from the first. I have therefore taken the liberty of writing to Captain Melvin and Major Hughes on the subject, copies of which letters are herewith enclosed; also one addressed to your excellency at Fort Scott, whither I expected you had gone.

I have the honor to be, with the highest esteem,

DAVID BREARLY,
Colonel 7th infantry, commanding in Creek nation.

Major General GAINES.

SIR: HEAD-QUARTERS, HARTFORD, GEORGIA, *January* 29, 1818.

I am instructed by Major General Gaines to acknowledge the receipt of your communication of the 27th instant, and to observe to you that he will cheerfully accept the services of all the Indians that may be disposed to join him, which disposition you will encourage as far as practicable.

On the subject of the boats, the major general expressly directs that no boat shall be suffered to leave the agency without being made ball proof, and desires me to urge all practicable despatch in the transportation of those supplies to the fort below, as heretofore directed. If Indians can be obtained to assist the boats in the descent of the river, it is desirable you should employ them; let the boats be but lightly laden, and there can be no doubt they will go with safety.

I am directed also to apprize you that, from the state of the post under the command of Lieutenant Phillips, whose command consists of twenty volunteers, in addition to the detachment of regulars, who it is possible will not remain very long, or until they can be relieved, it is desirable that supplies should be promptly furnished them; and the state of the service demands that a part of the dragoons now at the Agency should be ordered to reinforce him.

Very respectfully, your obedient servant,

CLINTON WRIGHT, *Assistant Adj. Gen.*

To Col. D. BREARLY, *7th infantry,*
Commanding 7th military department.

SIR: DEPARTMENT OF WAR, *January* 6, 1820.

I have received your letter of the 15th ultimo. The enclosed report of the paymaster general (marked 1) furnishes "the number and general description of the militia forces engaged in the Seminole war, the times when they were mustered into service, the periods of their discharge, the rank and capacity in which they served;" and the accompanying report of the Second Auditor of the Treasury (marked 2) comprehends "the general abstracts of the pay-rolls," as far as the pay-rolls of the paymasters engaged in paying said forces have been rendered for settlement. The payment of the Tennessee volunteers was confided to Major Hogan, paymaster of the 7th regiment of infantry. The difficulty of the service, and the arrest of Major Hogan by Colonel King early last summer, and the subsequent arrest of Colonel King, upon whose trial Major Hogan was a material witness, have delayed the rendering of his accounts.

Major Hogan was ordered to Washington in October last to settle his accounts; and as the trial has probably terminated before this time, I hope it will be in my power to furnish you with the remaining abstract of the pay-rolls before the termination of the session.

I have the honor to be, your most obedient servant,

JOHN C. CALHOUN.

Hon. HENRY R. STORRS, *Chairman, &c. House of Representatives.*

SIR: PAYMASTER GENERAL'S OFFICE, CITY OF WASHINGTON, *January* 4, 1820.

I have the honor herewith to transmit an abstract of the muster-rolls of the volunteers, militia, and Indian warriors engaged in the Seminole war, in the years 1817 and 1818, taken from the rolls on file in this and in the Second Auditor's office.

The pay-rolls of the agents employed in paying this force, so far as they are rendered, have been passed to the Second Auditor for settlement of their accounts.

I am, very respectfully, sir, your obedient servant,

NATHAN TOWSON, *Paymaster General.*

To the Hon. JOHN C. CALHOUN, *Secretary of War.*

Abstract of volunteers, militia, and Indian warriors, engaged in the Seminole war, in the years 1817 *and* 1818, *as appears from the inspection of the muster-rolls.*

PAYMASTER GENERAL'S OFFICE, *January* 4, 1820.

NATHAN TOWSON, *Paymaster General U. S. Army.*

NOTE.—Two companies of rangers (Captains Boyle and Gist's) not included in the above.

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *January* 5, 1820.

SIR:

In compliance with your directions to furnish for the use of "the Committee of the House of Representatives, relative to the application of the appropriations for the pay and subsistence of the regular army since the 4th of March, 1815," general abstracts of the pay-rolls of certain forces employed against the Seminole Indians, not composing any part of the ordinary military establishment, I have the honor to hand you, herewith, abstracts, as rendered to this office, of the rolls of the brigade of Georgia militia; of a brigade of Creek warriors, commanded by General M'Intosh; and of five companies of Alabama militia. The paymasters, in whose hands funds have been placed for satisfying the claims of the Tennessee mounted gun men, not having, as they state, completed the payments of that corps, have as yet forwarded no abstracts of the rolls.

I have the honor to be, with great respect, your very obedient servant,

WILLIAM LEE.

Hon. J. C. CALHOUN, *Secretary of War.*

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *January* 5, 1820.
A true copy.

WILLIAM LEE.

SIR: DEPARTMENT OF WAR, *January* 22, 1820.

I have received your letter of this month, requesting copies of any orders (if any such exist) which may have issued from the War Department to the commanding officers of the south division, and by virtue of which the volunteer forces from the State of Tennessee, the rangers under Captains Boyle and Gist, and the Indian forces engaged in the service of the United States during the late war with the Seminole Indians, were respectively raised, officered, and taken into service. In reply, I respectfully refer the committee to the letters of the Secretary of War to General Jackson, of the 26th of December, 1817, and 29th of January, 1818; to Governor Bibb's letters of the 27th of March, and 15th of April, 1818, addressed to the Department, and the Secretary of War's answer to them both, dated the 13th of May, 1818, transmitted by the President to Congress, in his message of the 2d of December, 1818.

In relation to raising and officering the Indian force, I refer the committee to General Gaines's letter to the War Department, of the 2d of December, 1817, contained in the President's message of the 2d of December, 1818, and to an extract of a letter addressed to the War Department, by D. B. Mitchell, Creek agent, which is enclosed herewith, which contain all the information on this subject in the Department. It is believed the Indian forces alluded to were called into service by General Gaines, and were officered by the nation, with the sanction of the commanding general, and, with few exceptions, this mode has always prevailed in raising and officering Indian forces, received into the United States' service.

I have the honor to be your obedient servant,

J. C. CALHOUN.

The Hon. HENRY R. STORRS, *Chairman, &c. House of Representatives.*

Extract of a letter from D. B. Mitchell, Indian Agent, to the Secretary of War, dated

CREEK AGENCY, *February* 3, 1818.

In consequence of the notice which I received from Mr. Graham, that General Gaines was prohibited from crossing the Spanish line against the Seminoles, I declined sending the friendly warriors to join him until that restriction should be removed, or I had the orders of the Government upon that subject. This matter I have already explained in my former letters; but, at the late meeting, understanding that the prohibition to crossing the Spanish line had been removed by an order from you, I informed the chiefs and warriors that they might now comply with the call of General Gaines, and join with him in the contemplated expedition. They immediately came to a determination to meet at the end of twenty-five days, from the 21st of January, which will be about the 17th of the present month, and proceed to join the army. Colonel Brearly, of the 7th infantry, being present, and informed of their determination, has agreed to muster them, and assist in preparing them for the service, having previously received the general's orders to do so; and I have little doubt, but that they will add at least fifteen hundred, and probably two thousand, useful warriors to the general's present force.

WAR DEPARTMENT, *January* 22, 1820.

I certify the foregoing is a true extract from the original letter of D. B. Mitchell, now on file in this Department.

C. VANDEVENTER.

Proceedings of a general court-martial held at Fort Scott, (State of Georgia,) by virtue of the following order:

HEAD-QUARTERS, DIVISION OF THE SOUTH,
ADJUTANT GENERAL'S OFFICE, *Ochesee Bluff, on the Appalachicola river, May* 10, 1818.

DIVISION ORDER.

A general court-martial will convene at Fort Scott, on the 1st of June next, for the trial of Colonel David Brearly, of the 7th infantry, and such other prisoners as may be brought before it.

Lieutenant Colonel WILLIAM LINDSAY, *president.* Lieutenant Colonel Clinch, Brevet Major Cutler, Brevet Major Dinkins, Major Nicks, Brevet Major Muhlenberg, Captain Cummings, *members.*

Captains Donoho and Vashon, *supernumerary members.*

Major James T. Dent, Judge Advocate; or, in his absence, Major General Gaines will order a suitable officer to perform the duties *pro tempore.* A suitable non-commissioned officer, as orderly, will attend the court. On the adjournment of the court-martial *sine die*, a court of inquiry will immediately convene at the same place, by request of Lieutenant Colonel Arbuckle, to inquire into his official conduct as commanding officer at Fort Scott,

and will consist of three members and a recorder. Lieutenant Colonel William Lindsay, president, and Lieutenant Colonel Clinch and Major Dinkins, members. The Judge Advocate of the court, or person acting as such, will perform the duties of recorder. The court will place on record all the evidence adduced, and give their opinion.

By order: ROBERT BUTLER, *Adj't General.*

HEAD-QUARTERS, 6TH AND 7TH MILITARY DEPARTMENTS,
ASSISTANT ADJUTANT GENERAL'S OFFICE, *Fort Gadsden, May* 22, 1818.

AFTER ORDERS.

In the event of the non-attendance of Judge Advocate Dent at the general court-martial ordered to convene at Fort Scott, on the 1st of June, Surgeon Thomas Lawson, of the 7th infantry, is appointed to do the duties of that office, and will proceed thither for that purpose.

By command; J. M. GLASSELL,
Acting Assistant Adjutant General.

The court assembled pursuant to the above order: Present, Lieutenant Colonel Lindsay, president; Major E. Cutler, Major Nicks, Brevet Major Muhlenberg, Captain Cummings, members; Captains Donoho and Vashon, supernumerary members; Surgeon Thomas Lawson, Judge Advocate.

Two of the members and the accused being absent, the court adjourned, to meet again on on the 12th instant, unless ordered to convene previously to that period by the President.

JUNE 12, 1818.

The court assembled pursuant to adjournment: Present, Brevet Major E. Cutler, Major Nicks, Brevet Major Muhlenberg, Captain Cummings, members; Captains Donoho and Vashon, supernumerary members; Surgeon Thomas Lawson, Judge Advocate.

Two of the members and the accused being absent, the court adjourned, to meet on the 16th instant, unless sooner convened by order of the president.

JUNE 16, 1818.

The court met pursuant to adjournment: Present, Lieutenant Colonel Lindsay, president; Brevet Major Cutler, Major Nicks, Brevet Major Muhlenberg, Captain Cummings, members; Captains Donoho and Vashon, supernumerary members; Surgeon Thomas Lawson, Judge Advocate.

Two of the members and the accused being still absent, the court adjourned, to meet on the 20th instant, unless sooner assembled by order of the president.

JUNE 20, 1818.

The Court met pursuant to adjournment: Present, Lieutenant Colonel Lindsay, president; Major Cutler, Major Nicks, Major Muhlenberg, Captain Cummings, members; Captains Donoho and Vashon, supernumerary members. Surgeon Thomas Lawson, Judge Advocate.

Lieutenant Colonel Clinch and Major Dinkins being absent, Captains Donoho and Vashon took their seats as members.

The Court being duly sworn, in the presence of the accused, proceeded to the trial of Colonel David Brearly, of the seventh infantry, who being previously asked if he had any objection to either member of the Court, and replying in the negative, was arraigned on the following charges and specifications.

CHARGE 1st.—*Disobedience of orders and neglect of duty.*

Specification 1st. For, that the said Colonel David Brearly being ordered by Major General Gaines, commanding, on or about the 11th of January, 1818, to repair to the Creek agency (Creek nation) to superintend the building of boats, and send therein, down the Flint river, for the use of the troops of the United States and Georgia militia, stationed near the Chehaw village and at Fort Scott, the supplies of provisions and corn then at the agency, with such other supplies as should be sent thither from Fort Hawkins for the troops aforesaid, did disobey the said orders; and, although furnished with near forty men and a proper supply of tools, for the prompt performance of the duties assigned him, he nevertheless neglected those duties, whereby the United States' troops and the Georgia militia aforesaid were left in the vicinity of an enemy, without the necessary and proper means of subsistence, to the great injury of the service.

Specification 2d. For that the said Colonel David Brearly, being ordered by Major General Gaines, commanding at Hartford, in the State of Georgia, in the month of January, 1818, to superintend the construction of boats at the Creek agency, to forward supplies to the troops below, to require of the acting assistant deputy quartermaster general, Lieutenant Kieser, such tools and supplies as would enable him, with the least possible delay, to order from Fort Hawkins to the agency, thirty thousand rations of provisions, and to forward the same, together with the supplies then at the agency, down the Flint river, to the United States' troops and Georgia militia, near the Chehaw village and at Fort Scott, as soon as the boats should be completed, and being repeatedly urged and ordered, in the month of January, 1818, to cause the said boats to be completed, and the supplies forwarded to the troops below, without delay; all which orders were disobeyed, and the duties they prescribed neglected by him, the said Colonel David Brearly, who, without proper authority, abandoned the position and duties assigned him at the Creek agency, as aforesaid; and, contrary to orders, went to Fort Mitchell to attend a duty which he should have performed at the Creek agency, or detached an officer of his command for the purpose; all which disobedience of orders and neglect of duty being contrary to the rules and articles for the government of the army, and having had a direct tendency to jeopardize the safety of the army and retard and defeat its operations against the enemy, to the great injury of the service.

E. P. GAINES, *Major Gen. by brevet.*

ADDITIONAL CHARGE.—*Unmilitary conduct.*

Specification 1st. In this, that the said Colonel David Brearly did advise changing the route of the Tennessee volunteers, under the command of Colonel A. P. Hayne, in the month of March last, and contrary to the instructions of the major general given to Colonel Hayne, when, too, the said Colonel Brearly did know the wishes and anxiety of the commanding general that those troops should join him at Fort Scott, by the route pointed out, and

when the said Colonel Brearly had, on the 11th of February, 1818, given information that a plentiful supply of corn could be obtained at Fort Gaines and probably other supplies, which were communicated to Colonel Hayne, as per accompanying extract of letter under that date.

Specification 2d. In this, that the said Colonel David Brearly did, in the month of February or March, 1818, muster into the service of the United States a large body of Indian warriors, at or near Fort Mitchell, thereby consuming a large quantity of the supplies laid in and destined for the relief of Fort Scott and to furnish the Tennessee volunteers; all of which acts, contained in both specifications, tended manifestly to the injury of the service.

By order:

ROBERT BUTLER, *Adjutant General.*

To the first charge and its specifications, the accused pleaded "not guilty."

To the first specification of additional charge, the accused objected to plead, on the ground that it contained no military offence if proven, as it consists of a matter of opinion or advice, which an officer is at all times at liberty to give when solicited. The court being cleared, the objection was sustained.

To the second specification of the additional charge, the accused pleaded "not guilty."

Major General Gaines, a witness for the prosecution, being duly sworn, says, about the 11th or 12th of January, as stated in the charge, being advised of the failures which had taken place on the part of the contractor to forward the provisions that had been required for this place, the accused being with me at Hartford, proposed to superintend the building of boats at the agency, in order to forward supplies down the Flint river. The want of officers in that quarter induced me to avail myself of the Colonel's proposition. I therefore gave him an order, marked A, which I believe should have been dated the 12th, instead of the 11th January; the first draught of this order was lost in my boat. I at the same time gave an order for an officer and thirty mounted men to accompany him for the purpose of building the boats. They left Hartford soon after the date of this order. In the course of a few days I received the letter B; afterwards, and within a short time, the following correspondence took place between us, viz. the letters and orders marked C, D, E, F, G. Some few days previous to the detachment first mentioned, a command of an officer and twenty or thirty men was ordered to the agency to build the boats. I deem it proper to state, that, previously to writing the letter G, I had learned from General Jackson that he had seen Colonel Brearly at Fort Hawkins, and that it was understood he was going to the meeting of the Indians, which was to be held at Fort Mitchell. Conceiving it probable, therefore, that he might leave the agency before any letter could reach him, I directed it to Captain Melvin, in case of his absence. I know nothing of the second specification of the additional charge, further than is contained in the order of the 20th of January, marked C, and accompanying letters.

Question by the accused. Did I not in the early part of December, and on our way to Marian, propose to you the building of boats at the agency, and transporting thence provisions; and, if so, what was your opinion and answer on the subject?

Answer. I recollect, in travelling about the middle of December, of a conversation between Colonel Brearly and myself, on the subject of building boats and sending provisions down the Flint river. It was my opinion that it was not necessary at that time.

Question by the accused. Did I not urge you strenuously to make the trial to get provisions by water from the agency?

Answer. I believe Colonel Brearly stated the practicability of getting provisions down the river, and I think he expressed the opinion confidently that it could be effected.

Question by the accused. Did you not say to me when I volunteered to take charge of the party ordered for the purpose of building boats, that it was a duty which you would not have thought of ordering an officer of my rank to perform?

Answer. Yes; and I added that I should not have ordered you on that duty, if you had not volunteered to perform it.

Question by the accused. Did you not, on your arrival at Fort Hawkins, in the early part of December, offer me leave of absence to visit my family and the city of Washington?

Answer. In consequence of your repeated solicitation, previous to that time, I told you that you might be indulged with leave of absence; this indulgence was waived by you in consequence of your desire to participate in the campaign.

Question by the accused. Were you not apprized by the officer or officers commanding the mounted Georgia militia, previous to my leaving Hartford with a detachment of them, that they would not remain in service after the time for which they were called out should expire?

Answer. It was pretty generally understood that they were desirous to quit the service after the expiration of the two months for which they were called out, and some of the officers said that it would be difficult to detain them longer.

Question by the accused. Had you not an interview with Major Lewis on the subject of their intention to quit the service at the expiration of the two months?

Answer. I think Major Lewis did mention the subject to me, and stated the same opinion with most other officers that those men would not serve after two months.

Question by the court. What length of time had the mounted Georgia militia to serve when they were ordered from Hartford to the Creek agency to build boats?

Answer. Between two or three weeks from the date of the order.

Lieutenant KEISER, a witness for the prosecution, being duly sworn, says, Colonel Brearly asked me the state of the tools at the agency about the 14th or 15th of January. I gave him a state of the tools which I procured for the first detachment. The colonel, finding there was not a sufficient quantity of tools, ordered me to furnish more, which I did as soon as practicable. The whipsaws were furnished probably on the 21st, the felling axes a few days afterwards, and these were all the axes that could have been (in my opinion) procured short of Augusta. As respects the provisions, I was with Colonel Brearly between the 14th and 17th of January, when he called on the clerk of the contractor (the agent being absent) at Fort Hawkins for thirty thousand rations, which had been called for by General Gaines. The clerk had no knowledge of any rations except some beef which had been condemned by the Georgia militia, and perhaps some pork. The clerk did not state that the pork had been condemned.

Question by the Judge Advocate. When did you arrive at the agency?

Answer. On the 13th of January; and a detachment of thirty Georgia militia arrived the day after.

Question by the Judge Advocate. What number of tools had this detachment to work with when you left the agency?

Answer. I borrowed one whipsaw, I had five felling axes, two broad axes, two crosscut saws, and a sufficient quantity of small tools, which were furnished agreeably to a bill made out by the commander of the detachment.

Question by the Judge Advocate. Did you comply with all of Colonel Brearly's requisitions for tools, and what were the tools furnished?

Answer. I complied with all the requisitions except as to two felling axes; I do not remember the number of each variety of tools; but recollect to have forwarded to the agency, between the 13th and 31st January, about thirteen felling axes, four whipsaws, two crosscut saws, five broad axes, and a variety of small tools.

Question by the Judge Advocate. What number of rations were at the agency when you left it?

Answer. Early in December forty-six barrels of flour and three hundred and eighty odd bushels of corn were deposited at the agency; a considerable part of the flour had been issued by the Indian agent.

Question by the Judge Advocate. What quantity of provisions did you forward to the agency between the 13th and the 31st of January?

Answer. I do not recollect; perhaps between seventy and a hundred barrels of flour and corn meal.

The court adjourned to meet to-morrow at nine o'clock.

JUNE 21.

The court assembled pursuant to adjournment. Present: Lieutenant Colonel Lindsay, president; Major Nicks, Major Muhlenberg, Captain Donoho, Major Cutler, Captain Cummings, Captain Vashon, members; Surgeon Thomas Lawson, Judge Advocate.

Lieutenant Keiser's testimony continued.

Question by the Judge Advocate. Were eight additional axes sent to the agency, and at what time?

Answer. Eight axes arrived at the agency I believe about the 24th or 25th January, perhaps sooner; the saws arrived about the 23d, 26th, or 27th of January.

Question by the Judge Advocate. What number of mechanics and laborers were employed by you, and when did they go to the agency?

Answer. On the 4th February I sent about four, and, from time to time afterwards, until the 22d March, I sent between fifteen and twenty, perhaps more, at different times.

Question by the Judge Advocate. Did you not, on your arrival at the camp near Hartford about the 20th of February, report to General Gaines that you had sent to the agency about sixteen men?

Answer. I do not recollect the circumstance, but whatever I did report was correct; I then had my note-book.

Question by the Judge Advocate. What number of workmen had Colonel Brearly at the agency between the 13th of January and 4th of February?

Answer. I do not know.

Question by the accused. Did I not, from the time of my arrival at Fort Hawkins with a detachment of Georgia militia, and during my command of them at the agency, frequently make requisitions for tools and other supplies to enable me to carry into effect the orders of General Gaines, which requisitions you were unable promptly to comply with?

Answer. Yes.

Question by the accused. Did you not find it impracticable to procure such a number of workmen as was required by me to complete the boats while I was at the agency?

Answer. I found it impracticable, although I offered three dollars per day and subsistence for sawyers.

Captain MELVIN, of the 4th infantry, a witness for the prosecution, being duly sworn, says, in obedience to an order from General Gaines, I, on the 24th January at noon, reported myself to Colonel Brearly at the agency. He requested that I would walk with him to the boat-yard, and asked my opinion relative to the boat which was then building by the Georgia militia. I told him I thought she would be too heavy with bulwarks on to answer the purpose for which she was intended. The colonel then said that he intended to leave the agency for Fort Hawkins, which he did the day after. The colonel, at the same time, advised me not to interfere materially with the militia, as he thought more work would be got out of them if they were allowed to exercise their own judgment. On the 29th January one of the officers stated to me that the men had determined to quit the agency and go home. I wrote to Colonel Brearly and communicated the intention of the Georgia militia to march for home on the last of January; the militia launched the boat I think on the 29th, and, on the next day, departed for Fort Hawkins. On the 30th Colonel Brearly returned to the agency. As there were no men to carry on the building of the boats Colonel Brearly gave me permission to go to Fort Hawkins, where I remained until the 8th of February, when I received an order from the colonel to repair to the agency, at which place I arrived on the 9th. The colonel left the agency for Fort Hawkins the first or second day after and did not return until the 14th or 15th of February. The colonel being on the eve of departure for Fort Mitchell gave me the command of the agency; at the same time turning over to me some instructions received by him from General Gaines, together with a letter of instructions from himself.

Question by the Judge Advocate. Were any of the boats complete when you joined Colonel Brearly at the agency on the 24th January?

Answer. None.

Question by the Judge Advocate. What number of men were working at the agency on the boats on the 24th January?

Answer. About fifty or sixty.

Question by the Judge Advocate. What number of tools were in possession of the working party?

Answer. I cannot say what number they had on my arrival at the agency, but on their departure they turned into me four whipsaws, two crosscut saws, two or three handsaws, six or eight augers, two jack and two fore planes, four or five chisels of different sizes, four broad axes, eleven good felling axes, with some others that were damaged; also, some small gimlets and other tools.

Question by the Judge Advocate. What were the contractor's supplies at Fort Hawkins, in January and February, and was he able to furnish thirty thousand rations of provisions?

Answer. His supplies were very small, and he did not furnish rations, on my requisition, for about one hundred and ten men, for ten days, stating that he could not meet the requisition. I also received two or three requisitions from General Gaines, for thirty thousand rations each, which the contractor did not supply.

Question by the Judge Advocate. Was there a boat load of provisions at the agency when you took command?

Answer. There was.

Question by the Judge Advocate. How many men were working on the boats between the 31st January and 15th February?

Answer. Between the 1st and 4th February, one man, on the 9th, about eight, and on the 15th, eleven or twelve men, including my waiter.

Question by the Judge Advocate. Were those good workmen?

Answer. Some of them were good workmen, but they could not be made to work. They were drunken, worthless, discharged soldiers, and two negroes.

Question by the Judge Advocate. On what day did the first boat or boats descend the river with supplies?

Answer. On the 21st February, two descended; on the 22d another; on the 10th of March another landed with corn meal, salt, and salted pork; and on the 25th March two more, loaded with eight hundred, and perhaps more bushels of corn. Those were all the provisions at the agency, except a few barrels of whiskey.

Question by the accused. Did you not frequently hear me express my regret, that the general would not permit me to send the boats down without being made ball-proof?

Answer. Yes.

The court adjourned to meet to-morrow at nine o'clock.

JUNE 22.

The court met pursuant to adjournment. Present: President, Lieutenant Colonel Lindsay; members, Major Nicks, Major Muhlenberg, Captain Donoho, Major Cutler, Captain Cummings, Captain Vashon; Surgeon Thomas Lawson, Judge Advocate.

Captain Melvin's testimony continued.

Question by the accused. Had I not Indians in readiness to take the boat or boats down, if the General had permitted them to have gone without being made ball-proof?

Answer. I know of no arrangement being made by Colonel Brearly with the Indians, but Timothy Barnett reported to me that some of his people were ready to descend the river with any boats.

Question by the accused. Did you afterwards send a boat or boats by Indians?

Answer. No.

Question by the accused. Did you send the boat, which I had launched, down the river by Indians?

Answer. The boat which was launched by the Georgia militia was sent down by Indians.

Question by the accused. Was there not prepared in the woods, by the Georgia militia, a sufficiency of stuff for a second boat?

Answer. There was nothing but two gunnels partly complete, and some clap boards; for what purpose the clap boards were intended I know not. There were also, I believe, a few small stocks; but by whom all this timber was prepared I have no knowledge.

Question by the accused. From the observations you were able to make while we were together, did I appear to neglect the work?

Answer. Your stay was so short that I am unable to say.

Question by the court. What instructions were turned over to you by Colonel Brearly, when he gave you the command at the agency?

Answer. The instructions contained in the letter marked F, which has already been recorded, and in the letters marked H and I.

Lieutenant Colonel ARBUCKLE, a witness for the prosecution, being duly sworn, says, I know nothing of the 1st specification of the 1st charge, except as to the arrival of provisions at Fort Scott from down the river. None did arrive previous to the 10th of March, when I left the post.

Question by the Judge Advocate. Do you know any thing relative to the 2d specification of the 1st charge?

Answer. Nothing except the information contained in those letters from Colonel Brearly, marked J, K, L, M, which I present to the court.

The court adjourned to meet to morrow at nine o'clock.

JUNE 23.

The court met pursuant to adjournment: Present, Lieutenant Colonel Lindsay, President; Major Nicks, Major Muhlenberg, Captain Donoho, Major Cutler, Captain Cummings, Captain Vashon, members; Surgeon Thomas Lawson, Judge Advocate.

Lieutenant KEISER was again called into court.

Question by the court. Were any provisions sent to Fort Mitchell for the relief of Fort Scott?

Answer. I sent one hundred and ten or twenty live hogs about the last of February.

Question by the Judge Advocate. Did you not, between the 10th and 20th of January, receive from the Governor of Georgia, by General Gaines' order, ten thousand dollars, and on the 5th of February, from the General, twelve thousand dollars, for the purposes of the quartermaster general's department?

To which question the accused objected, on the ground of its irrelevancy.

The court being cleared, the objection was sustained.

Question by the Judge Advocate. What was the cause of the impracticability promptly to comply with the requisitions of Colonel Brearly?

Answer. I could not find persons willing to work, and could not procure, (or have made,) tools at an earlier period.

Question by the Judge Advocate. Were provisions required of you by Colonel Brearly; and if so, were they furnished?

Answer. Yes.

Question by the accused. When our duties have called us together during the present war, have I not always evinced an ardent disposition to promote the interests of the service, and particularly the views of General Gaines?

Answer. In all cases.

Captain GLASSELL, of the 4th infantry, a witness for the prosecution, being duly sworn, says, I know nothing of the 2d specification of the additional charge.

Question by the accused. Were you in the family of General Jackson at Fort Hawkins, on or about the 9th or 10th of February, and were you present when I called on the general and had a conference with him respecting my duties in the Nation?

Answer. I was in General Jackson's family and was present when Colonel Brearly called on the general, about the 10th of February, and had a conversation with him respecting his duties in the Creek nation; the colonel stating what he had been doing and what he was about to do.

Sergeant P. PHILLINGIN, of the 4th infantry, a witness for the prosecution, being duly sworn, says, I know that there were provisions at Fort Mitchell, and that they were issued to the Indians by Mr. Anthony, (issuing commissary,) and also to the Tennessee volunteers.

Question by the Judge Advocate. By whose order were those provisions issued?

Answer. I do not know.

Question by the Judge Advocate. For what troops were those provisions deposited at Fort Mitchell?

Answer. I do not know.

Question by the Judge Advocate. Did Colonel Brearly muster into service a large body of Indian warriors?

Answer. I believe he did.

Question by the accused. Do you know whether the Indians drew any but the flour part of the rations during the time that was occupied in mustering them into service?

Answer. They drew meat before they left Fort Mitchell, but I cannot say whether or not they drew meat while mustering.

Question by the accused. Do you know that the Indians drew flour only for a part of the time they were at Fort Mitchell?

Answer. I believe they did.

The testimony on the part of the prosecution being closed, General GAINES was, at the instance of the accused, called into court.

Question by the accused. Did you point out by order when and where the Indians were to be mustered into service?

Answer. I think I did not. I would now add that my letters and orders upon that subject were written under the impression that the warriors would be obtained at the agency, where they were to assemble in a few days. That impression was, I think, communicated to Colonel Brearly. Afterwards, however, I learned from the colonel that there was little prospect of getting the warriors at the agency, and that a meeting of them was to be held at Fort Mitchell about the 17th or 18th February. I learned from the colonel, also, that more Indians were likely to offer their services; whereupon, I directed the assistant adjutant general, Major Wright, to write a letter, of which a copy, marked F, and dated 29th January, is now before the court.

The accused requested General Gaines to furnish the court the communication of the 27th January, in answer to which the letter F was written. The General not being able to procure the communication, the paper marked P was, by the accused, presented to him, which he acknowledged to be a copy of the communication in question. The court received the paper P and ordered it to be placed on record.

Question by the accused. Did you intend that the Indian warriors should receive rations from the United States?

Answer. Certainly I did; but in strict conformity with my order of the 20th of January.

Question by the accused. Did you point out by any order how supplies were to be obtained by me for those Indians?

Answer. I think I mentioned verbally to Colonel Brearly, that a large supply of provisions had been ordered to Fort Scott by water, and that I had reason to believe they would arrive. I, however, communicated to the Colonel the difficulties that Major Muhlenberg had experienced in ascending the river, and urgent necessity of getting supplies by the other route.

Question by the accused. Did I not despatch a boat loaded with provisions to Fort Early, in the early part of February, which arrived at that place safe?

Answer. I saw an old boat with from nine to twelve barrels of provisions which Lieutenant Phillips said Colonel Brearly had sent down.

Question by the accused. Did you not ascertain, after my leaving the agency, that the navigation of Flint river from that place, for covered boats of the description ordered to be made, was unsafe.

Answer. I recollect of receiving no information on the subject different from that I had previously possessed, which was, that the navigation was difficult and dangerous, yet practicable.

The court adjourned to meet to-morrow at 9 o'clock.

JUNE 24.

The Court assembled pursuant to adjournment. Present, Lieutenant Colonel Lindsay, president; Major Nicks, Major Muhlenberg, Major Cutler, Captain Donoho, Captain Cummings, Captain Vashon, members; Surgeon Thomas Lawson, Judge Advocate.

Colonel Brearly having requested the court to enter on record the letter N, the authenticity of which Captain Melvin acknowledges, the request was granted. Captain Melvin, in explanation of the letter, says, "From a conversation I had with General Gaines, while at Hartford, I was led to believe, that the boats alluded to in my letter were intended to carry the ordnance and ordnance stores, then at Forts Hawkins and Early, to Fort Scott. I do not recollect to have mentioned this conversation to Colonel Brearly."

Captain CUMMINGS, a member of the court, was interrogated.

Question by the court. Did you ever descend Flint river?

Answer. Yes.

Question by the court. Is it practicable to navigate the river from the agency to the Chehaw shoals in ball-proof boats?

Answer. It is not practicable without exposing the men who navigate them; and when the river is low, there is not water sufficient to float them.

Question by the court. What are the principal obstacles to the navigation of the river?

Answer. The principal obstacles are, the short bends of the river, its narrowness, its crookedness, and the many logs and tops of trees in it.

The accused presented to the court for consideration the paper marked O. The court was then cleared.

The court deemed it unnecessary to hear further testimony on the points referred to by the accused. The evidence on the part of the accused having closed, the court was cleared.

The whole of the proceedings having been read over to the court by the Judge Advocate, the following sentence was pronounced: The court, after mature deliberation on all the testimony adduced, find the accused, Colonel David Brearly, not guilty of either of the charges or specifications preferred against him, and do therefore acquit him.

The court adjourned to meet to-morrow at 9 o'clock.

JUNE 25.

The court assembled pursuant to adjournment. Present, Lieutenant Colonel Lindsay, president; Major Nicks, Major Muhlenberg, Captain Donoho, Major Cutler, Captain Cummings, Captain Vashon, members; Surgeon Thomas Lawson, Judge Advocate.

The Judge Advocate having no further business to lay before the court, the court adjourned *sine die*.

WM. LINDSAY,
Lt. Col. corps of Artillery, President.
THOMAS LAWSON,
Surgeon 7th Infantry, Judge Advocate.

HEAD-QUARTERS, DIVISION OF THE SOUTH,

ADJUTANT GENERAL'S OFFICE, *Nashville, August* 5, 1818.

DIVISION ORDER.

At a general court-martial held at Fort Scott, in the State of Georgia, and of which Lieutenant Colonel Lindsay is president, was tried Colonel David Brearly, of the 7th regiment United States' infantry, on the following charges and specifications, viz:

Charge 1*st. Disobedience of orders and neglect of duty.*

Specification 1*st.* For that the said Colonel David Brearly, being ordered by Major General Gaines, commanding, on or about the 11th January, 1818, to repair to the Creek agency (Creek nation) to superintend the building of boats, and send therein, down the Flint river, for the use of the troops of the United States and Georgia militia, stationed near Chehaw village and at Fort Scott, the supplies of provision and corn then at the agency, with such other supplies as should be sent thither from Fort Hawkins for the troops aforesaid, did disobey the said orders, and, although furnished with near forty men, and a proper supply of tools for the prompt performance of the duties assigned to him, he nevertheless neglected those duties, whereby the United States' troops and Georgia militia aforesaid were left in the vicinity of an enemy without the necessary and proper means of subsistence, to the great injury of the service.

Specification 2*d.* For that the said Colonel David Brearly, being ordered by Major General Gaines, commanding at Hartford, in the State of Georgia, in the month of January, 1818, to superintend the construction of boats at the Creek agency; to forward supplies to the troops below; to require of the acting assistant deputy quartermaster general, Lieutenant Keiser, such tools and supplies as would enable him, the colonel, to carry into effect the order given him, with the least possible delay; to order from Fort Hawkins to the agency thirty thousand rations of provisions, and to forward the same, together with the supplies then at the agency, down the Flint river, to the United States' troops and Georgia militia, near Chehaw village, and at Fort Scott, as soon as the boats should be completed, and, being repeatedly urged and ordered, in the month of January, 1818, to cause the said boats to be completed, and the supplies forwarded to the troops below without delay; all which orders were disobeyed, and the duties they prescribed neglected by him, the said Colonel Brearly, who, without proper authority, abandoned the position and duties assigned him at the Creek agency, or detached an officer of his command for the purpose. All which disobedience of orders and neglect of duty, being contrary to the rules and articles for the government of the army, and having had a direct tendency to jeopardize the safety of the army, and retard and defeat its operations against the enemy, to the great injury of the service.

E. P. GAINES,
Major General by brevet.

ADDITIONAL CHARGE.—*Unmilitary conduct.*

Specification 1*st.* In this, that the said Colonel David Brearly did advise changing the route of the Tennessee volunteers, under the command of Colonel A. P. Hayne, in the month of March last, and contrary to the instructions of the major general given to Colonel Hayne; when, too, the said colonel did know the wishes and anxiety of the commanding general that those troops should join him at Fort Scott, by the route pointed out, and when the said Colonel Brearly had, on the 11th February, 1818, given information that a plentiful supply of corn could be obtained at Fort Gaines, and probably other supplies, which were communicated to Colonel Hayne, as per accompanying extract of a letter under that date.

Specification 2*d.* In that the said Colonel David Brearly did, in the month of February or March, 1818, muster into the service of the United States a large body of Indian warriors, at or near Fort Mitchell, thereby consuming a large quantity of the supplies laid in and destined for the relief of Fort Scott, and to furnish the Tennessee volunteers; all of which acts contained in both specifications tended manifestly to the injury of the service.

By order: ROBERT BUTLER, *Adjutant General.*

To the first charge and its specifications the accused pleaded not guilty. To the first specification of the additional charge the accused objected to plead, on the ground "that it contained no military offence if proven, as it consists of a matter of opinion or advice, which an officer is at all times at liberty to give, when solicited." The court being cleared, the objection was sustained.

To the second specification of the additional charge the accused pleaded not guilty.

The court, after mature deliberation on all the testimony adduced, find the accused, Colonel David Brearly, not guilty of either of the charges or specifications, and do therefore acquit him.

The commanding general approves the finding of the court on the first charge and its specification, and disapproves the act of the court in sustaining the objection of Colonel Brearly to the first specification of the additional charge, inasmuch, as the defendant was notified, at Fort Hawkins, by the general, of the orders sent to Colonel Hayne that, on meeting the colonel, he might express his (the general's) anxiety of being joined at Fort Scott by the Tennessee troops. Yet, under these circumstances, it is not deemed unmilitary to advise a movement of those troops contrary to orders and expressed wishes, and that, too, when the defendant knew that this force, combined with the regulars, was relied on for the preservation of the provisions ordered from New Orleans, and the ultimate prosecution of the campaign.

The defendant's plea in bar, was, in law, an acknowledgment of the truth of the charge, and should have been so considered by the court; and it is a matter of surprise how the court could have sustained the objection.

On the 2d specification, the court, from the documents produced, have properly found him not guilty, as it appears from General Gaines's letter, bearing date 29th January, that he was ordered to accept all the Indians that might be disposed to join him.

Colonel Brearly will resume his *sword* and report to General Gaines for orders.

The court is dissolved.

By order: ROBERT BUTLER, *Adjutant General.*

SIR: DEPARTMENT OF WAR, *January* 11, 1820.

In reply to your letter of the 8th instant, I transmit, herewith, "a statement of the expenditures to defray the expenses of a brigade of militia and mounted volunteers," made to me by the Second Auditor of the Treasury.

I have the honor to be, your most obedient servant,

J. C. CALHOUN.

Hon. H. R. STORRS, *Chairman of the committee, &c. &c. House of Representatives.*

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *January* 1, 1820.

SIR:

I have the honor to transmit you such a statement of the expenditures to defray the expenses of a brigade of militia and mounted volunteers, as can at present be had from the books of this office; a more perfect one cannot be furnished for the want of the returns of several paymasters.

I have the honor to be, very respectfully, your obedient servant,

WM. LEE.

Hon. J. C. CALHOUN, *Secretary of War.*

Statement of expenditures to defray the expenses of a brigade of militia and mounted volunteers.

Amount appropriated per act of 19th Feb. 1818, on account of a brigade of militia,	$306,743 00	
Amount appropriated per act of 20th April, 1818, on account of a brigade of militia,	50,000 00	
Amount appropriated per act of 20th April, 1818, on account of mounted volunteers,	90,000 00	
		$446,743 00
For amount expended by the following officers:		
By Robert Brent, (paymaster general,) from 1st July, 1815, to 31st December, 1818,	675 41	
Henry Hitchcock, (secretary to Alabama Territory,) paid to the Alabama militia in 1819,	4,926 58	
James Alston, (paymaster to Georgia militia,) paid them in 1818,	53,310 42	
Abner Wimberley, (paymaster to Georgia militia,) paid them between 26th November, 1817, and 12th February, 1818,	21,555 20	
John B. Hogan, (paymaster 4th infantry,) paid Tennessee mounted volunteers in 1818,	27,855 45	
Daniel Hughes, (United States' factor,) paid on account of militia in 1818,	30 63	
		$108,353 69
For amount expended by the following officers, per settlements filed in the Second Auditor's office:		
By warrant 1,294, in favor of Hon. John Crowell, for amount due Thomas Everton, late private of Alabama militia, for services in 1818,	18 66	
T. F. Hunt, (lieutenant, and acting quartermaster,) paid for transportation of baggage of lieutenant Dallam, of Kentucky volunteers,	54 24	
Thomas R. Broom, (paymaster 4th infantry,) for amount paid officers of Georgia militia,	810 42	
C. Keiser, (lieutenant of ordnance,) paid Georgia militia in 1817 and 1818,	1,359 63

PAYMASTER GENERAL'S OFFICE, CITY OF WASHINGTON, *February* 16, 1820.

NATHAN TOWSON, *Paymaster General.*

To the Hon. J. C. CALHOUN, *Secretary of War.*

SIR: TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *January* 14, 1820.

In conformity to the request contained in your letter of yesterday, I have the honor to transmit to you a copy of the pay-roll of the general, field, and staff officers of General McIntosh's brigade of Creek warriors, amounting to the sum of three thousand five hundred and forty-eight dollars and forty-eight and a half cents.

The amount of the abstract of payments made by D. B. Mitchell to the brigade of Creek warriors, viz: thirty thousand one hundred and twenty-seven dollars and forty-nine and a half cents, was taken from the appropriation for the pay of the army for the same year. A question having arisen, out of what fund these troops were to be paid, and it having been found, on examination, that our Indian auxiliaries were frequently paid during the last war out of the appropriation for the "pay of the army," the Secretary of War concluded to carry the above expenditure to that appropriation.

The particulars of the payment made by John B. Hogan to the Tennessee mounted volunteer gun-men for their pay, subsistence, and allowance for the use and risk of their horses, arms, and accoutrements, will be found enclosed herewith.

I have the honor to be, most respectfully, your obedient servant,

WILLIAM LEE.

Honorable H. R. STORRS, *House of Representatives.*

JUNE 30, 1818.

I certify that this muster-roll exhibits the true state of Captain Henry Norwood's company of the volunteer mounted gun-men, of West Tennessee, from 31st January, when mustered into service, to the 30th day of June, 1818, when discharged; and that the remarks set opposite the names of the men are accurate and just.

Given at Columbia, in the State of Tennessee, this 30th day of June, 1818.

HENRY NORWOOD, *Commanding the Company.*

Mustered this 30th day of June, 1818.

A. P. HAYNE, *Insp. Gen. U. S. Army.*

I certify on honor that the distance from Columbia to Franklin county, Tennessee, the place of our respective residence, is eighty miles.

HENRY NORWOOD, *Captain.*

I certify that the above certificate is correct.

A. P. HAYNE, *Insp. Gen.*
WILLIAM LEE, *Auditor.*

SIR: TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *February* 5, 1820.

I have been favored by your letter of the 3d instant.

The accounts of paymaster John B. Hogan have not yet been received at this office. Four pay and receipt rolls, the amount of which, viz: twenty-seven thousand eight hundred and fifty-five dollars and forty-five cents, have been laid before you, are the only vouchers he has transmitted, and they have not been acted on, nor any part of them passed off to his credit. We learn *viva voce* that Mr. Hogan has very properly objected to the claim of the Tennessee mounted volunteers for an allowance of clothing, in consequence of which he has experienced some difficulties, which have retarded his arrival at the seat of Government with his accounts and vouchers. There being no law authorizing such a disbursement, he cannot, even should he have been overruled and forced to make such an allowance, receive a credit therefor.

On the back of the abstract of the pay-roll of the general, field, and staff officers of W. McIntosh's brigade of Creek warriors will be found a voucher signed by each of the officers, wherein they acknowledge to have received of Governor Mitchell, agent for Indian affairs, in money, the sums opposite their respective names, in full for their pay, subsistence, &c., agreeably to the pay-roll, which is drawn up on the muster-roll, certified to by order of General Jackson. This I did not consider at the time as a regular voucher. But as Governor Mitchell is an Indian agent, and not a paymaster, of course unacquainted with the rules, regulations, and forms for the payment of the army of the United States; and as it was next to impossible, at the time the accounts were presented, to procure of these Indian officers the usual evidence of their having employed the horses and servants specified on the roll, viz: their declaration, on honor, as in similar cases is exacted from officers of the line, (as per blank enclosed,) I consider it but just that Governor Mitchell should receive a credit for the moneys he had actually disbursed in good faith, and, as he supposed, in proper form, dispensing thereby with the usual certificate, "upon the word and honor of a gentleman that the account was accurate and just;" the Governor having taken the muster-roll, officially signed, as his guide, and the vouchers proving satisfactorily that he *bona fide* paid the several sums charged.

The amount with which the late Robert Brent, late paymaster general, stood charged on account of appropriation for a brigade of militia, has been closed by a transfer of the same to Colonel Towson, paymaster general.

As far as we have progressed in the settlement of the late paymaster general's accounts, there appears to be a balance against him in this office of eighty thousand dollars, to which must be added a transfer made within these few days from the Third Auditor's office of forty thousand dollars, on account of half pay pensions, making together the sum of one hundred and twenty thousand dollars. The executors of his estate have been called upon to refund this sum, and they have assured us the estate has ample means of discharging the same, taking into view a number of balances due the estate from several banks for moneys deposited therein by the deceased. Every proper measure will be resorted to to bring this important account to a close.

I have the honor to be, very respectfully, your obedient servant,

WILLIAM LEE.

Honorable H. R. STORRS, *&c.*

We, the subscribers, do hereby acknowledge to have received of John B. Hogan, Paymaster 7th regiment of infantry, the sums annexed to our names respectively, being in full of our pay, horse hire, and clothing, for the period herein expressed.

WILLIAM LEE, *Auditor.*

SIR: DEPARTMENT OF WAR, *February* 19, 1820.

In reply to your letter of the 12th instant, I have the honor to transmit herewith statements prepared by the Paymaster General and the Second Auditor of the Treasury, which, with General Jackson's letter of the 2d of June, 1818, communicated to Congress by the President of the United States in his message of the 2d of December, 1818, contains all the information in this Department relative to Captains Boyle and McGist's companies of rangers.

Conformably to your request of the 18th instant, I also transmit copies of General Gaines's letter of the 17th of October, 1819, and of Colonel Hayne's of the 9th of February, 1818.

I have the honor to be your obedient servant,

J. C. CALHOUN.

The Hon. HENRY R. STORRS, *Chairman, &c. H. R.*

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *February* 14, 1820.

SIR:

In reply to the letter of the 12th instant of the Hon. H. R. Storrs, which you have referred to this office, requesting an abstract of the muster-rolls of certain companies of rangers, under the command of Captains Boyle and McGist, employed in the service of the Seminole war in 1818, I have the honor to state that it appears these companies were to be paid by J. B. Hogan, the paymaster of the 4th infantry; but this officer has as yet sent on no vouchers for payments to the militia employed in the Seminole campaign, except to four companies of Tennessee volunteer mounted gun-men, as will appear by his letter, a copy of which I have this day forwarded to Mr. Storrs. Nothing further having been received from Major Hogan, and no rolls of the companies in question being on file in any of the offices here, as far as I can discover, nor any memorandum of the amount paid them, it is not in my power to furnish the information required.

With high consideration, I have the honor to be, your very humble servant,

WILLIAM LEE.

Hon. J. C. CALHOUN, *Secretary of War.*

PAYMASTER GENERAL'S OFFICE,

SIR: CITY OF WASHINGTON, *February* 17, 1820.

I have received your letter of this date, enclosing a copy of one of the 12th instant from the Hon. Mr. Storrs, chairman of a committee in Congress, and have to report to you that no muster-rolls of Captain Boyle's and McGist's companies of rangers have been received at this office, consequently no abstract of them can be given. A communication from the paymaster of the fourth regiment of infantry, dated September 23, 1818, a copy of which is herewith enclosed, contains all the information which the pay department possesses on the subject.

I am, very respectfully, sir, your most obedient servant,

N. TOWSON, *P. M. G.*

To the Hon. J. C. CALHOUN, *Secretary of War.*

Extract of a letter from John B. Hogan, Paymaster fourth regiment infantry, to Robert Brent, Esq., Paymaster General, dated

FORT MONTGOMERY, *September* 23, 1818.

I received this morning an order from Colonel William King, commanding this department, to estimate, and be ready to pay off, two companies of rangers, viz. Boyle's and McGist's, which were organized some time since by Major General Jackson. Not knowing the service they have rendered, I have estimated for six months, for pay, subsistence, and the forty cents per day for the use and risk of each horse: enclosed is the estimate. You will see I have left out clothing and forage. I also enclose you Colonel King's order on the subject.

Estimate of the pay, subsistence, and forty cents per day for the use and risk of each horse, and of two companies of rangers, authorized by Major General Jackson, viz. Captains Boyle and McGist's.

Enumeration of the troops.	Pay.	Subsistence.	Horse allowance.	Amount.	Remarks.
1 surgeon's mate, -	$180 00	$72 0	$72 00	$324 00	This estimate is for six months' service, as Colonel King's return does not state the length of service. I know Gen. Jackson's order says six months, unless sooner discharged; as they are to be mustered out of service on the 31st October, it is probable they have not been so long. I have made no estimate for forage.
2 captains, -	600 00	216 00	144 00	960 00	
2 first lieutenants, -	399 96	216 00	144 00	759 96	
2 second lieutenants,	399 96	216 00	144 00	759 96	
8 sergeants, -	528 00	-	576 00	1,104 00	
8 corporals, -	480 00	-	576 00	1,056 00	
4 musicians, -	216 00	-	288 00	504 00	
190 privates, -	5,760 00	-	8,640 00	14,400 00	
	$8,563 92	$720 00	$10,584 00	$19,867 92	

I certify the above is as accurate an estimate as I can make from the return furnished me. The period of service is not known.

Given at Montgomery, Alabama Territory, September 23, 1818.

JOHN B. HOGAN, *Paymaster 4th Regiment Infantry.*

SIR: PENSACOLA, *September* 18, 1818.

You will be pleased, without delay, to estimate for the amount of funds necessary to pay off the two companies of rangers, called into the service by Major General Jackson, under the command of Captains Boyle and M'Gist. They will, in all probability, be disbanded at the close of the ensuing month, and it is particularly desirable that they should then be paid off.

I am, sir, with much respect, your obedient servant,

WILLIAM KING,
Commanding Department E. of Al.

To J. B. HOGAN, Esq., *Paymaster 4th infantry.*

SIR: HEAD-QUARTERS, CAMP BLOUNT, NEAR FAYETTEVILLE, TENNESSEE, *February* 9, 1818.

The volunteer brigade from West Tennessee, which has been assembled at this place, has been furnished by private contract; the regular contractor not having been given the legal notice, refused to furnish the troops; under these circumstances, I have made the best arrangements in my power. Each ration has cost the Government twenty cents. The provisions furnished have been of good quality.

The organization of the brigade has been attended with great difficulty. We can be correctly taught by experience only the great difficulties inseparable from the organization of volunteer corps; and on the present occasion the shortness of the notice given the troops to assemble has added to those difficulties. The major general commanding had authorized the field officers to raise two regiments, and they brought to camp forty captains, of which I could receive only twenty into service. To merge the lesser fractions into the greater, and thus amalgamate them into single companies, to cut down captains, to leave out subalterns, and yet to satisfy and secure to us the men, has been a very difficult task indeed. To effect these objects, I have been obliged in a number of cases to give an additional lieutenant and cornet to the companies. The major general in the first instance agreed that each regiment should have an additional lieutenant colonel and major. In fact, I have been compelled to give that organization which was formerly had in the Creek war. I would barely remark, that on strict military principles mounted gun-men ought to have an additional number of officers: it is certainly more difficult to command sixty-four mounted gun-men than a hundred and twenty foot soldiers. I have served in both capacities, and have found it so. In foreign service, too, it is usual to give cavalry an additional number of officers. In order to reconcile jarring interests, to harmonize the conflicting elements of local partialities and narrow-minded views, and not to lose sight of the great object of the campaign, there was left but one way to act. I do not hesitate to say that one man of our present command is intrinsically worth to the Government ten draughted militia; and you will find in the end that the course General Jackson has pursued will cost the Government much less than any other mode which could have been adopted would have done.

We take up the line of march to-morrow at sunrise, with twenty days' provisions. I calculate to march from this ground with one thousand two hundred men; and before crossing the Tennessee river I am in hopes they will amount to one thousand five hundred. The officers and men can be relied on. I never saw a regular camp exhibit better discipline, or more exact subordination: that is, so far as relates to correctness of conduct and vigilance in attending to duty.

The General left me with three thousand dollars, and I had only a few days to make those contracts absolutely necessary to move and feed the army. I have acted for my country as I would, under like circumstances, have acted for myself. At Tennessee river, when we march half a day and night, I will forward to the Adjutant and Inspector General's Office a report of the strengh of the brigade, also the muster-rolls.

Captain Kingsly has furnished in the contractor's, and a merchant of Fayetteville, W. B. M. Garner, in the quartermaster's department. They will accompany me as far as the Tennessee river, at which place I shall liquidate their accounts by bills on Government, drawn at ten days' sight.

I have the honor to be, &c.

A. P. HAYNE, *Inspector General commanding.*

Hon. J. C. CALHOUN, *Secretary of War.*

SIR: HEAD-QUARTERS, AUGUSTA, GEORGIA, *October* 17, 1819.

I have been inexpressibly hurt and embarrassed by a publication purporting to be a report of a committee of the Senate of the United States, which appeared in the newspapers about the close of last session, animadverting upon and censuring my conduct in the late Seminole war.

I was embarrassed because of the novelty and manifest injustice of this act of censure, ushered forth to the world with the apparently irresistible force and solemnity of a decree of a high tribunal, calculated to leave an impression upon the public mind fatal to the military character of the officers denounced: for it could hardly be believed that they were proceeded against and censured wholly upon *ex parte proof*, and without being heard or even notified of the intended investigation. I have, however, the melancholy pleasure of knowing that the investigation, if it really took place, was *ex parte*, and that I was not previously "informed of the nature and cause of accusation," nor allowed an opportunity of being "confronted with the witnesses against me," a privilege guarantied by the constitution of the United States to every citizen, even to the poorest and most wretched offender. The National Intelligencer of the 19th December, which I received in the month of January last, contains a resolution of the Senate of the United States, under which it seems the committee in question acted.

The resolution is as follows:

"*Resolved*, That the message of the President, and documents relating to the Seminole war, be referred to a select committee, who shall have authority, if necessary, to send for persons and papers; that said committee inquire relative to the advance of the United States' troops into West Florida; whether the officers in command at Pensacola and St. Marks were amenable to, and under the control of Spain, and particularly what circumstances existed to authorize and justify the commanding general in taking possession of these posts."

As the committee did not "send for" or notify me to attend its sittings, I could not suppose, under this resolution, that my conduct was to be inquired into, and I was confirmed in this conclusion, from the well known fact that the order for "the advance of the United States' troops into West Florida" did not originate with me, though I was convinced that the measure was indispensably necessary to give security to our suffering frontier settlements.

After much inquiry and reflection to ascertain the ground of accusation, and to determine upon the proper steps to enable me to penetrate and counteract the designs of my personal enemies, I have traced it in part to a false statement, which appears to have been made to the committee upon oath by D. B. Mitchell, Creek Indian agent.

How it happened that this agent was in Washington, near seven hundred miles from his agency, and why he should have been called before the committee to bear witness touching my conduct without my having been notified thereof, I am totally at a loss to divine, or reconcile with any sound principle of even-handed justice. But it is not my present purpose to inquire into the justice or legality of the measures which produced the inquiry and report. This document has been for some time in existence, and it may have already done me all the injury intended or expected from it, by giving solemnity and currency to calumnies against me; yet I cannot doubt that the honorable body, whose committee appears to have seen fit to question the correctness of my conduct, will at their next session act upon the report, and cause justice to be done. Holding myself always in readiness to meet any sort of legal investigation, I am by no means disposed to make any effort to change the mode of proceeding, which has been without my knowledge, or may hereafter be adopted by the committee or by the Senate, for whom I entertain the most profound respect; not only from a sense of public duty, but moreover from the high estimation in which I have long held the patriotism, talents, and virtue of most of the individual members composing that venerable branch of the National Legislature. I only desire that the investigation, commenced without any notice having been given me, may take whatever course the wisdom of the Senate and their sense of justice may suggest. Should I really be guilty of having wantonly involved my country in a war, I ought then to be shot; and I hereby assure you that I would, if properly found guilty, meet the sentence and punishment without a murmur. But I cannot silently permit my reputation, a thousand times dearer to me than life, to be assailed and injured by a course of proceeding not known to the constitution or laws of my country.

It has and may again be contended that the report in question cannot be considered as the decree of a tribunal authorized to *try and determine* a case affecting the life or reputation of a public officer, and that the report can be considered only as the incipient act of a special inquisition devoid of the power *to pass sentence* upon whoever they deem to be offenders.

This view may well accord with the technical subtleties of the common law, but let us for a moment examine the fact; let a committee of the Senate of the United States report a military officer (who has promised upon his oath and upon his honor to serve the United States honestly and faithfully) guilty of violating the first principles of his duty; let the report be put in the hands of the citizens of the United States, as coming from a committee of the Senate; what but a miracle can save the denounced officer from the heavy sentence which public opinion will pronounce? The people of this nation must either consider him guilty, or that he has suffered a degree of injustice unworthy the character of any tribunal. And who will have the temerity to say, after reading such a report, that the accused is innocent? and that a committee of the Senate of the United States, authorized "to send for persons and papers," viz. persons accused, together with documents and other proof necessary to elicit "the truth, the whole truth," could be capable of terminating their inquiry in the denunciation of a public officer while at his post, eight hundred miles distant, without having sent for or given him any notice whatever of such investigation.

I had hoped that the whole subject of the Seminole war, including the very limited, but most vexatious part, allotted to me, had been sufficiently developed by the luminous discussion which took place in the House of Representatives of the United States, (previous to the date of the report in question) to obviate the necessity of any further investigation or discussion. The authentic public documents which had been sent to the War Department and published, clearly disprove the principal statements upon which the report was bottomed: for instance, the deposition of D. B. Mitchell, Indian agent, adverting to the depredations which he is pleased to call "petty acts of aggression" committed on the Georgia frontier, states that "these petty acts of aggression were increased and multiplied by a set of *lawless and abandoned characters*, who had taken refuge on both sides of St. Mary's river, living principally by plunder;" and that he believes "the first outrage committed on the frontier of Georgia after the treaty of Fort Jackson was by these banditti, who plundered a party of the Seminole Indians on their way to Georgia for the purposes of trade, and killed one of them. This produced retaliation on the part of the Indians, and hence the killing of Mrs. Garrett and her *child*. The evidence of these plunders and murders," he adds, "is on the files of the Executive of Georgia."

Here the agent betrays at once his true character for deep calumny and misrepresentation. The committee having asked for information as to "the origin of the Seminole war and the Fowltown affair," his great and obvious purpose was to prove that the Seminole war had been commenced by me at Fowltown; but knowing as he did that the war on the part of the Seminole Indians had existed for more than two years before the affair at Fowltown, he found it necessary to touch lightly and cautiously upon the occurrences of that period of the war, and although he knew full well that many persons had been massacred during that period, in addition to Mrs. Garrett and her *two children*, yet it seems he found the committee without positive proof of any other; hence, the effort which he has made to show that "the killing of Mrs. Garrett and *her child*" was but an act of "retaliation on the part of the Indians;" and, availing himself of the too common prejudices of many respectable citizens of the interior against the frontier inhabitants, he lauds them with the epithets of "lawless and abandoned characters," "banditti," &c. and ventures to denominate depredations committed upon this class of people merely as "petty aggressions!" Thus it will be found how completely this agent understood his subject. He could not believe it to be possible that he could induce the honorable committee to admit that the disturbances, thefts, and murders perpetrated by the Indians upon the frontier inhabitants, could be viewed only as "petty aggressions," without first showing that the unfortunate citizens upon whom they were committed were "lawless and abandoned characters," and such as were in the habit of committing similar aggressions upon the Indians. And to give to his testimony the most imposing character in his power, he adroitly asserts that "the evidence of these plunders and murders," viz. ("these petty acts of aggression") "is on the files of the Executive of Georgia." Did the honorable committee take his word for it that such evidence really existed? or did they require him to produce the evidence? Let him bring it forward, and it will then be seen whether it is any better than that which he himself has given, which is for the most part destitute of truth.

The Seminole chiefs themselves admitted in their communication of the 11th of September, 1817, that their people had killed seven white persons. For my own part, I am convinced that they had killed many more; but they, as well as the agent, knew that dead men make no affidavits: "dead men tell no tales."

Whether they were of the "lawless or abandoned character," referred to by the agent, I have not deemed it proper to inquire. It was enough for me to know that they were *citizens of the United States*, and that they had been wantonly massacred by the Indians. Having ascertained and reported these facts, and received orders to arrest the murderers, I undertook the execution of this duty with a full persuasion that it would eventuate in giving security to the frontier settlers, and relieve my country, in some measure, from the afflictive and degrading scenes of Indian massacre, by which hundreds of pages of her history must be stained: scenes which, from their frequency of occurrence, had ceased to attract the lively sympathy, and excite the deep interest, by which every humane and patriotic heart must have been touched, had the suffering victims fallen under their immediate observation; or had the details of the heart-rending catastrophe by which fathers, mothers, and babes, were plunged into eternity by the hand of unrelenting barbarians, been accompanied by the cruel and false suggestions, such as dis-

grace this agent's testimony, that the sufferers were "*lawless, abandoned characters!*" I have long been acquainted with many frontier citizens of Tennessee, as well as of Alabama and Georgia, and have no hesitation in saying that they have been grossly calumniated; and that the number of "lawless and abandoned characters" among them is not, in my opinion, greater in proportion to the number of honest, orderly, good citizens, than in the interior of the States.

The citizens of the frontier are, indeed, without much property or education, but they are, for the most part, honest, orderly, patriotic citizens. If poverty and want of education be crimes, many of them may, in these respects, be culpable. The citizens inhabiting the frontier of the United States at this time, are probably, in most respects, similar to those of 1776. The period itself, and the events which immediately followed at King's Mountain, the Cowpens, and other places, afford ample evidence of the true character of the frontier people. The venerable Shelby, Preston, Campbell, Sevier, Pickens, Clark, and hundreds of other distinguished patriots and warriors of those "times which tried men's souls," and gave birth to this great republic, were all frontier people.

Where, I would ask, was this Indian agent during that eventful period?

The safety of the frontier inhabitants has been, and must continue to be, the safety and prosperity of the whole people of this nation. Our Government and country which already attract the admiration of the civilized world, would now be a "savage wild," unmarked by the hand of civilization, had the frontier inhabitants been heretofore left entirely at the mercy of the merciless savage. But, whatever may have been the character of these inhabitants, they have been protected and defended by the virtuous and wise of every age since the first settlement of the country. Incessant efforts have been likewise made to reclaim the savages, but these efforts have been, in many cases, unavailing; because often thwarted, as they have been frequently within my recollection, by foreign agents and emissaries.

Among the documents accompanying the report of the committee, are two communications which appear to have been written by D. B. Mitchell, while Governor of Georgia, one on the 6th January, addressed to the War Department, protesting against the exposure of the frontier, by the movement of the 4th regiment from Camp Crawford (Fort Scott) to Fort Montgomery, near Mobile; the other, bearing date the 5th February, 1817, addressed to me, announcing the arrival of Woodbine and his agent among the Seminole Indians and negroes; communicating an account of an outrage committed by a party of those Indians on the frontier of Wayne county, in which one of our citizens was reported to have been mortally wounded; and inquiring of me, whether I felt authorized to suspend the march of the 4th regiment, or to order it back to the Georgia frontier. From the first mentioned letter, (dated either through mistake or design "1818," though written in 1817,) I make the following extract:

"By this movement, (of the 4th regiment) not only the frontier of Georgia is left without defence, but the restless and dissatisfied part of the Creeks, who are concentrated within the Spanish line, and at no great distance from the post, Camp Crawford, lately occupied by the 4th regiment, under Lieutenant Colonel Clinch, will be without any check, and I have no doubt will indulge their propensity for mischief by acts of murder or rapine upon defenceless travellers and frontier settlers. It is a fact well known to Lieutenant Colonel Clinch, and to every officer with him at Camp Crawford, that nothing has kept those Seminole Indians, who have been joined by the most inveterate of the most hostile fellows from the upper towns, in check, but the presence of the troops; and, if they are removed, some serious consequences are to be apprehended. Besides, it is very evident that, by the removal of the troops from Fort Crawford and the neighboring country, that portion of the territory acquired by Jackson's treaty, as it is usually called, lying east of the Chattahoochie, and which, of course, falls to Georgia, will be abandoned to the Indians. Against measures which, in my judgment, will produce those results, it is my duty, as chief magistrate of Georgia, to protest."

The second letter, dated 5th February, 1817, contains the following remarks:

"Understanding that you are thus far on your way to Montgomery, I avail myself of the present opportunity to communicate some facts, in the expectation that you will have it in your power, if your judgment approve, to adopt the measures I am about to propose.

"You, no doubt, have already been informed that the notorious Woodbine has recently made his appearance again at the mouth of the Appalachicola, and that he has an agent now among the Seminole Indians and negroes in that quarter, stirring them up to acts of hostility against this country; and that Woodbine himself has gone in an armed vessel to some part of the West Indies for supplies. Connected with this fact is another, which may serve as an intimation of the future conduct of these people, when once in possession of the supplies, which it is said they expect on return of Woodbine. About ten or twelve days ago, a small party of those Indians entered the frontier of Wayne county, and stole two horses and some cattle; they were pursued by some of the inhabitants, who peaceably commanded a restoration of the stolen property, and instead of a compliance on the part of the Indians, they immediately fired upon the whites, who retired without returning a shot: one of the whites was mortally wounded. Before this last circumstance came to my knowledge, I had addressed the acting Secretary of War and desired the contents of my letter to be communicated to the President, in which I represented the evil consequences that were likely to result to Georgia in particular, by the removal of the 4th regiment from Camp Crawford, without the place was supplied by an adequate force from some other quarter; and requested the order for the removal of that regiment might be countermanded, or their place supplied. To this communication there has not yet been time to receive an answer. One object of my present address is to know if you can suspend the march of the 4th regiment until I can hear from the War Department, if you do not feel authorized or disposed to order them back to their former station at Camp Crawford."

Thus, it appears, that while Governor of Georgia, and prior to the massacre of Mrs. Garret and her two infant children, the same D. B. Mitchell not only announced the danger which menaced the frontier inhabitants, but actually reported to me a theft and murder perpetrated by a party of Seminole Indians, in Wayne county, where, according to his own account, the aggression was clearly on the part of the Indians, and marked by them with unequivocal hostility; whilst the peaceful inhabitants of the frontier evinced only a desire to recover their property, and to avoid the effusion of blood: for it seems that when fired on, and one of them mortally wounded, they retreated without returning the fire!

In the deposition of the agent, he states, that early in March, 1817, he resigned the government of Georgia, and accepted his present appointment; that, in July the same year, he called a grand meeting of the Creek Nation, at Fort Hawkins, where he endeavored to impress on the minds of the Indians, the necessity of preserving peace; adding that "many of the people of the lower towns had been led astray by evil counsels; had received presents from the British agent, Colonel Nichols," &c.

He further states, that about the last of August of the same year, he received a letter from Major Twiggs, then at Fort Scott, dated the 4th of that month, written at the request of the chiefs of three towns near that place, "expressive of their willingness to agree to the talk delivered by me in July, at Fort Hawkins; a copy of Major Twiggs's letter, and the memorandum enclosed therein, is herewith exhibited. *Of the three towns referred to, Fowltown was one.* But before I had an opportunity of sending for those chiefs, or of taking any measures for meeting

the proposition, General Gaines arrived with a detachment of troops from the west; sent for the chief of Fowltown, and for his contumacy in not immediately appearing, the town was attacked and destroyed by the troops of the United States, by order of General Gaines." This part of the agent's deposition is positively destittue of truth. A Fowltown chief *did not attend* the meeting at Fort Scott, referred to by the agent, nor was either of the chiefs (named in Major Twiggs's letter of the 4th of August, and referred to by the agent) at any time chief or inhabitant of the Fowltown, to which Major Twiggs was afterwards ordered to arrest the chief and warriors; on the contrary, *Major Twiggs states*, that no Fowltown Indian attended the meeting referred to in his letter to D. B. Mitchell, of August 4, 1817. (See the statement of Major Twiggs herewith, No. 1.)

When the agent stated upon oath, that Fowltown was disposed to be friendly; that in consequence of the contumacy of its chief, it was attacked by my order, and that this was the immediate cause of the Seminole war, there is good reason to infer from the report of the committee, that his deposition upon these points was not credited by a single member of the honorable body before whom he had the hardihood to utter declarations so false and atrocious. Adverting to the hostilities between the Seminole Indians and the frontier inhabitants of Georgia, the committee appears to have been in possession of the fact that I had demanded a surrender of the Indians who had committed outrages on our frontier.

"With this demand," says the report, "they refused to comply; alleging that the first and greatest aggressions had been made by the white men. In consequence of this refusal, General Gaines was authorized by the Secretary of War, at his discretion, to remove the Indians still remaining on the lands ceded to the United States by the treaty made with the Creeks in 1814. In so doing he is told that it might be proper to retain some of them as hostages, until reparation was made for the depredations committed by the Indians."

This part of the report is founded upon facts which could not be controverted by the insidious efforts of the Indian agent, whose zeal to establish the period, and locate the *place* of commencement of the Seminole war, to be the 20th of November, 1817, and at Fowltown, has relieved me of the trouble of exhibiting other evidence to prove the existence of a confederacy between those Indians, and that they were equally hostile to the United States, with this only difference: the Fowltown chief and most of his warriors took an active part in the late war with England against us, refused to attend the treaty of Fort Jackson, and have ever since refused to submit to the concessions embraced in that treaty; whereas, the Seminolians, though combined with the British, probably took a less active part in the war than their confederates of Fowltown. The warmest advocates in favor of this town merely contend that, since the spring of 1815, it has confined its depredations on the frontier inhabitants principally to the stealing of horses and cattle. I received, previous to the 20th of November, 1817, satisfactory proof that near one hundred head of cattle, stolen from the frontier inhabitants by the Fowltown warriors, had been brought to their town, in one drove, in the summer of that year; and I have heard the statements of Indian countrymen, interpreters, and Indians, the best evidence that can be expected to be found among savages having no friendly intercourse with civilized citizens of our country, that those warriors often accompanied the neighboring Seminole and Red Stick friends and confederates in their marauding incursions upon the Georgia frontier. Thefts, robberies, and murders of unoffending men, women, and children, were perpetrated by those parties, as well in the Alabama Territory as in Georgia. Many human scalps were seen by hundreds of officers and men, under the command of Major General Jackson, on visiting the Mickasukee towns, in April, 1818. I examined a large bundle of those scalps, in presence of that distinguished officer; many of them were evidently taken from the heads of small children. Many other scalps were reported to me as having been seen at a large village called Fowltown, near Mickasukee. I am, nevertheless, unable to say positively that the first mentioned Fowltown Indians were the actual perpetrators of the bloody deeds which produced those barbarous trophies. But I feel warranted in saying that the proof was too strong, and conclusive, taking all the circumstances of the case into view, to leave a doubt on the mind of any officer or man who took the trouble to investigate it.

Not a doubt remained in my mind of the guilt of the Fowltown chief and warriors, previous to the 20th of November, 1817; though convinced of their inveterate hostility, and that, upon their own principles of retaliation, I should be justified in destroying their town; yet *it is not true that it was attacked by my order*, nor is there any proof that it ever was *attacked*. My order (as will be seen by referring to the enclosed copy, No. 2) directed Major Twiggs to arrest the chief and warriors, but to treat them as enemies only in case of their resistance or flight; and he was strictly prohibited, in any event, from firing upon or otherwise injuring women and children. Major Twiggs, in his report, (a copy of which is enclosed, No. 3,) states that he marched all night, and on reaching the town in the morning of the 21st November, posted the troops in order of battle, intending silently to surround it, and, without bloodshed, to bring me the chiefs and warriors, but that they fled from the companies on his right, and fired upon his left, when they were fired on in return.

Had any honorable member of the committee questioned the Indian agent as to the means he had of being acquainted with the circumstances he undertook to detail, he must have betrayed an important truth, which does not appear in his deposition, viz: that he was not within less than one hundred and thirty miles of the place where the alleged outrage he attempted to represent was committed. He was not, (as will probably appear in the War Office, from his own statements on subjects connected with his agency,) at any time between October, 1817, and May, 1818, within one hundred and thirty miles of Fort Scott, or any place south of Fort Scott, as I am assured by officers and others who saw him frequently during that period. How, then, I would ask, could he venture, upon his oath, to report the occurrences which he undertook to detail to the committee? I have been informed, and believe, that he had a correspondent about the time above mentioned among the Seminole Indians, who was no other than the notorious emissary Arbuthnot. Whether this information was communicated to the agent, relied on, and sworn to by him, as matters of fact within his own knowledge, and thus offered by him to the committee, may be questionable; but of this I have no doubt, that his deposition is as false, and was made with motives as base as ever actuated the most abandoned of men.

I received orders in the month of May, 1817, to demand of the Seminole chiefs a surrender of the murderers of our citizens, and to hold myself in readiness to enforce the demand. An interpreter was despatched with my letter, stating the outrages which had been committed, and requiring the chiefs to arrest and deliver to the commanding officer at Fort Scott the offenders; to which I obtained no answer until the month of September, when I received a communication from the chief of ten towns of the Seminole Indians, a copy of which will be found among the documents published, admitting that their warriors had killed seven of our people, and alleging that the whites had killed ten of theirs. They therefore declined the arrest and delivery of the offenders demanded. In the meanwhile, another murder was committed by the Indians who had killed Mr. Glass, one of the citizens of Alabama Territory, near the place called Murder Creek, on the waters of the Escambia, where numerous cattle and hogs were killed and stolen, with some horses and other property, by a large party, who had previously killed Johnston and McGaskey, and one other citizen, with a negro, on the Alabama river. This party, when pursued, had taken refuge in West Florida, between the Escambia and Appalachicola, and, by dispersing itself in thick woods and swamps, had eluded the pursuit of several detachments of regular troops as well as militia. The troops at

Fort Scott were at the same time menaced by the hostile chief of Fowltown, and his Seminole confederates. In this state of things, I made arrangements, pursuant to the orders I had received from Major General Jackson, to repair to Fort Scott, with my disposable force. I marched in the latter part of October, 1817, and arrived at Fort Scott about the 17th of November.

I had previously taken measures to obtain one thousand Georgia militia, and six hundred friendly Indian warriors, to be held in readiness to join me in the event of a determination on the part of the hostile towns to maintain their position, and to resist any attempt on my part to remove them from the land ceded by the treaty of Fort Jackson, or to arrest their warriors who had committed murders and robberies on our frontier. In approaching Fort Scott, I received from the Creek agent a letter, dated Creek Agency, 7th of October, 1817, from which I take the following paragraph:

"On my way here, I saw Major Nix, on his way to Fort Hawkins from Fort Scott, and he assured me the Seminoles had absolutely refused any satisfaction for their aggressions, notwithstanding your positive demand. I therefore presume it is your intention to occupy Fort Scott with such a force as to enable you from thence to *compel them to a more reasonable course of conduct.* Colonel Brearly has, according to your order, made a requisition on the Executive of Georgia for two battalions of troops; and I believe every arrangement has been made for their taking the field on a short notice. I have also prepared the minds of the friendly Indians for a co-operation on their part, if you shall deem it necessary; and I have mentioned to them five hundred warriors as the number you would probably require. I am preparing for a trip to the Alabama, and, having a good deal of business with the Indians, which will require a pretty general meeting of the chiefs, I should be glad to hear from you on the probability of your going against the Seminoles, and of your desire to be, in that case, assisted by the Creek warriors."

This letter, (of which I annex a copy, No. 4,) added to the above mentioned letters of the 6th of January and 5th of February, 1817, from the same D. B. Mitchell, prove very clearly that his views in relation to the Seminole Indians, and their hostile confederates, up to the 7th of October, 1817, were very similar to those which I had from time to time communicated to the Department of War and to Major General Jackson, previous to the affair at Fowltown. In comparing these letters with the agent's deposition sworn and subscribed before the committee on the 23d of February, 1819, it will be seen how materially his views relative to Indian affairs had changed, and with what zeal he, at the last mentioned period, endeavored to palliate the cruelties of the Indians, at the expense of his adopted country's humanity and justice, and at the expense of truth. A manifest change appears to have been wrought in his *knowledge of facts*, as well as in his views of *policy*, after the 7th of October, 1817.

Soon after that period, the arrival of several vessels laden with Africans on the coast of Florida, from whence they could be conveniently smuggled into the Creek nation, presented such golden prospects to persons disposed to embark in that lawless and ignominious traffic, as to produce immediate efforts on their part to bring about an understanding between them and the Florida Indians. A half-war half-peace system was evidently most desirable to those smugglers; because the intercourse between the two places would, in that case, be confined to the select few possessing the confidence of the *prime movers* of that detestable traffic; of whom I have not a doubt but that the agent, D. B. Mitchell, was one. He was accused by some *frontier inhabitants*, as well as by Colonel Brearly and Captain Melvin, of having received at the agency near one hundred smuggled slaves; and, in consequence of my having noticed and exposed his conduct, he has endeavored to injure me by a false and malicious attempt to prove me guilty of an act which he considers to have been the immediate cause of the Seminole war.

It is stated in the paper purporting to be the report of the committee, that " General Gaines, with about six hundred regular soldiers, was confined to the garrison."

I have carefully examined the documents accompanying the report, without being able to find any proof whatever in support of this statement; and, being convinced that no honorable member of the committee would have suffered such a statement to be made without proof, I am obliged to conclude the committee never made such a statement. I shall therefore take no notice of it, other than to say that I never was " confined to the garrison," for the space of a minute, nor an instant, by Indians or any other force at Fort Scott; nor was I ever at Fort Scott more than eighteen days in the year 1817, or previous to the arrival of Major General Jackson, on the 9th of March, 1818; having left that post, pursuant to the positive order of the President of the United States, through the acting Secretary of War, dated the 12th of November, and received on the 2d of December, 1817. I had previously received from the acting Secretary of War a letter, dated October 30th, containing the orders of the President prohibiting me from passing the Florida line to attack the Indians on account of their past aggressions, and directing the removal of such as were still remaining on the land ceded by the treaty of Fort Jackson. On hearing of the defeat of the lamented Lieutenant Scott and his detachment, the account of which reached me on the 1st of December, and believing this additional outrage on the part of the Indians would authorize a movement across the line, I determined to reduce Fort Scott to two block-houses, to be defended by a small guard, with my sick and convalescent, for the security of my supplies, and to take a position on the river below, with the whole of my disposable force, (about four hundred men,) and, on being joined by the Georgia militia and friendly Indians, whose arrival I had reason to calculate on before the middle of December, to attack the principal force opposed to me, and destroy their towns. But on the following day I received the positive order of the President of the United States to repair to Amelia island. I soon after learned that the friendly Indians had been prevented by the agent from joining me, and that a failure on the part of the contractor to provide a proper supply of rations had detained, and would probably detain for some time longer, the Georgia militia. Hence, I concluded that little or nothing could be effected until my return from Amelia island. Had the order of the 12th of November contained any discretionary authority which would have sanctioned my remaining with the troops then at Fort Scott, I should doubtless have remained, and thus extricated myself from the most painful perplexity in which I had ever been placed by an order. But it contained not a shadow of discretionary power, by which my movement towards Amelia island could, upon any sound military principle, have been suspended. It has been said that the extraordinary circumstances of the case would have justified me in disobeying the order; that, although I must have been found guilty of disobedience, yet I might have been pardoned. But I was unwilling to subject myself to an accusation, and be brought before a court-martial, for violating an order which I had taken an oath to obey. I was unwilling to put it in the power of those who were endeavoring to filch from me my reputation, to say that I was capable of an act of insubordination, which would have thwarted the views of the President, and would realize the false predictions and accusations of the enemies of our country, that *anarchy reigns in our army;* that the *positive order* of the commander-in-chief had not been sufficient to ensure the immediate movement of a general officer from one post to another.

I have, indeed, been informed, and believe, that some person did remonstrate against my conduct, and solicit my removal from the command at Fort Scott, in December, 1817, upon the ground of my not having, at that time, *without authority, and without a competent force*, crossed the Florida line and chastised the Indians; and I am likewise informed that one or more of the same persons have since protested against the conduct of Major General Jackson, because he really did cross the line, *after being duly authorized to do so*, and did effect the very objects which our *wise* accusers had censured me for not effecting when I was without authority!

The report, after stating that I was confined to the garrison with six hundred soldiers, proceeds:

"In this state of things, information having been communicated to the War Department, General Jackson was ordered to take the field."

It will be recollected that the order given me to cross the line was not in existence until the 16th of December, 1817, eleven days after I had left Fort Scott, and it did not reach me until the 5th of January, 1818, some days after I had left Amelia Island, and when near three hundred miles from Fort Scott. On my return thither I was informed at Hartford of the order given to Major General Jackson to assume the immediate command at that post; a step which he might have taken, had he seen fit, even without an order, being within his proper command. I was about the same time notified by the Department of War that I was to penetrate the Seminole country with such a force as I should be able to assemble at Amelia Island, and thus co-operate with the force ordered from Fort Scott. I never for a moment suspected or believed that it was designed by the President of the United States to inflict on me a wound by ordering me from Fort Scott as a token of his disapprobation of my conduct, and ordering another officer thither to perform the duties which had been but ten days before assigned to me while absent from the spot where the order was to be executed; duties which, previous to my leaving that place, I had no authority to perform. I disclaim and abhor the idea of any such suspicion. If the dates of the different orders from the War Department, and the distance from Washington to the southern frontier, did not clearly show the utter impossibility of any such intention on the part of the President of the United States, the known justice and honor of that exalted patriot and soldier leave not a shadow of ground for any such unworthy suspicion.

The report further states that "General Gaines, without orders, took upon himself the authority of raising an army of at least sixteen hundred Creek Indians, appointing their officers, with a brigadier general at their head, and likewise mustering this force into the service of the United States."

I cannot find upon what testimony I am thus charged with raising an army of Creek Indians, and appointing their officers, with a brigadier general.

I can truly say that I never did raise an army, or any part of an army, without proper authority; nor did I ever appoint an officer without proper authority. I feel convinced that every honorable member of the committee will find, on re-examining the documents and testimony published on the subject of the Seminole war, that, in regard to the friendly Indian warriors, I did nothing more than to accept or permit them to join and co-operate with me in the intended expedition against their and our enemies, the hostile Indians. It will be found that the friendly warriors, who first proposed this co-operation, were prevented by the intrigues of the negro smuggling agent from joining me; nor did any ever join me until after the arrival of Major General Jackson, whose presence relieved me of the duty of deciding on the propriety of accepting or rejecting their co-operation—of retaining or discharging them. I appointed none of the officers belonging to any of the friendly Indians in question; I think they appointed their own officers.

I have devoted my time almost exclusively, ever since my earliest days of manhood, to the theory and practical duties of my profession; and although I have frequently seen in newspapers, and other publications, biographical memoirs, &c. statements relative to my conduct full of misrepresentation, and which has often been completely in my power to correct by the publication of undeniable proof, I have abstained from doing so from a belief that my attention should not be thus diverted from my public duty, and under the full impression that every honest and intelligent citizen, knowing the trust reposed in me, and having some knowledge of my humble efforts to merit a trust so high and honorable, will naturally conclude that I can have no reasonable motive to do wrong, and that every consideration connected with my present and future welfare must strongly prompt me to endeavor steadily to do right; I therefore conclude that they will consider me to be innocent until I am lawfully proved to be guilty. I claim no privilege but such as is common to every citizen, and such as is guarantied to all by the constitution and laws of the United States. Exemption from the cruel and unmerited punishment of *reprimand* and *censure* without a hearing is one among the dearest of those privileges.

I have to request the favor of you to submit the foregoing remarks to the President of the United States, that he may lay them before the Senate, or take such other measures, in relation to the accusations against me, as his wisdom and sense of justice may suggest.

I have the honor to be, with perfect respect, your obedient servant,

EDMUND P. GAINES, *Major General by brevet, comd'g.*

The Hon. JOHN C. CALHOUN, *Secretary of War.*

SIR: HEAD-QUARTERS, AUGUSTA, GEO. *October* 6, 1819.

I am directed by Major General Gaines to request your reply to the following interrogatories:

1st. What chiefs were present at the meeting of the chiefs at Fort Scott on the 4th of August, 1817, and mentioned in your letter of that date to D. B. Mitchell, the agent for Indian affairs?

2d. What was the particular object of the chiefs in that meeting, and to what towns did they respectively belong?

3d. Whether the chief or any of the warriors of the Fowltown attended that meeting?

4th. Whether, after the meeting of the chiefs before mentioned, either they, or any of them, or their towns, joined the hostile party; and, if so, state the name or names of the chiefs, and their towns?

5th. Holoth Emauthla, in the copy of your letter mentioned above, and certified to be a true copy, from the original by D. B. Mitchell, agent for Indian affairs, is stated to be the chief of Fowltown. Will you state who was at that time the chief of the Fowltown, and of what town Holoth Emauthla was actually a chief; and whether he was ever known or considered to be the chief of, or as in any way belonging to, the Fowltown Indians?

6th. Was it not a fact, fully within your personal knowledge, that Eneheemathla, the chief of Fowltown, had frequently declared, previous to Major General Gaines's arrival with the troops at Fort Scott, in November, 1817, that he never would recognise the treaty of Fort Jackson as valid or binding on him; that neither himself nor his people would leave their town (which was situated in the territory ceded to the United States, by the treaty above mentioned) voluntarily; and that, if removed at all, it must be by force of arms?

I have, &c.

DANIEL E. BURCH, *Aid-de-Camp.*

Major D. E. TWIGGS, *U. S. Army, Augusta, Georgia.*

No. 1.

SIR: AUGUSTA, GEO., *October* 7, 1819.

I have the honor to acknowledge the receipt of your communication through your aid-de-camp, Lieutenant Burch, of the 6th instant, and, to the interrogatories therein contained, have to reply as follows, viz:

Answer to the first interrogatory. The first and second men of Conchattu, of Choco Nuklu, and Ochesee, and of some of the other towns on the Chattahoochie, together with some of their warriors, attended the meeting at Fort Scott, on the 4th of August, 1817, and alluded to in the inferrogatory.

Answer to the second interrogatory. The objects of the chiefs and warriors who attended that meeting, was, to have a talk with the commanding officer, (myself,) for the purpose of expressing their friendship for the United States, and their intention of remaining at peace with the United States. I understood, from another source, which, at the time, I deemed to be conclusive evidence of the fact, that one object those chiefs and warriors who attended the meeting, had in view, was to flog, in my presence, the chief of the Fowltown, Eneheemauthla, for his permitting his warriors to commit depredations on the inhabitants of the Georgia frontier, and afterwards stating those outrages, committed by his own people, to have been committed by the people of their own towns.

Answer to the third interrogatory. The talk was delayed until nearly four o'clock in the evening, waiting for the Fowltown chief, Eneheemauthla and his warriors. I did not see or hear from either that chief or his warriors, during that day, nor until several days afterwards. He was duly notified of the meeting, in a message sent by myself. This meeting of the chiefs and warriors was called by myself, at the particular request of William Perryman, chief in the lower towns, or those on the Chattahoochie, below the Indian boundary line; and his object in having the meeting, he stated to me to be the same as that given in the reply to the first interrogatory.

Answer to the fourth interrogatory. I always understood and believe that the chiefs and warriors of Conchattu, the chief and most of the warriors of the Ochesee, and the greatest part of the warriors of Choco Nuklu, joined the hostile Indians; and I understood, also, from Tallessee Tustunnuggee, chief of Choco Nuklu, that the above-mentioned Indians, thus become hostile, were present at, and took an active part in, the attack upon the vessels ascending the Appalachicola river, under the command of Major Muhlenburg.

Answer to the fifth interrogatory. Eneheemauthla was first chief of the Fowltown, and I understand Tustunnuggee Hajo was the second. Holothemauthla, to the best of my recollection, was the second chief of Ochesee, and I believe was reported to me as such on the day of the meeting before mentioned; I am positive, however, he was the second chief of either the last mentioned town or Conchattu. He never belonged, to my knowledge, to the Fowltown, or was considered as one of those Indians usually called Fowltown Indians. It is here proper for me to state, that I have no recollection of having mentioned to General D. B. Mitchell, Agent for Indian affairs, that Holothemauthla was the chief of the Fowltown, as noted in a copy of a letter written by me to General Mitchell, and which copy is certified to be a correct copy by him, on the 22d February, 1819, and furnished to the committee of the Senate of the United States, appointed to investigate and report on the Seminole war.

Answer to the sixth interrogatory. Eneheemauthla, the chief of Fowltown, stated to me, previous to the arrival of the troops under General Gaines at Fort Scott, in November, 1817, that he had nothing to do with giving the land away at Fort Jackson, (as he called it,) and that he should not consider that act as binding on him or his people, nor would they remove in consequence, unless compelled by force; that he supposed the Indians on the Chattahoochie had fooled away their land, but that the land on his side of the Flint river (the left bank) belonged to him and his people, and that he should defend it, saying he was directed to do so by the Powers above. He intimated to me, in plain terms, that if ever a detachment of United States' troops crossed the Flint river he would resist them by force. He also cautioned me not to turn over there either horses or cattle, nor to get timber from off the land, as he was determined it should not be done except by force.

I am, &c.

D. E. TWIGGS, *Brevet Major 7th infantry.*

Major General E. P. GAINES,
Commanding, &c. Augusta, Georgia.

No. 2.

HEAD-QUARTERS, E. SECTION DIVISION OF THE SOUTH,

SIR: FORT SCOTT, *November* 20, 1817.

The hostile character and conduct of the Indians of the Fowltown settled within our own limits rendering it absolutely necessary that they should be removed, you will proceed to the town with the detachment assigned you, and remove them. You will arrest and bring the chiefs and warriors to this place, but should they oppose you, or attempt to escape, you will, in that event, treat them as enemies. Your men are to be strictly prohibited, in any event, from firing upon, or otherwise injuring, women and children.

You will return to this place with your command as soon as practicable.

Should you receive satisfactory information that any considerable number of the neighboring Indians have joined those of the Fowltown, you will, in that event, immediately return to this place, without making any further attempt to execute the first above written order.

E. P. GAINES, *Major General commanding.*

To Major TWIGGS,
Commanding a detachment of United States' troops.

No. 3.

SIR: FORT SCOTT, *November* 21, 1817.

I have, with my command, a few hours since, returned from the hostile Fowltown, situated upon the United States' land, and distant about sixteen miles, having executed so much of your order of the 20th as was practicable.

Having marched all the night of the 20th, I reached the town before daylight on the morning of the 21st, and posted the troops in order of battle, intending silently to surround it, and, without bloodshed, to bring to you the chiefs and warriors; but they fled from the companies of Major Montgomery and Captain Burch, on my right, and fired upon my left, under Captains Allison and Bee, when they were fired on in return. Discovering my superiority of force, they fled to a neighboring swamp; I remained in possession of the town until sunrise; and, without destroying it or their provisions, I marched my command back to head quarters, bringing with me only a few head of horses and cattle.

I had not a man killed or wounded, and the Indians but few, as they received but one round and fled.

D. E. TWIGGS, *Major U. S. army.*

Major General GAINES.

No. 4.

DEAR SIR: CREEK AGENCY, *October* 7, 1817.

It was my intention immediately on the breaking up of the meeting of the Indians, at Fort Hawkins, in July, to have written to you, either from that place or this; but the unfortunate illness and death of one of my sons at that time, compelled me, unexpectedly, to return home; and my own indisposition, or some one of my family, ever since, until very lately, has prevented my attending to any sort of business.

On my way here I saw Major Nix, on his way to Fort Hawkins, from Fort Scott, and he assured me the Seminoles had absolutely refused any satisfaction for their aggressions, notwithstanding your positive demand. I therefore presume it is your intention to occupy Fort Scott with such a force as to enable you from thence to compel them to a more reasonable course of conduct. Colonel Brearly has, according to your order, made a requisition on the Executive of Georgia for two battalions of troops, and I believe every arrangement has been made for their taking the field on a short notice. I have also prepared the minds of the friendly Indians for a co-operation on their part, if you shall deem it necessary; and I have mentioned to them five hundred warriors as the number you would probably require. I am now preparing for a trip to the Alabama, and having a good deal of business with the Indians, which will require a pretty general meeting of the chiefs, I should be glad to hear from you on the probability of your going against the Seminoles, and of your desire to be, in that case, assisted by the Creek warriors.

From the report of some officers, or some other means, we have been led to expect the pleasure of seeing you at Fort Hawkins for some time past. In the hope of having this expectation soon realized; I shall defer communicating some matters relating to the military and the Indian departments, until I have the pleasure of seeing you. When I return to Georgia, which I expect to do in a day or two, and deposite my family, who are now here with me, I shall shortly thereafter proceed to the westward.

I am, dear sir, with high consideration and esteem, your very obedient servant,

D. B. MITCHELL.

Major General E. P. GAINES.

16th CONGRESS.] No. 190. [1st SESSION.

LOAN OF GUNPOWDER.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 1, 1820.

SIR: DEPARTMENT OF WAR, *February* 28, 1820.

Pursuant to a resolution of the House of Representatives, of the 24th instant, directing the Secretary for the Department of War to communicate to the House copies of any arrangement which may have been made with the firm of Stull & Williams, or their surety or sureties, relative to the loan to the said Stull & Williams, of powder, by the War Department, or the repayment thereof; and also to inform this House whether any moneys, and what sums, have been advanced to the said Stull & Williams, or to their surety or sureties, or any contract or contracts, made with them or either of them, relative thereto; and also to state the fund from which said advances have been made; I have the honor to transmit, herewith, a report of the colonel of ordnance, which furnishes the information required.

I have the honor to be your obedient servant,

J. C. CALHOUN.

The Hon. HENRY CLAY, *Speaker of the House of Representatives.*

SIR: ORDNANCE OFFICE, *February* 28, 1820.

In reference to the inquiry of the House of Representatives as contained in their resolution of the 24th instant, I have the honor to state:

That the paper marked A is a copy of the contract concluded with Daniel Bussard, of Georgetown, on the 1st August, 1818, relating to the loan or sale of powder, which had been previously made to Stull & Williams.

To form a just estimate of this contract, the circumstances of the case at the time it was made ought to be taken into view.

The original proposition from Stull & Williams was to obtain a loan of six hundred barrels of musket powder, to be guarantied by Daniel Bussard. A copy of the proposal and guarantee is contained in the paper marked B.

By a subsequent agreement, which does not appear to have been reduced to writing, the loan was converted into a sale, and a bill of exchange given at ninety days date, by J. C. Williams on his partner, John J. Stull, for twenty-one thousand six hundred dollars, being the value of the powder at the rate of thirty-six cents a pound. A copy of the bill of exchange is annexed. (See paper B.)

The bill of exchange, which had been duly accepted, was finally protested for non-payment when it became due.

Another agreement, likewise verbal, was then made to accept in kind the six hundred barrels of powder; and two hundred barrels, part thereof, were returned. (See paper B.)

Stull & Williams having made an assignment of property for the benefit of creditors, and being reputed insolvent, Daniel Bussard remained the only responsible person in the concern. As his engagement was originally no more than to guaranty a loan of six hundred barrels of powder to Stull & Williams, strong doubts were entertained whether converting the loan into a sale did not abrogate his engagement. It became important, therefore, to obtain from him the best security he could give to guard against a final loss.

He represented that, with the aid of an advance of money from Government, to enable him to rebuild his powder works, which had been destroyed by an explosion, he would undertake to return the balance of powder due from Stull & Williams, and to repay the advances in other powder, at twenty-five cents a pound; securing the amount of the advances on real property. This proposal, which forms the basis of the contract of 1st August, 1818, was accepted. The advance, amounting to ten thousand dollars, was taken from the funds appropriated for the ordnance service.

This course, it is believed, was the most eligible that could have been taken in the circumstances; at any rate, it is not to be deemed an act of choice on the part of the agents of the Government, but as the result of a desire to obtain the best security the nature of the case would admit.

I have the honor to be, very respectfully, sir, your obedient servant,

DECIUS WADSWORTH, *Colonel of Ordnance.*

The Hon. J. C. CALHOUN.

A.

Articles of agreement made and concluded at the city of Washington, this 1st day of August, A. D. 1818, between Decius Wadsworth, colonel of ordnance, with the approbation and consent of the Hon: John C. Calhoun, Secretary of War, of the one part, and Daniel Bussard, of Georgetown, in the District of Columbia, of the other part, witnesseth:

That, whereas Messrs. Stull & Williams, of Georgetown, merchants, did, on the 25th day of May, 1815, borrow from the magazines of the United States six hundred barrels of gunpowder, containing altogether sixty thousand pounds, on the condition of returning an equal quantity of serviceable gunpowder when thereunto required; for the performance of which condition the said Daniel Bussard made himself responsible; and whereas, there is now due and owing from the said Stull & Williams and the said Daniel Bussard to the United States, on account of the aforesaid loan, the quantity of thirty-nine thousand five hundred and seventy-two pounds of gunpowder. Now the said Daniel Bussard doth agree to manufacture and deliver to the United States, within three years from this date, thirty-nine thousand five hundred and seventy-two pounds of good serviceable gunpowder; one-fourth of which to be of a quality and grain suitable for small arms, and the remainder of a quality suitable for cannon; the whole to be duly proved and inspected according to law; and to be packed in good sound casks full trimmed, at the expense of the said Daniel Bussard, which shall be received, on the part of the United States, in full satisfaction of the original agreement of the said Stull & Williams and the said Daniel Bussard.

It is also further agreed, that the said Daniel Bussard shall manufacture and deliver to the United States a further quantity of gunpowder, not exceeding forty thousand pounds, within three years from this date; the said powder last mentioned to be packed in good casks, full trimmed, and to be in proportions for small arms and cannons, and in quality as before stated, for which he shall be allowed twenty-five cents per pound, money of the United States. The price of the casks to be charged to the United States.

It is further agreed, that an advance shall be made to the said Daniel Bussard, not exceeding ten thousand dollars, to enable him to erect works on Paint creek, suitable for manufacturing gunpowder, and to purchase, and lay in materials; the said advances to be made by the Secretary of War, it being fully understood, that a sum, not less than five thousand dollars, shall be expended on the works at Paint creek, and in providing materials for manufacturing gunpowder.

It is further agreed, that the said Daniel Bussard shall give security for the faithful performance of the said contract, by a conveyance, or by conveyances, in trust, to Thomas Mustine, of Georgetown, of so much of his real estate as may be deemed sufficient for that purpose, with a power to sell the same in case of his failure to perform faithfully the said contract.

It being further understood, that part of the said property shall from time to time be released from the incumbrance, as the said contract shall in part be fulfilled, so as to justify such release.

In witness whereof, the parties have hereunto set their hands and seals the day and year the first above named.

DANIEL BUSSARD,
DECIUS WADSWORTH, *Col. of ordnance.*

Witnesses present,
THOMAS G. RINGGOLD,
WILLIAM RIDDALL.

B.

SIR: GEORGETOWN, *May* 25, 1815.

Having occasion for a quantity of musket powder, not exceeding six hundred barrels, we wish to borrow it, to be returned when required, for which loan we give you the security below.

We are yours, very respectfully,

WILLIAMS & STULL.

Lieutenant Colonel BOMFORD.

GEORGETOWN, *May* 25, 1815.

For the true performance of the above loan of gunpowder, not exceeding six hundred barrels, we pledge ourselves to return it when demanded, at ————, to the order of Lieutenant Colonel George Bomford, of the Ordnance Department, Washington. The quantity in each barrel to contain one hundred weight of proof powder.

J. S. WILLIAMS,
J. I. STULL,
DANL. BUSSARD.

Witness, HOR. JONES.

GEORGETOWN, *June* 23, 1815.

$ 21,600

Ninety days after date pay to the order of John C. Williams, twenty-one thousand six hundred dollars, which place to account of

Your obedient servants,

J. S. WILLIAMS.
J. C. WILLIAMS.

[Endorsed]
JOHN I. STULL, Esq., *Georgetown, D. C.*

Received from Williams & Stull, for the use of the Ordnance Department, Greenleaf's Point:

1815, April 25,	Two hundred pounds mealed powder	certificate issued.
do.	Twenty-eight pounds of sulphur	
June 15,	Fifty pounds of pulverised saltpetre,	do.
July 24,	One hundred pounds do. do.	
Aug. 5,	One hundred pounds mealed powder.	
1816, Oct. 25,	One hundred barrels cannon powder.	
Dec. 3,	One hundred barrels do. do.	

The above are the articles entered on the company books, as received from Williams & Stull.

I. S. NELSON,
Captain U. S. Ordnance commanding.

[NOTE.—See Nos. 186, 192, 204.]

16th CONGRESS.] **No. 191.** [1st SESSION.

THE MILITIA.

COMMUNICATED TO THE SENATE, MARCH 30, 1820.

To the Senate of the United States: WASHINGTON, *March* 30, 1820.

I transmit to Congress a general abstract of the militia of the United States, in pursuance of the act of March the 2d, 1803.

JAMES MONROE.

SIR: WAR DEPARTMENT, *March* 17, 1820.

I have the honor to enclose herewith a general abstract of the militia of the United States to be laid before Congress, conformable to the act of March 2, 1803.

I have the honor to be, with very great respect, your obedient servant,

J. C. CALHOUN.

To the PRESIDENT OF THE UNITED STATES.

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *March* 15, 1820.

SIR:

I have the honor to lay before you an abstract of the militia of the several States and Territories, with an account of arms, accoutrements, ammunition, and ordnance, belonging to each, as far as the annual returns have been received at this office.

The first section of the act of March 2, 1803, for establishing an uniform militia throughout the United States, provides, "that it shall be the duty of the adjutant general of the militia, in each State, to make returns of the militia of the State to which he belongs, with their arms, accoutrements, and ammunition, to the President of the United States, annually, on or before the first Monday in January, in each year; and it shall be the duty of the Secretary of War, from time to time, to give such directions to the adjutant generals of the militia as shall, in his opinion, be necessary to produce a uniformity in the said returns, and he shall lay an abstract of the same before Congress, on or before the first Monday in February, annually." Finding these provisions wholly neglected by several States, under your orders, more than two years since forms were prepared to produce a uniformity in the returns, and blanks were distributed to the adjutants general of the militia of the several States and Territories, directing their attention to the law, and requiring their returns to be made accordingly.

The dates of the several State returns, in the enclosed report, show how far the law has been complied with. I have repeated your instructions to those who failed to make returns, and, in several instances, have enclosed duplicates of my letters to the governors of States and Territories.

It appears some of the State laws contain no provision for paying the adjutants general and the brigade inspectors of militia, and it is believed those duties require more time than can be devoted without compensation.

These returns are rendered important, as they are referred to in distributing arms to the several States, under the law for arming and equipping the whole body of the militia of the United States.

Twenty-five thousand stand of arms were distributed during the last year, and it is presumed such distribution will be continued, for which there is no other guide than the militia returns. By this rule those States who do not make annual returns, will get less than their proportion, as it appears, by the returns regularly made, that the militia increased every year.

I have delayed this report, expecting the returns due on the 1st of January would enable me to make it more perfect; and it is now condensed as much as practicable, to present the organization and strength of the militia on one page. The returns to Congress, of former years, have been cut up in printing, and spread over so many pages as to render them almost unintelligible.

I have the honor to be, sir, with perfect respect, your obedient servant,

D. PARKER,
Adjutant and Inspector General.

To the SECRETARY OF WAR.

Abstract of the annual returns of the Militia of the United States, by States and Territories, for the year 1819, *taken from the last returns received at this office.*

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *March* 15, 1820.

D. PARKER, *Adjutant and Inspector General.*

16th Congress.] No. 192. [1st Session.

LOANS OF GUNPOWDER AND LEAD.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 6, 1820.

Mr. Sergeant, from the Committee on the Judiciary, to whom was referred a resolution of the 14th March, directing them to inquire whether any, and, if any, what measures are necessary to be taken for the greater security of debts due the United States, in consequence of certain loans of powder, lead, and other munitions belonging to Government, having been made to private citizens by any officer of the United States, reported:

That they have had the said resolution under consideration, and have examined the several cases to which it is supposed more particularly to refer, as they have been communicated to the House by the Secretary of War. The liability of those who have been concerned in these loans is already determined by the contracts, and by the existing laws, and the committee believe that it could not now be increased by any act of legislation. How far it might be proper, by an expression of opinion or otherwise, to endeavor to restrain the practice for the future, it is not referred to the committee to consider. If, however, any provision on this part of the subject be deemed expedient, the committee would respectfully suggest that it belongs more properly to the Committee on Military Affairs, who have the best means of judging what the public service may, in such cases, require.

The remedies already provided by law, for the recovery of the debts growing out of these loans, appear to the committee to be sufficient for the purpose; and the application of them depending, of course, upon a variety of circumstances unknown to the committee, is for the Executive department of the Government.

They, therefore, submit the following resolution:

Resolved, That the committee be discharged from the further consideration of the subject.

16th Congress.] No. 193. [1st Session.

DUELLING.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 11, 1820.

Mr. Alexander Smyth made the following report:

The Committee on Military Affairs have, according to order, had under consideration a resolution directing them to inquire into the expediency of providing by law a more effectual remedy to prevent duelling in the army and navy of the United States, and in the District of Columbia, and report:

That the laws of the United States provide that "no officer or soldier shall send a challenge to another officer or soldier to fight a duel, or accept a challenge, if sent, upon pain, if a commissioned officer, of being *cashiered;* if a non-commissioned officer or soldier, of suffering corporeal punishment, at the discretion of a court-martial;" that, "if any commissioned or non-commissioned officer, commanding a guard, shall knowingly or willingly suffer any person whatsoever to go forth to fight a duel, he shall be punished as a challenger; and all seconds, promoters, and carriers of challenges, in order to duels, shall be deemed principals, and punished accordingly;" and that "it shall be the duty of every officer commanding an army, regiment, company, post, or detachment, who is knowing to a challenge being given or accepted by any officer, non-commissioned officer, or soldier, under his command, or has reason to believe the same to be the case, immediately to arrest and bring to trial such offenders."

The committee, therefore, consider the existing law as amply sufficient, if executed, to repress duelling in the army, and, therefore, submit the following resolution:

Resolved, That the Committee on Military Affairs be discharged from inquiring into the expediency of providing by law for a more effectual remedy to prevent duelling in the army and navy of the United States, and in the District of Columbia.

16th Congress.] No. 194. [1st Session.

COMPLAINTS AGAINST THE MILITARY ACADEMY AT WEST POINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, APRIL 11, 1820.

Mr. Alexander Smyth made the following report:

The Committee on Military Affairs have, according to order, had under their consideration the petition of Nathaniel Hall Loring, Thomas Ragland, Charles Rutledge Holmes, Charles R. Vining, and Wilson M. C. Fairfax, late cadets at the Military Academy, and report:

That it appears to your committee, by satisfactory proof, that Captain Bliss, then teacher of tactics, did, in October, 1818, maltreat one of the cadets, by throwing him off the railings of the barracks; that the said Captain

Bliss did, in November of the same year, insult another of the cadets by ordering him from his (Captain Bliss's) quarters, and immediately seizing and thrusting the said cadet out of the room; that the said Captain Bliss did, in the month last mentioned, while on battalion drill, rudely take by the collar and pull out of the ranks another of the cadets without any reasonable cause.

The committee avoid expressing an opinion on the conduct of Captain Bliss, further than to say that they approve of the order given by the Secretary of War, relieving him from performing the duty of instructor of tactics at the Military Academy.

The committee further report that one hundred and eighty-nine of the cadets, under the influence of indignant feelings, elected the petitioners a committee to represent to the superintendent of the academy the treatment they had received from the said Captain Bliss; the said committee proceeded to present a remonstrance and charges against the said Captain Bliss; that the superintendent issued an order in which he directs the petitioners to consider themselves in arrest, to absent themselves from the post within six hours, and to proceed directly to the places of residence of their respective guardians; that the petitioners remaining until the next day in the vicinity, were ordered by the superintendent to leave their residence in one hour; that the petitioners, on the 29th of the same month, addressed a memorial to the Secretary of War, who, on the 9th of December, directed that a court of inquiry should convene at West Point to inquire into the transactions aforesaid, which court declared that the before stated charges against Captain Bliss were founded on facts, and also that the mode adopted by the young gentlemen to obtain redress was unmilitary and bordering on mutiny.

The committee further state that the President of the United States being desirous that the petitioners should be recalled to the Military Academy upon their acquiescence, the same was signified to them; that they addressed an apology to the Secretary of War, but persevered in the use of certain expressions which were objected to, and which they were requested to withdraw; that the superintendent exhibited charges against one of the petitioners; that a court-martial was held, who decided that the cadets were not liable to martial law, although the Attorney General gave his opinion that they were so liable.

The committee further report that the President disapproved of the decision of the court-martial; that they had not jurisdiction to try the cadets; and also disapproved of the conduct of the cadets; in consequence whereof the petitioners tendered their resignations, and they were accepted.

Your committee cannot but express their regret that the petitioners, who seem to be high-minded young men of talents and honor, are lost to the army of the United States. They even presume that the President would consider them favorably were they to become candidates for admission into the academy, or for commissions in the army. But they will remark that *obedience and subordination are the essential principles of the army*, which is not the place for the exercise of liberty. Your committee cannot say that the conduct of the superintendent of the Military Academy is altogether "satisfactory" to them, (although they have other ample testimony of his worth as an officer, and fitness for the station in which he is placed.) They suppress their opinion of the conduct of Captain Bliss. They agree with the Secretary of War, that "the redress of military grievances must never be extorted or obtained by *combinations*, which are alike mutinous;" and they agree with the President that "if military orders are not promptly obeyed all discipline is at an end."

As the House of Representatives have already before them a bill providing for the government of the Military Academy, the committee offer the following resolution:

Resolved, That Nathaniel Hall Loring, Thomas Ragland, Charles Rutledge Holmes, Charles R. Vining, and Wilson M. C. Fairfax, have leave to withdraw their petition and documents.

* See No. 176.

16th CONGRESS.] No. 195. [1st SESSION.

TRIAL OF COLONEL WILLIAM KING.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 3, 1820.

SIR: WAR DEPARTMENT, *May* 2, 1820.

Conformably to a resolution of the House of Representatives, of the 18th of April last, I have the honor to transmit a copy of the proceedings of the court-martial, in the trial of Colonel William King, of the fourth infantry, and a copy of orders and documents connected therewith.

I have the honor to be, very respectfully, your obedient servant,

J. C. CALHOUN.

To the SPEAKER *of the House of Representatives.*

HEAD-QUARTERS DIVISION OF THE SOUTH,

ADJUTANT GENERAL'S OFFICE, NASHVILLE, *September* 2, 1819.

DIVISION ORDER.

A general court-martial will convene at Fort Charlotte, Mobile, Alabama Territory, on the 25th day of October next, or as soon thereafter as practicable, for the trial of Colonel William King of the fourth regiment of infantry, and such prisoners as may be brought before it; the court will consist of seven members and three supernumeraries, as follows, viz:

Brevet Brigadier General Daniel Bissell, President; Lieutenant Colonel William Lindsay, Lieutenant Colonel William McCrea, Major James Bankhead, Lieutenant Colonel M. Arbuckle, Major J. B. Many, Brevet Major A. C. W. Fanning, members; Brevet Major E. Montgomery, Major J. N. McIntosh, Captain Francis L. Dade, supernumerary members; S. D. Hays, Esquire, Judge Advocate of Division.

The attendance of all witnesses is required to be promptly given on the official summons of the Judge Advocate. A suitable non-commissioned officer will be ordered from the fourth infantry, to attend the court as orderly; also, a clerk, to report to the Judge Advocate.

By order of Major General Jackson.

ROBERT BUTLER, *Adj. Gen.*

MOBILE, ALABAMA TERRITORY, *October* 25, 1819.

Pursuant to the foregoing order the following members attended, viz:

Lieutenant Colonel M. Arbuckle, Brevet Major A. C. W. Fanning, members; Brevet Major E. Montgomery, Captain F. L. Dade, supernumerary members.

On the 26th, S. D. Hays, Judge Advocate of division, also attended, who being unable to form a court, and viewing that event uncertain, from the absence of the president and so many members, from whom nothing had been heard, and owing to the prevalence of a malignant fever, which was then raging with great violence in the town, those present thought it most advisable to return to the country to await the arrival of the president of the court and other members, or an order from the general of division on the subject, which was daily expected.

Colonel Lindsay and Major Bankhead, who had arrived at cantonment Montpelier, the first on the 25th, and the last on the 27th October, thought it imprudent and unnecessary to proceed further under the then circumstances of the case.

HEAD-QUARTERS OF THE DIVISION SOUTH,

ADJUTANT GENERAL'S OFFICE, *October* 20, 1819.

DIVISION ORDER.

Information having been received that the yellow fever has visited the town of Mobile, it is, therefore, ordered that the general court-martial required to convene at that place, for the trial of Colonel William King, be convened at cantonment Montpelier as soon as practicable. To prevent any unnecessary delay arising from the absence of General Bissell, which may occur from the state of his health, the officer next in rank will, in that case, preside.

By order.

ROBERT BUTLER, *Adj. Gen.*

In conformity with the above order the following members of the court met, viz:

Lieutenant Colonel Wm. Lindsay, Lieutenant Colonel M. Arbuckle, Major James Bankhead, Brevet Major A. C. W. Fanning, members; Brevet Major E. Montgomery and Captain F. L. Dade, supernumerary members; S. D. Hays, Judge Advocate of Division:

Who, being unable to form a court, were compelled to delay proceeding until the arrival of the members. On the 15th of November, Majors Many and McIntosh arrived at Mobile, from which place they proceeded to cantonment Montpelier, where they arrived on the 18th of November. Major Many alleged, as the cause of his delay, that the state of his health did not admit of a more prompt obedience to the order of the 2d September. Major McIntosh stated, that he did not receive the order of the 2d September until the 30th October, five days after the period at which the court was to have assembled; that when he received it, he was on the military road, and used all diligence to reach the place of session.

CANTONMENT MONTPELIER, MONDAY, *November* 23, 1819.

Court met. Present, Lieutenant Colonel William Lindsay, President; Lieutenant Colonel M. Arbuckle, Major James Bankhead, Brevet Major E. Montgomery, Major J. B. Many, Brevet Major A. C. W. Fanning, Major J. N. McIntosh, members; Captain F. L. Dade, supernumerary member; S. D. Hays, Judge Advocate.

The court being duly sworn, in the presence of the prisoner, proceeded to the trial of Colonel William King, of the fourth regiment United States' infantry, who, being previously asked if he had any objections to the members constituting the court, and replying in the negative, was arraigned on the following charges and specifications, preferred against him by Major John B. Hogan, paymaster fourth regiment United States' infantry, prosecutor.

CHARGE 1. Violation of the fourteenth article of the rules and articles of war, by making and signing a false certificate with respect to his pay.

Specification 1. In this, that the said Colonel King did keep and employ Elijah Holland, a private soldier of the fourth regiment United States' infantry, as his coachman and wagoner, during the months of August and September, 1818, and, at the same time, charging the United States for the pay of two private servants, viz: Cyrus and Tom, and Cyrus and Nan, and certified on his honor that he did not, for and during any part of the said time, (August and September, 1818,) use or employ, in his service, any soldier of the line of the army, as a waiter or servant, thereby certifying and signing a false certificate with respect to his pay.

Specification 2. In that the said Colonel King did receive forage in kind, from the quartermaster of the fourth infantry, during the months of July and August, 1818, at Pensacola, and charged in his pay account for the forage of four horses, for the said months of July and August, 1818, amounting to sixty-four dollars or thereabouts, and certifying, on his honor, that he did not receive forage in kind for and during any part of the said time, viz: the months of July and August, 1818, thereby signing a false certificate with respect to his own pay.

Specification 3. In this, that the said Colonel King did charge in his pay account for double rations, as commanding officer of the 8th military department east of the Alabama, for the months of October and December, 1818, and January, 1819, for the whole period, although he was absent out of the department on the 6th October, 1818, and on the 3d and 4th days of January, 1819, at Mobile, and 2d, 3d, and 4th days of December, 1818, travelling to and from, and remaining at St. Stephen's, and made no deductions, nor gave any credit, but did certify, on his honor, his account to be accurate and just, when, in fact, he had overcharged.

CHARGE 2. Conduct unbecoming an officer and a gentleman.

Specification 1. That the said Colonel King did enter into private contracts with certain non-commissioned officers of his regiment, to become overseers of his negroes, and discharged them several months anterior to the

expiration of their term of service, viz: Sergeant William Gary about five months, Sergeant Joel Whetten about three months, and Sergeant Latta one month.

Specification 2. That the said Colonel King did charge, in his pay account of August and September, 1818, for two private servants, and certified, on his honor, that he did not use or employ any soldier of the line of the army for and during said period, when, in fact, he did keep and employ Elijah Holland, a private of the fourth infantry, as his coachman and wagoner, during the months of August and September, 1818.

Specification 3. In this, that the said Colonel King certified, on his honor, that he did not receive forage in kind, for or during the months of July and August, 1818, thereby to draw from the paymaster of the fourth infantry the allowance in money, when, in fact, he did draw forage in kind.

Specification 4. In this, that the said Colonel King did write a letter to John B. Hogan, paymaster of the 4th infantry, on or about the 14th of January, 1819, and forwarded it by Corporal Clarke, couched in the following words and figures, and which is hereto attached, and makes part of this specification, viz:

MY DEAR SIR:

I set out for Pensacola to-morrow, and must ask of you the loan of $300 until pay day. The failure to sell my cotton will lay me under the necessity to use here part of the money I had intended to lay out in Maryland for negroes. This I must raise by letting Nelson have a bill on Baltimore for $1,000; but, as it is possible he may be unable to raise all the money, will you assist us by making him an advance until pay day, out of which you shall be refunded what you have been so good as to loan me?

Yours sincerely,

W. KING.

To Major J. B. HOGAN, *Montgomery.* (*Per Corporal Clarke.*)

Thereby inducing the said J. B. Hogan, paymaster, to accommodate him, the colonel of his regiment, with $1,000; and, the month following, contrary to every principle of the gentleman and man of honor, he, the said Colonel King, among other charges preferred against the said John B. Hogan, produces that of a violation of the thirty-ninth article of the rules and articles of war, and specifies this particular act of friendship as a public crime.

Specification 5. In this, that the said Colonel King, contrary to his duty as an officer, and in violation of the principles of a gentleman, did, on or about the 2d March, 1819, obtain from Lieutenant A. M. Houston, acting assistant deputy quartermaster general, duplicate receipts for the sum of $1,677, or thereabouts, of public money, and, in fact, only handed over to the said Houston the sum of $1,477, in cash, and his own due bill for $200, which due bill he neglected, as a gentleman, to lift, for several months; thereby putting it out of the power of the said Lieutenant Houston to pay the debts due by the United States in the east section 8th military department, east of the Alabama, and of which department the said Colonel William King had then the command.

Specification 6. That the said Colonel King has, at different times, and in many places, indulged himself, in an unofficer and ungentlemanly-like manner, in speaking in the most contemptuous terms of the military talents and qualifications of Major General E. P. Gaines, his immediate commanding officer.

CHARGE 3. *Violation of the thirty-ninth article of the rules and articles of war, by the misapplication of public funds.*

Specification 1. That the said Colonel King did, on or about the 1st March, 1819, order Lieutenant A. M. Houston, acting assistant deputy quartermaster general, to pay Sergeant Childress, of the 4th regiment United States' infantry, the sum of thirty dollars, which he alleges was for the apprehension and delivery of Neil Cameron, a private of the 1st battalion company 4th regiment infantry, when, in fact, said Sergeant Childress had put the said Cameron to death, on or about the 16th day of September, 1819, in the woods, sixteen or seventeen miles from Pensacola, and had never delivered him to any officer of the United States' army, as the regulation required, but left him unburied where he had shot him, of all which circumstances said Colonel King was well apprized.

Specification 2. In this, that the said Colonel King did order and direct Lieutenant A. M. Houston, acting assistant deputy quartermaster general, in the eastern section 8th military department, on or about the 26th day of October, 1818, to pay Messrs. Nelson & Randolph, sutlers 4th regiment United States' infantry, the sum of $500, which was accordingly paid out of the public money placed in the hands of the said Lieutenant Houston for the use of the quartermaster general's department, in the east section 8th military department, east of the Alabama, and which $500 was not due by the United States to the said firm of Messrs. Nelson & Randolph, but was due by the said Colonel King, on his own private account, with the said sutlers, and had no connexion whatever with the public service.

Specification 3. That the said Colonel King, on or about the 29th November, 1818, did direct Lieutenant A. M. Houston, acting assistant deputy quartermaster general in the east section 8th military department, east of the Alabama, to pay to Messrs. Nelson & Randolph, sutlers of the 4th infantry, the sum of *one thousand dollars, in specie*, out of the public fund which Lieutenant Henry Wilson, adjutant of the 4th infantry, was ordered to receive and convey from New Orleans, for the use of the quartermaster general's department at Pensacola; the said sum of $1,000 not being due by the United States to said sutlers, but was to repay them, for the sum of $1,000, in Georgia or other notes, which had been lent by said sutlers to the said Colonel King, 4th United States' infantry, to enable him to commence his speculations in Pensacola property.

Specification 4. In that the said Colonel King, being ordered to take charge of a company or party of recruits of the 4th infantry, and being authorized to employ water transportation for the same from Baltimore to the Alabama Territory, did charter the ship General Hand, of Baltimore, Captain McNeil, and did ship on board the said vessel, and transport, at the public expense, thirty negro persons, (slaves,) or thereabouts; a large quantity of flour and other provisions, a part of which he speculated on, and sold on his arrival in Mobile; a heavy carriage, which he immediately shipped for New Orleans for sale; and a large quantity of salt fish, and four wagon loads of household furniture, consisting of a side-board, tables, chairs, &c.; and the destination of said company or party of recruits being altered from Mobile to Point Petre, or Amelia island, yet, nevertheless, the said Colonel King did, on the part of the United States, give the owners of said vessel the additional sum of $1,175 to convey the said company to its place of destination, Point Petre, and then to proceed, with himself, his family, negroes, and freight, alone, to the town of Mobile, Alabama Territory; and for which latter service the United States was thus made to pay for the said Colonel King's private purposes the sum of $1,175, or thereabouts.

Specification 5. That the said Colonel King, having arrived in the town of Mobile, in the month of December, 1817, or January, 1818, on board of the ship General Hand, did take possession of a United States' schooner, the Amelia, and ship on board her his family, his negroes, his furniture, &c., and convey them from the town of Mobile to the bayou near Fort Montgomery, Alabama Territory, all at the expense of the United States, although the said Colonel King was then under orders to join his regiment, which was well known to be at Fort Scott, and not at Fort Montgomery.

CHARGE 4. *Neglect of duty and unofficer-like conduct.*

Specification 1. In that the said Colonel King did neglect, fail, and refuse, although thereunto requested, to investigate the cause and manner of the death of Charles Mason, a private of the 8th battalion company 4th regiment United States' infantry, who was drowned in the harbor of Pensacola, on or about the 2d September, 1818, while undergoing a ducking, which was carried to such excess as to deprive him of life, and was inflicted by order of Lieutenant Lear, and executed by Sergeant Lewis Starks, without the form or authority of a court-martial, and entirely on his own responsibility; and although Major Dinkins, then commanding in Pensacola, immediately arrested the said Lieutenant Lear, and confined the sergeant until the return of said Colonel King from Montpelier, yet, nevertheless, the said Colonel King, on his return, totally failing, refusing, and neglecting to do his duty as an officer, had them both released, without any trial or legal investigation whatever.

Specification 2. In that the said Colonel King, being then commanding officer of the province of West Florida, did fail, refuse, and neglect to cause an immediate inquiry into the circumstances attending the death of Neil Cameron, a private and deserter from the 1st battalion company 4th infantry, who was, in the most cruel and inhuman manner, put to death on the 16th September, 1818, by Sergeant Childress, of the 7th battalion company, in or about sixteen or seventeen miles from Pensacola, West Florida, although said Cameron had made no resistance, but begged to be taken back, and punished according to the nature of his offence, by the sentence of a general court-martial.

Specification 3. In this, that the said Colonel King, commanding officer of the province of West Florida aforesaid, on or about the 27th day of August, 1818, at Pensacola, did neglect, fail, and refuse to see justice extended to Benjamin Tackwell, late a private of the 4th regiment United States' infantry, who had honestly served out his term of enlistment to within a few days, and, in consideration thereof, was furloughed, and discharged from service; and, after he had left the town of Pensacola, was pursued, overtaken, and brought back, by a command ordered by Lieutenant Lear for that purpose, and carried to his (said Lear's) room, stripped, and compelled to receive on his *bare* back fifty lashes, contrary to the laws of the United States, and without the form or authority of a court-martial; which arbitrary, cruel, and ignominious punishment was inflicted on the said Tackwell, after he had been, in effect, discharged, and without any good or sufficient cause; and he was then compelled to serve out the full term of his enlistment.

Specification 4. In this, that he, the said Colonel King, did encourage and enforce, in an unofficer-like manner, contrary to the laws of the United States, and the rules and articles of war, the infliction of corporeal punishment, by stripes and lashes, by issuing and promulgating an order, on or about the 10th August, 1818, at Pensacola, and otherwise, to this effect: that every man found out of his quarters between tattoo and reveille, should receive fifty lashes, and be confined on bread and water in the black hole for the space of one month.

Specification 5. That the said Colonel King, contrary to his duty as an officer, and in defiance of the laws of the United States, and the rules and articles of war, in their meaning and spirit, as regards the infliction of corporeal punishment by stripes or lashes, did, on or about the 31st day of August, 1818, at Pensacola, permit, carry, or cause to be carried into effect, so much of his said department order of the 10th of August, 1818, as related to the inflicting of fifty lashes on the person of John McCleary, a private of Captain Cummins's company, 4th infantry, which was executed accordingly, although the said McCleary's term of service had actually expired.

Specification 6. That the said Colonel King, contrary to his duty as an officer, and in contravention of the rules and articles of war, and the meaning and spirit of a law of the United States, passed by the Congress thereof, on the 16th day of May, 1812, sec. 7, which repeals the law authorizing the infliction of corporeal punishment by stripes or lashes, did, in defiance of said law, and in disregard of his duty as an officer, sanction the proceedings of a regimental court-martial, whereof Captain Gale, of the 4th infantry, was president, convened on the 16th of June, 1818, at Pensacola, before which court were tried Corporal Roberts, and private Whitty, of the 4th regiment United States' infantry, who were both convicted, and sentenced to receive, viz: Corporal Roberts twenty-five lashes on his bare back, and private Whitty to receive, privately, forty-five lashes on his bare back; which said sentence and proceedings were approved on the 19th June, 1818, in orders by the said Colonel King, there and then being commanding officer, and was carried into effect, except such part as related to the infliction of twenty-five lashes on Corporal Roberts, which the said Colonel King was pleased to remit, when, in fact, it was the duty of the said Colonel King, as commanding officer, to have disapproved of the whole proceedings and sentence, and called the attention of the court to the laws of the United States, and the rules and articles of war, and to have enforced a strict conformity to them in every part of the department under his command.

Specification 7. In this, that the said Colonel King, contrary to his duty as an officer, and in open violation of the laws of the United States, and the rules and articles of war, in their true meaning and spirit, did, on or about the 29th day of June, 1818, sanction, in department orders, the proceedings of a general court-martial, whereof Captain John McIntosh was President, and Lieutenant H. Wilson, Judge Advocate, before which said court was tried W. Newby, a private of the fourth infantry, on the charge of desertion, and found guilty, and sentenced to have his head shaved, his left ear cut from his head, and to receive on the grand parade in Pensacola fifty lashes on his bare back, and then drummed out of service; which said proceedings and sentence the said Colonel King, then commanding the eastern section, eighth military department, did approve, but was pleased to remit, except the fifty lashes which he ordered to be carried into immediate effect, and the prisoner to return to duty.

Specification 8. In this, that, on or about the 29th day of June, 1818, the said Colonel King, then commanding the east section, eighth military department, and acting civil and military Governor of West Florida, did sanction, in department orders, the proceedings of a general court-martial, whereof Captain John McIntosh, fourth infantry, was President, and Lieutenant H. Wilson, Judge Advocate, before which court was tried private Henry Benner, of the eighth battalion company, fourth infantry, charged with desertion, and to which charge the prisoner pleaded guilty; and was sentenced to have his head shaved and receive fifty lashes on his bare back, and then drummed out of service; and the said Colonel King, contrary to his duty as an officer, and in open violation of the laws of the United States, and the rules and articles of war, did approve of said sentence, and ordered so much of it carried into effect as related to the inflicting of the corporeal punishment, and compelled the prisoner to receive fifty lashes and return to duty.

Specification 9. In that the said Colonel King, commanding officer as aforesaid, did neglect and fail to take any steps whatever to prevent the frequent and open violations of the laws of the United States, and the rules and articles of war, by the infliction of corporeal punishment within his command, from the 1st of June, 1818, to the 1st of February, 1819, while the fourth regiment of United States' infantry was stationed in Pensacola, but, on the contrary, did sanction, in orders, the frequent proceedings of regimental courts-martial within his command, which were in direct violation and disregard of a law of Congress, in its true spirit and meaning, and contrary to the rules and articles of war, which prohibits the infliction of corporeal punishment.

Specification 10. In this, that the said Colonel King did issue an order, on or about the 19th June, 1818, while acting civil and military Governor of West Florida, establishing a quarantine law, that every vessel arriving from the Havana, Mobile, and New Orleans, &c. should ride out a certain number of days below gunshot of the

Barancas, and did enforce this order (as he alleges) to prevent the introduction of infectious diseases, to the entire loss and destruction of one or more vessels, which came there unprepared for riding out a quarantine, and afterwards, the said Colonel King, in an unofficer-like manner, did order (viz. in the month of July) a vessel direct from New Orleans to ascend to the town, without undergoing any quarantine, for no other reason but that she had a carriage on board belonging to the said Colonel King, commanding, &c.

Specification 11. In this, that the said Colonel King, contrary to his duty as an officer, and in open violation of the laws of the United States, and the rules and articles of war, on or about the 1st of August, 1818, did issue a verbal order to the acting adjutant of the fourth infantry, Lieutenant Sands, then stationed at Pensacola, to select two confidential non-commissioned officers, and a suitable command for each, and send them in pursuit of some men of the fourth infantry, who were reported as having deserted, and if taken within the limits of the province of West Florida instantly to have them put to death; but to be careful not to infringe on the civil laws of the Alabama Territory, for, if taken above the line, they must be brought back; and the said Colonel King, in an unofficer-like manner, and in total disregard of the laws of the United States, and rules and articles of war, did continue, and cause to be continued in force, the aforesaid verbal order, issued as aforesaid, both at the Barancas and Pensacola, during the whole period that those posts were occupied by the American troops, and until a private and deserter of the first battalion company (Neil Cameron) was overtaken by Sergeant Childress and his command, on or about the 16th day of September, 1818, within seventeen or eighteen miles of Pensacola, and there shot; although the said Cameron made no resistance, but, on the contrary, begged to be taken back and put on his trial, and punished as a general court-martial might direct.

Specification 12. In that the said Colonel King, contrary to his duty as an officer, did, from time to time, and at different times, viz:

Keep and employ at work the soldiers (mechanics) of his regiment, the fourth infantry, in making, for his own private use, a variety of articles not warranted by any law of the United States, nor the rules and articles of war, viz: a wagon, worth nearly one hundred dollars, for the use of his plantation; ploughs for the same, and boots and shoes for his family.

Specification 13. In that the said Colonel King did, on or about the 14th day of February, and 11th day of May, 1819, give an order to purchase provisions, on account of the failure of the contractor, and instead of imposing the necessity of being particular in obtaining them as cheap as possible, did, on the contrary, make use of unofficer-like language to the officer or officers who had been ordered to purchase; saying he did not care a damn what the rations cost the contractor, but to get them at any price, as it made no difference to him if they cost a dollar per ration, or words to that effect.

Specification 14. In that the said Colonel King did fail and neglect to give orders in time to purchase provisions for the use of the troops at cantonment Montpelier, until the said troops were destitute of provisions, or nearly so, and then not allowing time enough to have the contract advertised, and the provisions purchased at a reasonable price, viz: in the months of February, March, and May, 1819, the purchases having been made by Lieutenants Houston, Heronimus, and Delany, to neither of whom was sufficient time allowed to go into the market, advertise, and make the purchases at a fair price.

The consequence was those officers were compelled to give the contract to such persons as were prepared, knowing of the necessity of the post, and had calculated accordingly.

Specification 15. In this, that the said Colonel King, of the fourth United States' infantry, in an unofficer-like manner, and in contravention of the good of the service, has frequently given the men of the fourth regiment of infantry furloughs for several months immediately preceding the expiration of their term of service, and, at the same time, gave them discharges so dated, as to take effect at the termination of the time limited in their accompanying furloughs, which was, in effect, to all intents and purposes, giving them discharges so many months before their term of service had actually expired, viz: The said Colonel King, of the fourth United States' infantry, did, in this way, in effect, and in fact, at cantonment Montpelier, between the 10th of March, and 20th of August, 1817, discharge Sergeant William Gary, of the fourth infantry, about five months anterior to the expiration of his term of service, and Sergeant Joel Whetten, fourth infantry; between the 10th August, and 1st of December, 1818, about three months before his term of service had expired.

CHARGE 5. *Violation of the thirty-first articles of the rules and articles of war.*

Specification 1. In this, that the said Colonel William King, commanding the fourth infantry, at Montpelier, on or about the —— day of September, in the year 1817, did lay a duty or imposition of five per centum on all the moneys collected for goods sold by Messrs. Nelson & Randolph, sutlers of the fourth regiment of infantry, to the non-commissioned officers, musicians, and privates of the fourth regiment of the United States' infantry, and, contrary to his duty as an officer, and in open violation of the rules and articles of war, did demand, compel, and enforce the payment (through his adjutant) of the aforesaid duty of five per centum, thereby compelling the soldiers of the fourth infantry to pay five per cent. more for the goods they bought of the sutlers, than they could be obtained for in other stores in the country, which duty was to be expended, as he alleges, in support of a band, but never publicly accounting for the same.

Specification 2. In this, that the said Colonel King, contrary to his duty as an officer, and in violation of the rules and articles of war, did, by his own authority, and upon his own responsibility, lay a duty of five per centum on all the collections made by the sutlers of the fourth infantry, of the non-commissioned officers, musicians, and privates of said regiment, which duty bore peculiarly hard on the soldiers, inasmuch as it was partial and unequally laid, and has not extended to the collections made off the commissioned officers of the said fourth United States' regiment of infantry.

J. B. HOGAN,
Paymaster 4th Reg. Infantry.

The prisoner being called upon to make his plea, objected to plead to the following specifications, viz:

Third specification, 1st charge; first specification, 2d charge; sixth specification, 2d charge; fourth specification, 4th charge; sixth, seventh, eighth, and ninth specifications, 4th charge; twelfth specification, 4th charge; thirteenth specification, 4th charge; fifteenth specification, 4th charge; first and second specifications, 5th charge; and offered document marked A as his reason for objecting.

The Court, after mature deliberation, decided that the prisoner shall not plead to the third specification, 1st charge; shall plead to the first specification, 2d charge; shall not plead to the sixth specification, 2d charge; shall plead to the fourth specification, 4th charge; shall plead to the sixth, seventh, eighth, and ninth specifications, 4th charge; shall not plead to the twelfth specification, 4th charge; shall not plead to the thirteenth specification, 4th charge; shall plead to the fifteenth specification, 4th charge; shall plead to the first and second specifications, 5th charge.

The prisoner then pleaded "NOT GUILTY."

Major J. B. Hogan, paymaster of the fourth infantry, a witness for the prosecution, being duly sworn, says, that he joined the regiment as paymaster at Pensacola, about the last of July, or first of August, 1818; a few days afterwards he was at the front door of Captain Barron's hotel, General Gaines's quarters, when Colonel King's carriage drove up with Mrs. King in it, and Elijah Holland, a private soldier of the fourth infantry, driving her. Witness remained in Pensacola a week or ten days, during which time he saw once, twice, or thrice, Colonel King riding about the town in his carriage with said Holland driving it. Witness paid Colonel King his pay account, for the months of July and August, in which he paid him for two private servants, Cyrus and Tom.

Elijah Holland, a late private of the fourth infantry, a witness on the part of the prosecution, being duly sworn, says, that, some time in the months of July and August, he was detailed by the adjutant of the regiment to attend in the public garden; that Colonel King told him to help his boy take care of his (Colonel King's) horses; that he took care of the garden and horses all at one time; that he only fed and watered the horses; that Colonel King asked the witness to drive his carriage just to ride out; that he used to drive Colonel King's carriage once or twice a week, sometimes not so often, but does not remember how many times. Witness states, when Colonel King was about to come up to Montpelier, he sent his orderly to Captain McIntosh to let the witness come up with him; that the orderly came back and told the Colonel he might have witness to take with him to drive his carriage; that he drove the carriage up to Montpelier, and the next morning Colonel King asked him to drive a wagon to Little River, to get a load of corn and fodder; that he done so, and came back that night, and next day hauled some rails; that he drove the wagon about two days; that he never done any thing more for Colonel King.

Question by the court. How long were you employed in taking care of Colonel King's horses, and driving his carriage, before you came up to Montpelier?

Answer. Some time about the last of July I commenced taking care of his horses.

Question by the court. Did you continue to take care of the colonel's horses until you came up to Montpelier?

Answer. I did.

Question by the court. What time did you leave Pensacola for Montpelier?

Answer. On the last day of August.

Question by the prisoner. How long have you been employed in the mess gardens? When Colonel King arrived at Pensacola with his family, had you, prior to that time, done any personal service for Colonel King?

Answer. About four days before Colonel King came to the witness in the garden; that Colonel King had not his family with him at that time; that previously he had done no personal service for Colonel King.

Question by the prisoner. Did you take any care of Colonel King's horses prior to his purchasing, at a public sale, a bay mare and sorrel horse? What horses had Colonel King anterior to that time at Pensacola?

Answer. I did not; but Colonel King had then a sorrel horse and an Indian pony.

Question by the prisoner. At what hour did you drive out my carriage at Pensacola? and how far did we usually ride?

Answer. About four o'clock in the evening; and we usually rode about half a mile.

Question by the prisoner. Were you not sick in your company quarters when Colonel King sent to know if you were well enough to drive his carriage to Montpelier? and had not old Rogers been detailed as gardener in your place?

Answer. I was on the sick report, but not in quarters; and Rogers had been detailed as gardener at that time.

Question by the prisoner. When you arrived here, did you not report yourself to the corporal in charge of the cantonment? and were not all or the greater part of the men then here, sent for the forage on the day you mention to have driven Major Blue's wagon for me?

Answer. I did not until the evening of the second day, and there was a man sent out at that time.

Question by the prisoner. From whom did you receive the forage?

Answer. From Colonel King's negro boy Tom.

Question by the prisoner. Were not the rails hauled to run a fence across the garden at Col. King's quarters?

Answer. They were hauled to or near Colonel King's quarters.

Question by the prisoner. How many private servants had Colonel King at Pensacola? and what servants of his did you find in charge of his quarters at this place on his arrival?

Answer. He had three servants, a boy and two women, at Pensacola, and one woman and one man at Montpelier?

The court adjourned to meet to-morrow at nine o'clock, A. M.

Tuesday, *November* 23, 1819.

The court met pursuant to adjournment: Present, Lieutenant Colonel William Lindsay, President; Lieutenant Colonel M. Arbuckle, Major James Bankhead, Brevet Major E. Montgomery, Major J. B. Many, Brevet Major A. C. W. Fanning, Major J. N. McIntosh, members; Captain F. L. Dade, supernumerary member; S. D. Hays, Judge Advocate.

Elijah Holland, a witness, previously sworn before the court, being present—

Question by the prisoner. How long before the August muster did you cease to do duty in the mess garden?

Answer. About the middle of August.

Question by the prisoner. Did you take any care of Colonel King's horses, and drive his carriage, after you went on the sick report, until the evening before we set out for this place?

Answer. I did not take care of his horses, but I drove his carriage once or twice.

Question by the prosecution. From whom did you receive the forage at Pensacola that you fed Colonel King's horses with?

Answer. I got it at Colonel King's quarters.

Question by the prosecution. Do you know who obtained the forage, and where he got it from, that was in Colonel King's stable?

Answer. I do not.

Mr. Patton, a merchant of Mobile, a witness on the part of the prosecution, being duly sworn, states, as to the 4th and 5th specifications, 3d charge, that when Colonel King arrived at Mobile, about the 17th of December, 1818, he desired witness to sell for him six barrels of pork and ten of salt fish, which were brought out on board the General Hand. The colonel remarked he had brought out the articles for his own use; that having more than he wanted, desired witness to sell them.

Question by the prosecution. Did Colonel King tell you what he paid for the pork and fish in Baltimore, and what he must receive for them at Mobile? and did he not tell you he must have six dollars per barrel for the pork in advance of what he gave in Baltimore?

Answer. Colonel King stated the pork cost him twenty-four dollars in Baltimore, and directed it to be sold for twenty-five or thirty dollars, and it was sold accordingly for thirty dollars.

Question by the prosecution. Is the paper you hold in your hand a correct transcript of your account with Colonel King of the sales you made of the pork and fish you sold for him?

Answer. It is a correct transcript. (See document marked No. 3.)

Question by the prisoner. Have you no recollection of sending the fish up in a barge to Colonel King's plantation on the Alabama, or delivering it to Mr. Gary, then Colonel King's manager?

Answer. I sent some negroes up some time afterwards, whom I had hired of Colonel King, but have no recollection of sending any fish.

Question by the prisoner. Do you recollect the difficulty which Colonel King had in procuring transportation from Mobile to Montgomery, in December, 1817? and was it not in consequence of Colonel King being unable to take the fish and pork with him that they were left with you to sell?

Answer. It was pretty difficult to get transportation, but have no recollection that this was assigned as a reason why the articles were sold.

Question by the prisoner. Do you recollect the state of the roads and watercourses between this place and Mobile, in the month of December, 1817?

Answer. I recollect that it was a very rainy season, and the roads very bad generally.

Major Hogan, paymaster 4th infantry, a witness on the part of the prosecution, being previously sworn, and now present, states, as to the 2d specification, 1st charge, that he paid Colonel King money in lieu of forage for the months of July and August, 1818, amounting to sixty-four dollars, or thereabouts; as to the 1st specification, 2d charge, that Sergeant Whetten, of the 4th United States' infantry, called on him for his pay about three months before said Whetten's term of service had expired; that he objected to pay him, but Whetten then produced a furlough, to include the expiration of his term of service, and a discharge and duplicate certificates, for his pay; his discharge was so dated as to take effect at the expiration of his furlough; that on these documents he made him the payment. The witness is of opinion the discharge was signed by Colonel King some time about the last of November or first of December, 1818; witness was at Colonel King's quarters, speaking on the subject of overseers; Colonel King observed he did not think Whetten would return, that he had overstaid his time, and he should be under the necessity of getting some other person to oversee for him; witness does not recollect whether it was at this or another time, when Mr. Randolph was present, that Colonel King asked the opinion of Mr. Randolph whether Riley would suit him; but in the conversation Colonel King again stated he did not think Whetten would return, and that he would be under the necessity of getting Riley. With regard to Sergeant Latta, witness recollects to have paid him about a month before his term of service expired. As to specification 2d of charge 2d, witness has already testified; and as to the 4th specification, 2d charge, witness states he received from Colonel King a letter, (see document marked No. 4,) on the receipt of which letter he answered it, and sent Colonel King the three hundred dollars requested, and informed Colonel King that he would let Nelson have the money for his accommodation, as required; that on the next evening Nelson came to Montgomery; that witness and Nelson had a conversation, in the course of which the subject of letting Colonel King have the money was mentioned; witness informed Nelson that he would let him have the money, and did so accordingly; at the same time Nelson presented witness with a letter from Lieutenant Hall, requesting witness to send him money, and also a request from Dr. Elliot and some other officers, who wanted money likewise; upon which witness forwarded by Nelson five hundred dollars to the officers at Pensacola, in addition to the one thousand dollars furnished Nelson for Colonel King. In the month of February following Colonel King arrested witness, and, among other charges preferred, was that of a violation of the thirty-ninth article of the rules and articles of war, and this particular circumstance was made one of the specifications against witness, as appears by document marked No. 4. With regard to the 4th specification, 3d charge, witness states, that when he arrived at Montgomery, about the last of February, 1818, he had a conversation with Colonel King about bringing their respective families to this country; witness was complaining with respect to the trouble and expense of getting out, when Colonel King remarked that if witness had been at Baltimore when he sailed, he might have got out without cost, for he had brought out his family in the ship General Hand to Mobile without costing him any thing. Some short time after arriving at Montgomery witness's family obtained a barrel of flour from Colonel King's family, for which he paid Colonel King about ten or twelve dollars. With respect to the furniture which Colonel King brought on in the General Hand, he saw it packed up at Colonel King's quarters, and thinks there must have been about the quantity charged in the specification.

As to the 1st specification, 4th charge, witness informed Colonel King that he understood a soldier by the name of Mason had been drowned at Pensacola, while undergoing a ducking, and that Major Dinkins had placed Lieutenant Lear in arrest, and confined Sergeant Starks. Colonel King replied he knew there was a man by that name, but was uninformed as to the circumstances; supposed it was an accident. Some time after this, in the month of October, Colonel King and witness were riding to Blakely, and, conversing on the subject of the arrest of Lieutenant Lear and Sergeant Starks, Colonel King stated he differed with Major Dinkins in opinion, and had them both released. As to the 11th specification, 4th charge, witness states he was sitting in front of the officers' quarters at Pensacola some time in the beginning of August, when an officer reported a man or men as having deserted. Colonel King directed Lieutenant Sands, adjutant, to select one or two non-commissioned officers with suitable commands, and send them in pursuit of said deserters; and if they were taken within the province of West Florida, to put them to death; but if taken above the line, to have them brought back. Shortly after witness left Pensacola, and remained generally at Montgomery, and while there saw a number of parties in pursuit of deserters, and, on examining their orders, found they generally read in this way—that if taken in the province of West Florida, to shoot them; but if above the line, to have them brought back. With regard to the 15th specification, 4th charge, witness says, in addition to what he had before deposed, he has in a number of instances paid soldiers, who had furloughs up to the expiration of their terms of service, and accompanying discharges corresponding in date to their furloughs, generally about a month before their term of enlistment had expired.

Question by the prisoner. At what period was it, that you was in the habit of examining orders of parties sent in pursuit of deserters at Montgomery, and by whom were they signed?

Answer. It was between August, 1818, and February, 1819, and they were generally signed by the acting adjutant.

The court adjourned, to meet to-morrow, 9 o'clock, A. M.

Wednesday, *November* 24, 1819.

Court met: Present, Lieutenant Colonel William Lindsay, President; Lieutenant Colonel M. Arbuckle, Major James Bankhead, Brevet Major E. Montgomery, Major J. B. Many, Brevet Major A. C. W. Fanning, Major J. N. McIntosh, members; Captain F. L. Dade, supernumerary; S. D. Hays, Judge Advocate.

Captain Joseph Shomo, 4th United States' infantry, being duly sworn, says: he arrived in Baltimore about the last of October; Colonel King was not there, but came on in a few days, and told witness the destination of the troops was changed to Point Petre; that, the next morning, Colonel King went on to Washington City and returned to Baltimore, where we remained until the 13th November, when the troops were embarked on board the ship General Hand; we sailed from thence to Point Petre, where we arrived about the last of the month; after our arrival, we remained two days on board, when the recruits and baggage of the detachment were taken ashore; the General Hand laid there a day or two waiting for a wind; she then sailed with Colonel King, and his family on board, for Mobile, as was said; there were twenty or thirty negroes on board, the property of Colonel King, which negroes sailed with him from Point Petre.

Question by prosecution. What number of soldiers was shipped on board the General Hand when you sailed in her, and who had the command of them?

Answer. Between sixty and eighty soldiers, and Lieutenant Wager was the senior officer.

Question by prosecution. Where did you understand Colonel King was, on our arrival in Baltimore?

Answer. I understood he was on the Eastern Shore of Maryland, or on his way from thence to Baltimore, with his family.

Question by prosecution. Did Colonel King state to you, when he first informed you of the alteration of the order with respect to the movement of that detachment or company of recruits, that it had played hell with his arrangements, or words to that effect, and that he must go to Washington to make some arrangements?

Answer. He stated that it had interfered very much with his arrangements, for he had made arrangements to sail to Mobile; that he must go on to Washington to see General Parker on the subject, or the Secretary of War.

Question by prosecutor. Do you recollect how many soldiers sailed from Point Petre to Mobile, in the General Hand, with Colonel King, and for what were they brought to Mobile, and was not the 4th regiment then at Fort Scott?

Answer. Colonel King observed he would take the musician Enright, and three or four others, with him, and attach them to the band; but does not know whether the 4th regiment was then at Fort Scott.

Question by prosecutor. Do you know what the orders were which were generally given to parties sent from Pensacola in pursuit of deserters, from the time of your joining the regiment last fall, to the removal of the troops to this post, in February?

Answer. I do not; but saw an order, signed by Lieutenant Wilson, acting adjutant, directing them to be put to instant death if they attempted to escape or resist; which order was written by Lieutenant Wilson, whilst I was in command, pursuant to my direction to him to write such an order, as was usual in like cases at that post.

Question by prisoner. Was not the ship General Hand weather-bound for several days previous to our sailing from Baltimore?

Answer. I understood so, but was not on board until the day on which she sailed.

Captain J. H. Gale, of the 4th infantry, being duly sworn, says, as to the 6th specification, 4th charge, that he was president of the court which tried Corporal Roberts and private Whitty, and sentenced them to the punishment described in the said specification; that the sentence of Corporal Roberts, as to the infliction of corporeal punishment by stripes and lashes, was remitted, and that of Whitty was carried into effect, by order of Colonel King.

Question by prosecutor. What has been the practice in the 4th regiment infantry, with respect to the punishment of the soldiers by regimental courts-martial? Has it not always been a practice to flog, and have you ever known an instance in which the colonel has disapproved the practice of flogging, in orders, or called the attention of a court to the law of the United States which repeals the infliction of corporeal punishment?

Answer. It has generally been the practice to flog, and I do not know that Colonel King ever disapproved the practice, or called the attention of a court to the law repealing the infliction of corporeal punishment by stripes or lashes, but has frequently remitted the punishment.

Question by prosecutor. Was you with the 4th regiment infantry, during the year 1817 and part of 1818, and where was the regiment stationed in the months of October and November, 1817?

Answer. I was with the regiment in 1817, and part of 1818, and the regiment marched from cantonment Montpelier, about the 20th October, for Fort Scott, where it arrived some time in November or December, 1817.

Question by prosecutor. Was Colonel King with the regiment at that time, or expected to join?

Answer. He was not with the regiment, and I do not know whether he was expected or not.

Brevet Major E. Montgomery, a witness in behalf of the United States, being duly sworn, says, with respect to orders given to parties sent out in pursuit of deserters, that, some time in the fall of 1818, he examined the order of a corporal who reported to him, at Montgomery, in pursuit of one or two deserters from Captain Jones's company, 1st regiment infantry, and his orders were, in case he overtook them, to put them to instant death; his order was signed by Colonel Brook, then commanding at Barancas. On another occasion, a non-commissioned officer, sent in pursuit of one or more deserters from Pensacola, reported to him his orders were, in case they attempted to resist or escape, to make good use of his arms. This order was signed by Major Dinkins, then commanding at Pensacola.

Lieutenant A. M. Houston, a witness in behalf of the United States, being duly sworn, says, as to the 5th specification 2d charge, that Colonel King paid over to him, about the 2d of March, 1819, the sum of one thousand four hundred and seventy-seven dollars, and gave him his (Colonel King's) due bill for $200, which he said he would lift at any time; that he gave Colonel King duplicate receipts for the whole sum of one thousand six hundred and seventy-seven dollars; that he did not present the due bill to Colonel King for payment for about two months; that he was indebted to Colonel King about that sum, for forage purchased of him, as an individual, for the United States; that the reason why he did not present it sooner was, he was ordered, some time afterwards, to New Orleans; that it was settled soon after his return, which was about the sixth or seventh of May. As to the 1st specification, 3d charge, says, he paid Sergeant Childress thirty dollars for the apprehension of Neil Cameron, by order of Colonel King, but does not recollect as to the time. As to the 2d specification, 3d charge, says, he received a letter from Colonel King about the 1st of November, 1818, requesting him to pay Messrs. Nelson & Randolph the sum of five hundred dollars; which sum he accordingly paid on Colonel King's own private account, and took receipts to that effect. As to the 3d specification, 3d charge, says, that Colonel King, about the 29th November, 1818, directed him to state to Lieutenant Wilson, on his return from New Orleans, to pay over to witness, the public money he was to bring with him, and requested witness to pay the sutlers, 4th infantry, one thousand dollars thereof in specie; but witness did not receive the money of Lieutenant Wilson, and said one thousand dollars was not to have been paid to said sutlers on public account. In regard to the 5th specification, 4th charge, witness recollects to have seen McCleary whipped about the 31st August, 1818, but does not believe his term of service had expired, and understood he was whipped in consequence of the order of the 10th August, 1818.

Question by prosecutor. Had you any public funds in the quartermaster's department, on or about the 2d March, 1819, and did not the United States owe a considerable sum for the transportation of troops and baggage from Pensacola?

Answer. I had not, and the United States did owe a considerable sum at that time.

Question by prosecutor. At what time did you buy forage of Colonel King, and to what amount, and at what price?

Answer. It was in the month of February, that some of the forage was purchased, but the amount I do not recollect; the price for corn was two dollars per barrel, French measure.

Question by the court. To what amount were yon indebted to Colonel King, at the time he gave you his due bill for two hundred dollars?

Answer. I think I was indebted to him near that sum.

Question by court. Was this two hundred dollars, for which Colonel King gave you his due bill, left in C olone King's hands for his own accommodation, or in consideration of your being in his debt about that sum, as the agent of the United States?

Answer. In consideration of my being indebted to him as the agent of the United States.

Question by prosecutor. Did not Colonel King, when he gave you the one thousand four hundred and seventy-seven dollars, and his due bill, say he was unable to pay you the other two hundred dollars, but would do it in a few days, or when you wanted it?

Answer. If he did, I do not recollect it.

Question by prosecutor. Was you furnished with an officer's certificate of the delivery of Neil Cameron at any military post as a deserter, or how did you know he was a deserter when you paid the reward?

Answer. I do not recollect of any officer's certificate; Colonel King's order was a sufficient voucher for me, and I understood he had deserted.

Question by prosecutor. Does not the regulations require that there shall be a certificate of the delivery of a deserter before the quartermaster shall pay the usual reward of thirty dollars, and in this instance was the regulation complied with, or the account and order made out, and by whom was the account stated?

Answer. I do not believe any certificate of apprehension or delivery accompanied the order for payment, and think the account was made out in the hand-writing of Russel, a private of the 4th infantry; I do not know whether there is such a regulation or not.

Question by prosecutor. Has the account you paid to Sergeant Childress been adjusted by the Government, and have you received a credit for this money, or has the account been rejected?

Answer. The account was rejected by the Government, on the ground that there was no evidence of the delivery of the deserter to the proper authority.

Question by prosecutor. Did you not receive from the paymaster of the 4th infantry at Pensacola about the last of October or first of November, 1818, the sum of two or three thousand dollars, that had been lent to him by Lieutenant Brady, for the purpose of paying a recruiting party about to set out for Baltimore?

Answer. I did receive two or three thousand dollars of the paymaster of the 4th infantry about that time, for which money I receipted to Lieutenant Brady.

Question by prosecutor. Did you not, when you received this money, inform the paymaster that you must go immediately and pay to Nelson & Randolph the sum of five hundred dollars?

Answer. I do not know, but may have said so.

Question by prosecutor. Did you not immediately go and pay that sum to Nelson & Randolph?

Answer. I paid it a short time afterwards, but they called on me at my own room for it.

Court adjourned to meet to-morrow at nine o'clock, A. M.

THURSDAY, *November* 25, 1819.

Court met: Present, Lieutenant Colonel William Lindsay, President; Lieutenant Colonel M. Arbuckle, Major James Bankhead, Brevet Major E. Montgomery, Major J. B. Many, Brevet Major A. C. W. Fanning, Major J. N. McIntosh, members; Captain F. L. Dade, supernumerary member; S. D. Hays, judge advocate.

Lieutenant HOUSTON being again called, and apprized by the court that he was not bound to answer any question which might tend to criminate himself, the following question was put to him, viz:

Question by prosecutor. Was the five hundred dollars you paid to Messrs. Nelson & Randolph part of the money the paymaster paid you on or about the 1st November, 1818?

Answer. I believe it was; and when I received the letter from Colonel King, I considered it in the nature of an order, although without date, and not signed officially.

Question by court. What time did you receive the letter from Colonel King to pay Messrs. Nelson & Randolph the five hundred dollars?

Answer. I received it between the 1st and 4th November, 1818, but think on the 1st, as I have noted on the letter.

Question by prosecutor. Were there not on the 1st November, 1818, a number of debts due by the quartermaster general's department which you were unable to pay in the eastern section eighth military department?

Answer. There were; but generally draughts were drawn on New Orleans, and none of the claims presented to me for payment for some time after this, and then only one or two, which were of my own contracting, or contracted within my knowledge.

Question by prosecutor. Who drew the draughts on New Orleans, and what were the reasons that made it necessary to draw on New Orleans for their payment?

Answer. I do not know by whom they were generally drawn, and I presume the draughts were drawn on New Orleans for want of funds at Pensacola.

Question by prosecutor. Did you not draw a draught on New Orleans in favor of J. and J. Juarrety, of Pensacola, for one or two thousand dollars about the 1st of November, 1818?

Answer. I did not; but gave him a draught on the Secretary of War for the amount of rations I had bought in consequence of the failure of the contractor; sum not recollected.

Question by prosecutor. What character did McCleary, of Captain Cummins's company, bear in the regiment, and how long have you known him?

Answer. I believe he had borne a good character, and I had known him two or three months.

Question by prisoner. In addition to the amount due for corn sold the quartermaster's department from Colo nel King's plantation, did you or did you not owe Colonel King for forage furnished by himself for his own horses anterior to the return of the regiment to Montpelier, amounting to about $23 74, a postage account of $47 87, and for the rent of a house at Pensacola belonging to Colonel King, as officers' quarters, say $20?

Answer. I did owe him at the time he gave me his due bill for the $200, for forage, postage account, and house rent, but the precise amount not recollected.

Question by prisoner. Did not Colonel King several times tell you to call over and he would settle his accounts with you before you came?

Answer. I do not recollect; he may have done so.

Question by prisoner. By whom was Colonel King's note without date delivered to you, and at what time of day?

Answer. I think it was delivered by Lieutenant Wilson some time in the afternoon.

Question by prisoner. Had not Colonel King prior to its receipt left Pensacola for this place?

Answer. He was absent, and I presume for this place.

Question by prisoner. Where was the prosecutor at this time? Had he arrived at Pensacola with funds for the payment of the regiment, or was he daily expected?

Answer. He had not arrived, but was daily expected.

Question by prisoner. Did Colonel King request you to let Nelson & Randolph have the $1,000 in specie in exchange for paper money, or were you to let them have it without receiving an equivalent in return?

Answer. I was requested to turn over the $1,000 to them in specie, and my impression was that I was to be paid back in current paper either by Nelson & Randolph, or Colonel King, on or about the time the specie was to have been delivered.

Question by prisoner. By whom was the punishment of McCleary superintended, and who was at that time doing the duty of adjutant?

Answer. By Lieutenant Lear, who was, I believe, at that time doing the duty of adjutant.

Question by court. Did you consider this transaction as to the $1,000 you were to have paid Messrs. Nelson & Randolph an order from Colonel King, or an advance for his accommodation, or a mere matter of exchange?

Answer. I considered it an accommodation to Colonel King, by way of exchange.

Major URIAH BLUE, a witness on the part of the United States, was duly sworn and questioned as follows, viz:

Question by prosecutor. Did you go to Mobile to put in for a contract to furnish a quantity of provisions for the use of this post some time in May last?

Answer. I went to Mobile I believe in May last to bid for a contract to furnish provisions for this post.

Question by prosecutor. What terms were advertised, and how long was the time allowed for the delivery of the provisions after the contract, and the amount of the provisions wanted, and by whom was the contract advertised?

Answer. The terms were, to deliver the provisions at this post in six, eight, or ten days after the contract; the only difficulty was the want of wagonage to get the provisions here in time, which was obviated by Colonel King's offering the public teams for that purpose. It was advertised by Lieutenant Delany.

Question by prosecutor. Who obtained the contract, and what did you offer for it?

Answer. Mr. Randolph obtained the contract: I offered twenty-eight cents per ration.

Question by prosecutor. Would you not have taken it at a lower price than twenty-eight cents, (your proposal,) if longer time had been allowed for the delivery?

Answer. Yes: I think it would have made a difference.

Question by prosecutor. What reason was assigned by Colonel King for offering the public teams to get the provisions in agreeable to contract?

Answer. The Colonel offered to hire the public teams, as none other could be got, that the provisions might be brought on in time to comply with the contract.

EDWARD B. RANDOLPH, sutler 4th infantry, a witness on the part of the United States, being duly sworn, says, as to the 2d specification, 3d charge, I do not recollect that I saw the order or request to Mr. Houston to pay our firm the $500, but he informed me he had such an order, and paid the $500 accordingly, which money was placed to Colonel King's private account.

Third specification, 3d charge: we lent to Colonel King $1,000 in Georgia or other money, not recollected, for which he promised so soon as Lieutenant Wilson returned from New Orleans that we should receive $1,000 in specie; that, after Colonel King and witness had mounted their horses for this place, witness heard Colonel King direct or request (witness does not recollect which) Lieutenant Houston to turn over this money to Captain Nelson, witness's partner.

As to the 1st specification, 5th charge, when we were appointed sutlers to the 4th regiment, it was an understanding that a five per centum duty would be required of us, and we consented to suttle on that condition: we have never laid that additional duty on all the articles sold to the soldiers, but have laid a duty on particular articles, so as to make the amount of the five per centum duty we were bound to turn over to the regiment, particularly on liquors, and other articles the least necessary to a soldier; that we have sold to officers lower than we could sell the same to soldiers, because as to them we had not to pay the duty of five per centum.

Question by the court. Had you lent Colonel King the one thousand dollars, which was to have been repaid in specie by Lieutenant Houston, on the return of Mr. Wilson from New Orleans, before yourself and Colonel King left Pensacola for this place, and for what purpose?

Answer. We had, to enable Colonel King to make a payment for property purchased in Pensacola.

Question by the court. Did you know that Lieutenant Houston was to receive, from Messrs. Nelson & Randolph, one thousand dollars in bank notes for the one thousand in specie which Lieutenant Houston was directed by Colonel King to pay to that firm?

Answer. We had before advanced the money, and this was to reimburse us.

Question by the court. Had not Messrs. Nelson & Randolph the exclusive privilege of suttling to the fourth regiment?

Answer. We believe so.

Question by the court. Do the sutlers sell to the troops, at Montpelier, groceries and merchandise, with a tax of five per centum on their accounts, as cheap as they can be purchased in St. Stephen's and Claiborne?

Answer. We do not; for the casualties and want of comforts in a camp are too great for us to sell at the usual profit, independent of the five per centum duty.

Question by the court. There being less risk in selling to the officers than the privates, cannot the sutler afford to sell to the officers at a lower rate than to the privates?

Answer. They can.

Question by the prosecutor. Has your five per centum duty extended to the collections made from the officers of the fourth regiment?

Answer. No; it has not.

Question by the prosecutor. Do you know what amount you have paid on the five per centum duty, to the adjutant of the fourth regiment, since you have been suttling?

Answer. I dont know the precise sum, but think something less than four hundred dollars.

Question by the court. Has the order laying the duty been continued and enforced during the whole time you have been suttling?

Answer. It has, except once, perhaps, in the instance of a detachment.

On the first specification, second charge, witness states he was with the regiment about the month of April or May, 1817, at the time Sergeant Gary, fourth infantry, was in the employ as overseer of Colonel King, and continued in his employ until the regiment left this place in October following: that witness understood he was a soldier some part of this time. Here the prisoner, Colonel King, voluntarily admitted that Sergeant Gary entered into his service as manager in the month of March, 1817, and remained in it nearly two years; and, also, that he expected when Sergeant Whetten was furloughed to go to North Carolina, that he would return to this country, and, if he did, he (Colonel King) would give for his services as much as any one got in the country.

Question by the prisoner. Were you the agent of Colonel King for the purchase of a house and lot in Pensacola, from a person by the name of Malagassa, and was Colonel King bound to make the payment of one thousand dollars in specie, and was that one thousand dollars which Colonel King requested Mr. Houston to let Mr. Nelson have, intended to meet that payment?

Answer. Captain Nelson made the contract, and advanced the money in notes, which were to have been taken up by that sum in specie so soon as Lieutenant Wilson returned from New Orleans, and this one thousand dollars was intended to pay for the property, and the notes previously advanced to be returned to Messrs. Nelson & Randolph.

The court adjourned to meet to-morrow at nine o'clock, A. M.

FRIDAY, *November* 26, 1819.

The court met: Present, Lieutenant Colonel William Lindsay, President; Lieutenant Colonel M. Arbuckle, Major James Bankhead, Brevet Major E. Montgomery, Major J. B. Many, Brevet Major A. C. W. Fanning, and Major John N. McIntosh, members; Captain F. L. Dade, supernumerary member; S. D. Hays, Judge Advocate.

Mr. RANDOLPH again being called before the court, was questioned as follows, viz:

Question by the prisoner. Was the one thousand dollars in bills paid over by Nelson to Malagassa before we left Pensacola, on the 29th November, 1818, or did it at that time remain in Mr. Nelson's hands?

Answer. I believe the one thousand dollars in notes was counted out to Malagassa, and retained in Captain Nelson's hands on deposite, subject to his will, or until specie could be got for them, and I believe Malagassa was not paid the specie.

Question by the prisoner. How many payments have been made since you were appointed sutlers to the fourth regiment, and when, and where?

Answer. There have been five payments; one at this place in September, 1817; a partial payment at Fort Scott, on or about February, 1818; one, and a partial one, at Pensacola; and one other at this place in May, 1819.

Question by the prosecutor. At the time Colonel King commenced his purchases of Pensacola property, what was the state of exchange between specie and Georgia notes?

Answer. The average rate of exchange was about ten per cent. at the time of this transaction.

Captain JOSEPH SHOMO, fourth infantry, having asked and obtained leave of the court, explains and alters his testimony given the day before yesterday, in this: that he now recollects when Lieutenant Wilson, adjutant of the fourth infantry, wrote the order, in pursuance of his direction, for the party sent in pursuit of deserters, it read in this way, that, if they were overtaken, they must be put to instant death; that he directed Lieutenant Wilson to alter it so that they should not be shot, unless they resisted or attempted to escape.

Captain HENRY WILSON, of the fourth infantry, being duly sworn, states, as to the first specification of the first charge, that, on one or two occasions, witness saw Elijah Holland, private fourth infantry, driving Colonel King's carriage in Pensacola.

Third specification, third charge: witness went to New Orleans under Colonel King's orders, some time in November, 1818, with two draughts for three thousand dollars each, for the quartermaster general's department: witness was to have brought some of this money in specie, but failed to get it; the draughts were drawn by General Gaines.

Fifth specification, third charge: the fourth regiment of infantry was at Fort Scott in the month of December, 1817.

First specification, fourth charge: as to the death of Charles Mason, late private in fourth infantry, witness understood he was drowned while undergoing a ducking; that Lieutenant Lear was arrested and Sergeant Starks confined; that they both were afterwards released without a trial; witness dont know by whose order, but believed by Major Dinkins's: the arrest of Lieutenant Lear was withdrawn by Major Dinkins's.

Second specification, fourth charge: there was no investigation as to the death of Neil Cameron, that witness knows of; it was reported, and witness always understood, that he was killed by Sergeant Childress, who commanded a party sent in pursuit of deserters.

Here the accused voluntarily made the following admissions, viz: that the facts at large, as contained in the sixth, seventh, eighth, and ninth specifications of the fourth charge, so far as it relates to his approval of the proceedings of the courts-martial therein referred to; and that he did order the sentences to be carried into effect, as set forth in the specifications.

Tenth specification, fourth charge: witness says, as to the order for the quarantine regulations, witness knew that such order was given; that whilst that order was in force, a vessel did come up to Pensacola, but witness does not know by whose order and permission.

Eleventh specification, fourth charge: as to Colonel King's giving an order to Lieutenant Sands, witness knows nothing; he knows there was an order of the department, as stated in the specification; that witness, as adjutant of the fourth regiment, frequently gave the order to shoot deserters, if taken in Florida, and sometimes with the condition of their resisting or attempting to escape; that at this time, they were in the habit of going off by twos, threes, and fours together, and frequently with their arms; that the accused did, in one instance, approve the order to put deserters to death, if taken in Florida; that, afterwards, witness issued such orders as adjutant, deeming them as sanctioned by the accused.

Eleventh specification, fourth charge: witness says, that soldiers of the fourth regiment have been frequently furloughed, and discharged a short time before the expiration of their terms of service; that it was generally done

in the case of good soldiers; and as to witness's company, at his own solicitation and request; as to Sergeant Gary, he was furloughed some time before his term of service had expired; but by whose order he was discharged witness does not know.

First and second specification, fifth charge: witness says, in February or March, 1817, the order as to the five per centum duty was issued, and witness was directed to make it known to the then sutlers; the present sutlers came in under the same order, which has continued in force ever since.

Question by the prosecutor. When you bore Major Dinkins's note, releasing Lieutenant Lear and Sergeant Starks, was not Colonel King then in Pensacola, and did not Major Dinkins keep Lieutenant Lear and Sergeant Starks, in arrest, until the return of Colonel King from Montpelier?

Answer. Colonel King was in Pensacola at the time they were released, and they were kept in confinement until the return of Colonel King from Montpelier.

Question by the prosecutor. Was Colonel King in Pensacola at the time the vessel was admitted, contrary to Colonel King's quarantine regulations, which vessel was directly from New Orleans with Colonel King's carriage?

Answer. I do not recollect whether he was or was not.

Question by the prosecutor. What character did Benjamin Tackwell and Charles Mason, of the fourth regiment, bear in said regiment?

Answer. I do not know.

Question by the prosecutor. Do you recollect whether deserters carried off their arms with them previous to the death of Cameron, or after he was shot?

Answer. They did.

Question by the prosecutor. Did you not write an order for a command to pursue deserters from Pensacola by order of Colonel King, and show it to him, in which you directed the party to shoot the deserter if he made any resistance or attempted to escape, and did not Colonel King tear up that written by you and hoot at it, as not being positive to put him or them to death, and did he not write one himself, in the most positive terms, to put the deserter or deserters to instant death, if taken within the limits of West Florida?

Answer. I did write such an order, and showed it to Colonel King, the accused, who stated it would not do, and wrote one himself, or directed me to write one, to have them put to death if taken in Florida.

Question by prosecutor. When you were relieved, as adjutant of the fourth infantry, by Lieutenant Dulany, did you not turn over to him what was termed the regimental fund, and was it in cash or due bills, and was there not a due bill of Colonel King's for the heaviest part of that fund?

Answer. I did; which was in due bills, and there was a due bill of Colonel King's for the heaviest part of that fund.

Question by prosecutor. Has there ever been any settlement of the fund collected from the sutlers, called the regimental fund, and how and to what has it been applied; as adjutant were you not treasurer, and how did Colonel King become so much indebted to that fund?

Answer. I was treasurer; my accounts were settled when I turned the funds over to Lieutenant Dulany, including the account called the regimental fund; I loaned the money to Colonel King, and held myself accountable to the regiment for it.

Question by prisoner. Were you, anterior to the 31st August, 1818, in the habit of reporting desertions to Colonel King as they occurred, and receiving his instructions in the case, or did you send off the parties without consulting him?

Answer. I do not recollect as to the time, but have frequently reported cases to Colonel King, and always to the commanding officer, and given the orders to the parties sent out, in pursuance of their instructions expressed or implied.

Question by prisoner. Was the discipline of the regiment unusually severe, or were the men indulged at Pensacola with the liberty of the town, and every other gratification consistent with good order.

Answer. I did not think the discipline unusually severe, and the men were indulged as much as consistent with good order.

Question by prisoner. What was the impression of the officers in relation to the orders to shoot deserters; that it was a measure imperiously called for by the then existing state of things within Colonel King's command, or that it was unnecessary and improper?

Answer. I believe the officers generally thought this order absolutely necessary to put a stop to the frequent desertions. I did think so myself.

Question by prisoner. Did you ever know Colonel King to furlough a man but at the solicitation of the company officer, and has not Colonel King ever been scrupulously nice in his interference with the internal concerns of the companies of the regiment?

Answer. I did not, except in the case of Sergeant Gary, and I do not know whether he did or did not furlough him unsolicited; and Colonel King never unnecessarily interfered with the internal regulations of companies.

Question by prisoner. Had not Sergeant Whetten been for a long time the mess sergeant, and what was his character?

Answer. He had, and bore the character of a correct man.

Question by prisoner. How much money did you loan Colonel King, and at what time? and how much had there been paid into your hands on account of the five per cent. duty?

Answer. At one time Colonel King was indebted to me upwards of eight hundred dollars, that is to say, in September, 1818, and I had then received of the sutlers something upwards of two hundred dollars.

Question by prosecutor. At the time you loaned Colonel King the eight hundred dollars had there been any expenditure for the band of the money collected on the five per cent. duty?

Answer. There had not, except a small purchase of music.

Lieutenant Francis W. Brady, of the fourth United States' infantry, a witness on the part of the United States, being duly sworn, says:

Third specification, second charge: he believes Colonel King did not draw forage in kind of witness, as quartermaster, for either the months of July or August, 1818; but that witness did purchase him some fodder in August, and thinks it was due on a requisition for June previous.

Question by prosecutor. Was there not a number of debts due in the east section of the eighth military department by the United States, at the time you was relieved by Lieutenant Houston; and what funds were then in the department?

Answer. There were but two debts within my knowledge which I had not paid or drawn draughts for, and those were disputed claims, amounting to about seven hundred dollars. I turned over to Lieutenant Houston, in due bills and cash, about three thousand eight hundred dollars. Three thousand of which was a due bill on Major

Hogan, paymaster of the fourth infantry, and a due bill on Colonel King for one hundred and ninety dollars, and one on Lieutenant Wilson for about fifty-five dollars.

Question by prosecutor. What was the reason Mr. Randolph turned over Colonel King's due bill to you, or what had Mr. Randolph to do with the public horses, and how came he to sell them? and at what time did you leave Pensacola, and how long long had you held Colonel King's due bill before Mr. Houston received it?

Answer. They were auctioneers, and sold the cast horses; two of which Colonel King purchased, and I suppose gave his due bill for them. I left Pensacola on the last day of August, 1818, and had not held Colonel King's due bill more than two or three days before I turned it over to Lieutenant Houston.

Question by prosecutor. Did you not issue forage to General Gaines and staff, at Pensacola, in July and August, 1818; and did not all the officers then in Pensacola, entitled to forage, receive it?

Answer. I did issue forage to Gaines and staff, by his (General Gaines's) order; the other officers in Pensacola did not, I believe, receive forage.

Question by the prisoner. Do you recollect the day of the month on which Colonel King purchased, at public sale, a bay mare and sorrel horse?

Answer. I think it was about the 15th of August that the public horses were sold.

The court adjourned until to-morrow, nine o'clock, A. M.

SATURDAY, *November* 27, 1819.

Court met: Present, Lieutenant Colonel William Lindsay, President; Lieutenant Colonel M. Arbuckle, Major James Bankhead, Brevet Major E. Montgomery, Major J. B. Many, Brevet Major A. C. W. Fanning; Major J. N. McIntosh, members; and Captain F. L. Dade, supernumerary member; S. D. Hays, Judge Advocate.

CORNELIUS JACKSON, a private of the fourth regiment United States' infantry, being duly sworn a witness for the prosecution, says, witness was one of the party who was sent in pursuit of Neil Cameron, a private in the fourth infantry; that the party came upon him about fifteen miles from Pensacola, while he was asleep; does not know who gave the order. Our order was wrote by Major Dinkins, which was, that if we came up with him in the bounds of Spain we were to put him to instant death, but if he was out of the limits of Spain we were to take him back as a prisoner; we waked him up and asked him if he had not deserted, and he said he had; we asked him if he did not consider himself a prisoner, and he said he did. Sergeant Childress told him that he had orders to put him to instant death; he begged to be taken back as a prisoner, (saying he was on his return to Pensacola,) and tried by a court-martial, and receive such punishment as a court might put on him. Sergeant Childress said it was not worth while, for if he was he would be put to death as soon as he got back. Cameron said, if he was it would give him a few days to repent of his drunkenness and bad doings. Witness saw Sergeant Childress's determination was to shoot him, and witness told Sergeant Childress to let Cameron read the order himself, and he still begged to be taken back as a prisoner; then Sergeant Childress ordered witness to shoot him, and witness could not do it; he did not see any occasion for it, for Cameron had given himself up as a prisoner. Childress took the gun out of witness's hand, and stepped round him while he was sitting down, and snapped it at Cameron's breast twice. Sergeant Childress handed back the gun, and told witness to discharge it; he told witness to load her again, and witness did so. Cameron then made this reply to him, "Sergeant Childress, you have snapped your gun at me the second time, now take me home as a prisoner, if you please." He told him it was more than he could do, for his order would not allow of it; Sergeant Childress stepped round to Cameron, as he was sitting down, and says, I wish I had a heart as big as a mill-stone, and blowed him through; then we returned to Pensacola as quick as we could; we reported to the commanding officer what we had done, and he said we had done exactly right.

Question by prosecutor. Had Neil Cameron his arms with him when you overtook him, or was he unarmed?

Answer. He was unarmed.

Question by prosecutor. Did you bury him, or leave him where you had shot him, and did not Colonel King pass you on the road as you were returning, and had he any conversation with the sergeant or yourself on the subject of shooting Cameron?

Answer. We left him where we had shot him, unburied. Colonel King did not pass us on our return.

Question by prosecutor. Did you not receive, in March last, at this post, the sum of fifteen dollars from Sergeant Childress, as part of the reward for apprehending Neil Cameron?

Answer. I did.

Question by court. At what time was Neil Cameron shot?

Answer. I do not recollect, but believe about the last of August, 1818.

Question by prosecutor. Can you read or write?

Answer. I cannot.

THOMAS MITCHELL, a private of the fourth infantry, a witness on the part of the prosecution, being duly sworn, says:

First specification, fourth charge. Witness was sent with Charles Mason, in the morning, to see that he washed himself; he had been in the stocks all night; and while he was down washing himself, Sergeant Starks and another man came down with a rope; the sergeant ordered us to tie Mason's hands and feet; we only tied his hands, and kept him under water till we cried to Sergeant Starks to let him take his breath; he replied, keep him under the water, if you don't, I will come in and duck you. Afterwards, witness told him he was so near drowned it was not worth while to duck him any more, and he ordered us to fetch him out then; when we were fetching him out we both had hold of him, and the sergeant ordered us to let him go. He fell and sunk under water, and we grabbed him up as soon as we could, and we took him out and rolled him on a barrel awhile, but he was dead.

Question by court. Was he dead when you let him go, or did you observe any life in him?

Answer. He was not dead when we let him go.

Question by prosecutor. Was not Benjamin Tackwell one of the party who held Mason under water?

Answer. He was.

Question by prosecutor. Did not Sergeant Starks say to Mason, before he tied him, that he intended to drown him for being drunk the night before?

Answer. I did not hear him say so.

Question by prosecutor. Was you knowing to Benjamin Tackwell's being discharged, or furloughed, previous to the day Mason was drowned?

Answer. He was not.

Question by prosecutor. Was you knowing to Tackwell's being flogged, after his being discharged and brought back?

Answer. Yes, I was.

Question by prosecutor. Do you know the reason assigned for Tackwell's being flogged? Was it by order of a court-martial?

Answer. I cannot exactly tell what he was flogged for; it was not by order of a court-martial.

Captain PHILIP WAGER, a witness on the part of the procecution, being duly sworn, says, (fourth specification third charge,) that, on the 10th October, 1817, witness joined a detachment of recruits, fourth infantry, at Fort McHenry, Baltimore, then under orders for Mobile. Colonel King engaged the ship General Hand for the transportation of the detachment, and every preparation was made for our embarcation about the 1st of November following. A few days previous to the time at which we were to have sailed, the destination of the detachment was changed to Point Petre. When this order was received, witness went to the owner of the ship General Hand, and told him he need not make any further preparation for us; that probably we should not go in his vessel, as the destination of the detachment was changed, and, if we did go in his vessel, we should have to make a new bargain with him. He replied to witness, give me $1,500 more, and I will land you at Point Petre. Colonel King, in the mean time, arrived at Baltimore with his family. Hearing the destination of his detachment being changed, he (Colonel King) proceeded immediately to Washington City, and on his return to Baltimore informed witness he had made arrangements with the Department; and the Department had permitted him to give as much more for the ship General Hand as he would have to give any other vessel to land the detachment at Point Petre. On the 11th of November, we embarked on board the ship General Hand, and on the 13th set sail; the detachment consisted of sixty-three men, and two subaltern officers. On board said ship was Colonel King and family, and about thirty negroes; he had also a quantity of furniture on board, with a carriage, chairs, tables, and some other articles of furniture. About the 25th or 28th of November, the detachment landed at Point Petre, Georgia. Colonel King then proceeded in the ship to Mobile, where he informed witness the Department had permitted him to go to settle his family.

Question by prosecutor. Was you not the quartermaster, or acting in that capacity at that time?

Answer. I was.

Question by prosecutor. Did not Colonel King make the contract with the owners of the ship General Hand; and had you any concern in making the bargain; or was you employed in any manner on that duty?

Answer. I had not; but the contract was made before Colonel King directed me to act as quartermaster.

Question by prosecutor. Were the provisions necessary for the subsistence of the detachment shipped on board the General Hand previous to the alteration in the destination of the troops?

Answer. I do not recollect.

Question by prosecutor. Did you, as quartermaster, make any attempt to obtain a vessel at a lower price after the destination of the troops was altered; and what was given for the General Hand; or was you ordered to make any inquiry on that subject by Colonel King?

Answer. No: I had nothing to do with it; nor had I any orders from Colonel King on the subject.

Question by prosecutor. Do you know that Colonel King made any inquiry, or took any pains to procure a vessel at a lower price than was exacted by the owners of the General Hand?

Answer. I do not.

Question by prosecutor. Did not Colonel King say to you, on his arrival in Baltimore with his family, when he knew that the destination of the troops was altered, that he must go to Washington, for it had played hell with his private arrangements, alluding to his getting his family, &c. brought out in that vessel?

Answer. Colonel King did make some such remark.

Question by prosecutor. Do you know what is customary to be paid for transporting a detachment of the strength you commanded from Baltimore to Point Petre?

Answer. I do not.

Question by prosecutor. Was you not apprised, at Baltimore or Point Petre, on your arrival, that the fourth regiment was then in the Creek nation?

Answer. On our arrival at Point Petre, we understood that the regiment had moved from Camp Montpelier for Fort Scott; which information was obtained from a paragraph in a newspaper.

Question by prosecutor. Did you not hear Colonel King say, when in Baltimore, he was under orders to join his regiment?

Answer. I do not recollect to have heard him say so.

Question by prosecutor. Did you not remain at Point Petre for some time, and then march your command for Fort Scott, and arrived there previous to Colonel King's joining the regiment on that post?

Answer. I remained at Point Petre and Amelia Island till the 4th of January, 1818, and arrived at Fort Scott about the 15th of March following, the day previous to the arrival of Colonel King.

Question by prisoner. Was the ship General Hand bound to New Orleans, and thence to Liverpool, when she was chartered by Colonel King?

Answer. I understood so from the captain of the vessel.

Question by prisoner. Were you not at Fort McHenry, in command of the detachment, and had not Captain Hook, then recruiting in Baltimore, the superintendence of the preparations for embarcation?

Answer. I was at Fort McHenry in command of the detachment, but do not know that Captain Hook had the superintendence of the preparations for embarcation; that Captain Hook was then in Baltimore.

Question by prisoner. For what purpose did Colonel King direct you to act as quartermaster? was it principally to make the disbursement for a set of musical instruments purchased by Captain Hook for the regiment, and did you do any other duty as quartermaster?

Answer. It was for that purpose, and I done no other duty as quartermaster, except to purchase fuel for the detachment.

Question by prisoner. What were the description of negroes which Colonel King had on board the General Hand; were they all men and women, or were they principally children?

Answer. About half the number, I think, was under the age of eighteen years, and a great part of them small children.

Question by court. What sum was to have been paid to the owners of the General Hand to transport the detachment to Mobile?

Answer. I do not know, but understood it was $1,500.

Question by court. Do you know that the Department did allow Colonel King to transport his family, negroes, provisions, and furniture, to Mobile, on board the General Hand?

Answer. I do not; but was told by the Adjutant and Inspector General, Daniel Parker, that Colonel King would move out with his family, and go with the detachment.

Question by court. What was the additional sum given between the first and last contract made for the transportation of the detachment?

Answer. I do not know.

Question by court. Was Colonel King's family and provisions on board the General Hand previous to the destination of the detachment being altered?

Answer. His family was not, but part of the provisions might have been, though I do not recollect; every thing he brought from home was put on board afterwards.

Question by prosecutor. Have you not brought on a detachment of troops from Philadelphia to Point Petre, since the fall of 1817, and did you not engage the transport? and what was paid, and the strength of the detachment?

Answer. I brought on a detachment of about one hundred and fifteen men, in March last, from Philadelphia to St. Mary's. I did not engage the transport myself, but believe the sum given was about $700 or $900, and the accommodations afforded by the vessel were not sufficient for more than half that number of men.

Question by prosecutor. Could not a vessel have been obtained in Baltimore, in 1817, to transport your detachment to Point Petre for $1000? Do you not believe, if you had been ordered to procure a transport, you could have obtained it for that price?

Answer. I think a vessel might have been procured for $1000, affording accommodation for my detachment.

10th specification 4th charge, witness states: in the month of June, 1818, witness was ordered to New Orleans to bring on military stores and clothing for the troops at Pensacola; Colonel King requested witness, at the same time, to bring a carriage of his. After loading the public vessel with public property, witness found there was not room for his carriage, and shipped it in another vessel for Pensacola; witness arrived at that place on the 4th of July, on board the public vessel; the day following, when in company with Colonel Brooke, some person reported to Colonel Brooke there was a vessel below with Colonel King's carriage on board, and asked if she should be permitted to come up; Colonel Brooke directed that she should; at this time Colonel King was absent at cantonment Montpelier, as witness was informed; witness was told there was an order out subjecting vessels from Orleans to a quarantine for a number of days not recollected.

Question by prosecutor. Did you not purchase in the fall of 1817, under an order of Colonel King, instruments for the band of the fourth infantry, and what did you pay for them, and out of what fund?

Answer. I paid, in the fall of 1817, for a number of instruments for the fourth infantry, the sum amounting to about $250 or $300, by the order of General Gaines.

Question by prosecutor. Have you received a credit for the sum you paid for the band instruments at the Auditor's Office, or how has the account been settled?

Answer. The account was passed to my credit.

Question by prisoner. Have you any recollection of the time and place, when and where, General Gaines's order for the purchase of the instruments was given?

Answer. I do not recollect the date of the order, but think it was made in the latter part of the year 1815, or first of 1816.

Captain Henry Wilson, of the fourth infantry, having asked and obtained leave of the court to correct his statement of yesterday, states, that the sum turned over to Lieutenant Dulany in Colonel King's due bill, was for $330 52⅓; instead, as stated before, of the heaviest part of the regimental fund, it was the heaviest due bill.

Question by the prosecutor. Is not the statement, now in your hands, in the hand-writing of Colonel King, the statement of your account as regimental treasurer?

Answer. It is in the hand-writing of Colonel King, and is a statement of my account as treasurer.

The court adjourned to meet on Monday, the 29th instant, at nine o'clock, A. M.

Monday, *November* 29, 1819.

The court met: Present, Lieutenant Colonel William Lindsay, President; Lieutenant Colonel M. Arbuckle, Major James Bankhead, Brevet Major E. Montgomery, Major J. B. Many, Brevet Major A. C. W. Fanning, Major J. N. McIntosh, members; Captain F. L. Dade, supernumerary member; S. D. Hays, Judge Advocate.

Captain Henry Wilson being again before the court.

Question by the prosecutor. Was you not present in Pensacola some time in September, 1818, when Major Dinkins was on the point of sending Sergeant Childress and party in pursuit of Neil Cameron, a deserter from the 4th regiment of infantry?

Answer. I was in Pensacola during the month of September, 1818, but dont recollect of the command's going out after Neil Cameron.

Question by the prosecutor. Who wrote the order that Sergeant Childress and party had to pursue Neil Cameron?

Answer. I always understood that Major Dinkins wrote the order.

Question by court. Was you not with Major Dinkins about this time, when he had written an order for a party to pursue deserters, "that if they resisted or attempted to escape to put them to death;" and did you not not tell them the department order was to have them put to instant death if taken in the province of West Florida, but otherwise to have them brought back?

Answer. I dont recollect that I did.

Question by court. Some time shortly anterior to this, did Colonel King authorize or direct that all parties sent in pursuit of deserters should be ordered to put them to death if taken within the limits of Florida?

Answer. I considered it so.

Question by court. Were you not the department adjutant at this time?

Answer. I was.

Question by court. Did or did you not consider the order to put all deserters to death, if taken in Florida, the standing department order; and the other order, in case of resistance or an attempt to escape, rather an exception to the first order?

Answer. I most frequently gave the order to put them to death if taken in Florida, and always considered myself fully authorized to do so.

Question by court. By what authority did you give orders different to what you say you considered the department order?

Answer. I gave them in that way, under the belief they would be sanctioned; and once by order of Captain Shomo, commanding Pensacola.

JOHN ENWRIGHT, a musician of the 4th infantry, a witness on the part of the prosecution, being duly sworn, says, that at the time we sailed from Point Petre, Colonel King had on board the General Hand some provisions, household furniture, a carriage, and about twenty-five or twenty-six negroes; and likewise, four enlisted soldiers of the 4th infantry, of which number witness was one; all of which Colonel King brought with him to Mobile; but at whose expense witness does not know; that the three men were brought on to Mobile for the purpose of being attached to the band of the 4th infantry; that we waited five or six days at Fort Charlotte for a fair wind to bring us up to Fort Montgomery; that afterwards, Cummings and myself were landed at Blakely, from where we marched with a detachment of the 8th infantry to Fort Montgomery.

Question by prosecutor: On board of what vessel was Colonel King's furniture and negroes shipped, after your return through Lizard creek to Mobile?

Answer. I do not know.

Question by prosecutor. When you arrived at Mobile had the ship any cargo on board but what belonged to Colonel King?

Answer. I dont know.

Question by prosecutor. Did you assist to land Colonel King's baggage from on board the ship General Hand?

Answer. No.

Question by prosecutor. Was Colonel King's carriage landed at Mobile, or was it left on board that ship?

Answer. It was left at Mobile, I think.

Question by prisoner. Do you recollect the circumstance of seeing the crew of the General Hand employed in landing from the ship at Mobile a parcel of tierces of loaf sugar, a quantity of cast iron ware, a quantity of butter in kegs, a quantity of powder, and perhaps some other articles?

Answer. Yes.

GARDNER FULLERTON, a musician of the 4th infantry, a witness on the part of the prosecution, being duly sworn, was questioned as follows, viz:

Question by prosecutor. Did not you come up the river in the vessel that Colonel King and family were on board of; and did you remain on board until you reached Fort Montgomery or the bayou?

Answer. Colonel King's family was not on board the vessel I came in; but on board the Amelia.

Question by prosecutor. What was done with the negroes that Colonel King brought out in the General Hand after his arrival in Mobile?

Answer. They were sent up to Montgomery; two or three on board the vessel I came in, and some on board the Amelia, which came in company with us.

Question by prosecutor. Was the vessel you came in a public vessel; and what was her name?

Answer. I think she was not a public vessel; but dont recollect her name.

Question by prosecutor. What was on board the vessel you came in, provisions or soldiers?

Answer. There were eight or nine soldiers, and baggage for the 8th regiment; but dont know as to the provisions.

Question by prosecutor. Did you see Colonel King's carriage landed at Mobile from on board the ship General Hand?

Answer. I did not.

Lieutenant HENRY R. DULANY, of the 4th infantry, a witness on the part of the prosecution, being duly sworn, says, witness knows that the duty of five per centum has been laid on the sutlers, as set out in the specifications; and since witness was adjutant of the regiment had made two collections under the said order, between the first of April and last of September of the present year, amounting to about one hundred and fifty dollars.

Question by prosecutor. Was any cash turned over to you, as belonging to the regimental fund when you relieved Captain Wilson, or was it entirely in due bills?

Answer. It was entirely in due bills.

Question by prosecutor. Was Colonel King's due bill turned over to you by Captain Wilson as a part of that fund; and did you receipt for it as such?

Answer. Colonel King's due bill was turned over to me for about three hundred dollars; but dont know whether it was a regimental fund or not, but presume it was.

Question by prosecutor. What did you consider Colonel King's due bill given to you for; as a debt due by Captain Wilson to the regimental fund, or as Colonel King's debt to that fund?

Answer. I considered it as a debt due by Colonel King to that fund.

Lieutenant WILLIAM LEAR, of the 4th infantry, a witness on the part of the prosecution, being duly sworn states, that about the 2d of September, 1818, witness ordered Sergeant Starks to take Charles Mason, who had been drunk the over night, and at that time in a very filthy condition, and to duck him and wash him; the sergeant took him to the bay; Mason was brought back dead, but witness does not know whether he was drowned or not. By the order of Major Dinkins witness and Sergeant Starks were put under arrest, and remained so fifteen days. When Colonel King returned to Pensacola witness went to Colonel King's quarters to report the case to him, and found Major Dinkins there, who had mentioned the circumstance to the colonel witness presumes; Colonel King observed, he did not hold him bound for the man's death, but only for the order he had given; witness then returned to his quarters, and in a short time Lieutenant Wilson, the adjutant, brought witness a release from arrest signed by Major Dinkins; and Sergeant Starks was also released without trial, by order of Major Dinkins, as witness believes; and witness does not know that the colonel ever refused to have the affair investigated.

Here the witness objected giving testimony as to third specification, fourth charge; as he might thereby criminate himself.

The court, after mature deliberation, decided that the witness should not testify to the specification generally, but shall answer to such questions as the court deem proper.

Question by court. Was Benjamin Tackwell discharged about the 27th August, 1818; and had his term of service expired, and by whom was he discharged?

Answer. Benjamin Tackwell was furloughed and discharged about the 27th August, 1818, by Colonel King; his term of service had not then expired; his furlough was signed by witness and countersigned by Colonel King.

Question by court. How long had he to serve at the time he was furloughed?

Answer. About fifteen or twenty days.

Question by court. Was he brought back and made to serve out his term of service?

Answer. He was brought back and put on duty; but was again discharged a few days before his term expired by consent of Major Dinkins.

Question by prosecutor. Was he not flogged after his return to Pensacola; and do you know the reason why he was flogged?

Answer. He was flogged. The reason why he was flogged was, that after he got his furlough he tore up his uniform coat in a most contemptuous manner.

Question by court. Was he flogged by sentence of a court-martial?

Answer. He was not.

Question by prosecutor. Was not Colonel King knowing to his being flogged; and did you hear him say he approved of his being flogged?

Answer. He was knowing to it; and I heard Colonel King say he deserved it.

Question by court. Did Colonel King ever cause any legal investigation to be made as to his being flogged?

Answer. Not to my knowledge.

Question by prisoner. Was it on your application that Tackwell was furloughed and discharged?

Answer. I think it was.

Question by prosecutor. What character did Charles Mason and Benjamin Tackwell bear in the 4th infantry?

Answer. The character of Mason was that of a great drunkard; and Tackwell I considered a very indifferent soldier.

Lieutenant Q. B. Heronimus, a witness on the part of the prosecution, being duly sworn, states, that on or about the 10th of August, 1818, witness reported to Lieutenant Sands, adjutant 4th infantry, that a man of the name of Waters had deserted; that Colonel King gave a verbal order to Lieutenant Sands to detail a suitable non-commissioned officer, one who could be trusted, and two men, to pursue this man, and if overtaken within the province of Florida, they should put him to death; but if above the line, they should bring him back. This man was not overtaken by them.

Question by the prosecutor. Where was Colonel King when you reported to Lieutenant Sands the desertion of Waters; and who was present besides Lieutenant Sands?

Answer. He was in front of the officers' quarters; several gentlemen were present, and, I think, Dr. Elliott.

Question by the prosecutor. Did Waters take off his arms with him?

Answer. He did not.

Question by the prosecutor. Did you not act as adjutant at the Barancas, and was it not customary to send commands after deserters, with a similar order to that given by Colonel King?

Answer. I did act as adjutant, but do not recollect to have given such an order.

Question by the prisoner. At what time did you go to the Barancas, and when did you enter upon the duties of adjutant at that post?

Answer. I think on or about the 12th November, 1818.

Fourteenth specification, fourth charge. Witness believes that he has had a sufficiency of time to make purchases of such provisions as could be procured in the country, and that he had at least three days' notice—thinks more.

Question by the prosecutor. Was you not acting quartermaster at the time Lieutenants Dulany, Houston, and yourself were ordered to make purchases of provisions?

Answer. I was.

Question by the prosecutor. What quantity of provisions was on hand when Colonel King gave his order to purchase?

Answer. When I was ordered to purchase provisions in May, 1819, there was on hand a half barrel of beef, and twelve barrels of flour.

Question by the prosecutor. What time was allowed under that order for procuring the supplies necessary? and what was paid for the rations?

Answer. There was an advertisement out three days; and the rations of beef only cost seventeen and a half cents.

Question by the court. How many troops were here at that time?

Answer. About two hundred men.

Question by the court. Do you know that the troops did suffer for want of rations?

Answer. They were one day without meat.

The court adjourned to meet to-morrow at 9 o'clock, A. M.

Tuesday, *November* 30, 1819.

Court met: Present, Lieutenant Colonel William Lindsay, President; Lieutenant Colonel M. Arbuckle, Major James Bankhead, Brevet Major E. Montgomery, Major J. B. Many, Brevet Major A. C. W. Fanning, Major J. N. McIntosh, members; Captain F. L. Dade, supernumerary member; S. D. Hays, Judge Advocate.

Major James E. Dinkins, of the 4th infantry, a witness on the part of the prosecution, being duly sworn, states, that about the 1st September, 1818, Colonel King left Pensacola, and witness assumed the command of the regiment; a day or two afterwards, Lieutenant Lear represented to witness, that he had ordered a soldier by the name of Mason to be ducked, and he believed he was drowned; witness directed the surgeon to be sent to him, and afterwards learned the man was dead; on which witness arrested Lieutenant Lear, and the sergeant who was directed to put the said order into execution, but did not prefer charges against them, because he only considered himself as the temporary commanding officer of the regiment and post, and chose rather to report the circumstances to the colonel on his return, and let him act on them. Witness accordingly done so, on the return of the colonel, about the 16th of the month, and observed, at the same time, witness considered an officer who gave an order for the infliction of punishment, and did not superintend its execution, as accountable for the extent to which it was carried; but left it altogether to him to prosecute or not. Colonel King observed, he thought Lieutenant Lear only accountable for the order he had given, and not for the death of the man, and was not disposed to prosecute, and had no objection to their both being released from arrest. Witness then liberated them. Colonel King did not, however, again assume the command, but witness continued in command until the day on which the regiment left Pensacola. Colonel King was, during the whole of this time, commanding the department, and acting civil and military governor of the province of West Florida.

Question by prosecutor. Was you not in Pensacola when Sergeant Whetten, the messman, was furloughed and discharged previous to the expiration of his term of service? and had you not heard Colonel King say he had engaged him to return in the fall, as his overseer?

Answer. I was in Pensacola, and recollect, at some time, to have heard the colonel speak of having Whetten as an overseer, and if he returned, he expected to get him; but never heard him say that he had actually made a contract with him.

Question by the court. How long prior to the expiration of Sergeant Whetten's term of service was he furloughed and discharged? by whom, and for what purpose or reason?

Answer. I do not know how long he had to serve when furloughed by Colonel King; don't know by whom discharged, for what purpose or reason.

Question by court. Had not Whetten the character of a very good soldier?

Answer. I have heard the officers say he was a man of a very good character; from his being appointed mess sergeant, I was under the impression that it was for his good qualities.

Question by the court. How is the good of the service promoted by discharging a valuable soldier three or four months before his term expires?

Answer. I am of opinion that the service is not injured by discharging a faithful, good soldier, a month or two before his term expires, who has served five years without a furlough.

Question by the court. Has not this been frequently done in the fourth regiment, with the knowledge and consent of Colonel King?

Answer. Men have been frequently furloughed and discharged a short time previous to the expiration of their term of service, in the 4th regiment, to the knowledge of Colonel King, and I presume by his consent.

Question by the prisoner. Have you not had the immediate command of this post since the month of March last?

Answer. I have been in command of this post since about the 18th of March last.

Question by the court. Has not Colonel King been in the actual command of the department since August, 1818, until the day of his arrest?

Answer. He has.

The court adjourned to meet to-morrow 9 o'clock.

WEDNESDAY, *December* 1, 1819.

Court met: Present, Lieutenant Colonel William Lindsay, President; Lieutenant Colonel M. Arbuckle, James Bankhead, Brevet Major E. Montgomery, Major J. B. Many, Brevet Major A. C. W. Fanning, Major J. N. McIntosh, members; Captain F. L. Dade, supernumerary member; S. D. Hays, Judge Advocate.

Major J. B. HOGAN, paymaster 4th infantry, was asked the following question by the court, viz:

Question by the court. Have you any evidence of Colonel King's ever having received your answer to his letter set out in the fourth specification, second charge?

Answer. Colonel King has paid me the three hundred dollars enclosed to him in that letter, that, on my trial before the general court-martial, whereof Brevet Major Fanning was president, acknowledged that he did receive a letter from me, enclosing the three hundred dollars, in which I stated I would accommodate him, by assisting Messrs. Nelson & Randolph to the amount of a few hundred dollars.

Here the following documents were offered to be read in evidence on the part of the prosecution, which was allowed by the court, viz.

Document No. 1, as to the fourth charge, second and eleventh specifications.
Document No. 2, as to the third charge, second and eleventh specifications.
Document No. 3, as to the third charge, fourth and eleventh specifications.
Document No. 4, as to the second charge, fourth and eleventh specifications.
Document No. 5, as to the second charge, fourth and eleventh specifications.
Document No. 6, as to the fourth charge, fifteenth and eleventh specifications.
Document No. 7, as to the fourth charge, fifteenth and eleventh specifications.
Document No. 8, as to the fourth charge, fourth and eleventh specifications.
Document No. 9, as to the fourth charge, seventh and eleventh specifications.
Document No. 10, as to the second and fourth charges, first and fifteenth specifications.
Document No. 11, as to the fourth charge, tenth and eleventh specifications.
Document No. 12, as to the fourth charge, sixth and eleventh specifications.
Document No. 13, as to the fifth charge, first, second, and eleventh specifications.
Document No. 14, as to the fourth charge, eleventh specification.
Document from No. 15 to 27, as to third charge, fourth and eleventh specifications.

The accused (Colonel King) objected to document marked No. 10, as relates to the furlough for Sergeant William Gary, being read as evidence in the case, on the ground that the order furloughing him is in existence, and ought to be produced. The court, after mature deliberation, are of opinion that, inasmuch as the document is admitted to be a true extract from the official registration of furloughs in the fourth regiment, and deeming that the best evidence of the fact therein contained, decided that it ought to be received as evidence, and therefore overruled the objections.

The testimony on the part of the prosecution being closed, the accused, Colonel King, was allowed to examine Captain H. Wilson, Lieutenant H. R. Dulany, fourth infantry, and Major James E. Dinkins, fourth infantry.

Captain HENRY WILSON was interrogated as follows:

Question by prisoner. Were not the orders which you received from Colonel King, during the month of August, 1818, in relation to the shooting of deserters, if overtaken in the province of West Florida, given by him as the immediate commanding officer at Pensacola?

Answer. I believe they were.

Question by prisoner. Did you not, after the 1st of September, 1818, act in the double capacity of adjutant to Major Dinkins, commanding the garrison of Pensacola, and adjutant to Colonel King, commanding the department?

Answer. I did.

Question by prisoner. During the month of September, 1818, and until the evacuation of Florida by the fourth regiment, to whom did you report the deserters from Pensacola, and on whose orders were they pursued?

Answer. Major Dinkins assumed the command of the post of Pensacola on the 1st September, and was in the habit of reporting the casualties of the night to him as the adjutant of the regiment, and that Major Dinkins continued in command until the removal of the troops, except for six days, while Captain Shomo commanded.

Question by prisoner. How many desertions took place from Pensacola from the 15th to the 18th September, 1818, and what was then the strength of the garrison?

Answer. During the 15th and 18th inclusive, there were eight desertions; the strength of the garrison was, on the 15th, two hundred and seventy-two, non-commissioned officers, musicians, and privates, and, on the 18th, two hundred and seventy-five present.

Question by prisoner. Was there not a great number of desertions from Pensacola, in 1818, that were never entered in the regimental book, from the circumstance of their being retaken and brought back in a day or two?

Answer. I presume there were a number of desertions in 1818 that were not recorded.

Question by prisoner. What was the strength of the garrison of Pensacola "present" on the 26th July, 1818?

Answer. The total present was one hundred and thirty.

Question by prisoner. Did Colonel King leave the fourth regiment on furlough, in May, 1817, and when did he rejoin it?

Answer. He left it in May, 1817, and rejoined again in March, 1818, at Fort Gadsden.

Question by prosecution. Was not Colonel King at that time, (August, 1818,) the actual commander of the department, as well as the garrison of Pensacola?

Answer. He was.

Question by court. Did Captain Shomo issue an order assuming the command of the 4th regiment, at Pensacola, during the absence of Major Dinkins, or did you only view him as the commanding officer, in consequence of his being the senior officer present?

Answer. He did not, but I reported to him as being the senior officer present?

Question by prosecution. Did you not hold a conversation with Major Dinkins, about the first time he was in command, and had ordered a party in pursuit of deserters, and did you not state to Major Dinkins, viz: that the order Major Dinkins had just written, which read thus, that if they attempted to escape or resist they should be shot, was not such a one as Colonel King always issued on similar occasions; but that Colonel King always ordered them put to instant death, if taken in West Florida; and did not the Major alter his order at your suggestions?

Answer. Not that I recollect.

Lieutenant H. R. Dulany, being called by the accused, was questioned as follows, viz:

Question by prisoner. As regimental treasurer, had you not charge of the wine fund and mess fund, as well as the regimental fund, and was there not in the treasurer's accounts some hundred dollars due the companies at Amelia Island?

Answer. Yes, I had several different funds, and I believe a company fund, due a company at Amelia Island.

Question by prisoner. When you closed your accounts, did not Colonel King offer to pay down the sum of $130, the amount he then owed to the treasurer, and did not Major Dinkins, (Colonel King being in arrest,) request him to retain it in his hands until it was called for?

Answer. He did.

Question by prisoner. During the time you acted as regimental treasurer, was there not about $200 of the regimental fund expended for the purchase of instruments for the regimental band, and was there not about a like sum laid out to equip for West Point a youth named Henry Von, who had been patronised by the gentlemen of the regiment, and at their interest appointed a cadet at the Military Academy?

Answer. During the time I acted as regimental treasurer, I believe there was about $162 laid out for musical instruments for the regiment, and about $175 paid for the outfit of Henry Von, the youth who was sent to West Point?

Major James E. Dinkins being called, was interrogated as follows:

Question by prisoner. Has Colonel King granted furloughs to any of the men under your command since the month of September, 1818?

Answer. Not to my recollection.

Question by prisoner. Has Colonel King ever given discharges to men under your command before the expiration of their term of service, except on the surgeon's certificate of inability, or when you had granted them furloughs to the expiration of their enlistment?

Answer. Colonel King has discharged men previous to the expiration of their term of enlistment on the surgeon's certificate; in a few instances, I have furloughed men till their term of service expired; their discharge I did not sign, because, before their term of service expired, I might be removed from the command, and therefore preferred that their discharges should be signed by the commanding officer of the regiment.

Question by prisoner. For what length of time were the furloughs usually given, and were the discharges so dated as to be of no effect until the expiration of the term of enlistment; and was not the sole object for which the discharges were given to save the men the trouble and expense of returning for them?

Answer. The furloughs were given from five to thirty days, and, perhaps, in one or two instances, for a few days more; the discharges were so dated as to take effect at the expiration of their term of enlistment; my impression was that the sole object in signing the discharges was to save the trouble and expense of the soldiers returning for them.

Question by prosecutor. Was it practicable, from the manner in which the garrison of Pensacola was necessarily quartered, to restrict the men by means of a chain of sentinels?

Answer. I do not think it was practicable, from the manner in which the town was quartered, to have formed a chain of sentinels.

Question by prisoner. Did it not appear, from your observation, that many of the inhabitants of Pensacola were entirely dependent upon the proceeds of their gardens for the support of their famiiies?

Answer. I believe there were many.

Question by prisoner. Do you recollect the circumstance of complaints being made, immediately after your arrival at Pensacola, in the early part of August, 1818, that the men brought on by you had commenced plundering the gardens of the inhabitants, and committing other depredations upon their property?

Answer. I understood such complaints were made.

Question by prisoner. Was not Major General Gaines at Pensacola in the latter part of July and early part of August, 1818?

Answer. Major General Gaines was there in the early part of August.

Question by prosecutor. Did you not refuse to give a discharge to the late Sergeant Barron, ward-master and steward of the hospital, and do you recollect the reasons you had for refusing the usual indulgence?

Answer. I did refuse, because I thought his services were indispensably necessary here. I think his furlough was for upwards of thirty days.

Lieutenant Colonel William Lindsay being sworn, the following question was asked him:

Question by prisoner. What has been the practice at the posts at which you served, since the 1st January, 1815, in relation to the inflicting of corporeal punishment by stripes and lashes?

The judge advocate objected to the witness answering the question, because it is irrelavent, and the answer to it could in nowise benefit the defence. The prisoner stands charged with an offence before the court, and were he even to succeed in establishing the guilt of others it would not disprove or extenuate his own.

The court, after mature deliberation, sustained the objection.

The court adjourned to meet to-morrow at nine o'clock, A. M.

THURSDAY, *December* 2, 1819.

Court met: Present, Lieutenant Colonel William Lindsay, President; Lieutenant Colonel M. Arbuckle, Major James Bankhead, Brevet Major E. Montgomery, Major J. B. Many, Brevet Major A. C. W. Fanning, Major J. N. McIntosh, members; Captain F. L. Dade, supernumerary member; S. D. Hays, Judge Advocate.

The prisoner offered the following documents, to be read as testimony in his defence, which was allowed by the court:

Document C, eleventh specification, fourth charge.
Document D, fifth specification, third charge.
Document E, eleventh specification, fourth charge.
Document F, first specification, second charge.
Document G, first specification, second charge, and fifteenth specification, fourth charge.
Document H, fourth specification, fifteenth charge.
Document I, fifteenth specification, fourth charge.
Document K, fourth specification, third charge.
Document L, fourth specification, third charge.
Document M, eleventh specification, fourth charge.
Document N, General Jackson's letter of approbation.

The judge advocate objected to document I being read in evidence, because it purports to be the order of the prisoner himself, introduced by himself, to disprove a charge alleged against him for the very fact of having made the order: the prisoner alleges that the order was made by the authority of General Gaines, and not by himself as charged. It is in proof that he issued the order by his adjutant, and it now devolves on him to show that General Gaines directed him to do so; but it is not competent for him merely to state that such is the fact, or to introduce any act of his own in proof thereof.

He should have had General Gaines before this court; he is in their reach, and it was the duty of the prisoner, as it was his interest, to require his attendance; but he has failed to do so. The court, therefore, will reject this testimony, for it is totally inadmissible in its nature, and not the best within their power to obtain.

The court, after mature deliberation, overruled the objection.

The prisoner having closed his testimony, the court allowed him until Monday next to make his defence.

The court adjourned to meet on Monday next at nine o'clock, A. M.

MONDAY, *December* 6, 1819.

Court met: Present, Lieutenant Colonel William Lindsay, President; Lieutenant Colonel M. Arbuckle, Major J. Bankhead, Brevet Major E. Montgomery, Major J. B. Many, Brevet Major A. C. W. Fanning, Major J. N. McIntosh, members; Captain F. L. Dade, supernumerary member; S. D. Hays, Judge Advocate.

When the accused, Colonel King, delivered his defence, which was read to the court, (see document marked O;) when the judge advocate gave his opinion to the court, (see document 28;) after which the court was occupied, during the legal hours of sitting, until Wednesday, twelve o'clock, when they agreed on the following finding and sentence, viz:

After the most mature deliberation, the court find the prisoner, Colonel William King, 4th regiment United States' infantry, not guilty of the 1st specification, 1st charge; not guilty of the 2d specification, 1st charge; not guilty of the 1st charge.

The court find in the 1st specification, 2d charge, that the prisoner did furlough Sergeant Gary about five months before his term of service expired, and that he employed him as his manager or overseer; they also find that the accused did employ Sergeant Latta before his term of service expired; and they also find that he did discharge and furlough Sergeant Whetten about three months before his term of service expired. The court find him not guilty of the other parts of the specification.

Not guilty of the 2d specification of the 2d charge; not guilty of the 3d specification of the 2d charge; guilty of the facts charged in the 4th specification, 2d charge; not guilty as stated in the 5th specification, 2d charge.

On the 2d charge the court find the prisoner guilty of unofficerlike conduct, but cannot in their conscience say that he was actuated by the ungentlemanly motives ascribed to him in the 4th specification, and believe he may have acted under the influence of mistake or misapprehension; they, however, cannot withhold the expression of their highest disapprobation of his conduct in the transaction; they acquit him of so much of the 2d charge as relates to ungentlemanly conduct.

The court find the prisoner guilty of the facts stated in the 1st specification, 3d charge, except so much as relates to the delivery of the deserter; guilty of the 2d specification, 3d charge, except that he did request, and not order or direct, as charged in the specification; guilty of the 3d specification, 3d charge, except that he did request, and not direct, Lieutenant Houston, as stated in the specification. As to the 4th specification, 3d charge, the court find that the prisoner brought out to Mobile, in the ship General Hand, his family, about thirty negroes, some provisions, (part of which he sold,) and some household furniture, all at the expense of the Government; and that he did, on the part of the United States, give to the owners of the ship General Hand the additional sum of $1,175, to convey the said detachment mentioned in the specification to its place of destination, Point Petre, Georgia.

Not guilty of the 5th specification, 3d charge; not guilty of the 3d charge.

The court find the prisoner guilty of the 1st specification of the 4th charge; guilty of the 2d and 3d specifications, 4th charge; guilty of the facts contained in the 4th specification, 4th charge; guilty of the 5th specification, 4th charge, except as to the term of service having expired; guilty of the facts stated in the 6th specification, 4th charge; guilty of the facts stated in the 7th and 8th specifications, 4th charge; guilty of the 9th specification, 4th charge; not guilty of the 10th specification, 4th charge; guilty of the 11th specification, 4th charge; not guilty of the 14th specification, 4th charge; guilty of the facts stated in the 15th specification, 4th charge, except as it relates to the discharge of Sergeant Gary, and the furlough and discharge of Sergeant Latta, and as to them not guilty. Guilty of the 4th charge.

As to the 1st specification of the 5th charge, the court find that the prisoner, Colonel King, did lay a duty of five per centum, as specified; that the duty has fallen on the soldiers, but that has proceeded from an omission, on the part of the commanding officer, in not regulating the sutler's prices; that this duty was not for the benefit of the accused, but for the benefit of the 4th regiment; and find the prisoner not guilty of the 1st specification, as stated; not guilty of the 2d specification of the 5th charge; not guilty of the 5th charge.

The court sentence the prisoner, Colonel William King, of the 4th regiment United States' infantry, to be suspended from all rank, pay, and emoluments, for the space of five years, from the date of the ratification of this sentence.

WM. LINDSAY, *Lieut. Col. Corps Art., President.*
S. D. HAYS, *Judge Advocate, D. S.*

Documents from No. 1 to No. 27, produced, on the part of the prosecution, to the court-martial held for the trial of Colonel King, of the 4th regiment of infantry.

No. 1,

Relating to 4th Charge, 2d and 11th Specifications.

Order to Colonel King to report relative to shooting deserters, and Col. King's report to the Secretary of War.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *March* 29, 1819.

It has been reported to the War Department, from a source entitled to credit, that since you have had the command in Florida and at Pensacola, orders have been given to the military to shoot down deserters, if found within the limits of Florida; that such orders emanated from Colonel King, military commandant, and have accordingly been executed.

The Secretary of War directs that you forthwith make a particular and detailed report, stating the orders, by whom given, by whom executed, on whom executed, and the time when executed; with such other facts as you may deem important on the subject.

I have the honor to be, sir, your obedient servant,

D. PARKER, *Adj. and Insp. General.*

Col. WM. KING, *4th infantry.*

Colonel King's answer to the foregoing order.

SIR: CANTONMENT MONTPELIER, *April* 25, 1819.

In conformity with your order of the 27th ultimo, received by yesterday's mail, I have the honor to report, for the information of the honorable the Secretary of War:

That, about the 1st of August last, it being reported to me that Sergeant Aiken, Corporal Curry, and one private of Captain Peters's company, corps of artillery, had deserted from the Barancas, I gave special orders to one or more parties sent in pursuit, to shoot them if overtaken within the limits of the province of West Florida. They were overtaken some distance short of the line of demarcation, by a party commanded by Corporal Watkins of the 4th reginent, secured, and brought back, unharmed. Similar orders were given, perhaps, in two other instances, during the month of August, and with the like result.

These are the only instances in which it appears orders to shoot down deserters emanated from me, and in no case were they ever carried into execution.

Between the 15th and 18th of September, during my absence from Pensacola, no fewer than *eight desertions* took place from the battalion of the 4th regiment, less than three hundred strong. They were pursued on the orders of Major James E. Dinkins, then of the 8th infantry, commanding the garrison of Pensacola; the non-commissioned officers charged with the conduct of the parties being specially instructed to shoot down the deserters, *wherever found.* One of the parties, commanded by Sergeant William Childress, of the 7th battalion company, 4th infantry, came up with Neil Cameron, a deserter from the 1st battalion company, 4th regiment, about fifteen miles above Pensacola, and shot him. This is the only instance in which orders to shoot deserters were carried into execution.

It may here be proper to call the attention of the Department to the circumstances which elicited the orders in question. With a feeble force I had been thrown into a province (with orders to maintain the flag of the United States) that had first been forcibly wrested from a foreign Power, with whom we were, to all intents and purposes, at war, save that no formal declaration of hostilities had taken place. I was within striking distance of a powerful dependency of the Spanish crown, and bound to hold myself prepared to meet any effort which the captain-general of the island of Cuba might make to recover the violated territory of his master. Under this state of things, desertions from the force under my command prevailed to an extent, perhaps, never before known in the American army; and it became the imperious duty of the commanding officer to check the practice, by the application of such means as were within his reach, legal or otherwise. In ordinary cases, it is a rule of service to order deserters shot down if resistance is offered or an escape attempted; and when it is remembered that it was usual for the deserters from Pensacola to go off armed, avowedly for the purpose of fighting their way through, I think every candid and liberal man will not only consider the orders justifiable, but called for by the exigencies of the service, and the safety of the parties ordered in pursuit.

These remarks apply as forcibly to the case of Cameron as to those wherein the order emanated from me, and, if justifiable in me, was justifiable in Major Dinkins.

In giving an order which involved the life of a human being, I was well aware of the awful responsibility to my God, my conscience, and my country that I assumed, and without delay reported the fact to General Jackson, at Nashville, and General Gaines, at Fort Hawkins, who sanctioned the measure by their silence; and I cannot but feel surprised that the subject should be made one of inquiry at this late hour.

Every act of my military life has been open as midday, sir; and, proudly conscious of the rectitude of my conduct throughout the whole course of my service, I will most cheerfully meet any investigation that may be judged necessary, should the honorable Secretary of War be of opinion that the orders which are the subject of this communication were not warranted by circumstances, and called for by the interest of the public service.

I have the honor to be, very respectfully, sir, your most obedient servant,

WILLIAM KING, *Colonel 4th infantry.*

Brig. Gen. D. PARKER, *Adjutant and Inspector General.*

No. 2.

3d Charge, 2d Specification.

Letter from Colonel King to Lieutenant Houston, 7th infantry, received November 1, 1818.

DEAR SIR:

Mr. Wilson will deliver you your appointment to the 7th regiment. If you would prefer remaining in the 4th, make application through me, and I will obtain a transfer for you if it be practicable.

Do me the favor to pay to Neilson & Randolph the sum of five hundred dollars for me, and I will refund it to you when I return. Get from Mr. Hogan all the money he owes you, and call in the claims against the United States for payment.

Yours, with esteem,

WILLIAM KING.

P. S. Unless you can get a barge load of rations here, it is not worth making a purchase of a smaller quantity under the order of the 1st.

W. K.

To Mr. HOUSTON, *7th infantry.*

No. 3.

3d Charge, 4th Specification.

Russell & Co.'s account with Colonel King.

Account of sales of six barrels of pork and ten barrels of fish, for account of Colonel William King, by Russell & Co., Mobile.

1817, Dec. 30,	To 1 barrel of pork, cash, to Messrs. Kengery and Swett, at $30,	- -	$30 00
" "	To 1 barrel of pork, cash, to Barge S. Pane,	- - - -	30 00
" "	To 2 barrels of pork, 60 days, Jesse O'Neal,	- - - -	60 00
1818, Jan. 1,	To 1 barrel of pork, cash,	- - - - -	30 00
" May 18,	To 1 barrel of pork, cash, R. Tankersby,	- - - -	30 00
" "	To 1 barrel of herrings, R. Tankersby, at $5,	- - - -	5 00
			$185 00
	Deduct commission and storage, 5 per cent.	- - - -	9 25
			$175 75

One barrel of herrings delivered to Messrs. Motley & Co., or to Colonel King's order.

Errors excepted,

RUSSELL & Co.

MOBILE, *May* 16, 1819.

Received of Colonel King, to be sold for his account, pork, cost in Baltimore twenty-four dollars; imported in the ship General Hand, and received December 18, 1817.

No. 4.

2d Charge, 4th Specification.

Colonel King's charges against J. B. Hogan, paymaster 4th infantry.

Extracts from the charges and specifications preferred against John B. Hogan, Esq., paymaster fourth regiment infantry, by Colonel William King, fourth infantry, commanding eastern section, eighth military department.

"Charge 5th. Violation of the thirty-ninth article of the rules and articles of war, by misapplication of public money.

"Specification 1st. In loaning, some time in the month of January, 1819, to the firm of Messrs. Neilson & Randolph, sutlers of the fourth infantry, the sum of fifteen hundred dollars, more or less, out of the funds placed in his hands for the payment of the troops in the service of the United States, thereby putting it out of his power to pay off the fourth regiment infantry, when ordered to do so by the commanding officer of the department, on or about the 10th day of February, 1819."

WILLIAM KING,

Colonel 4th infantry, commanding E. S. 8th Military Department.

S. D. HAYS, *Judge Advocate Southern Division.*

CANTONMENT MONTPELIER, *February* 22, 1819.

Colonel King's note to Major Hogan.

MY DEAR SIR:

I set out for Pensacola to-morrow, and must ask of you the loan of $300 until pay day.

The failure to sell my cotton will lay me under the necessity to use here part of the money I had intended to lay out in Maryland for negroes. This I must raise by letting Neilson have a bill on Baltimore for $1,000; but, as it is possible he may not be able to raise all the money, will you assist us by making him an advance until pay day? out of which you shall be refunded what you have been so good as to loan me.

Your servant,

J. B. HOGAN, Esq. W. KING.

14th January, 1819, sent the $300 per Corporal Clark.

No. 5.

2d Charge, 4th Specification.

Letter from Colonel King to J. B. Hogan, Esq., in answer to a private letter.

SIR: FEBRUARY 13, 1819.

Your private letter of yesterday is received. I regret, as much as you can, the unfortunate difficulty which exists with regard to the payment; but the business has now gone too far to stop, were it possible for me, under any state of things, to sacrifice my military character to my private convenience; but that, I boldly affirm, is impossible. It is my desire to live on the best terms with the officers of my regiment, more particularly those of the staff; but I can never consent to yield my opinion on a point of duty to that of any man, not my superior in rank and service.

With regard to the exchange of the bills in your possession, for those current at Pensacola, it never was, I assure you, my wish or expectation that any loss to you should result from the exchange; my wish was to bring the question before the Government, and I took it for granted the course I adopted would have that effect, unless your money had been in the bills of the Tombeckbee bank, for which specie could have been obtained.

On the subject of inconvenience and loss to the sutlers of the regiment, however much I might, on their account, regret it, yet I cannot consent that a payment shall ever be delayed one moment for their accommodation.

The circumstance connected with this business, that gives me the most uneasiness, is the fact of my having, as you give to understand, been one cause of your present embarrassment by asking you if you could assist Neilson & Randolph to purchase my bill on Maryland. But, again, I repeat, that no personal consideration can be allowed to have any weight with me where my professional duties are involved; they are sacred, and, whilst I hold a commission, shall be discharged without fear of censure, or hope of reward.

I am, sir, very respectfully, your most obedient servant,

W. KING, *Colonel 4th infantry.*

To JOHN B. HOGAN, Esq. *Paymaster 4th infantry.*

No. 6.

4th Charge, 15th Specification.

Extract from Regimental Order, 12th August, 1819.

Sergeant Whetten will be permitted to go on furlough until the expiration of theerm of service.
Certified: December 1, 1819.

W. H. BARCLAY, *Acting Adjutant.*

The accused, in open court, voluntarily admitted the foregoing order to have been made by himself.

S. D. HAYS, *Judge Advocate S. D.*

4th Charge, 15th Specification.

4th Regiment Order.

Sergeant William Gary, second light company, having, with the approbation of the major general, been indulged with leave of absence until the 16th day of August next, when his term of service expires, is, with his own consent, to be mustered as a private sentinel until further orders.

By order:

H. WILSON, *Adjutant 4th infantry.*

CANTONMENT MONTPELIER, *March* 18, 1817.

Certified: December 1, 1819.

W. H. BARCLAY, *Acting Adjutant.*

No. 8.

4th Charge, 4th Specification.

PENSACOLA, *August* 10, 1819.

4th Regiment Order.

Complaints having been made to the colonel commanding, that the soldiers are getting into the habit of committing depredations on the citizens, gentlemen in command of companies are called upon to prevent such disturbance in future, and they will use every effort to find out the perpetrators of the irregularities which have already taken place, in order that the most exemplary punishment may be inflicted.

Patroles will be sent through the town every hour to take up stragglers, and every man found out of his quarters between tattoo and reveille, may expect to receive *fifty lashes*, and be confined one month in the *black hole*, on *bread and water;* the commanding officer being determined to check all further depredations.

On Sunday next the regular parades, with arms at troop and retreat, will commence, and on that day the guards must be increased to one subaltern, two sergeants, three corporals, and thirty men, to be under charge of a captain, as officer of the day.

By order: R. M. SANDS, *Acting Adjutant.*

Certified: December 2, 1819:

W. H. BARCLAY, *Adjutant 4th infantry.*

No. 9.

4th Charge, 7th Specification.

PENSACOLA, *June* 28, 1818.

DEPARTMENT ORDER.

A general court-martial of five members, will convene at the president's quarters to-morrow morning at 10 o'clock, A M. for the trial of such prisoners as may be brought before it.

Captain McIntosh, fourth infantry, President; Captain Gale, fourth infantry, Lieutenant Scallan, first infantry, Lieutenant Sands, fourth infantry, Lieutenant Lear, fourth infantry, members; Lieutenant Wilson, will act as Judge Advocate.

By order: H. WILSON, *Dep. Adjutant.*

PENSACOLA, *June* 29, 1818.

At a general court-martial, pursuant to the above order, of which Captain McIntosh is President, was tried private William Newby, of the fourth regiment of infantry; arraigned on the following charge and specification, preferred against him by Lieutenant Wilson.

CHARGE. *Desertion.*

Specification. In deserting from the third battalion company fourth regiment infantry, whilst stationed at Fort Hawkins, Georgia, between the 14th of February and the 13th of March, 1816.

HENRY WILSON, *Adj. 4th infantry.*

To which charge and specification the prisoner pled guilty. The court, after mature deliberation, find the prisoner, William Newby, guilty as charged, and sentence him to have his left ear cut from his head, receive fifty lashes on his bare back, on the grand parade, have his head shaved, and drummed out of service.

The court then proceeded to the trial of Henry Benner, a private of the eighth battalion company fourth regiment United States' infantry; arraigned on the following charge and specification:

CHARGE. *Desertion.*

Specification. In deserting from the eighth battalion company fourth regiment United States' infantry, whilst on guard, and stationed at cantonment Montpelier, on or about the 11th June, 1817.

J. H. GALE, *Capt. 4th infantry.*

To which charge and specification the prisoner pled guilty. The court, after mature deliberation, find the prisoner guilty as charged, and sentence him to receive fifty lashes on his bare back, his head shaved, and drummed out of service. The court has been induced to award this lenient punishment to the prisoner, in consequence of the possibility of his being on his way to surrender himself when apprehended, as stated by him in extenuation of punishment.

The court adjourned to meet to-morrow.

The court met pursuant to adjournment; all present. The proceedings being read over, the court beg leave to recommend to the clemency of the commanding officer, for a remission of so much of the sentence passed on private William Newby as relates to cutting off his left ear.

The court adjourned *sine die.*

The commanding officer approves the foregoing proceedings of the general court-martial of which Captain McIntosh is President; but is pleased to remit the punishment, except the fifty lashes, which will be immediately carried into effect, and the prisoner return to duty.

By order:

HENRY WILSON, *Dep. Adjutant.*

Certified: December 1, 1819.

W. H. BARCLAY, *Act'g Adj. 4th infantry.*

No. 10.

2d Charge, 1st Specification, and 4th Charge, 15th Specification.

CANTONMENT MONTPELIER, ALABAMA TERRITORY, *November* 30, 1819.

I certify that Sergeant William Gary, of the second light company fourth regiment of infantry, was enlisted on the 17th August, 1812, to serve for five years, and was furloughed on the 17th March, 1817, at cantonment Montpelier, to the expiration of his term of service, by order of Colonel King, as appears by the books and documents of this office.

W. H. BARCLAY, *Act'g Adj. 4th infantry.*

No. 11.

4th Charge, 10th Specification.

PENSACOLA, *June* 19, 1818.

ORDERS.

In order to guard against the introduction of infectious diseases the following quarantine regulations are established, and will be carried into effect by the officer commanding at Fort St. Carlos de Barancas, until the 1st day of November.

1st. All vessels arriving from foreign ports will be made to ride quarantine for the space of ten days.

2d. All vessels arriving from New Orleans, or any port of the United States on the Atlantic coast, south of the Chesapeake bay, will ride quarantine for the space of five days.

3d. Vessels arriving from other ports of the United States may be permitted to proceed to town unless the health officer, after a careful inspection, shall be of opinion that either from disease having made its appearance, the nature of the cargo, or other cause, the health of the city might be jeopardized, in which case, the commanding officer will order such detention of the vessel as the health officer may judge necessary.

4th. When a vessel has rode out the quarantine, and, previous to her being permitted to get under way, the health officer will make a critical examination of the situation of her crew, passengers, &c. when, if he is perfectly satisfied there is no danger to be apprehended, the vessel may be discharged, but if he has any doubt on the subject he will report to the commanding officer, who will detain her until those doubts be removed.

5th. Should a vessel arrive with a case of contagious disease on board, it will be immediately reported to the colonel commanding, for his orders.

6th. Whilst a vessel is undergoing quarantine she will, from sunrise to sunset, wear her ensign in the mizzen shrouds, and the fort will be careful not to suffer her to have any communication with the main shore under any pretence whatever; but there is no objection to her crew landing on the island of Santa Rosa, for the purpose of taking fish.

7th. The health officer will visit every morning the vessels riding quarantine; and will muster and inspect the crews and passengers, and will immediately report the names and description of any person or persons, who may have presumed to land, in order that they may be seized and punished. No persons will be permitted to attend the health officer in those visits except his boat's crew.

8th. Doctor Walmsley is appointed health officer for the harbor, and will be respected accordingly. He will consider himself entitled to receive, as a compensation for his services, for the first visit $— for every vessel of or under one hundred tons, and $— from every vessel over that burthen; and for each succeeding visit one half that sum, independent of a reasonable charge for professional attendance, where it may be required.

By order:

HENRY WILSON, *Dep. Adjutant.*

No. 12.

4th Charge, 6th Specification.

PENSACOLA, *June* 19, 1818.

FOURTH REGIMENT ORDER.

At a regimental court-martial, convened on the 6th June, 1818, of which Captain Gale is President, was tried Corporal Roberts, on the following charges and specifications, exhibitited against him by Lieutenant Houston.

CHARGE. *Neglect of duty, and disobedience of orders.*

Specification. After being put on duty by Lieutenant Houston, at his quarters, on the 3d of June, 1818, he left them and went into Pensacola, where he became intoxicated with ardent spirits.

CHARGE 2. *Frequent intoxication.*

Specification. In being frequently intoxicated between the 10th and 13th June, 1818.

To which charges and specifications the prisoner pleaded *not guilty.*

The court, after mature deliberation on the testimony adduced, find the prisoner, Corporal Roberts, guilty, and sentence him to be reduced to the rank of a private sentinel, and to receive twenty-five lashes on his bare back.

The court then proceeded to the trial of private McNitts, of the eighth battalion company, on the following charge:

CHARGE. *Unsoldier-like conduct.*

Specification. In making use of insolent and abusive language towards Sergeant Gladden, on or about the 1st June, 1818.

To which charge and specification the prisoner pleaded *not guilty.*

The court, after mature deliberation on the evidence adduced, find the prisoner, McNitts, guilty as charged, and sentence him to receive, privately, forty-five lashes on his bare back.

The court adjourned *sine die.*

The commanding officer approves the foregoing proceedings, but is pleased, in the case of Corporal Roberts, to remit that part of the sentence ordering him twenty-five lashes.

By order:

HENRY WILSON, *Adjt. 4th infantry.*

Certified: December 1, 1819.

No. 13.

5th Charge and Specifications.

Extract from Regimental Regulations.

ARTICLE 50. A duty of five *per cent.* will hereafter be laid on all moneys collected by the sutlers, which shall constitute a regimental fund for the support of a *band*, and for such other purposes as will be judged best calculated to promote the interest of the regiment. The sutlers will therefore hand in to the adjutant the day preceding that on which the payment is to commence duplicate accounts of their claims against each company, one of which will be furnished the company officers, to regulate the collections of the sutlers, and the other filed in the Adjutant's office.

At twelve o'clock on the day after the payment, the sutlers will call on the adjutant and pay over to him the amount due under this regulation, taking duplicate receipts, one of which they will deposite with the colonel, or senior officer present.

The amount thus collected the adjutant will hold subject to the order of the commanding officer.

By order:

HENRY WILSON, *Adjutant 4th infantry.*

4th Specification, 3d Charge.

Colonel King's letter to the War Department.

SIR: BALTIMORE, *September* 24, 1817.

The house of Stump & Williams offer me the ship Congress, about to sail to New Orleans, for the sum of $2,000; they reserve to themselves the right of putting what heavy freight may offer on board, and giving me the privilege of transporting any number of men the ship can accommodate, provided she be despatched on or before the 1st day of November; the vessel to touch at Mobile, and allow the necessary time for the landing of troops, baggage, &c. With this offer I have closed, subject to the approval or disapproval of the Department, considering it a good one, as the sum of $1,200 was paid for the ship Aristides to Charleston.

Captain Hook has enlisted forty men, and entertains no doubt but he will be able to obtain at least as many more by the 1st of November. As Messrs. Stump & Williams are desirous of knowing as soon as possible whether they may consider their vessel as chartered, I will thank you to communicate your determination by the next mail. But, as I shall leave town in the morning, I will thank you to put your letter unsealed under cover to Captain Hook, who will first show it to Messrs. Stump & Williams, and then forward it to me at Easton.

With great respect, I have the honor to be your most obedient servant,

WILLIAM KING, *Colonel 4th infantry.*

Brigadier General D. PARKER, *Adjutant and Inspector General.*

3d Charge, 4th Specification.

Letter from General Parker to Captain Hook, enclosing a letter to Colonel King.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *September* 26, 1817.

Please to read, seal, and forward the enclosed letter to Colonel King. You will make inquiry for transportation of your recruits to Mobile. It is believed a vessel bound to New Orleans will take them on for one-half the charge reported by the colonel, which he states to be $2,000. You will muster and inspect the recruits which shall have been made at Baltimore for your regiment on the 30th instant, and report such as are mustered into service: they will not, however, be paid until further orders. When you are in want of funds for the recruiting service, you will state your accounts and transmit to me an estimate.

I have the honor to be, sir, your obedient servant,

D. PARKER, *Adjutant and Inspector General.*

Captain JAMES H. HOOK, *4th infantry, Baltimore.*

4th Specification, 2d Charge.

Letter from Colonel King to the Department of War.

SIR: OCTOBER 16, 1817.

I arrived here yesterday, and find that Captain Hook has not yet been able to obtain a vessel at the price limited by the department for the transportation of the Detachment to Mobile, which now amounts to seventy men. I do not believe a vessel suitable for the purpose will be obtained for less than the sum at which I have taken the Congress; but, if the Secretary will authorize me to pay $1,500, I will out of my own pocket make up the deficiency, whatever it may be, but I hope to be able to obtain one at that price.

Be pleased to answer me on this subject immediately, as I am very desirous to be off by the 1st of November, and we have not now one moment to spare.

With great respect, I have the honor to be,

WILLIAM KING, *Colonel 4th infantry.*

The ADJUTANT AND INSPECTOR GENERAL, *Washington.*

4th Specification, 3d Charge.

Letter from Colonel King to the War Department.

SIR: BALTIMORE, *October* 17, 1817.

I had hoped to have been favored with your reply to my letter of the 15th by to-day's mail, but was disappointed.

Four vessels are offered me for the transportation of my troops to Mobile; one at $2,000, and the other three at $1,500. That at $2,000 is by far the best calculated for our purpose, inasmuch as she has fine roomy accommodations between decks for the men; yet, as the Government have in one instance refused to give that sum, I have declined taking her, and have contracted for the only one of the other three that will at all suit; subject, as in the case of the *Congress*, to the pleasure of the Department.

Be pleased to communicate the decision of the Secretary on this subject to Captain Hook as soon as possible, that the owners of the vessel may not be kept in suspense. Should the arrangement be confirmed, it will be necessary that a sum of money should be placed in the hands of Captain Hook, for the purpose of laying in fuel, purchasing plank for temporary bunks, &c. &c.

I am, sir, your obedient servant,

WILLIAM KING.

To Brigadier General PARKER, *Adjutant and Inspector General.*

Letter from General Parker to Colonel King.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *October* 18, 1817.

I have received your letter of the 16th instant, and have laid it before the War Department.

I am now authorized to inform you that a proper vessel may be chartered for conveying all your recruits, &c., at the price you suggest, $1,500.

Write to Mr. Ervine, Commissary General, to learn if there is any clothing, or other supplies, which can be forwarded by the same vessel.

It is the wish of the War Department that the men should be sent on as soon as possible.

I sent to Captain Hook a uniform coat for Major Cutler, to go on with your baggage, and have so advised the major, agreeably to his request.

I have the honor to be, sir, your obedient servant,

D. PARKER, *Adjutant and Inspector General.*

Colonel WM. KING, *4th infantry.*

D. PARKER, *Adjutant and Inspector General.*

No. 21.

4th Specification, 3d Charge.

Letter from Colonel King to the War Department.

SIR: BALTIMORE, *November* 10, 1817.

Under the authority of the honorable the Secretary of War, to add to the original contract for the General Hand the sum which I should have to give another vessel, for the transportation of the detachment to St. Mary's,

I have agreed with the owners of that ship to land the troops at St. Mary's, for the additional sum of $1,175. This I believe to be at least as small a sum as any suitable vessel could have been had to go to St. Mary's for; and had another been chartered, the expense of getting the supplies, now on board the General Hand, delivered, stored, and reshipped, would have been considerable, independent of the damages to which her owners would have been entitled, while she was detained discharging; besides, the great object of the Government appears to be despatch; and under any other arrangement, a detention of a week or ten days must have taken place. Now every thing is in readiness, and we sail at an early hour to-morrow.

Had I chartered another vessel, there is not a doubt but Messrs. Boyle & Co. would have recovered the full amount of the first contract; and, indeed, so well satisfied were they of the justness of their claim, that they were perfectly willing to refer the question to any two merchants of the city. I therefore hope the arrangement will meet the approbation of the Department; and I do assure you that I would not again undergo the vexation and trouble which this business has caused me, for any consideration.

The sum received at Washington, on the 7th instant, being entirely inadequate to pay the transportation of the detachment, and place my quartermaster in funds, I have taken advantage of your suggestion, and drawn on the honorable Secretary of War, in favor of Messrs. Boyle & Co., for the amount of their account. The money on hand I shall turn over to the quartermaster, to be by him disbursed. This I beg you to explain to the Secretary, in order that no difficulty may occur when my draught is presented.

Colonel Brooke having been reported "*absent without leave*" for more than six months, I shall be constrained, by a sense of duty, to bring him before a general court-martial. I have therefore to solicit, that, should he report at your office, he may be ordered to repair to the head-quarters of the fourth infantry without delay, and not assigned to the command of Point Pętre, as was at one time contemplated.

I have the honor to be, most respectfully, sir, your obedient servant,

WM. KING, *Colonel 4th infantry.*

Brig. Gen. D. PARKER, *Adjutant and Inspector General.*

P. S. I have received dates of the 6th of October from Montpelier, but they are silent on the subject of a movement; I am, of course, led to believe the major general has given up his contemplated expedition.

W. K.

4th Specification, 3d Charge.

Letter from the War Department to Colonel King.

SIR: DEPARTMENT OF WAR, *November* 24, 1817.

Having furnished you with money to pay the transportation of the detachment of men enlisted by Captain Hook, from Baltimore to Point Petre, I regret that the necessity has been imposed upon me to refuse the payment of the bill which you drew on this Department for that purpose. Funds having previously been forwarded to General Gaines, on account of the quartermaster's department for the fourth and seventh regiments, which are under his immediate command, there was no necessity to furnish you with any on account of the general expenditure of the quartermaster's department, for the fourth regiment; the funds placed in your hands, therefore, will be applied to the particular object for which they were advanced.

I have, &c. &c.

GEORGE GRAHAM.

Colonel WM. KING, *4th infantry, Mobile.*

4th Specification, 3d Charge.

Letter from Colonel King to the War Department.

SIR: MOBILE, *December* 19, 1818.

Your letter of the 24th ultimo was forwarded to this place, and I have just received it, informing me that you had protested my bill in favor of Messrs. Boyle & Co. of Baltimore; and, however mortified I may be at the circumstance, I assure you I am relieved from a state of great perplexity; for, there being no agent left in this quarter to whom I could pay over the public money in my hands, nor bank in which it could be deposited, I was truly at a loss to disencumber myself of it. Fortunately, the captain was still here, and agreeably to your instructions, the money has been paid over to him.

I am, sir, very respectfully, your most obedient servant,

WM. KING, *Colonel 4th infantry.*

GEORGE GRAHAM, Esq., *Acting Secretary of War.*

WAR DEPARTMENT, *August* 11, 1819.

I certify that the above is a true copy from the original letter on file in this office.

C. VANDEVENTER, *C. C.*

No. 24.

4th Specification, 3d Charge.

Letter from the Secretary of War to Colonel King.

SIR: DEPARTMENT OF WAR, *February* 16, 1818.

Your letter of the 19th December last is received. Soon after I came into the Department, Messrs. Boyle & Co. presented your draught for $2,675, which the acting Secretary of War had noted for non-acceptance.

Impressed with the belief that the funds you had received, for the purpose of transporting your detachment to Mobile, might be usefully applied to other objects after your arrival at your destination, and, supposing that you had retained them with such motives, I directed the payment of the draught, and the amount to be carried to your debit on the books of the Third Auditor. You will be held accountable accordingly. Messrs. I have the honor to be, &c.

J. C. CALHOUN.

Colonel WM. KING, *Fort Scott, Georgia.*

WAR DEPARTMENT, *August* 11, 1819.

I certify that the above is a true copy of the original letter on record in this office.

C. VANDEVENTER, *C. C.*

No. 25.

4th Specification, 3d Charge.

Letter from Colonel King to the Secretary of War.

SIR: CAMP AT FORT ST. MARKS, E. F., *April* 27, 1818.

On the return of the army to this place, yesterday, I had the honor to receive your communication of the 16th of February last, acknowledging the receipt of my letter of the 19th of December preceding, informing me that my draught in favor of Messrs. Boyle & Co., of Baltimore, which had been protested by the late acting Secretary of War, had been paid by you, and the amount charged to my account on the books of the Third Auditor. The adoption of this course by Mr. Graham would have afforded me satisfaction, and promoted the interest of the service. But that gentleman having thought proper to dishonor my bill, and the public funds having been paid out of my hands by a positive order, under date of the 24th of November, 1817, I have to regret that the bill was ever redeemed; and as, on no principle whatever, can I be made responsible for the sum last paid to Messrs. Boyle & Co., I must leave it to the Department to adopt such measures for the recovery of that money from those gentlemen as you may think proper. In the mean time, I confidently flatter myself, you will order my account credited with the amount of the draught with which it appears I now stand charged.

The motives to which you are pleased to ascribe the course pursued by me, in this transaction, are precisely those by which I was governed; and, in order to remove any unfavorable impressions which may have been made on your mind by the *singular conduct of Mr Graham*, to use no harsher expressions towards that gentleman, permit me to make the following concise statement of the facts connected with the occurrence.

Under an order from the Department of War to transport from Baltimore (Maryland) to Mobile, a detachment of the troops belonging to the fourth regiment, I received, on estimate, the sum of $3,000, the one half for transportation, the residue on account of the quartermaster's department. The destination of the detachment being changed, after provisions, baggage, &c., had been embarked, and the owners of the vessels refusing either to give up the contract, or to leave the men at St. Mary's, without an additional compensation, the expenses were increased to nearly the amount of the public money in my possession, and I determined to draw on the Secretary of War for the amount of transportation, a course previously suggested by the Adjutant and Inspector General, holding on to the $3,000 for the use of my quartermaster, well aware of the almost impossibility of obtaining funds in the remote quarter to which I was about to repair.

With great respect, &c. &c.

W. KING, *Colonel Commanding.*

Hon. J. C. CALHOUN.

WAR DEPARTMENT, *August* 11, 1819.

A.

Colonel King's objection to pleading to certain charges and specifications exhibited against him.

I object, Mr. President, to plead to the following specifications of the charges on which I stand arraigned before this court:

To the third specification of the first charge, I object to plead, *because it is malicious and vexatious, and contains no offence.*

It is true, sir, that, in company with the prosecutor, I did visit Mobile, on the 6th of October, 1818; we arrived in the ferry boat from Blakely, at twelve o'clock, and I returned with the boat the same afternoon. I again visited Mobile, in company with my accuser, on the 3d and 4th January, 1819; we arrived from Blakely, at twelve o'clock on the 3d, and I left Mobile about the same hour on the 4th. I also travelled to, remained at, and returned from, St. Stephen's, on the 2d, 3d, and 4th of December, 1818, again in company with Major Hogan. We dined at his house at Montgomery on the 2d, and slept at my quarters, at Montpelier, on the night of the 4th; so that of the six days for which I am accused of having improperly drawn double rations, there is but one of them that I was not within my command. But what, Mr. President, if I had been without the limits of my department six times six days? I still retained the command, and was justly entitled to the double rations. General Gaines, when exercising the same command, has made St. Stephen's his head-quarters for weeks at a time; he recently retained command of the E. S. southern division, whilst accompanying the President on his tour of observation, as far as Lexington, Kentucky, many hundred miles beyond the limits of his district. General Jackson retained command of his division when at New York, last year; and, on the principle of my accuser, the commanding officer of a post forfeits his claim to double rations every time he goes beyond his chain of sentinels. The idea, sir, is preposterous.

I object, sir, to plead to the 1st specification of the 2d charge, *as being too loose and general, neither time nor place being set forth in the accusation.*

My sole object, Mr. President, in throwing out this specification, is to save an idle waste of time; for I am prepared to show that Sergeant Gary was furloughed by the authority of Major General Gaines, and discharged at the expiration of his term of service by Major Cutler, when I was in Maryland. In the case of Sergeant Whetten, who was as faithful a soldier as any in the army of the United States, I did, sir, what I had a right to do. I furloughed him, in August, 1818, for three months, and to save him the trouble of coming from South Carolina for his discharge, it was given to him with his furlough, dated, and to take effect, in the month of November following, when his term of service expired. With Sergeant Whetten I never formed a contract, but he was an active, capable, industrious, young man, and I promised him, that if he did return to this Territory, I would employ him as my overseer for the ensuing year. As for Sergeant Latta he was furloughed by Colonel Brooke for twenty days, and by that officer discharged, without any interference on my part, I believe.

Mr. Gary managed my plantation for two years, and Mr. Latta has had charge of it since March last; and, in the name of God, Mr. President, who but my prosecutor would ever have thought of making this a charge against me? Perhaps he wishes to be understood, that because my overseers were on furlough when I employed them, I got their services at a reduced price; but let the court overrule the objection to this specification, and I will show by the evidence of the prosecutor himself, that I allowed to both Mr. Gary and Mr. Latta more ample wages than any planter on the Alabama.

I object, sir, to plead to the 6th specification of the 2d charge, *as being too loose and general in its terms of accusation.*

In this case, the law requires that not only the time and place shall be clearly specified, but that the very words spoken be also set forth in the charge. The court are therefore bound to throw out the specification.

I object, sir, to plead to the 4th specification of the 4th charge, as being malicious and vexatious, and containing no crime.

Major Dinkins, with a detachment of two hundred recruits, drawn principally from the brothels and tippling shops of our seaport towns, arrived at Pensacola on or about the 6th of August, 1818; on the morning of the 10th, the magistrates of the town reported to me that those men had commenced a system of robbing and plundering that threatened the most serious consequences to the inhabitants, and prayed I would adopt measures to protect them. I accordingly issued the order alluded to in the specification, which is in the following words, viz:

FOURTH REGIMENT ORDERS.

PENSACOLA, *August* 10, 1818.

Complaints having been made to the colonel commanding that the soldiery are getting into the habit of committing depredations on the citizens, gentlemen in command of companies are called upon to prevent such practices in future; and they will use every effort to find out the perpetrators of the irregularities which have already taken place, in order that the most exemplary punishment may be inflicted.

Patroles will be sent through the town every hour to take up stragglers, and every man found out of his quarters between tattoo and reveille may expect to receive *fifty lashes*, and be confined one month on bread and water.

By order:

R. M. SANDS, *Adjutant.*

In giving this order, Mr. President, who but my accuser will say I crossed the line of my duty? He, I suppose, would have had me to follow the example of the notorious Nichols, and sit with arms folded, while the poor defenceless inhabitants of Pensacola, who have been for years alternately the prey of Spanish, Indian, English, and American rapacity, had their possessions laid waste by a licentious soldiery. I knew my duty better, sir, and had the order of the 10th failed of the desired effect, I would have resorted to measures of a much harsher character.

I object, Mr. President, to plead to the 6th, 7th, 8th, and 9th specifications of the 4th charge, as malicious and vexatious, and containing no military crime.

It is admitted, sir, that I did approve of the proceedings of the courts-martial referred to in those specifications, but in so doing I simply and conscientiously performed my duty, and violated neither the law of the United States nor the custom of the army. I deny, sir, that the laws of the United States prohibit corporeal punishment by stripes or lashes; and the rules and articles of war, which I am accused of having violated, are totally silent on the subject. It is true that the Congress of the United States did, on the 16th of May, 1812, repeal so much of the rules and articles of war as authorized the infliction of stripes or lashes, but here, sir, they wisely stopped—they added no clause of prohibition; and it is a rule of law, I understand, that the continuance of a custom, founded upon statute, is not actionable after the repeal of the statute, unless the law has declared the custom thereafter to be penal. The clause of prohibition was intentionally omitted, sir; for I have the authority of the then chairman of the military committee of the House of Representatives for asserting that the law of repeal was solely intended to promote the success of the recruiting service. The committee were well aware of the necessity for corporeal punishment in the army, and they were careful not to make the practice penal.

There is not, Mr. President, in the United States a camp, a garrison, or a corps, in which corporeal punishment, by stripes or lashes, has not been necessarily resorted to since 1812. I defy my accuser to produce an orderly book of the army that does not bear the record of sentences similar to those I sanctioned. Every general in service well knows that lashes are daily inflicted throughout the army. Why, if it is improper, has it never been forbidden? Because, sir, the law does not prohibit it.

In October, 1818, General Gaines, my commanding officer, approved the sentence of a general court-martial which awarded to a deserter the penalty of being branded on both cheeks and the forehead with the letter D. I hold in my hand, sir, that officer's approval of a sentence, which directs that an offender's *ears shall be cut off as close to his head as possible*. What law, Mr. President, authorizes such a punishment? None. What law prohibits it? None. Then, sir, those cases are precisely on the same footing, except that the punishment which I sanctioned is usual and customary, whereas the other is unusual and severe. And, Mr. President, it is a mockery of the wisdom of the Congress of the United States to say they would render penal the infliction of so simple a punishment as fifty lashes, and yet authorize a man's ears to be taken off close to his head. The one, sir, is a species of punishment common to almost every State of the Union for petty offences, whereas the other is never resorted to but for the most atrocious crimes.

Is this court prepared, Mr. President, to put down a practice on which hangs the discipline of the army? I trust not, sir. Punish me under these specifications, and when the gentlemen of this court resume their respective commands they will have their garrisons' ruin rest on their hands. Better, sir, far better, had you petition Congress to disband the army than adopt a course so fraught with ruin to the service.

Another very weighty reason may, I conceive, Mr. President, be urged, why I should not be compelled to plead to the 6th, 7th, 8th, and 9th specifications of the 4th charge. An officer cannot be made to account before a military tribunal for his vote or opinion as a member of a court-martial; and, on the same principle, the officer acting upon the proceedings of such court cannot be considered responsible, in a military sense, for his simple approval of the sentence. Both are liable to an action at civil law in a suit of damages, if the sentence be illegal; and the question involved in those specifications being one of law, a civil court is alone competent to decide upon it.

I object, sir, to plead to the 12th specification of the 4th charge. 1st. *Because it contains no offence; and, 2d. Because neither time nor place is laid in the accusation.*

What, sir, if I had employed the artificers of my regiment in making me a wagon for my plantation, ploughs for my plantation, and boots and shoes for myself and children? I only did that which the custom of the army, time immemorial, and the general order of 1799, republished in 1808, fully warranted me in doing. In every service of the civilized world, sir, artificers are permitted to work for the accommodation of their officers; and in every service, but ours, for individuals not attached to the army.

The truth is, however, Mr. President, that the wagon was not made for my plantation, and has never been within three miles of it. It is a light two horse wagon that I had built to haul fuel, forage, &c. for my family at this post, under an impression that Pensacola would never be re-occupied by the Spaniards. The return of my regiment rendered the wagon perfectly useless to me, and it has never been from under the shed, where it was put on its arrival, except once that it was loaned to Major Blue, and on another occasion when Major Dinkins borrowed it. With regard to the ploughs, it was a matter entirely between my overseers and the blacksmiths. I ordered my manager to get his work done at the shop of a citizen; some time afterwards he came to me and said, if I had no objection he could make arrangements with the army blacksmiths to do his work on Sundays and at nights, when they were permitted to work for themselves. I replied, it was a matter of indifference to me, provided the commanding officer of the post made no objection.

I will not take up the time of this court in noticing that part of the specification which relates to the boots and shoes; but I assert, without the fear of contradiction, that there is not in the army of the United States an officer of my rank who has derived fewer advantages of this kind from his situation than I have.

I object, sir, to plead to the 13th specification of the 4th charge, 1*st. Because it contains no military offence; and, 2dly, because no place is laid in the specification.*

It was not my duty, Mr. President, "to enforce the necessity of being very particular in obtaining the provisions as cheap as possible." I had only to designate an officer to make the purchases; and the regulations required that officer to accompany his bill on the department with an oath that the purchase had been made on the best terms that the state of the market afforded. What, sir, if I did say I cared not a *damn* what the rations cost the contractor; to get them at any price; that it made no difference to me (as it made none to the United States,) if they cost one dollar the ration? Sir, the more the ration cost the contractor the more I was pleased; it was a just punishment for his shameful negligence, which I will show to the court, under the succeeding specification, was, perhaps, unexampled even in our service.

I object, Mr. President, to plead to the 15th specification of the 4th charge. 1st. Because it contains no military offence; 2dly, because the case of Sergeant Gary (who was furloughed by the authority of General Gaines, and discharged by Major Cutler,) is void by act of limitation; and, 3dly, because the time and place is not laid with sufficient precision.

Granting that I did furlough and discharge men, I only did that which, under the 11th and 12th articles of the rules and articles of war, my commission fully empowered me to do. But, in no instance, sir, did I ever furlough a soldier, unless on the recommendation of his commanding officer; and where the furlough was granted to the expiration of the period of enlistment, surely there could be no impropriety in giving the discharge, so dated as to take effect at the time the soldier would be entitled to receive it; no inconvenience or embarrassment resulted to the service, and a meritorious and faithful individual (for to no other was the indulgence extended) was saved the trouble and expense of a journey of perhaps several hundred miles.

I object, Mr. President, to plead to the first and second specifications of the fifth charge. 1st. Because the specifications contain no offence. 2dly. Because the regulations taxing the sutlers were made in April, 1817, and is void by act of limitation.

In April, 1817, I published a standing regimental order, containing fifty-four articles, for the government and economy of the fourth regiment. The 50th article of this order is in the following words, viz: "A duty of five per cent. will hereafter be levied on all moneys collected by the sutlers, which shall form a regimental fund for the support of a band, and for such other purposes as may be judged best calculated to promote the interest of the regiment. The sutlers will, therefore, hand into the adjutant, on the day preceding that on which the payment is to commence, duplicate accounts of their claims against each company. One copy of which will be furnished the company officers, to regulate the collection of the sutlers, and the other filed in the adjutant's office. At twelve o'clock, on the day after the payment, the sutler will call on the adjutant, and pay over to him the amount due under this regulation, taking duplicate receipts for the same; one of which will be deposited with the colonel or senior officer present. The amount thus collected the adjutant will hold, subject to the order of the commanding officer." This, sir, is the head and front of my offence; no more.

Had I levied this duty for my own private advantage, Mr. President, I should have sinned against the 31st article of the rules and articles of war, and been liable to punishment; but the order itself expresses the purpose for which the duty was laid, and I am not even accused of having laid it for any other. 'Tis true, the first specification says, "I never publicly accounted for the same." Nor was I, sir, bound to do so; the fund was the property of the regiment, and the public had nothing to do with it. The money was collected by the adjutant, and by him held, as regimental treasurer, subject to the order of the commanding officer for the time being. Should the court overrule the objections, I am prepared to show that the money has, from time to time, been expended in support of the regimental band, except about two hundred dollars, which, at the desire of the officers, was expended in fitting out a youth of singular promise, who had been patronized by the regiment, and, on the recommendation of the officers, appointed a cadet at West Point.

The prosecutor says, the duty compelled the non-commissioned officers and privates to pay five per cent. more to the sutler than elsewhere, and that it was partial and unequal, as it did not extend to the officers of the regiment. A reference to the order will show that he is mistaken in both positions. The tax effected the profits of the sutlers, not the pay of the soldier, and the regulation extends the duty to all moneys collected by the sutler.

It is unnecessary, I presume, sir, to apprize this court that the custom of taxing the sutlers for the benefit of the regiment or post, has long been common to the service. It is done in the regiment of light artillery, and the second and sixth infantry, to the north, and in the first regiment of infantry, if I am correctly informed, Mr. President, as well as the fourth, to the south. In the fourth regiment the regulation was made under the very eye of the commanding general, and, until the charges on which I stand arraigned were put into my hands, I never heard one word against the propriety of the measure, and no person but my accuser would ever have thought of making it a crime.

I again repeat, Mr. President, that my sole object in making the foregoing objections is to save an idle waste of time; for the accusations, though proven to the utmost extent, amount to nothing when stripped of their technical phraseology. There are other specifications to which I conceive very weighty objections might be sustained, but they are specifications that involve my character as an officer and a gentleman, and, therefore, I wish them to become the subject of investigation.

WILLIAM KING, *Colonel 4th infantry.*

B.

Colonel King's request to the court to delay the trial, for further evidence.

Mr. PRESIDENT:

It is with extreme regret I have to state to the court that I am not fully prepared for trial.

Under the fourth specification of the third charge, I want the testimony of Brigadier General Parker, who has been duly summoned, to prove that I was authorized to bring out my family, my negroes, and baggage, in the public transport. I want the deposition of Mr. Hugh Boyle, merchant, of Baltimore, the owner of the ship General Hand, to show that the destination of the detachment of recruits was changed after the provisions, wood, water, &c. &c. had been shipped, and the vessel ready for sea; and that he positively and peremptorily refused to give up the charter party for Mobile, or to permit the ship, then under engagement for New Orleans, to carry a freight of cotton to Liverpool, to touch at St. Mary's, for a less sum than three thousand dollars.

I want the deposition of George Graham, Esquire, late acting Secretary of War, to prove that, in this dilemma, I repaired to Washington, and reported to him the determination of Mr. Boyle, and that he ordered me to add to the original charter party for the "General Hand" the amount which I should have to pay for another vessel to transport the troops from Baltimore to Point Petre, (Georgia.)

Immediately on being furnished with a copy of the charges, I forwarded authority to take the depositions of Mr. Graham and Mr. Boyle, (of which the prosecution was duly notified,) and their answers to my interrogatories may, I presume, be expected by the last of the present month. The court will at once see how important this testimony is to my honorable acquittal of the charge, and they will, without hesitation, allow me the time necessary to obtain it.

But, Mr. President, as I am fully persuaded the prosecution cannot sustain the criminal features of the accusation, I have no objection to proceed to the examination of testimony, with an understanding that the court will allow me a reasonable time for the arrival of General Parker, and the depositions of Messrs. Graham and Boyle, should I hereafter consider them necessary to my complete justification.

WILLIAM KING, *Colonel 4th infantry.*

C.

4th Charge, 11th Specification.

Letter from Colonel Brooke to Colonel King.

FORT ST. CARLOS DE BARANCAS, *27th July*, 1818.

DEAR SIR:

I enclose you as correct a statement as can be obtained in the absence of Lieutenant Minton, of the amount of issues made at this post since the 29th of May, up to the present date. The sixty-four barrels of flour, reported as belonging to the United States, not surrendered with the fort by the Spanish authorities, and when you inquired whether or not any part of the provisions in deposite belonged to the United States, I supposed you to ask if all the rations at this post had been placed here by Mr. Tonkersly. Lieutenant Scallan turned over to Mr. Tonkersly all the United States' provisions, and took his receipt for them. I will thank you to refer to him, and his explanation must be conclusive as to what part of the issues already made belonged to the United States, and what part to Mr. Tonkersly.

I despatched Lieutenant Minton on command, to increase the certainty of the deserters being taken, because I believed that the best possible means of putting a stop to it; and when the soldiers once become certain that every effort will be made to overtake all deserters, the inducements to leave the service will be destroyed under the idea of the impossibility of escape. I think it highly problematical whether a command under a non-commissioned officer would return at this time to the post; and I am convinced that Peters's men will desert every good opportunity, and I doubt their obeying the order of killing the deserter, if apprehended in the province.

I wish very much a contract could be made for a supply of wood for this post. We have been using the dry wood near the work, and what was found here on its surrender, until it has been consumed. To procure it ourselves would subject the men to a very severe fatigue, and there is no other kind of wood within several miles but green pine. The bricklayers have been employed in completing the furnaces and repairing the magazine, which leaked very much every rain, and has been the cause of the great quantity of damaged powder at this post.

I am, with regard, your obedient servant,

GEO. M. BROOKE, *Colonel U. S. Army.*

To Colonel WILLIAM KING,
Commanding 8th military department, Pensacola.

D.

5th Specification, 3d Charge.

Letter from Colonel Trimble to Colonel King.

SIR: JANUARY 11.

The master of the steamboat will set out early in the morning, and calls on you for an additional sum for freight from Mobile to this place. Thirty-five dollars, for his additional trouble and detention, will, I think, be sufficient.

I am, very respectfully, sir, your obedient servant,

W. A. TRIMBLE.

Colonel W. KING.

The following accompanies this document.

Received, Montgomery, January 15, 1817, of Colonel King the sum of fifty dollars; being in full for the transportation of his furniture and stores from Mobile to the boat yard.

$50. B. LASSABE.

E.

11th Specification, 4th Charge.

Letter from Colonel Brooke.

DEAR SIR: FORT ST. CARLOS DE BARANCAS, *July* 22, 1818.

Three men from Peters's company deserted this evening, and in consequence of the state of interdiction in which we are placed, I have deemed it proper to inquire whether or not a command from this post shall be sent in pursuit. The desertions from this company alone is almost alarming. No less than eight men have deserted in twenty days. We have ten in confinement who have been apprehended some days since, whom I should wish court-martialed, as a severe example is necessary to deter others.

No new case of the small pox has occurred. A contract has been made with Mr. Ignatus to furnish fresh meat on the same terms allowed Collins, which I think is eight cents. A return for hospital stores has been enclosed to Lieutenant Brady, which are considered as very necessary.

I am, with sentiments of regard, your obedient servant,

GEO. M. BROOKE, *Colonel U. S. A.*

P. S. The deserters, it is believed, are gone on to Georgia; their names are, Sergeant Jos. Aikins, Corporal Thomas Morgan, and private William Carroll.

Since finishing my letter, I have learned that it is more than probable those deserters have taken the route to Tennessee. If I am permitted, I could send Lieutenant Minton, with several men on horseback, who would be certain to overtake them.

G. M. B.

F.

2d Charge, 1st Specification—4th Charge, 15th Specification.

CANTONMENT MONTPELIER, A. T., *December* 1, 1819.

It appears, from official documents on file in this office, that Sergeant Joel Whetten, of the 4th regiment of infantry, was enlisted by Lieutenant Watkins, on the 20th November, 1818, to serve for five years; and that he was discharged by Colonel William King, on the 19th November, 1818.

W. H. BARCLAY, *Adjutant 4th infantry.*

A true copy:

S. D. HAYS, *Judge Advocate, S. D.*

G.

2d Charge, 1st Specification—4th Charge, 15th Specification.

CANTONMENT MONTPELIER, A. T., *December* 1, 1819.

It appears, from official documents on file in this office, that Sergeant James A. Latta was enlisted by Lieutenant Smith, on the 25th day of March, 1814, to serve for five years; and was discharged by Colonel Geo. M. Brooke at this post on the 24th of March, 1819.

W. H. BARCLAY, *Adjutant 4th infantry*

H.

4th Charge, 15th Specification.

CANTONMENT MONTPELIER, A. T., *December* 1, 1819.

It appears, from the official documents on file in this office, that Sergeant William Gary, of the 2d light company, 4th regiment, was discharged by Major Enos Cutler, commanding at this post, on the 16th day of August, 1817.

W. H. BARCLAY, *Adjutant 4th infantry.*

I.

4th Charge, 15th Specification.

CANTONMENT MONTPELIER, *March* 18, 1817.

FOURTH REGIMENT ORDER.

Sergeant William Gary, 2d light company, having, with the approbation of the major general, been indulged with leave of absence until the 16th day of August, when his term of service expires, is, by his own consent, to be mustered as a private sentinel until further orders.

By order:

HENRY WILSON, *Adjutant 4th infantry.*

Certified:

W. H. BARCLAY, *Acting Adjutant, 4th infantry.*

K.

4th Specification, 3d Charge.

[*Private and unofficial. Enclosed in a letter under date 31st October*, 1817.]

DEAR SIR:

I have just been directed to make the enclosed order; and I hear, from the report of General Gaines, that he marched the whole of the 4th and 7th on the 1st October for Fort Scott, where they probably must be at this moment; and that the intention was to make war on the Seminoles. This the War Department has prohibited by a letter written to General Gaines this day, by Mr. Graham. Will it reach him in time? Mr. Graham says he is willing to allow you to go on to the Alabama with your family, and trust to your joining the general from that place, which I hope will accommodate your views in relation to your private affairs and your *black troops.** He says he cannot say any thing respecting the late cantonment of your regiment at Montpelier, not knowing what General Gaines intends to do, or what will become necessary. I did hope he would allow you to carry the men to Montpelier; but the enclosed is the arrangement.

D. PARKER.

Copy: S. D. HAYS, *Judge Advocate.*

* As this *unofficial and private* note is introduced by Colonel King to show that the War Department knew of and approved his taking his slaves in a public vessel, it seems proper to explain, in this way, the reasons for the note. It simply pointed at the approaching service of his regiment, information always desired by officers, and such as is never refused, in time of peace, to officers of his rank.

While in Washington, some short time previous to my writing the note, Colonel King had, in casual conversation, informed me he was cultivating a plantation in Alabama, where he was about sending many slaves, which would require his personal attention. *I did not hear when nor how they were to be sent.* I certainly did not suppose they were going with the troops; but I understood, from him, that his wife and children were going with him in the public vessel; an indulgence always allowed in transporting troops in that way.

D. PARKER.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *October* 31, 1817.

The acting Secretary of War directs that you supply the detachment of recruits of your regiment now at Baltimore with every thing requisite for their occupying a separate post; and that you land them at St. Mary's, Georgia, to be stationed at Point Petre. This arrangement is adopted in consequence of the movement of your regiment to Fort Scott, which General Gaines has advised the War Department he has ordered, and the necessity of having a large force on the seaboard frontier of Georgia.

Colonel Brooke reported to me, by letter from Norfolk on the 17th instant, that he was on his way to Baltimore to repair to the head-quarters of the 4th infantry by water; the War Department wishes that he may be left in command at St. Mary's.

Lieutenant Shomo starts from this place for Baltimore to-morrow; this will give three officers to the detachment, and, after landing them, will leave you at liberty to repair to the head-quarters of your regiment. Colonel Bomford informs me that all the necessary equipments can be furnished by the Ordnance Office at Baltimore.

Transmit an estimate for funds, and report the time you will be able to start from Baltimore.

If the vessel you have chartered will not land the men at St. Mary's on the terms agreed upon for the Alabama, you must give her up and take another.

I have the honor to be, sir, your most obedient servant,

D. PARKER, *Adjutant and Inspector General.*

Colonel WILLIAM KING, *4th infantry.*

A true copy from the original:

S. D. HAYS, *Judge Advocate D. S.*

L.

4th Specification, 3d Charge.

MONTPELIER, (A. T.) *October* 2, 1819.

Interrogatories to be propounded to George Graham, Esq., late acting Secretary of War, and to be read in evidence before a general court-martial ordered to convene at Mobile, (A. T.) for the trial of Colonel William King, United States' army.

Interrogatory 1st. Have you any recollection of Colonel King's waiting on you, at your office, on or about the 3d of November, 1817, whilst you were acting Secretary for the Department of War, and reporting to you that Messrs. Hugh Boyle & Co., of Baltimore, the owners of the vessel chartered to transport a detachment of the 4th United States' regiment to Mobile, (A. T.) had refused to give up the charter-party, or to land the troops at Point Petre, (Geo.) for which place their destination had been changed by your order, for a less sum than three thousand dollars?

Interrogatory 2d. Did you, or did you not, refuse to give the sum of three thousand dollars for the said vessel, and say to Colonel King that it was important to the service that the detachment should be at Point Petre with the least possible delay; that, therefore, he (Colonel King) would immediately return to Baltimore, and, as the provisions, wood, water, and baggage of the detachment were on board the General Hand, and the ship ready for sea, he was authorized to add to the amount of the original charter-party of that vessel whatever he would have to give for another vessel to go to St. Mary's, (Georgia;) that if Messrs. Boyle & Co. were not willing to let the ship touch at St. Mary's on those terms, they must sue Colonel King for damages, or the subject might be left to arbitration?

WILLIAM KING, *Colonel 4th infantry.*

In answer to the foregoing interrogatories, this deponent saith: that he cannot now charge his memory with the precise date and sum therein stated; but he well recollects that, in the month of October or November, 1817, Colonel King reported in person to the Department of War, that the owners of the vessel which he had chartered to take the detachment under his command to Mobile, would not permit the vessel to touch at St. Mary's, to which post he had been subsequently ordered with the detachment, without they were paid a considerable sum in addition to that stipulated for in the original charter-party. I, then acting as Secretary of War, stated to Colonel King that the price agreed to be given for the transportation of the detachment to Mobile was a high one, and that the additional charge for landing the troops at St. Mary's was considered as an attempt to extort money from the Government, and ought not, on an ordinary occasion, to be submitted to; but that circumstances of a peculiar nature, and such as I was not then at liberty to communicate, made it necessary that the detachment then under his command should be placed at St. Mary's in the shortest time possible, and that it ought not to be delayed from pecuniary considerations. That being thus possessed of the opinion and views of the Department, he must return immediately to Baltimore and make the best arrangement in his power for the prompt transportation of the detachment to St. Mary's; and that, if it became necessary or advisable, he must abandon the original charter-party, and leave the parties to their recourse at law.

After Colonel King returned to Baltimore, he communicated to the adjutant general the arrangement he had made, and advised him that he had drawn a bill upon me for the amount of the transportation; this bill I refused to pay, not on account of the high price given, as Colonel King had been authorized to exercise a sound discretion on that subject, but because funds had been placed in his hands for that purpose, and it was believed that the quartermaster's department, to which he proposed to apply those funds, had been provided for otherwise.

GEORGE GRAHAM.

Letter from General Jackson to Colonel King.

SIR: NASHVILLE, *April* 13, 1819.

Your several letters of the 4th and 10th of February have been received. I regret extremely the embarrassed situation in which you have been placed, owing to the want of funds in the quartermaster's department. Not until the receipt of your last communication did I learn that you were without an officer of that department. More than four months have elapsed since Captain Hunt was ordered from New Orleans to join you, and I presumed he had obeyed his instructions. I have directed a strict inquiry into the cause of his neglect and disobedience of orders; and, if satisfactory reasons are not given, shall direct his arrest. Be assured, sir, I am far from attaching censure to your conduct, which has been highly satisfactory. I have read, with pleasure, your correspondence with General Echeviere. Your conduct in the evacuation of Pensacola, as well as on every other occasion, during your unpleasant command in the Spanish province, meets my entire approbation. You have, no doubt, heard of the cession of the Floridas to the United States: there is little doubt but that the treaty will be ratified by Spain; and I hope, in a short time, you will have the pleasure of relieving the Spanish general again in command of the Barancas. Please to present my respects to Mrs. King.

Your obedient servant,

ANDREW JACKSON, *Maj. Gen. Commanding.*

Colonel WILLIAM KING, *4th infantry.*

O.

COLONEL KING'S DEFENCE.

Mr. PRESIDENT: Patiently, and with the frankness and candor of a soldier, I have met this investigation—an investigation founded, for the most part, upon charges frivolous, absurd, vexatious, and unfounded, and well calculated, from the vindictive and rancorous malignity with which the prosecution has been conducted, on the part of my accuser, to arouse in my bosom feelings the very reverse of those which have governed my conduct. But, sir, strong in the righteousness of my cause, and confident that every act of my military life would stand the test of the severest scrutiny, I have viewed the impotent assaults of my accuser with calm contempt, under a conviction that his efforts to injure my character would, in the end, recoil with dreadful and overwhelming fury upon his own head. Yet, think not, Mr. President, that I have been insensible to the humiliating situation to which the machinations of my accuser, and the pleasure of the Government, has reduced me. An officer who, for eleven years, has prided himself upon the rectitude of his conduct; whose ambition has been to merit the promotion which the Government, in the hour of need, has showered upon him with an unsparing hand; and who retained his commission from the love of his profession, could not be indifferent to a reverse not more unexpected than undeserved. Most keenly, sir, have I felt my arrest; for at a blow it severed the tie that bound me to the army; and, with Othello, I may say, "my occupation's gone."

I shall pass over in silence, sir, the first and second specifications of the first charge; the second, third, and fifth specifications of the third charge; the third, fourth, fifth, tenth, and fourteenth specifications of the fourth charge; and the first and second specifications of the fifth charge; they are either utterly destitute of all claim to truth, or are raised upon a foundation of sand that will slide from under them at the touch of this court. Neither will I detain you, Mr. President, with any remarks in relation to the sixth, seventh, eighth, and ninth specifications of the fourth charge; the facts therein contained are fully admitted, and it rests with this tribunal to decide a question that, in my opinion, involves the discipline of the army. That you will give it the considerations its importance demands I am well persuaded; and should you determine that my conduct has been exceptionable, I stand prepared to pay the penalty you may impose.

The first accusation that I shall notice, is the fourth specification of the second charge; in this I am accused of inducing Major Hogan to loan public money, and then making it a charge against him. Here, sir, the prosecution has failed to establish the most important fact involved in the question, and without which the charge must fall, viz: That I actually knew the one thousand five hundred dollars, which I charged Major Hogan with improperly loaning to Nelson & Randolph was furnished them for the purpose which he alleges it was, that is, one thousand dollars to buy my bill on Maryland, and the residue to pay off the officers at Pensacola. Had I known this to be the fact, and yet preferred the charge, I should have merited the heaviest censure of this court; but, sir, I had every reason to believe the fact was not as the prosecutor states it; and, on the honor of a soldier, and the veracity of a gentleman, I always believed that the one thousand five hundred dollars had been loaned to Messrs. Nelson & Randolph for their private purposes, until Major Hogan's examination before this court. Had Captain Nelson been present I would have placed this business beyond every question of doubt; but his absence leaves me no alternative but to lay before the court a simple statement of the transaction as it took place.

In the month of January last, finding I should have to use here part of a sum of money that I then had in Maryland, I concluded to offer to Nelson & Randolph a bill upon my agent for one thousand dollars. Apprehensive they might not be able to raise all the money, and anxious to be sure of the sale of my bill before I left this post, I addressed to Major Hogan my note of the 14th January, stating the fact, and asking him if he would assist us, if necessary. He replied, he would to the amount of a few hundred dollars. The next morning I set out for Pensacola, but meeting Mr. Nelson a few miles from this place, I turned back and he breakfasted with me. In the course of conversation I inquired of him if he wanted a bill on Maryland for one thousand dollars, and told him Major Hogan would assist him if he could not raise all the money. He replied, he did not want money in Maryland; that all the money he could raise here, he could employ to advantage in buying up depreciated paper from the Spaniards at Pensacola; that his object in coming up was to obtain funds from Major Hogan, and that he was going on to St. Stephen's to get Orleans paper, or specie. Here the subject dropped, and I heard no more of it until Captain Nelson called at my quarters in Pensacola, about the 1st of February, and said he would be glad to get a bill upon Maryland, as Mr. Randolph, then in Baltimore, had requested him by letter to send on all the money he could raise. I accordingly gave him a bill for one thousand dollars, and he called on the 4th February and paid me for it; but not one word was said about Major Hogan's lending him the money, nor had I ever reason to believe Major Hogan had any agency in the transaction. That this is the fact, Mr. President, I appeal to the two gentlemen on this court, who sat in judgment at the trial of Major Hogan.

About the time the troops of the United States evacuated the province of West Florida a difficulty occurred with Major Hogan in relation to the payment of the regiment, and I determined upon arresting him. In one of

the letters that passed between us at this time, he mentioned, to my no little astonishment, the fact of his having furnished Nelson with $1000 to buy my bill on Maryland, and stated that he could not proceed to the payment until Nelson refunded him the money. My reply to the letter, mentioning this circumstance, is before the court. A few days afterwards I called upon Captain Nelson, in front of the mess-house, and inquired of him how much money he had received of Major Hogan on the 15th January; he replied $1,500; I asked him how much he had drawn out of the St. Stephen's bank for Major Hogan; he answered about $6,000, and added he had been authorized to use the half of it, but could only get $1,500 in the kind of money he wanted. I requested to know if any thing had been said on the subject of the bill I had offered to sell him on the 15th January; he replied, yes! that when Major Hogan gave him the $1,500, he observed, he might now buy my bill, but that he answered he did not want my bill. After this conversation, I naturally concluded that Major Hogan wished to take advantage of my letter of the 14th of January, to alarm me out of the measure of his arrest, lest I might myself become implicated; and, as I believed the money had been given to Captain Nelson for his private purposes, and not for my accommodation, or that of the officers at Pensacola, and as I felt no disposition to let one of my officers remain under an impression that I was in his power, I determined to make it a subject of public investigation, and accordingly embodied it in the specification of the fifth of my charges against Major Hogan, which I had not then made out. It is now apparent to me that Captain Nelson deceived both Major Hogan and myself; he availed himself of the information received from me, on the morning of the 15th January, to draw money from Major Hogan, and, after having turned it to his purpose, he came three weeks afterwards and purchased my bill. I believed Captain Nelson left this at the instance of my accuser, but am now persuaded it was measurably of his own accord, to prevent his exposure before this court.

Never, Mr. President, did I more reluctantly perform an act of duty than in adopting the measure of Major Hogan's arrest. To that gentleman I owed a debt of gratitude, which I would have paid at any price short of my professional character; and, at this moment, I feel disposed to forget the injury he has done me. When I set out for the Seminole war, I left a young and helpless family, in a strange land, without a protector, and under circumstances of peculiar delicacy. Soon after I left this, the hostile Indians, from Pensacola, began to murder the settlers, and apprehensions were entertained for the safety of those left at Montgomery, amongst whom was my family and Major Hogan's. The Major at once determined to retire to a place of safety; but, the situation of my family rendering their removal impracticable, he generously concluded to remain, and share their fate. With this circumstance fresh in my memory, think you, sir, I would willingly adopt a course pregnant with ruin to a man who had just rendered me so signal a service? Be assured I did not; but I had no alternative between his arrest and the complete prostration of a character, earned by years of toil, privation, and sacrifice, and which I prized more dearly than my life. He had, Mr. President, peremptorily refused to obey my orders; he had set my authority at defiance; he had neglected his duty, and, as I thought, attempted to scare me from the performance of mine.

The question to be decided under the third specification of the third charge is simply whether I did "direct Lieutenant Houston, acting quartermaster, to pay to Nelson & Randolph, on my private account, the sum of $1,000 in specie, out of the public funds." Lieutenant Houston, the person to whom the direction is said to have been given, and, therefore, the best evidence, testifies that I *requested* him to pay to Nelson & Randolph $1,000 in specie out of some public funds Lieutenant Wilson was expected to bring from New Orleans; that he understood he was to receive the like sum in bills, in return; and that he considered I was to derive no further benefit from the quartermaster's department in the transaction than the mere accommodation of exchange. To this court, it little matters what were the terms of the loan made to me by Nelson & Randolph; the transaction, so far as the quartermaster's department was concerned, was to be governed by the understanding that Lieutenant Houston had of my request; and, if the specie had come to hand, it is evident it would not have been paid over to Nelson, unless the bank notes had been delivered in return. The court will therefore acquit me of the specification on two grounds: first, that I did not *direct* Lieutenant Houston to pay over the money; and, secondly, that between Lieutenant Houston and myself it was intended to be a mere matter of exchange.

Although the evidence of Mr. Randolph has no bearing upon the matter of accusation, it is calculated, most materially, to affect the propriety of my conduct as an officer. He swears, peremptorily and positively, that I promised to repay the one thousand dollars loaned to me by him and his partner, out of the public funds expected from New Orleans, by return of Mr. Wilson. I am loath, Mr. President, to question the veracity of any man, but more particularly one whose moral character I have always highly appreciated. I have, therefore, the charity to believe, that Mr. Randolph and myself entirely misunderstood each other as to the repayment of the loan. In the presence of my God and of this court, I most solemnly declare, I never made him any promise to repay the thousand dollars out of the public funds. My general character, sir, as a man of discretion, is known to every member of this court, and admitting the fact that I would use the public money for my private purposes, is there in this room a gentleman who can think me so very an idiot, as to place my character and my commission at the mercy of my sutlers by telling them of it? Sooner, sir, would I have set fire to the town of Pensacola than have done so! The improbability of the assertion, combined with the avowed hostility of the witness, and the deep interest that he has in my condemnation, speaks for itself, and needs from me no comment.

I now pass, sir, to the fourth specification of the charge of misapplication of public moneys. This specification embraces three distinct acts of offence: 1st, that I disbursed the sum of one thousand one hundred and seventy-five dollars of public money for my private purposes: 2d, that I brought out my family, my negroes and my furniture, and a large quantity of provisions, in a public transport; and, 3dly, that I speculated on part of the provisions after my arrival at Mobile.

The correspondence between the Department and myself, the deposition of the then acting Secretary of War, and the evidence of Captain Wager, completely refutes the first feature of the charge.

That I brought out my family, my negroes, and my furniture, in the General Hand, is admitted, but they cost the Government not a cent; and had I left them in Maryland, as I contemplated when I first heard of the intended movement of the 4th regiment to Fort Scott, and as I certainly should have done, had I for a moment believed we were going to get up an Indian war in this country, the charter money for the transport would have been precisely the same; her owner, sir, was too much a man of business not to take advantage of circumstances and get the most he could for the use of his vessel.

While I was employed in making arrangements for the removal of my family to this country, in the summer of 1817, I was called to Washington as the President of a general court-martial, ordered for the trial of Colonel Wharton, of the marine corps: whilst there, Captain Hook reported his success in recruiting for the 4th regiment, and I proposed to the Department that I should bring the men to this country with me, on condition that I was permitted to bring out my family, some negroes, and my furniture in the transport; this was assented to, and when the court was dissolved I was ordered to procure a vessel and take the detachment on with him. That I had permission to bring out my family, my furniture, &c. is clearly established by Captain Wager, who was told so by the adjutant and inspector general; that the Secretary of War knew I was coming out in the transport for the pur-

pose of settling in this country, is shown by the private letter of the adjutant and inspector general; for he there says, when he announces the change in the destination of the detachment, "*Mr. Graham is still willing to allow you to go on to the Alabama, and trust to your joining the general from that place, which* (the same letter adds) *I hope will accommodate your views in relation to your private affairs, and your black troops.*" And unless, Mr. President, you agree that I had permission to bring out in the transport my family, negroes, &c. how are you to construe my offer to the adjutant and inspector general under the date of the 16th of October, *to pay a part of the charter-money out of my own pocket, if they will agree to give a certain sum?*

The very proposition presupposes an understanding, that I was to derive some private advantage from the arrangement; otherwise, it is strange indeed, to hear an officer of the army offering to assist the Government to pay for the transportation of a detachment of troops. After landing the detachment at St. Mary's, the ship, on her way to New Orleans, touched at Mobile to deliver freight, and I came in her.

The third ramification of the charge is for having brought out in the ship and speculated thereon, a large quantity of flour and other provisions. Under this branch of the accusation, it is proven by Mr. Patten that he sold for me *six barrels of pork and one barrel of herrings*; and the prosecutor swears, that when I was on the Seminole campaign, my family let his family have a *barrel of flour!* Little did you suppose, Mr. President, when you heard of this speculation, that it was to dwindle down to the sale of some surplus sea stores, and my family accommodating Major Hogan with a barrel of flour. I had upwards of thirty souls on board the vessel to provide for, and humanity dictated I should lay in supplies for a long voyage. Fortunately our passage was prosperous; and on my arrival at Mobile I was compelled either to sell the stores that I could not bring up the river with me, or throw them away. I preferred the former course.

I now carry you, sir, to the 4th charge, of *neglect of duty and unofficerlike conduct.* But here the prosecutor has chosen a most unfortunate caption for his specifications; for, with a single exception, they all go to accuse me of exceeding my authority—not neglecting my duty.

The only point that has any claim to the consideration of the court, under the first specification of the fourth charge, is, whether a commanding officer is allowed the latitude of judging for himself, supposing an unusual occurrence takes place within his command, or is bound to put the Government and the service to the expense and inconvenience of a court-martial, although he may himself be satisfied there is nothing criminal to investigate. In the case under consideration, it was evident to me, as it must be to this court, that the death of Mason was the result of accident; that it was one of those unfortunate occurrences that could not be foreseen, and for which there was no remedy. I therefore at once determined not to prefer charges against Mr. Lear or the sergeant. Major Dinkins declined exhibiting them, and it became my duty to release the prisoners from arrest. Had charges been laid in, it would have been improper for me to have pursued the course I did; but I cannot think this court will censure me for having declined preferring charges that I was satisfied I could not support. Let the court admit the principle assumed by the charge, that a commanding officer is clothed with discretionary powers, but is bound to submit to the judgment of a legal tribunal any extraordinary circumstance that may occur within his command, and you at once pass a heavy reflection upon the conduct of General Gaines, General Jackson, and the head of the War Department himself, for not causing an inquiry into the propriety of my order to shoot deserters taken in the fact. The first passed over the order in silence, although it was given when he was present. The second, with his characteristic decision, approbated the measure; and the third, after calling for a report, permitted the affair to slumber for more than a year, and would never have revived it, but for the machinations of my accuser.

I will not long detain you, Mr. President, with the second specification of the fourth charge. It sets out with accusing me of having failed, refused, and neglected to do an act that would have been absurd and ridiculous in the extreme. In the name of Heaven, sir, into whose conduct was I to institute an inquiry? Into that of Sergeant Childress, who, it was evident to me, had fulfilled his orders like an honest and faithful soldier? Certainly not. Arrest the commanding officer for having given the order? That, sir, would have been a measure of folly; for the very order under which the sergeant acted was that which I would myself have given had I been present.

In compliment to Mr. Secretary Calhoun, I will notice the fifteenth specification of the fourth charge; for, although that gentleman has done me an injury he can never repair, yet I still entertain for his character the most profound respect, and am well satisfied that the error into which he has fallen originated in the purest motives. I cannot, therefore, prevail upon myself to mortify him so much as to pass over his charge in silence.

The honorable Secretary has, on the information of the prosecutor no doubt, charged me with having, in effect, frequently granted furloughs and discharges to "the men of the 4th regiment, several months before the expiration of their term of service." This mis-begotten bantling Major Hogan well knew would prove an abortion, or he would himself have fathered it.

The only instance established of my having granted a furlough to any man of my regiment, is in the case of Sergeant Joel Whetten; for I cannot agree that the case of Sergeant Gary, whose furlough was granted by General Gaines, comes under the charge. That I did grant to Sergeant Whetten a furlough for about three months, is admitted; but, sir, I owe the War Department no more accountability for that act, than I do for wearing my epaulets. The twelfth article of the rules and articles of war authorizes "every colonel or other officer commanding a regiment, troop, or company, and actually quartered with it, to give furloughs to non-commissioned officers, or soldiers, in such numbers, and for so long a time, as he shall judge to be most consistent with the good of the service;" I therefore simply exercised a positive right conferred upon me by the law.

That Sergeant Whetten was not discharged until the expiration of his term of service is in evidence; that he took his discharge with him is admitted, but it was useless to him until he served out his time, and without this document to carry with him his furlough would have been a burthen to him. The very circumstance of this case shows conclusively, that I could have had no sinister motives in granting the furlough, otherwise I would have withheld the discharge, in order to insure the sergeant's return.

Major Dinkins has told you that, in some few instances, when he granted furloughs to the men under his command, of from five to thirty days, immediately before their term of service expired, (and this the court will observe the law authorized him to do without any concurrence,) that, to save them the expense and trouble of returning for their discharges, they were made out and sent to me for signature, lest he might not be in command of the regiment on the day when they were to take effect. That the public service could sustain no injury from this kind of indulgence to the men on whom it was conferred is apparent, and I here take my leave of Mr Calhoun's specification.

I have reserved to the last, Mr. President, the eleventh specification of the fourth charge, which embraces a subject which has attracted the public attention in no inconsiderable degree, and will claim the most serious consideration of this court. This specification goes to accuse me of having given orders to parties sent from Pensacola in pursuit of deserters, to put them to death if overtaken within the province of West Florida, and of continuing and causing to be continued at Pensacola and the Barancas, the said order, during the whole period that those posts were held by the United States, and until Neil Cameron, a deserter from the 4th regiment, was put to death.

It is fully proven, and fully admitted, that I did give orders to parties sent in pursuit of deserters, to shoot them if overtaken within the province of West Florida. But the prosecution has failed to show that I ever caused such order to be given at the Barancas. That I am not, in the eye of the law, accountable for the fate of Neil Cameron, this court must be satisfied. He deserted when I was sixty miles distant from Pensacola, and the officer on whose order he was pursued and put to death was never authorized to give such orders on my responsibility.

In taking this view of the subject, think not, Mr. President, that it is my intention to shrink from the charge of my accuser, or that I am desirous to throw upon Major Dinkins any accountability for Cameron's death. In this business, sir, I set Major Dinkins the example; I formally approved of his conduct; I would myself have given the order, had I been present, and I stand here prepared to answer for it, as it may please the wisdom of this court to direct. Having thus boldly assumed the responsibility of the measure, I will now proceed to justify it.

At this distance of time, and with feelings lulled into apathy by a state of profound peace, it is impossible properly to appreciate the motives by which my conduct was governed in this transaction. To you, however, Mr. President, it is well known that, at the close of a campaign, and with all those ardent and high-toned feelings that war engenders glowing upon me, I had been left with a handful of men to defend a province just wrested by force of arms from a foreign Power. I was, to all intents and purposes, in an enemy's country; for the territory of Spain had been violated, her flag trampled upon, her strong holds carried at the point of the bayonet, and her garrison sent as prisoners of war to the Havana. I was within striking distance of a powerful dependency of the Spanish crown, and bound, upon every military principle, to hold myself in as complete an attitude of defence as if a formal declaration of war had taken place. The captain general of the island of Cuba, with ample means to wrest from the grasp of the United States the province I was left to defend, lay within three days' sail of me. Had he been a soldier, (and I was bound to consider him one,) he would have washed out, in the blood of my garrison, the reflection his master had cast upon his character for the loss of Fernandina. On that occasion, sir, in reply to his official despatch, he was told his Sovereign had expected his first communication would announce the recovery, not the loss, of Amelia island.

In this state of things, and at a time when the whole effective force within the province of West Florida fell short of two hundred and fifty men, desertions prevailed to an extent perhaps never before witnessed in the American army. Colonel Brooke reports, on the 22d July, "that the desertions from Peters's company alone is alarming; no less than eight men have gone off in twenty days; we have ten in confinement, who have been apprehended, and whom I want court-martialed, as a severe example is necessary to deter others." On the 27th of the same month, the same officer reports: "I have despatched Lieutenant Minton, on command, to insure the deserters being taken, because I believe that the best possible means of putting a stop to it; and when the soldiers become certain that every effort will be made to overtake all deserters, the inducement to leave the service will be destroyed, under an idea of the impossibility of escape. I think it highly problematical whether a command under a non-commissioned officer would return to the post; and I am convinced Peters's men will desert every good opportunity." This, sir, is the language of the officer commanding at the Barancas. Captain Wilson, then the adjutant at Pensacola, tells you that the men deserted in twos, threes, and fours, with their arms in their hands; and that, at one period, eight desertions took place from the garrison at Pensacola alone, in the space of three days. The number of men kept out in pursuit of deserters was so great as sensibly to impair our strength, and affect the ordinary duties of the garrison.

Under those circumstances, it became, I conceived, my imperious duty to stop the practice of desertion, by the application of such means as came within my reach, without being fastidiously nice as to their legality. I therefore gave orders to the parties sent in pursuit to shoot down the deserters, if overtaken within the province of West Florida, trusting that a few examples would have the desired effect.

This step I considered justifiable, from the necessity of the case; and I went upon the broad principle, that the soldier who deserts the standard of his country, especially when in foreign service, forfeits his life to the law, and that, in the eyes of justice, it little matters whether that life be rendered up at the foot of the gallows or on the bayonet of his pursuers.

The first instance in which I gave this order was in the case of a sergeant, a corporal, and a private of artillery, who went off together, towards the last of July. The pursuit came up with them some distance short of the line, but finding them asleep, they were secured, and brought back unharmed. I gave similar orders during the month of August, and with the like result. On the 1st of September I set out for this post, but left no instructions with the officer on whom the command of the garrison at Pensacola devolved, in relation to the pursuit of deserters. On the 16th of September, on my return to Pensacola, I came up to where a Spaniard had just interred the body of Neil Cameron; and any doubt that had before lingered in my mind respecting the propriety of the order that I had given to shoot deserters, was completely removed, by finding that an officer of Major Dinkins's merit, intelligence, and experience, had assumed the same responsibility. Trusting that the fate of Cameron would deter others from deserting, Major Dinkins was instructed not to give such orders again, until we saw the effect of one example. In the mean time, on the 26th September, the decision of the President of the United States in relation to the Floridas was communicated to me; and the order, which is the subject of charge, was never afterwards, to my knowledge, renewed.

Thus, sir, this business ended, and would probably never have revived, but for the vindictive malice of my accuser. A perverted statement of the case is furnished by the editor of the New York Evening Post, who raised the war-cry against military despotism; and instantly the enemies of General Jackson, the Government, and the army, join in, and the yell is resounded from Boston to New Orleans. Every act of violence and oppression that had been committed from Maine to Louisiana, from the Atlantic to the Lakes, is concentrated at this point, and heaped upon my shoulders.

With the calmness and contempt that I have met this investigation, I listened to the clamor; alike indifferent to its origin, its course, and its result.

From the singular manner in which this occurrence has attracted public attention, we are almost led to believe that it is the first instance, in any age or nation, where a deserter has been put to death without trial. But, sir, without going very far back into our own history, I can give you high precedent for the measure adopted at Pensacola. Whilst the American army was operating upon the North river, in 1779, desertions prevailed to such an extent as to claim the interference of the commander-in-chief. Orders were accordingly issued by General Washington, *to put to death, on the spot, every deserter taken in the fact;* and Colonel Read, a Representative in Congress from Maryland, stated on the floor of the House of Representatives, in the debate on the Seminole war, that, on a certain occasion, when a lieutenant, and commanding an outpost, he caused a deserter, taken in the fact, to be executed on the spot, and sent his head to the head-quarters of the army, where it was publicly exposed; and thus an effectual stop was put to desertion. I have the authority of the late General Pike for asserting that a deserter from camp Wilkinson was put to death, by order of Colonel Strong, in attempting to swim the Ohio river. If I am correct, the fact came, I suspect, within the knowledge of two members of this court. In 1809, a deserter

from the 6th regiment, then serving on the Lakes, was pursued into Canada, and there put to death by an officer of the regiment, I think Captain Cherry. Here, sir, the territory of Great Britain was violated, and for a time the affair made much noise, but it finally subsided without any investigation. Very recently, long since the death of Cameron, a deserter was put to death in the city of New Orleans, by an officer sent in pursuit of him. With the circumstances of that case I am unacquainted, but the conduct of the officer was justified, even by a civil tribunal.

Fallibility, sir, is the lot of man, and in giving the order in question I may have erred; but here, at least, I am safe from the suspicion of sinister motives. I had no private interests to consult, and no private feelings to gratify; I was alone actuated by devotion to the public service.

Where now, Mr. President, let me ask, are those mighty charges that have been sounded through this territory, until the welkin was made to ring again? They are gone, sir, gone to the tomb of the Capulets! At the touch of the hallowed wand of truth, they have faded away like the baseless fabric of a vision, nor left a wreck behind!

But does my accuser think to assail, with impunity, a reputation on which slander herself has never dared to breathe? Does he fancy that the Secretary of War will suffer himself to have been made the dupe of his artifices, and yet let him go unpunished? Can he suppose that, at a moment when the quartermaster's department is bankrupt, and the nation perhaps on the threshold of war, he has put the Government to an expense of twenty thousand dollars, and dragged all the most efficient officers of the division from their posts, for the mere gratification of his personal feelings; for surely, sir, he will not have the effrontery to say he had any public motive in preferring these charges: does he, I say, think to do all this, and not be called to render a strict account of his conduct? If so, he will find he deceives himself; for, unless the army has assigned to Mr. Secretary Calhoun a character to which he has no pretensions, this young gentleman will find his name stricken with reproach from the rolls of the army.

In closing my defence, Mr. President, I have but one request to make of this court. It is not, sir, an honorable acquittal that I have to ask: that your oath will compel you to render me. It is not to pronounce the charges on which this investigation has been held frivolous, malicious, and vexatious: that you will do, in justice to the service. But it is, sir, to urge this court to stamp with merited disapprobation a practice that has, of late, crept into the service, full fraught with consequences that will, in the end, prove fatal to the character, the discipline, and perhaps the very existence of this army. I allude, sir, to the custom of acting upon charges preferred by an officer in arrest against the officer by whom he was arrested. Never was the folly and impropriety of this practice more fully exemplified than on the present occasion. A subaltern under my command is guilty of five of the highest offences known by the military code, and I am most unwillingly constrained to arrest him. He feels that he has committed himself, and knows the only way to escape the punishment due to his offences, is, to induce an impression that his arrest has been caused by feelings of personal antipathy. He therefore gets up charges against me, whether well or ill founded he cares not, and forwards them direct to the War Department; at the same time, through the medium of the public papers, my character is assailed in the most shameless, wanton manner. We all know how tremblingly alive is the Executive of this country to the attacks of newspaper scribblers; and at a moment when apprehensions are entertained lest the sins imputed to me may be reflected upon them, the charges of my subaltern arrive; and, without regard to that subaltern's being in arrest and under trial on charges preferred by me; regardless of my rank, regardless of a character earned by a life spent in the public service, and thrice sealed with my blood, a sword that has been worn eleven years with honor to myself, and done "*the State some service*," is wrested from me.

Had the Department stopped here, sir, perhaps I might have submitted without a murmur; but, in their rage to strike at me, they lay prostrate every barrier raised by time and wisdom for the protection of the commanding officer in the discharge of his duty. They even order the arrest and trial of my subaltern suspended, that he may prosecute me! How is such conduct to be reconciled to the immutable principles of justice? how, Mr. President, to the dictates of common sense and common propriety? The effect which a measure like this, from the head of the War Department, is calculated to have upon the discipline of the army, is apparent to the most superficial observer; for what commanding officer, who has a turbulent subaltern to control, will venture on his arrest, when he knows that the loss of his own sword will be the necessary consequence of that subaltern preferring charges against him? Let no gentleman in commission view such a course with indifference, under an impression that he is himself beyond the reach of charges. Such, sir, was the delusion under which I labored at the very moment the order of arrest was put into my hands; and this court have seen on what foundation a man of vindictive passions, and who is insensible to all the finer feelings of the human soul, can build up charges of the most formidable appearance.

Mr. Calhoun supposes, perhaps, that the refutation of charges places the character of the accused upon the same ground it occupied before the arrest; but, had he been bred a soldier, sir, he would have been sensible of what I at this moment feel—that no sentence of a court, and no subsequent act of the Government, can do away the reproach which is implied by an arrest.

Mr. President, I have done; and in undertaking this defence I find I imposed upon myself a task, for which neither education, habit, nor pursuit, has fitted me. My case I cheerfully submit to your consideration; confident that in your award you will do justice to me, the Government, and the army. But, sir, whatever may be your sentence, I bear about me a proud consciousness of the purity and integrity of every act of my military life, that is not to be shaken by the decision of any earthly tribunal.

WM. KING, *Colonel 4th infantry.*

December 8, 1819.

No. 28.

Opinion of the Judge Advocate delivered to the court-martial held for the trial of Colonel King, of the fourth regiment of infantry.

Mr. PRESIDENT: I feel it were almost unnecessary for me to make many remarks upon the present occasion, because of the intelligence of this honorable court, and because of the overwhelming weight of the testimony adduced by the prosecution, which stands on your record, uncontroverted and unexplained by the accused.

I shall, therefore, confine my observations, for the most part, exclusively to the points of law involved in the case under consideration, and leave the application of evidence to this experienced and enlightened court.

Permit me, sir, in the first place, to call your attention to the law on the subject of furloughing and discharging soldiers which we find in the eleventh and twelfth articles of the rules and articles of war. From an attentive examination of the twelfth article it appears that every colonel or other officer commanding a regiment, troop, or company, and actually quartered with it, may give furloughs to non-commissioned officers and soldiers, in such numbers, and for so long a time, as he shall judge to be *most consistent* with the good of the service. This sentence evidently implies a strong negation, insomuch that, should it be found that a furlough has been granted for a

length of time the least inconsistent with the good of the service, it cannot be contended that the officer derives his authority for so doing from this article, but would, on the contrary, be held accountable for a violation of the law in its true spirit and meaning, and much more strict would this accountability be were it found that the furlough had been given by the officer for his own private purposes altogether unconnected with the public good.

Next, as to discharging soldiers, the eleventh article declares that no discharge shall be given to a non-commissioned officer or soldier before his term of service has expired, but by order of the President, the Secretary of War, the commanding officer of a department, or the sentence of a general court-martial. Here the law is strictly and merely declaratory of those who shall be allowed to give discharges, under any circumstances, before the soldier's term of service has expired, but perfectly silent as to the reasons or motives which should govern an officer in the exercise of his power, and there can be no question that he would be held responsible for the improper use or abuse of this as well as any other trust reposed in him by the Government, although left to his own conclusions wherefore a soldier might be discharged and himself justifiable in discharging him.

A soldier might be discharged, on account of inability or bodily infirmities, or by reason of a notoriously infamous and abandoned character, and in these cases the officer discharging him justifiable. But, surely, Mr. President, it was never intended that a man should be discharged four or five months anterior to his term of service, because he was a good soldier, and would make a very excellent overseer. And, most assuredly, an officer who could be actuated by such motives would be deemed unworthy, and held accountable for his conduct before a general court-martial.

And, Mr. President, the accused stands arraigned before you for having both furloughed and discharged soldiers frequently several months before their terms of service had expired, not with a view to promote the public service, but for his own private interest and convenience. It is, therefore, for you to determine how far the testimony spread upon your record goes to support the charge, and pronounce accordingly.

I shall next, Mr. President, call your attention to the law, of all others perhaps the most controverted, that of corporeal punishment by stripes or lashes. To ascertain how far, and in what manner, an American soldier, for any offence committed as such, may be punished by a military tribunal, we must advert to the original contract between the United States and soldier.

This contract is the enlistment, which is somewhat in the nature of an article of agreement, solemnized, on the part of the soldier, under the sanction of an oath; and by an implied pledge on the part of the Government of protection of all his rights and immunities not given up in the agreement itself; by which the soldier is bound "to bear true faith and allegiance to the United States of America, to serve them honestly and faithfully against all their enemies and opposers whomsoever, and to observe and obey the orders of the President of the United States, and the orders of the officers appointed over him *according* to the *rules and articles of war*."

This, then, is the surrender of civil liberty which the soldier makes, beyond that of any other American citizen, from the President himself downwards to the meanest subject. Farewell all equality in the protection of the law.

Let us then look to the rules and articles of war, and we shall find they consist of one act of the Congress of the United States with one hundred and one articles; which are nothing more or less than so many sections in any other act of Congress.

The twenty-fifth article provides "that if any non-commissioned officer or soldier shall be convicted of sending a challenge," &c. he shall suffer corporeal punishment at the discretion of a court-martial. Article twenty-six provides that if "any non-commissioned officer, commanding a guard, shall knowingly and willingly suffer any person whatever to go forth to fight a duel, he shall suffer corporeal punishment at the discretion of a court-martial." And any others, up to the eighty-seventh article, authorize this punishment, enumerating offences, at the discretion of a court-martial. In all these cases courts-martial might have inflicted stripes or lashes to any number they chose; but the supreme legislature of the nation, in their wisdom, judging of the future by the past, and apprehensive that inexperienced and indiscreet courts might abuse the power thus delegated to them, inserted the eighty-seventh article or section, viz: "no person shall be sentenced to suffer death but by consent of two-thirds of the members of a general court-martial, nor except in the cases herein expressly mentioned; nor shall more than fifty lashes be inflicted on any offender at the discretion of a court-martial," &c.

This is the restraining clause enacted for the express purpose of limiting a discretion which, but for this clause, it was thought might have been carried to any length, however cruel and inhuman. The Legislature here speak to courts-martial in language which cannot be mistaken. You shall not, in the exercise of a discretion heretofore used, as to the infliction of corporeal punishment, go beyond fifty lashes in this particular kind of corporeal punishment; but you are left to the full exercise of sound discretion in all other corporeal punishments recognised by the rules and articles of war, and therein defined and enumerated; to those articles you must confine yourselves, because the soldier never has consented to be governed by any other rule.

In the exercise of discretion, recognised by the rules and articles of war, it was never understood that courts should be left to their own capricious invention for new-fangled punishments; such as cutting off ears, branding, and the like; which goes to destroy the pride of the soldier, and leaves an indelible mark of infamy calculated to make the subject of it destitute and abandoned the remainder of his days; but courts-martial shall confine themselves to the punishments enumerated in the rules and articles of war; which are death, cashiering, dismission, suspension, imprisonment, reprimand, degradation, and confinement to hard labor, and, in the exercise of their discretionary powers, should consider themselves limited, as to kind and degree, by the known laws of the land. Again, some contend, that, inasmuch as the ninety-ninth article is subsequent, in order of arrangement, to the eighty-seventh which is the restricting clause, and inasmuch as that article gives to courts-martial discretionary power as to the offences not enumerated, and punishment undefined, that therefore the eighty-seventh article does not apply to it at all; but such is not the fact; for it must be recollected that all the rules and articles of war constitute but one single act of Congress; and, in the construction of that act, we must take all the articles under consideration together; in strictness (for it is a penal statute) such a construction as that they may all avail rather than perish; if this be correct it is manifest that the eighty-seventh article applies with as much force and propriety to the last as to the first of the rules and articles of war; and that, therefore, discretionary powers delegated to courts-martial by those articles with respect to the infliction of this particular kind of corporeal punishment, stripes or lashes, was, by the eighty-seventh article, restrained and limited down to fifty lashes; beyond which number they could not have gone without a palpable violation of law. But, Mr. President, Congress were not satisfied here; for conceiving this kind of punishment was too ignominious and destructive, as well of the pride of the American soldier as of the cause of the recruiting service, they passed the act of the 16th May, 1812; the 7th section of which reads thus: "And be it further enacted that so much of the act for establishing rules and articles for the government of the armies of the United States, as authorized the infliction of corporeal punishment, by stripes and lashes, be, and the same is hereby, repealed." This is a repealing clause of an act of Congress referring to a previous act on the subject of corporeal punishment, and we ascertain the identity of the act referred to by the

quotation of the repealing clause, as well as from the fact that there is but one act now in force on the subject therein referred to. Then, if it be granted (as it certainly cannot be denied) that courts-martial derive all their power of inflicting punishment from the rules and articles of war, the seventh section of the act of 1812 having repealed so much of all those articles as did authorize the infliction of punishment by stripes and lashes, the power which courts-martial possessed of inflicting such punishment died with that section of repeal, and is no where to be found in the code for the government of the army; and, Mr. President, it was in vain for the accused to say he did not so understand the law; as he has done in his objections to plead to the specifications; for it is one of his most important duties as an officer not only to understand aright the laws himself, but to have them read and explained to the soldiers under his command; and it was certainly improper that he should act under a law which he did not understand to the injury of the service and the subversion of the rights of the American citizen; it was even still more preposterous and absurd to suppose (as the accused has stated in his objections) that an American Congress should so far forget the character of the nation they had the honor to represent as to be in anywise accessary to a fraud to be practised on their fellow-citizens! For it were nothing less than an actual fraud and deception to hold forth to the world that a certain ignominious punishment heretofore commonly inflicted in our army was repealed and done away, and thus induce the citizen to enlist in the service of his country, under the belief that he would be exempt from this disagreeable punishment, when, on the next moment, his officer might give him five hundred lashes, and say there was no law against it, and therefore no law to punish him for it. Mr. President, if this were the fact it was in vain that our citizens became soldiers, and fight and win battles: what were all this *honor* to us if our civil liberties are surrendered as the price of it! The remarks here made, Mr. President, will apply with much more force to the case of ordering a supposed deserter to be shot down unheard, undefended; for the humanity of our laws presumes every man innocent until the contrary is proven; and where is the law which authorizes such procedure? None! And shall it be said, because there is no article of war which enumerates such a monstrous case as this, and defines the punishment, that the officer who so far forgets all law, both human and divine, shall therefore escape with impunity?

Having now taken a view, in discharge of my official duty, of such points of law as seem of most importance for the consideration of this honorable court, I shall rest the case with them, not doubting but, in their deliberations on the law and testimony, they will, in their final judgment and sentence, so commingle the sentiments of justice and mercy, as, on the one hand, to preserve the laws in their pristine purity, and, on the other, to impose on the accused, if guilty, such punishment alone as that consideration may demand.

S. D. HAYS, *Judge Advocate, D. S.*

APPENDIX.

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *February* 7, 1820.

GENERAL ORDER.

At a general court-martial begun and holden at Montpelier, in Alabama, on the 23d of November last, of which Lieutenant Colonel William Lindsay, of the corps of artillery, was president, was tried Colonel William King, of the 4th regiment of infantry, on the following charges and specifications:

CHARGE 1. *Violation of the fourteenth article of the rules and articles of war, by making and signing a false certificate with respect to his pay.*

Specification 1. In this, that the said Colonel King did keep and employ Elijah Holland, a private soldier of the 4th regiment United States' infantry, as his coachman and wagoner, during the months of August and September, 1818, and at the same time charging the United States for the pay of two private servants, viz. Cyrus and Tom, and Cyrus and Nan; and certified on his honor that he did not, for and during any part of the said time, (August and September, 1818,) use or employ in his service any soldier of the line of the army as a waiter or servant; thereby certifying and signing a false certificate with respect to his pay.

Specification 2. In that the said Colonel King did receive forage in kind from the quartermaster of the 4th infantry, during the months of July and August, 1818, at Pensacola, and charged in his pay account for the forage of four horses for the said months of July and August, 1818, amounting to sixty-four dollars, or thereabouts; and certifying on his honor that he did not receive forage in kind for and during any part of the said time, viz. the months of July and August, 1818; thereby signing a false certificate with respect to his own pay.

Specification 3. In this, that the said Colonel King did charge in his pay account for double rations, as commanding officer of the eighth military department east of the Alabama, for the months of October and December, 1818, and January, 1819, for the whole period, although he was absent out of the department on the 6th of October, 1818, and on the 3d and 4th days of January, 1819, at Mobile, and 2d, 3d, and 4th days of December, 1818, travelling to and from, and remaining at, St. Stephen's, and made no deductions, nor gave any credit, but did certify on his honor his account to be accurate and just, when, in fact, he had overcharged.

CHARGE 2. *Conduct unbecoming an officer and a gentleman.*

Specification 1. That the said Colonel King did enter into private contracts with certain non-commissioned officers of his regiment to become overseers of his negroes, and discharged them several months anterior to the expiration of their term of service, viz: Sergeant William Gary about five months, Sergeant Joel Whetten about three months, and Sergeant Latta one month.

Specification 2. That the said Colonel King did charge, in his pay account of August and September, 1818, for two private servants, and certified on his honor that he did not use or employ any soldier of the line of the army for and during said period, when, in fact, he did keep and employ Elijah Holland, a private of the 4th infantry, as his coachman and wagoner, during the months of August and September, 1818.

Specification 3. In this, that the said Colonel King certified on his honor that he did not receive forage in kind for or during the months of July and August, 1818, thereby to draw from the paymaster of the 4th infantry the allowance in money, when, in fact, he did draw forage in kind.

Specification 4. In this, that the said Colonel King did write a letter to John B. Hogan, paymaster of the 4th infantry, on or about the 14th of January, 1819, and forwarded it by Corporal Clarke, couched in the following words and figures, and which is hereto attached, and makes part of this specification, viz:

MY DEAR SIR:

I set out for Pensacola to-morrow, and must ask of you the loan of three hundred dollars until pay day. The failure to sell my cotton will lay me under the necessity to use here part of the money I had intended to lay out in

Maryland for negroes. This I must raise by letting Nelson have a bill on Baltimore for one thousand dollars; but as it is possible he may be unable to raise all the money, will you assist us by making him an advance until pay day, out of which you shall be refunded what you have been so good as to loan me?

Yours sincerely, W. KING.

To Major J. B. HOGAN, *Montgomery, per Corporal Clarke.*

thereby inducing the said J. B. Hogan, paymaster, to accommodate him, the colonel of his regiment, with one thousand dollars; and the month following, contrary to every principle of the gentleman and man of honor, he, the said Colonel King, among other charges preferred against the said John B. Hogan, produces that of a violation of the thirty-ninth article of the rules and articles of war, and specifies this particular act of friendship as a public crime.

Specification 5. In this, that the said Colonel King, contrary to his duty as an officer, and in violation of the principles of a gentleman, did, on or about the 2d of March, 1819, obtain from Lieutenant A. M. Houston, acting assistant deputy quartermaster general, duplicate receipts for the sum of $1,677, or thereabouts, of public money, and, in fact, only handed over to the said Houston the sum of $1,477 in cash, and his own due bill for $200, which due bill he neglected, as a gentleman, to lift for several months; thereby putting it out of the power of the said Lieutenant Houston to pay the debts due by the United States in the east section eighth military department east of the Alabama, and of which department the said Colonel William King had then the command.

Specification 6. That the said Colonel King has, at different times, and in many places, indulged himself in an unofficer and ungentlemanlike manner, in speaking in the most contemptuous terms of the military talents and qualifications of Major General E. P. Gaines, his immediate commanding officer.

CHARGE 3. *Violation of the thirty-ninth article of the rules and articles of war, by the misapplication of public funds.*

Specification 1. That the said Colonel King did, on or about the 1st of March, 1819, order Lieutenant A. M. Houston, acting assistant deputy quartermaster general, to pay Sergeant Childress, of the 4th regiment United States' infantry, the sum of thirty dollars, which he alleges was for the apprehension and delivery of Neil Cameron, a private of the 1st battalion company, 4th regiment infantry, when, in fact, said Sergeant Childress had put the said Cameron to death on or about the 16th day of September, 1819, in the woods, sixteen or seventeen miles from Pensacola, and had never delivered him to any officer of the United States' army, as the regulation required, but left him unburied where he had shot him; of all which circumstances said Colonel King was well apprized.

Specification 2. In this, that the said Colonel King did order and direct Lieutenant A. M. Houston, acting assistant deputy quartermaster general in the eastern section eighth military department, on or about the 26th day of October, 1818, to pay Messrs. Nelson and Randolph, sutlers 4th regiment United States' infantry, the sum of five hundred dollars, which was accordingly paid out of the public money placed in the hands of the said Lieutenant Houston, for the use of the quartermaster general's department in the east section eighth military department east of the Alabama, and which five hundred dollars were not due by the United States to the said firm of Messrs. Nelson and Randolph, but were due by the said Colonel King on his own private account with the said sutlers, and had no connexion whatever with the public service.

Specification 3. That the said Colonel King, on or about the 29th of November, 1818, did direct Lieutenant A. M. Houston, acting assistant deputy quartermaster general in the east section eighth military department east of the Alabama, to pay to Messrs. Nelson and Randolph, sutlers of the 4th infantry, the sum of one thousand dollars in specie, out of the public fund, which Lieutenant Henry Wilson, adjutant of the 4th infantry, was ordered to receive and convey from New Orleans, for the use of the quartermaster general's department at Pensacola; the said sum of one thousand dollars not being due by the United States to said sutlers, but was to repay them for the sum of one thousand dollars in Georgia or other notes, which had been lent by said sutlers to the said Colonel King, 4th United States' infantry, to enable him to commence his speculations in Pensacola property.

Specification 4. In that the said Colonel King, being ordered to take charge of a company or party of recruits of the 4th infantry, and being authorized to employ water transportation for the same from Baltimore to the Alabama Territory, did charter the ship General Hand, of Baltimore, Captain McNeil, and did ship on board the said vessel, and transport, at the public expense, thirty negro persons, (slaves,) or thereabouts; a large quantity of flour and other provisions, a part of which he speculated on, and sold on his arrival in Mobile; a heavy carriage, which he immediately shipped for New Orleans for sale; and a large quantity of salt fish, and four wagon loads of household furniture, consisting of a sideboard, tables, chairs, &c. &c.; and the destination of said company or party of recruits being altered from Mobile to Point Petre, or Amelia island, yet, nevertheless, the said Colonel King did, on the part of the United States, give the owners of said vessel the additional sum of $1,175 to convey the said company to its place of destination, (Point Petre,) and then to proceed with himself, his family, negroes, and freight alone to the town of Mobile, Alabama Territory; and for which latter service the United States were thus made to pay for the said Colonel King's private purposes the sum of $1,175, or thereabouts.

Specification 5. That the said Colonel King, having arrived in the town of Mobile, in the month of December, 1817, or January, 1818, on board of the ship General Hand, did take possession of a United States' schooner, the Amelia, and ship on board her his family, his negroes, his furniture, &c. &c., and convey them from the town of Mobile to the bayou near Fort Montgomery, A. T., all at the expense of the United States, although the said Colonel King was then under orders to join his regiment, which was well known to be at Fort Scott, and not at Fort Montgomery.

CHARGE 4. *Neglect of duty and unofficerlike conduct.*

Specification 1. In that the said Colonel King did neglect, fail, and refuse (although thereunto requested) to investigate the cause and manner of the death of Charles Mason, a private of the 8th battalion company 4th regiment United States' infantry, who was drowned in the harbor of Pensacola on or about the 2d of September, 1818, while undergoing a ducking, which was carried to such excess as to deprive him of life, and was inflicted by order of Lieutenant Lear, and executed by Sergeant Lewis Starks, without the form or authority of a court-martial, and entirely on his own responsibility; and although Major Dinkins, then commanding in Pensacola, immediately arrested the said Lieutenant Lear, and confined the sergeant until the return of said Colonel King from Montpelier, yet, nevertheless, the said Colonel King, on his return, totally failing, refusing, and neglecting to do his duty as an officer, had them both released without any trial or legal investigation whatever.

Specification 2. In that the said Colonel King, being then commanding officer of the province of West Florida, did fail, refuse, and neglect to cause an immediate inquiry into the circumstances attending the death of Neil Cameron, a private and deserter from the 1st battalion company 4th infantry, who was in the most cruel and inhuman manner put to death on the 16th September, 1818, by Sergeant Childress, of the 7th battalion company, in or about sixteen or seventeen miles from Pensacola, West Florida, although said Cameron had made no resistance,

but begged to be taken back and punished according to the nature of his offence by the sentence of a general court-martial.

Specification 3. In this, that the said Colonel King, commanding officer of the province of West Florida aforesaid, on or about the 27th day of August, 1818, at Pensacola, did neglect, fail, and refuse to see justice extended to Benjamin Tackwell, late a private of the 4th regiment United States' infantry, who had honestly served out his term of enlistment to within a few days, and, in consideration thereof, was furloughed and discharged from service; and, after he had left the town of Pensacola, was pursued, overtaken, and brought back, by a command ordered by Lieutenant Lear for that purpose, and carried to his (said Lear's) room, stripped, and compelled to receive on his bare back fifty lashes, contrary to the laws of the United States, and without the form or authority of a court-martial; which arbitrary, cruel, and ignominious punishment was inflicted on the said Tackwell after he had been in effect discharged, and without any good or sufficient cause; and he was then compelled to serve out the full term of his enlistment.

Specification 4. In this, that he, the said Colonel King, did encourage and enforce, in an unofficerlike manner, contrary to the laws of the United States and the rules and articles of war, the infliction of corporeal punishment, by stripes and lashes, by issuing and promulgating an order, on or about the 10th of August, 1818, at Pensacola, (and otherwise,) to this effect: that every man found out of his quarters between tattoo and reveille should receive fifty lashes, and be confined on bread and water in the black hole for the space of one month.

Specification 5. That the said Colonel King, contrary to his duty as an officer, and in defiance of the laws of the United States and the rules and articles of war, in their meaning and spirit, as regards the infliction of corporeal punishment by stripes or lashes, did, on or about the 31st day of August, 1818, at Pensacola, permit, carry, or cause to be carried into effect, so much of his said department order of the 10th of August, 1818, as related to the inflicting of fifty lashes on the person of John McCleary, a private of Captain Cummins's company 4th infantry, which was executed accordingly, although the said McCleary's term of service had actually expired.

Specification 6. That the said Colonel King, contrary to his duty as an officer, and in contravention of the rules and articles of war, and the meaning and spirit of a law of the United States, passed by the Congress thereof on the 16th day of May, 1812, section 7, which repeals the law authorizing the infliction of corporeal punishment by stripes or lashes, did, in defiance of said law, and in disregard of his duty as an officer, sanction the proceedings of a regimental court-martial, whereof Captain Gale of the 4th infantry was president, convened on the 16th June, 1818, at Pensacola, before which court were tried Corporal Roberts and private Whitty of the 4th regiment United States' infantry, who were both convicted, and sentenced to receive, viz: Corporal Roberts twenty-five lashes on his bare back, and private Whitty to receive, privately, forty-five lashes on his bare back; which said sentence and proceedings were approved on the 19th of June, 1818, in orders by the said Colonel King, there and then being commanding officer, and were carried into effect, except such part as related to the infliction of twenty-five lashes on Corporal Roberts, which the said Colonel King was pleased to remit, when, in fact, it was the duty of the said Colonel King, as commanding officer, to have disapproved of the whole proceedings and sentence, and called the attention of the court to the laws of the United States and the rules and articles of war, and to have enforced a strict conformity to them in every part of the department under his command.

Specification 7. In this, that the said Colonel King, contrary to his duty as an officer, and in open violation of the laws of the United States, and the rules and articles of war, in their true meaning and spirit, did, on or about the 29th day of June, 1818, sanction, in department orders, the proceedings of a general court-martial, whereof Captain John McIntosh was president, and Lieutenant H. Wilson judge advocate, before which said court was tried W. Newby, a private of the fourth infantry, on the charge of desertion, and found guilty, and sentenced to have his head shaved, his left ear cut from his head, and to receive, on the grand parade in Pensacola, fifty lashes on his bare back, and then drummed out of service, which said proceedings and sentence the said Colonel King, then commanding the eastern section eighth military department, did approve, but was pleased to remit, except the fifty lashes, which he ordered to be carried into immediate effect, and the prisoner to return to duty.

Specification 8. In this, that on or about the 29th day of June, 1818, the said Colonel King, then commanding the east section eighth military department, and acting civil and military Governor of West Florida, did sanction, in department orders, the proceedings of a general court-martial, whereof Captain John McIntosh, fourth infantry, was president, and Lieutenant H. Wilson judge advocate, before which court was tried private Henry Benner, of the eighth battalion company, fourth infantry, charged with desertion, and to which charge the prisoner pleaded guilty, and was sentenced to have his head shaved and receive fifty lashes on his bare back, and then drummed out of service; and the said Colonel King, contrary to his duty as an officer, and in open violation of the laws of the United States and the rules and articles of war, did approve of said sentence, and ordered so much of it carried into effect as related to the inflicting of the corporeal punishment, and compelled the prisoner to receive fifty lashes and return to duty.

Specification 9. In that the said Colonel King, commanding officer as aforesaid, did neglect and fail to take any steps whatever to prevent the frequent and open violations of the laws of the United States, and the rules and articles of war, by the infliction of corporeal punishment within his command, from the 1st June, 1818, to the 1st February, 1819, while the fourth regiment United States' infantry was stationed in Pensacola, but, on the contrary, did sanction, in orders, the frequent proceedings of regimental courts-martial within his command, which were in direct violation and disregard of a law of Congress, in its true spirit and meaning, and contrary to the rules and articles of war, which prohibit the infliction of corporeal punishment.

Specification 10. In this, that the said Colonel King did issue an order on or about the 19th June, 1818, while acting civil and military Governor of West Florida, establishing a quarantine law that every vessel arriving from the Havana, Mobile, and New Orleans, &c., should ride out a certain number of days below gunshot of the Barancas, and did enforce this order (as he alleges,) to prevent the introduction of infectious diseases, to the entire loss and destruction of one or more vessels which came there unprepared for riding out a quarantine, and afterwards the said Colonel King, in an unofficerlike manner, did order (viz. in the month of July,) a vessel direct from New Orleans to ascend to the town, without undergoing any quarantine, for no other reason but that she had a carriage on board belonging to the said Colonel King, commanding, &c.

Specification 11. In this, that the said Colonel King, contrary to his duty as an officer, and in open violation of the laws of the United States, and the rules and articles of war, on or about the 1st August, 1818, did issue a verbal order to the acting adjutant of the fourth infantry, Lieutenant Sands, then stationed at Pensacola, to select two confidential non-commissioned officers, and a suitable command for each, and send them in pursuit of some men of the fourth infantry, who were reported as having deserted, and if taken within the limits of the province of West Florida, instantly to have them put to death; but to be careful not to infringe on the civil laws of the Alabama Territory, for if taken above the line they must be brought back; and the said Colonel King, in an unofficerlike manner, and in total disregard of the laws of the United States, and the rules and articles of war, did continue and cause to be continued in force the aforesaid verbal order, issued as aforesaid, both at the Barancas and Pensacola,

during the whole period that those posts were occupied by the American troops, and until a private and deserter of the first battalion company, (Neil Cameron,) was overtaken by Sergeant Childress and his command, on or about the 16th day of September, 1818, within seventeen or eighteen miles of Pensacola, and there shot; although the said Cameron made no resistance, but, on the contrary, begged to be taken back and put on his trial, and punished as a general court-martial might direct.

Specification 12. In that the said Colonel King, contrary to his duty as an officer, did, from time to time, and at different times, viz: keep and employ at work the soldiers (mechanics) of his regiment, the fourth infantry, in making, for his own private use, a variety of articles, not warranted by any law of the United States, nor the rules and articles of war, viz: a wagon, worth nearly one hundred dollars, for the use of his plantation; ploughs for the same, and boots and shoes for his family.

Specification 13. In that the said Colonel King did, on or about the 14th day of February, and 11th day of May, 1819, give an order to purchase provisions, on account of the failure of the contractor, and instead of imposing the necessity of being particular in obtaining them as cheap as possible, did, on the contrary, make use of unofficerlike language to the officer or officers who had been ordered to purchase, saying he did not care a damn what the rations cost the contractor, but to get them at any price, as it made no difference to him if they cost a dollar per ration, or words to that effect.

Specification 14. In that the said Colonel King did fail and neglect to give orders in time to purchase provisions for the use of the troops at cantonment Montpelier, until the said troops were destitute of provisions, or nearly so, and then not allowing time enough to have the contract advertised, and the provisions purchased at a reasonable price, viz: in the months of February, March, and May, 1819, the purchases having been made by Lieutenants Houston, Heronimus, and Dulany, to neither of whom was sufficient time allowed to go into the market, advertise, and make the purchases at a fair price. The consequence was, those officers were compelled to give the contract to such persons as were prepared, knowing of the necessity of the post, and had calculated accordingly.

Specification 15. In this, that the said Colonel King, of the fourth United States' infantry, in an unofficerlike manner, and in contravention of the good of the service, has frequently given the men of the fourth regiment of infantry furloughs for several months immediately preceding the expiration of their term of service, and at the same time gave them discharges so dated as to take effect at the termination of the time limited in their accompanying furloughs, which was, in effect, to all intents and purposes, giving them discharges so many months before their term of service had actually expired, viz: the said Colonel King, of the fourth United States' infantry, did, in this way, in effect, and in fact, at cantonment Montpelier, between the 10th of March and 20th August, 1817, discharge Sergeant William Gary, of the fourth infantry, about five months anterior to the expiration of his term of service, and Sergeant Joel Whetten, fourth infantry, between the 10th August and 1st December, 1818, about three months before his term of service had expired.

CHARGE 5. Violation of the 31st article of the rules and articles of war.

Specification 1. In this, that the said Colonel William King, commanding fourth infantry, at Montpelier, on or about the —— day of September, in the year 1817, did lay a duty or imposition of five per centum on all the moneys collected for goods sold by Messrs. Nelson & Randolph, sutlers of the fourth regiment of infantry, to the non-commissioned officers, musicians, and privates, of the fourth regiment United States' infantry, and, contrary to his duty as an officer, and in open violation of the rules and articles of war, did demand, compel, and enforce the payment (through his adjutant) of the aforesaid duty of five per centum, thereby compelling the soldiers of the fourth infantry to pay five per centum more for the goods they bought of the sutlers than they could be obtained for in other stores in the country, which duty was to be expended, as he alleges, in support of a band, but never publicly accounting for the same.

Specification 2. In this, that the said Colonel King, contrary to his duty as an officer, and in violation of the rules and articles of war, did, by his own authority, and upon his own responsibility, lay a duty of five per centum on all the collections made by the sutlers of the fourth infantry, of the non-commissioned officers, musicians, and privates of said regiment, which duty bore peculiarly hard on the soldiers, inasmuch as it was partial and unequally laid, and has not extended to the collections made off the commissioned officers of the said fourth United States' regiment of infantry.

J. B. HOGAN, *Paymaster 4th regt. infantry.*

The prisoner being called upon to make his plea, objected to plead to the following specifications, viz:

Third specification, 1st charge; 1st specification, 2d charge; 6th specification, 2d charge; 4th specification, 4th charge; 6th, 7th, 8th, and 9th specifications, 4th charge; 12th specification, 4th charge; 13th specification, 4th charge; 15th specification, 4th charge; 1st and 2d specifications, 5th charge.

The court, after mature deliberation, decided that the prisoner shall not plead to the 3d specification, 1st charge; shall plead to the 1st specification, 2d charge; shall not plead to the 6th specification, 2d charge; shall plead to the 4th specification, 4th charge; shall plead to the 6th, 7th, 8th, and 9th specifications, 4th charge; shall not plead to the 12th specification, 4th charge; shall not plead to the 13th specification, 4th charge; shall plead to the 15th specification, 4th charge; shall plead to the 1st and 2d specifications, 5th charge.

The prisoner then pleaded "NOT GUILTY."

Finding and sentence.

After the most mature deliberation, the court find the prisoner, Colonel William King, fourth regiment United States' infantry, not guilty of the 1st specification, 1st charge; not guilty of the 2d specification, 1st charge; not guilty of the 1st charge.

The court find in the 1st specification, 2d charge, that the prisoner did furlough Sergeant Gary about five months before his term of service expired, and that he employed him as his manager or overseer; they also find that the accused did employ Sergeant Latta before his term of service expired; and they also find that he did discharge and furlough Sergeant Whetten about three months before his term of service expired. The court find him not guilty of the other parts of the specification.

Not guilty of the 2d specification of the 2d charge; not guilty of the 3d specification of the 2d charge; guilty of the facts charged in the 4th specification, 2d charge; not guilty as stated in the 5th specification, 2d charge.

On the 2d charge the court find the prisoner guilty of unofficerlike conduct, but cannot in their conscience say that he was actuated by the ungentlemanly motives ascribed to him in the 4th specification, and believe he may have acted under the influence of mistake or misapprehension; they, however, cannot withhold the expression of their highest disapprobation of his conduct in the transaction; they acquit him of so much of the 2d charge as relates to ungentlemanly conduct.

The court find the prisoner guilty of the facts stated in the 1st specification, 3d charge, except so much as relates to the delivery of the deserter; guilty of the 2d specification, 3d charge, except that he did request, and not order or direct, as charged in the specification; guilty of the 3d specification, 3d charge, except that he did request, and not direct, Lieutenant Houston, as stated in the specification. As to the 4th specification, 3d charge, the court find that the prisoner brought out to Mobile, in the ship General Hand, his family, about thirty negroes, some provisions, (part of which he sold,) and some household furniture, all at the expense of the Government; and that he did, on the part of the United States, give to the owners of the ship General Hand the additional sum of one thousand one hundred and seventy-five dollars to convey the said detachment, mentioned in the specification, to its place of destination, Point Petre, Georgia.

Not guilty of the 5th specification, 3d charge; not guilty of the 3d charge.

The court find the prisoner guilty of the 1st specification of the 4th charge; guilty of the 2d and 3d specifications, 4th charge; guilty of the facts contained in the 4th specification, 4th charge; guilty of the 5th specification, 4th charge, except as to the term of service having expired.

Guilty of the facts stated in the 6th specification, 4th charge; guilty of the facts stated in the 7th and 8th specifications, 4th charge; guilty of the 9th specification, 4th charge; not guilty of the 10th specification, 4th charge; guilty of the 11th specification, 4th charge; not guilty of the 14th specification, 4th charge; guilty of the facts stated in the 15th specification, 4th charge, except as it relates to the discharge of Sergeant Gary, and the furlough and discharge of Sergeant Latta, and, as to them, not guilty.

Guilty of the 4th charge.

As to the 1st specification of the 5th charge, the court find that the prisoner, Colonel King, did lay a duty of five per centum, as specified; that the duty has fallen on the soldiers, but that has proceeded from an omission, on the part of the commanding officer, in not regulating the sutler's prices.

That this duty was not for the benefit of the accused, but for the benefit of the fourth regiment; and find the prisoner not guilty of the 1st specification, as stated.

Not guilty of the 2d specification of the 5th charge.

Not guilty of the 5th charge.

The court sentence the prisoner, Colonel William King, of the fourth regiment United States' infantry, to be suspended from all rank, pay, and emoluments, for the space of five years from the date of the ratification of this sentence.

WM. LINDSAY, *Lieut. Col. Corps Art. President.*

S. D. HAYS, *Judge Advocate D. S.*

The President of the United States approves the proceedings of the general court-martial in the case of Colonel William King, of the fourth infantry, and directs that the sentence, suspending him from all rank, pay, and emoluments, for five years, be accordingly carried into effect.

By order: D. PARKER, *Adj. and Insp. Gen.*

Extract of a general order, dated Adjutant and Inspector General's office, August 10, 1819.

The commanding general of the south division will detail and organize a general court-martial, as soon as practicably consistent with the interest of the service, for the trial of Colonel William King, of the fourth infantry. Such charges, documents, and communications, as the War Department possess, are herewith transmitted, to be put into the hands of the army judge advocate of the south division, or such officer as may be detailed for that duty, in case he cannot attend the court.

Extract of a letter from Major General Jackson to the Secretary of War, dated at

NASHVILLE, *December* 28, 1819.

The proceedings of the general court-martial in the case of Colonel King, of the United States' fourth regiment of infantry, have been presented to me by the judge advocate of division, but they are herewith submitted to your consideration for approval or disapproval.

The enclosed document, marked No. 1, is a copy of the letters from Colonel King, the receipt of which is acknowledged in my letter to that officer, bearing date the 13th of April, 1819, a copy of which accompanies the proceedings of the court. In that letter I expressed my entire approbation of the conduct of Colonel King, during his command in Florida; in doing so I had reference only to those circumstances mentioned in his letters, and such other official acts as were within my knowledge.

But, however unwilling I am to detract from the merit of this officer, who I have ever considered one of the most superior of his rank and profession, it is a duty which I owe myself here to state that, at the date of this letter, I was entirely ignorant of the order given by Colonel King for shooting deserters taken within the province of Florida, and not until a short time previous to the arrest of Colonel King did I become acquainted with these facts.

I have the honor to be, &c.

ANDREW JACKSON.

The Honorable J. C. CALHOUN.

No. 1.

(Enclosed in the foregoing.)

Colonel King to General Jackson.

SIR: FORT ST. CARLOS DE BARANCAS, *February* 4, 1819.

I have the honor to report the arrival off this harbor, at daylight this morning, of the Spanish expedition destined for the occupancy of this province. It consists of two ships, two brigs, and two schooners, and is said to contain five hundred men. The commanding officer addressed himself to me as a major general.

I am, sir, your obedient servant,

WILLIAM KING, *Col. 4th infantry.*

Major General ANDREW JACKSON, *Comd'g Southern division.*

True copy: R. K. CALL, *Aid-de-camp.*

Colonel King to General Jackson.

SIR: CANTONMENT MONTPELIER, *February* 10, 1819.

Under date of the 4th instant, I apprized you of the arrival of the expedition, sent by the Captain-General of the island of Cuba, to reoccupy, for His Catholic Majesty, the province of West Florida. I have now the honor to report that the flag of the United States was struck at Pensacola and the fort of St. Carlos de Barancas, at eight o'clock, A. M. on the 8th instant, and those posts delivered up to Major General John M. Echeviere, duly authorized to receive them. The correspondence which passed between the Spanish general and myself is enclosed.

I am mortified to state that I have left Pensacola with my quartermaster's department upwards of $4,000 in debt to the inhabitants of that place. The knowledge of this state of things will give you as much chagrin as it has given to me, but I confidently trust you will do me the justice to believe no part of the blame is chargeable to my account, as I have, from time to time, reported myself without funds, in debt, and without credit. To transport the public property from Pensacola, I was compelled to resort to the odious practice of impressment, and the expense to the United States will be at least one hundred per cent. greater than if I had been in funds.

Under date of the 27th November, you informed me that Captain Hunt, assistant deputy quartermaster general, was attached to my command, and ordered to report to me. He has never made his appearance, and as the dilemma in which I am placed has been measureably caused by his neglect of duty, I have to solicit his arrest for disobedience of your orders, unless his destination has been subsequently changed by competent authority. By your letter it appears that you had ordered him to this country to pay the debts of the Tennessee brigade; if so, that duty was also neglected: for, instead of coming, he required persons, having claims of that description against the United States, to attend at his office in the city of New Orleans for settlement.

I had yesterday the honor to receive from Major General Gaines a draught on the officer having charge of the quartermaster general's department at New Orleans for $6,000; but from that quarter I expect no relief, or I should long since have drawn on him myself for funds.

I have the honor to be, with great respect, your obedient servant,

WILLIAM KING, *Col. 4th infantry.*

Major General ANDREW JACKSON, *Comd'g Southern division.*

True copy:

R. K. CALL, *Aid-de-camp.*

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *November* 4, 1819.

I have received your summons, as judge advocate of the general court-martial ordered to convene at Mobile, on the 25th of October last, for the trial of Colonel King, to give testimony in behalf of the accused. That summons is dated Nashville, September 1, and the envelope bears the post mark "Tensaw, A. T. 10th October." It was received by me on the 1st instant, since which, a letter to the War Department, written by Major J. B. Hogan, has been shown to me, stating that Colonel King is advised that interrogatories would be put to me in support of the charges on which the colonel was to be tried.

Having been left on duty here by the Secretary of War, I yesterday took the earliest moment to submit to the President, on his arriving in this city, as well the interrogatories as your summons; at the same time stating that I had, by order of the Secretary of War, sent to the commanding general of the south division, to be put into the hands of the judge advocate, copies of all communications relating to the transportation referred to in the interrogatories, with duplicate copies to Colonel King. The President directed me to transmit another certified copy of the same to you, with such further copies as might be connected with the subject. The copies are herewith enclosed. *They contain all the evidence which could be given by me*, as a witness, either for or against Colonel King. The President does not authorize me to go to Mobile to attend the court.

Perhaps it may be proper and respectful to explain to the court that, since Colonel King was arrested, he has corresponded with me, and asked for copies on this subject, which have been sent to him by mail, which could not have reached him on the 10th of October, when the summons, which appears to be directed in his own hand, was mailed at Tensaw. I now enclose copies to show that I have already sent all that he required.

The colonel has also transmitted, under cover, to me interrogatories to be answered by Mr. Graham, who was acting Secretary of War when the orders of the War Department were given for transporting the troops from Baltimore in the fall of 1817. Those interrogatories have been answered by Mr. Graham, and returned to the colonel by me. Although the interrogatories (signed by Major Hogan) do not come before the court, the judge advocate, or the accused, I should answer them under oath, if I saw any thing in them not explained by the official correspondence.

I herewith transmit a copy of these interrogatories, and an extract from Captain Hook's muster-roll of November, 1817. Of other orders Colonel King may have received direct from Mr. Graham, I can give no copies or evidence.

I have the honor to be, sir, your obedient servant,

D. PARKER, *Adjutant and Inspector General.*

S. D. HAYS, Esq., *Army Judge Advocate, and Judge Advocate of the general court-martial for the trial of Colonel King.*

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *May* 2, 1820.

I certify that the foregoing are true copies of the originals on file in this office.

D. PARKER, *Adjutant and Inspector General.*

16th Congress.] No. 196. [1st Session.

TRIAL OF COLONEL WILLIAM KING.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MAY 12, 1820.

Mr. Cocke made the following report:

The Committee on Military Affairs to whom was referred the report of the Secretary of War, containing the proceedings of the court-martial on the trial of William King, late of the fourth regiment of United States' infantry, have had the same under consideration, and submit to the House the following resolution:

Resolved, That the President of the United States be requested to strike from the roll of the army the said William King, late of the fourth regiment of United States' infantry.

16th Congress.] No. 197. [2d Session.

REDUCTION OF THE ARMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 12, 1820.

Sir: War Department, *December* 12, 1820.

In obedience to a resolution of the House of Representatives of the 11th of May last, "directing that the Secretary of War report to this House, at the commencement of the next session, a plan for the reduction of the army to six thousand, non-commissioned officers, musicians, and privates, and preserving such parts of the corps of engineers, as, in his opinion, without regard to that number, it may be for the public interest to retain; and, also, what saving of the public revenue will be produced by such an arrangement of the army as he may propose in conformity with this resolution," I have the honor to make the following report:

I deem it proper, before a plan is presented in detail for reducing the army, as proposed in the resolution, to state briefly the general principles on which it is conceived our military peace establishment ought to be organized. It will be readily admitted, that the organization of the army ought to have reference to the objects for which it is maintained, and ought to be such as may be best calculated to effect such objects; as it must be obvious, on the slightest reflection, that on considerations connected therewith ought to depend, not only its members, but also the principles on which it ought to be formed.

The necessity of a standing army in peace is not believed to be involved in the subject under consideration, as the resolution presupposes the propriety of maintaining one; and in fact its necessity is so apparent, that, even those least friendly to the army have never attempted to abolish it, or even to reduce it, since the late war, much below the number proposed in the resolution. The objects for which a standing army in peace ought to be maintained may be comprised under two classes; those which, though they have reference to a state of war, yet are more immediately connected with its duties in peace; and those which relate immediately and solely to war. Under the first class may be enumerated, as the leading objects, the garrisoning of the forts along our Atlantic frontier in order to preserve them, and to cause the sovereignty of the United States to be respected in their immediate neighborhood, and the occupying of certain commanding posts in our inland frontier to keep in check our savage neighbors, and to protect our newly formed and feeble settlements in that quarter. These are, doubtless, important objects; but are by no means so essential as those which relate immediately and solely to a state of war; and, though not to be neglected wholly, ought not to have any decided influence in the organization of our peace establishment. Without, therefore, making any further remark on this point of the inquiry, I will proceed to consider the other class, on which, as it comprises the great and leading inducement to maintain in this country a regular army in peace, the prominent features of its organization ought to depend.

However remote our situation from the great powers of the world, and however pacific our policy, we are, notwithstanding, liable to be involved in war; and, to resist, with success, its calamities and dangers, a standing army in peace, in the present improved state of the military science, is an indispensable preparation. The opposite opinion cannot be adopted, without putting to hazard the independence and safety of the country. I am aware that the militia is considered, and in many respects justly, as the great national force; but, to render them effective, every experienced officer must acknowledge, that they require the aid of regular troops. Supported by a suitable corps of trained artillerists, and by a small but well-disciplined body of infantry, they may be safely relied on to garrison our forts, and to act in the field as light troops. In these services, their zeal, courage, and habit of using fire-arms, would be of great importance, and would have their full effect. To rely on them beyond this, to suppose our militia capable of meeting in the open field the regular troops of Europe, would be to resist the most obvious truth, and the whole of our experience as a nation. War is an art, to attain perfection in which, much time and experience, particularly for the officers, are necessary. It is true, that men of great military genius occasionally appear, who, though without experience, may, when an army is already organized and disciplined, lead it to victory; yet I know of no instance, under circumstances nearly equal, in which the greatest talents have been able, with irregular and undisciplined troops, to meet with success those that were regularly trained. Genius without much experience may command, but it cannot go much further. It cannot at once organize and discipline an army, and give it that military tone and habit which only, in the midst of imminent danger, can enable it to perform the most complex evolutions with precision and promptitude. Those qualities which essentially distinguish an army from an equal assemblage of untrained individuals, can only be acquired by the instruction of experienced

officers. If they, particularly the company and regimental officers, are inexperienced, the army must remain undisciplined, in which case, the genius, and even experience of the commander, will be of little avail. The great and leading objects, then, of a military establishment in peace, ought to be to create and perpetuate military skill and experience; so that, at all times, the country may have at its command a body of officers, sufficiently numerous, and well instructed in every branch of duty, both of the line and staff; and the organization of the army ought to be such as to enable the Government, at the commencement of hostilities, to obtain a regular force, adequate to the emergencies of the country, properly organized and prepared for actual service. It is thus only that we can be in the condition to meet the first shocks of hostilities with unyielding firmness; and to press on an enemy, while our resources are yet unexhausted. But if, on the other hand, disregarding the sound dictates of reason and experience, we should in peace neglect our military establishment, we must, with a powerful and skilful enemy, be exposed to the most distressing calamities. Not all the zeal, courage, and patriotism of our militia, unsupported by regularly trained and disciplined troops, can avert them. Without such troops, the two or three first campaigns would be worse than lost. The honor of our arms would be tarnished, and the resources of the country uselessly lavished; for, in proportion to the want of efficiency, and a proper organization, must, in actual service, be our military expenditures. When taught by sad experience, we would be compelled to make redoubled efforts, with exhausted means, to regain those very advantages which were lost for the want of experience and skill. In addition to the immense expenditure which would then be necessary, exceeding manifold what would have been sufficient to put our peace establishment on a respectable footing, a crisis would be thus brought on of the most dangerous character. If our liberty should ever be endangered by the military power gaining the ascendency, it will be from the necessity of making those mighty and irregular efforts to retrieve our affairs, after a series of disasters, caused by the want of adequate military knowledge; just as, in our physical system, a state of the most dangerous excitement and paroxysm follows that of the greatest debility and prostration. To avoid these dangerous consequences, and to prepare the country to meet a state of war, particularly at its commencement, with honor and safety, much must depend on the organization of our military peace establishment, and I have, accordingly, in a plan about to be proposed for the reduction of the army, directed my attention mainly to that point, believing it to be of the greatest importance.

To give such an organization the leading principles in its formation ought to be, that, at the commencement of hostilities, there should be nothing either to new model or to create. The only difference, consequently, between the peace and the war formation of the army ought to be in the increased magnitude of the latter; and the only change in passing from the former to the latter, should consist in giving to it the augmentation which will then be necessary.

It is thus, and thus only, the dangerous transition from peace to war may be made without confusion or disorder; and the weakness and danger, which otherwise would be inevitable, be avoided. Two consequences result from this principle. First, the organization of the staff in a peace establishment ought to be such, that every branch of it should be completely formed, with such extension as the number of troops and posts occupied may render necessary; and, secondly, that the organization of the line ought, as far as practicable, to be such that, in passing from the peace to the war formation, the force may be sufficiently augmented; without adding new regiments or battalions; thus raising the war on the basis of the peace establishment, instead of creating a new army to be added to the old, as at the commencement of the late war. The next principle to be observed is, that the organization ought to be such as to induce, in time of peace, citizens of adequate talents and respectability of character to enter and remain in the military service of the country, so that the Government may have officers at its command, who, to the requisite experience, would add the public confidence. The correctness of this principle can scarcely be doubted; for, surely, if it is worth having an army at all, it is worth having it well commanded.

These are the general principles upon which I propose to form the organization of the army, as proposed to be reduced under the resolution. By reference to tables A and B, which contain the proposed and present organizations, it will be seen, that the principal difference between them is in the reduction of the rank and file. The present organization of the staff, with its branches, is retained, with slight alterations. The principal changes in it are in that of the Commissary General of Purchases and the Judge Advocates, by which it is intended that they should conform more exactly to the principles on which the other branches are now formed. It is believed that the true principle of its organization is, that every distinct branch of the staff should terminate in a chief, to be stationed, at least in peace, near the seat of Government, and to be made responsible for its condition. It is thus that the Government may at all times obtain correct knowledge of the condition of the army in every particular, and be enabled to introduce method, order, and economy, in its disbursements. It is, at present, with slight exceptions, thus organized, and the beneficial effects of it have already been strikingly exemplified by experience. Since the passage of the act of the 14th of April, 1818, which gave the present organization to the staff, the expense of the army has been greatly reduced, while, at the same time, the various articles supplied have been improved in quality, and the punctuality with which they have been issued; and while the movements of the army have, at least for the present, been rendered more expensive, by occupying the distant frontier posts at the mouth of the St. Peter's and at the Council Bluffs. By a statement from the Adjutant and Inspector General, and the books of the Second Auditor, marked C, containing the army disbursements from 1818 to 1820 inclusive, it appears that the expense of the army in 1818, the year in which the present organization commenced, amounted to $3,748,445 01, while the amount of warrants issued for current disbursements to the 1st of November this year, has amounted only to $2,616,526 11, and the disbursements of the whole year will probably not exceed $2,700,000. In the year 1818, the aggregate average number of military establishments, including the cadets, amounted to eight thousand one hundred and ninety-nine, and that of this year to nine thousand six hundred and eleven. It is admitted that, during the same period, a considerable reduction has taken place in many of the articles which constitute the supplies of the army, the effect of which has been to reduce its expense; but, on examination, it will appear that the diminution on this account is much less than what, on the first impression, might be supposed. Many of the more considerable items, which constitute the expenses of the army, are fixed by law, and do not fluctuate with the change of prices, such as the pay of the officers and men, the subsistence of the former, and the allowance to them for servants, forage, transportation of baggage, &c. All of the items estimated for by the Paymaster General, excepting clothing for servants, which is of small amount, partake of this character; to which, if we add those of the Quartermaster General's estimates, which, although the price of some of them have, in the period under consideration, been reduced, yet that has been at least balanced in the increased expenditure of that department for the two last years, by the extension and increased number of the military posts, it will result, that the reduction in the expense of the army by the diminution of prices is substantially confined to the clothing, medical, and subsistence departments. Some pains have been taken to ascertain this diminution, in the various articles supplied by them, and it has resulted in the belief, that the average of those supplied by the clothing and medical departments were, in the year 1818, about seven per cent. higher than in this, and in the subsistence about forty per cent. With this data, it is ascertained, (see table D,) that the expense of the army this year, had no diminution in price since 1818 taken place, would have amounted, deducting for the difference of the average number of the two years, and

allowing for the expenditures of the Seminole war in 1818, to about $2,791,038 55. This sum deducted from $3,748,445 01, the expense of the army in 1818, gives for the actual saving, after allowing for the diminution of prices, the sum of $957,356 46, (see table D,) which has been effected through the organization of the present staff, by enabling the Department to superintend, in its minute details, as well the various disbursements of the army, as the measures taken to prevent the waste of public property. The amount of saving may appear to be very great, but it is confidently believed that it cannot be materially reduced by any just mode of calculation of which the subject is susceptible.

As great as this result is, it is only in war that the benefits of a proper organization of the staff can be fully realized. With a complete organization, and experienced officers, trained in peace to an exact and punctual discharge of their duty, the saving in war (not to insist on an increased energy and success in our military movements) would be of incalculable advantage to the country. The number of deputies and assistants in each branch ought to be regulated by the exigency of the service, and this must obviously depend much more on the number of posts, than on the number of troops; and as no material change can, consistently with the public interest, be made as to the posts, under the proposed reduction, little diminution can be made in the number of subordinate officers belonging to the staff.

It is also proposed to retain the two majors and four brigadier generals. Although it is not probable that there will be concentrated, in time of peace, at any one point, the force equal to the command of a single major or even a brigadier general, yet it is conceived that it is important to the service that they should be retained. As two regiments, with a proper proportion of artillery and light troops, constitute, in our service, one brigade, and two brigades a division, the command of a major general, the number of regiments and battalions, under the proposed organization, thus gives a command equal to that of two majors and four brigadier generals. But a more weighty, and, in my opinion, decisive reason why they should be retained, may be found in the principle already stated, that the organization of the peace establishment ought to be such as to induce persons of talent and respectability to enter and continue in the military service. To give to the officers of the army the necessary skill and acquirements, the military academy is an invaluable part of our establishment; but that alone will be inadequate. For this purpose respectability of rank and compensation must be given to the officers of the army, in due proportion to the other pursuits of life. Every prudent individual, in selecting his course of life, must be governed, making some allowance for the natural disposition, essentially by the reward which attends the various pursuits open to him. Under our free institutions, every one is left free to make his selection; and most of the pursuits of life, followed with industry and skill, lead to opulence and respectability. The profession of arms, in the well established state of things which exist among us, has no reward but what is attached to it by law; and if that should be inferior to other professions, it would be idle to suppose individuals, possessed of the necessary talents and character, would be induced to enter it. A mere sense of duty ought not, and cannot be safely relied on. It supposes that individuals would be actuated by a stronger sense of duty towards the Government than the latter towards them.

If we may judge from experience, it would seem that the army, even with these important commands, which, from their rank and compensation, must operate strongly on those who have a military inclination, does not present inducements to remain in it, stronger than, nor even as strong as, those of most of the other respectable pursuits of life.

The number of resignations has been very great, of which many are among the most valuable officers. Should the number of generals be reduced, the motive for entering or continuing in service must also be greatly reduced; for, like the high prizes in a lottery, though they can be obtained by a few only, yet they operate on all those who adventure; so these important stations which they occupy are, with those best qualified to serve their country, the principal motive to enter or remain in the army. To retain them is, in fact, the cheapest mode of commanding such talents; for, to pursue the metaphor, if the high prizes were distributed among all the tickets, there would be but a few adventurers, so, if the compensation attached to the general officers were distributed proportionably among the other officers, the inducement which the army now holds out for a military profession to individuals of suitable character, would be almost wholly lost. If the generals were reduced to one major and two brigadiers, the saving would not exceed $14,432 annually, which, distributed among the officers in proportion to their pay, would give to a lieutenant but $25 59 additional pay, and to a captain $30 87 annually, a sum too inconsiderable to have much effect.

I will proceed next to make a few remarks on that portion of the organization which proposes to reduce the rank and file, without a correspondent reduction of the battalions and regiments. By a reference to the table A, it will be seen that it is proposed to add the rifle regiment to those of the infantry, and unite the ordnance and the light and heavy artillery into one corps of artillery, which, when thus blended, to form nine regiments of infantry and five battalions of artillery, from the latter of which, the corps of ordnance is to be taken, to consist of one colonel and lieutenant colonel, two majors, seven captains, and as many lieutenants as the President may judge necessary. This organization will require all the officers of the line of the present army to be retained. The reasons for the union of the corps, as well as the other details, will be found explained in the proper place in the annexed tables.

No position connected with the organization of the peace establishment is susceptible of being more rigidly proved, than that the proportion of its officers to the rank and file ought to be greater than in a war establishment. It results immediately from a position, the truth of which cannot be fairly doubted, and which I have attempted to illustrate in the preliminary remarks, that the leading object of a regular army in time of peace ought to be, to enable the country to meet with honor and safety, particularly at the commencement of war, the dangers incident to that state; to effect this object as far as practicable, the peace organization ought, as has been shown, to be such, that in passing to a state of war, there should be nothing either to new model or to create; and that the difference between that and the war organization, ought to be simply in the greater magnitude of the latter. The application of this principle has governed in that portion of the formation of the proposed military establishment now under consideration. The companies, both of the artillery and infantry, are proposed to be reduced to their minimum peace formation, the former to consist of sixty-four privates and non-commissioned officers, and the latter of thirty-seven, which will give to the aggregate of both corps thus formed, six thousand three hundred and sixteen non-commissioned officers, musicians, and privates. Without adding an additional officer, or a single company, they may be augmented, should a just precaution, growing out of our foreign relations, render it necessary, to eleven thousand five hundred and fifty-eight; and, pending hostilities, by adding two hundred and eighty-eight officers, the two corps, on the maximum of the war formation, may be raised to the respectable force of four thousand five hundred and forty-five of the artillery, and fourteen thousand four hundred and ninety of the infantry, making, in the aggregate, nineteen thousand and thirty-five officers, non-commissioned officers, and privates, (see table E.) The war organization, thus raised on the basis of the peace establishment, will bring into effective operation the whole of the experience and skill of the latter, which, with attention, would, in a short period, be communicated to the new recruits, and the officers recently appointed, so as to constitute a well disciplined force. Should the organi-

ation of full companies, on the contrary, be adopted for the peace establishment, this process could be carried to a very limited extent. Six thousand men so organized can be augmented on the full war establishment only to nine thousand one hundred and fifteen by doubling the battalions. (See table E.) Any additional force, beyond that, must be obtained by adding new regiments and battalions, with all of the disadvantages of inexperience in the officers and men, without the means of immediate instruction. This was the fatal error at the commencement of the late war, which cost the country so much treasure and blood. The peace establishment, which preceded it, was very imperfectly organized, and did not admit of the necessary augmentation; nor did the Government avail itself of even its limited capacity in that respect. The forces raised were organized into new corps, in which, consequently, every branch of military duty was to be learned by the officers as well as men. But with all of these disadvantages, the experience and discipline of the old establishment was of immense use, and has not been duly appreciated. The officers belonging to it gradually diffused their military knowledge through the army, and contributed much to the brilliant results of the campaign of 1814. For the truth of this assertion, I might with confidence appeal to those officers who then acquired so much glory for themselves and their country.

Another reason remains to be urged why, in the peace establishment, the number of officers ought to be great compared with the actual force. At the commencement of war, an adequate number of experienced officers is of greater importance than that of disciplined troops, even were it possible to have the latter without the former; for it is not difficult to form in a short time well disciplined troops by experienced officers, but the reverse is impossible. The qualifications of the officers are essentially superior to those of the soldiers, and are more difficult to be acquired. The progress of military science has not added much to the difficulty of performing the duty of the soldier or of training him, but it has greatly to that of the officer. No Government can, in the present improved state of the military science, neglect with impunity to instruct a sufficient number of its citizens in a science indispensable to its independence and safety, and to perfect which instruction, it is necessary that some portion of them (the number to be regulated by the rescources of the country and its relation with other Governments) should make arms their profession.

Table F exhibits the estimate of the saving which will be made by the proposed organization.

I have thus presented an organization which I deem the most effective, and which, in the future exigencies of the country, may be of the utmost importance. A different one, requiring for the present an expenditure something less than that proposed, might, in some respects, be more agreeable at this moment; but, believing that nothing in our situation or in our relation with other Powers, however pacific at this time, can give a certain assurance of uninterrupted peace, a state which may exist in the imagination of the poet, but which no nation has yet had the good fortune to enjoy, I have deemed it my duty to present that organization which will most effectually protect the country against the calamities and dangers of any future contest in which it may be our misfortune to be involved.

Economy is certainly a very high political virtue, intimately connected with the power and the public virtue of the community. In military operations, which, under the best management, are so expensive, it is of the utmost importance; but, by no propriety of language can that arrangement be called economical, which, in order that our military establishment in peace should be rather less expensive, would, regardless of the purposes for which it ought to be maintained, render it unfit to meet the dangers incident to a state of war.

With a single observation, which was omitted in its proper place, I will conclude my remarks. The plan proposed for the reduction of the army gives six thousand three hundred and sixteen non-commissioned officers, musicians, and privates, instead of six thousand, the number fixed in the resolution. It was found difficult to form an organization on proper principles, which would give that precise number, and as the difference was not deemed very material, I have ventured to deviate to that extent, from the terms of the resolution.

I have the honor to be, your most obedient servant,

J. C. CALHOUN.

The Hon. JOHN W. TAYLOR, *Speaker of the House of Representatives.*

A.

Organization of the Army as proposed under the resolution of the House of Representatives, of May 11, 1820.

GENERAL STAFF.

2 Major generals.
4 Aids-de-camp—subalterns of the line.
4 Brigadier generals.
4 Aids-de-camp—subalterns of the line.
1 Judge advocate.
6 Topographical engineers.
4 Assistant topographical engineers.
1 Adjutant and inspector general.
*2 Adjutants general.
*4 Assistant adjutants general.
*2 Inspectors general.
*4 Assistant inspectors general.

Quartermaster's Department.

1 Quartermaster general.
2 Deputy quartermasters general.
16 Ass't deputy quartermasters general. Eight of these are officers of the line, and it is contemplated to have them all of the line, as vacancies occur.

Paymaster Department.

1 Paymaster general.
19 Paymasters.

Purchasing Department.

1 Commissary general.
1 Assistant commissary general.
2 Storekeepers.

Subsistence Department.

1 Commissary general, with as many assistant commissaries as the service may require, all subalterns of the line.

Medical Department.

1 Surgeon general.
2 Assistant surgeons general.
1 Apothecary general.
2 Assistant apothecaries.
25 Surgeons.
44 Assistant surgeons.

Engineer Corps.

1 Colonel.
1 Assistant engineer.
1 Lieutenant colonel.
2 Majors.
6 Captains.
6 Lieutenants.
6 Second Lieutenants.

Military Academy.

12 Professors and masters.
250 Cadets.
1 Adjutant—subaltern.

* All except three are officers of the line, and it is contemplated to have them all of the line, as vacancies occur.

ARTILLERY.

1	Colonel commandant.
1	Colonel of ordnance.
1	Lieutenant colonel of ordnance.
2	Majors of ordnance.
5	Lieutenant colonels of battalions.
5	Majors, do
7	Captains of ordnance.
5	do of light artillery.
40	do of artillery.
10	Lieutenants of light artillery.
80	do of artillery.
10	Second lieutenants of light artillery.
80	Second lieutenants of artillery.
247	Officers.
15	Sergeants of light artillery.
120	do of artillery.
30	Corporals of light artillery.
240	do of artillery.
5	do of the train.
5	Armorers.
5	Smiths, (light artillery.)
5	Trumpets, (light artillery.)
40	Drummers.
90	Gunners, (light artillery.)
720	do artillery.
180	Matrosses, (light artillery.)
1,440	Matrosses, artillery.
10	Workmen.
45	Soldiers of the train, (light artillery.)
2,950	Total.

INFANTRY.

9	Colonels.
9	Lieutenant colonels.
9	Majors.
90	Captains.
90	First lieutenants.
90	Second lieutenants.
297	Officers.
360	Sergeants.
360	Corporals.
9	Armorers.
9	Drum majors.
90	Drummers.
2,520	Privates.
18	Workmen.
3,366	Total.
75	Artificers, workmen of ordnance
6,391	Rank and file.

NOTE.—To each regiment and battalion a subaltern will be assigned as adjutant, and one as quartermaster, and in all cases where officers of the line are assigned to the staff, their pay in the line is merged in that of the staff, which is in fact but an additional allowance for the extra expense attending such situations.

STAFF.

The chief reduction which is practicable in the staff is that of the purchasing department. It is reduced to one commissary general stationed at Washington, one assistant and two storekeepers at New York and Philadelphia, where all stores purchased for the army will be concentrated, and from whence they will be distributed to the quartermasters of every corps. By abolishing the distinction between the battalion and regimental paymasters, several corps may occasionally, when assembled on one point, be paid by the same officer. The difficulty of finding suitable persons willing to accept of the appointment of surgeons' mates has likewise been the reason for suppressing that rank, and allowing in their steads a certain number of assistant surgeons with the rank and appointment of post surgeons, and abolishing all distinctions of rank and pay between surgeons employed in a post, battalion, or regiment. In small posts the assistant commissaries of subsistence may be charged with the functions of quartermasters.

ARTILLERY.

By uniting the three corps of the ordinance, light artillery, and artillery in one, appointing one general staff at the head of it, and making its officers pass in rotation through the three services, the organization of the army will be rendered more simple, and the instruction of the officers much more complete. The present regiment of light artillery being organized to manœuvre sixty guns, is stronger than our occasions require; being on foot, and performing garrison duty, it cannot practise its peculiar manœuvres, nor qualify itself for the service which it will be called upon to perform in the field. It is therefore proposed to convert it into an additional regiment of foot artillery, which will only be changing its denomination, and to add a company of light artillery to each of the five regiments of artillery. This arm will thus be distributed on the frontier, and by allowing twenty-eight saddle and thirty-two train horses to each company, with ten soldiers of the train to serve them, it will be enabled to manœuvre two pieces at a time, with their caissons.

Two lieutenants and two second lieutenants in each company are more than the service indispensably require. A certain number of officers of this rank can, therefore, always be spared from regimental service, and appointed as assistants in the ordnance department. But it is necessary to maintain some supernumerary captains for this purpose; for, if their number did not pass that of the companies of artillery, it would be impossible to spare a captain of artillery from his company. Lest misapprehension should arise on this subject, it is proper to state that officers of artillery detailed on the ordnance service are exclusively under the control of the ordnance department. The service of the arsenals is to be provided for out of the artillery; and the cannoneers will thus perfect themselves in the composition of fireworks, &c. A single company of ordnance artificers will be retained in peace.

As three or four experienced pointers are sufficient for each piece, it is proposed to form them into a peculiar class, as in Europe. All augmentations or reductions of the artillery will then fall on the matrosses, who can be trained in a few weeks. The proposed organization allows three sergeants, commanding two guns, to each company, (of whom the senior may perform the duties of orderly and quartermaster sergeant,) six corporals, commanding each one gun, three gunners, and six matrosses (the least number that can manœuvre it) to each gun. By raising the force of each company to 100 men, in time of war, the whole corps will be able to manœuvre 90 guns in the field, viz: 30 by the light artillery, and 60 by ten companies of foot; and 900, or even 1,800 guns in forts and batteries, by allowing six cannoniers, or even three, with the aid of the militia, to serve alternately two guns.

INFANTRY.

The proposed organization in the reduction of each regiment to the minimum force, will leave it adapted to the purposes of military service and instruction, by preserving in each corps all its necessary component parts. To execute the modern manœuvres of the field, each battalion must divide itself into two half battalions, four divisions, eight platoons, sixteen sections, and thirty-two squads, exclusive of its flank companies. Experience has pointed

out that, in time of war, its front should not pass 200 files, exclusive of flank companies, lest it become weak and wavering. But it cannot, in peace, be reduced below 128 files, or 64 to a half battalion, 32 to a division, 16 to a platoon, 8 to a section, 4 to a squad, as the various fractions would become too diminutive for any service, if reduced below that number.

The propriety of reducing each regiment to its minimum force, rather than reducing the number of regiments, and making them somewhat stronger, has been chiefly deduced from the following principle, the desire of avoiding to create new regiments, with raw inexperienced officers at their head, in the time of war. Each regiment of the army can be formed into two battalions, equally intermixed with old soldiers at the approach of war, and that by a very simple operation, provided that, some time previously, care may have been taken to augment the number of their officers, and fill up their ranks to a higher complement. Nine regiments, which, on the proposed organization, form only 3,663 men in time of peace, may then be raised to near 16,000 in time of war, without creating new corps—by doubling the number of battalions, and raising their front to 250 files, including the flank companies, and forming them in three ranks. It is therefore evident that the reduction of each regiment of infantry, when formed on this small scale, whilst it makes a very trifling economy for the present, deprives us of the power of forming a large and effective force in time of war.

The mode of doubling the battalion is simply to form a battalion of each half battalion, a division of each platoon, a platoon of each section, &c., and fill up their ranks to the proper number, with a care to place the recruits in the second ranks.

Note.—As this estimate is predicated on the smallest numbers that can perform the requisite manœuvres in the school of company and battalion, and as experience proves that no organization can be kept full, an increase of one-sixth to the rank and file would render the corps at all times efficient and perfect, and would greatly improve the proposed organization.

B.

Present organization of the army of the United States.

CORPS.	Major generals.	Brigadier generals.	Adjutant and inspector general.	Quartermaster general.	Adjutants general.	Inspectors general.	Assistant adjutants general.	Assistant inspectors general. December, 1819,	641	8,047	8,688	9	244	8,941
September, 1820,	683	8,469				
As the returns of this year are only rendered for the third quarter, I have to add the recruits of the several rendezvous, and an estimate for those which will be enlisted during the fourth quarter,		885	10,037	8	236	10,281

NOTE.—A division of the aggregates at the close of 1817 and 1818, will give the average strength of the army for 1818, 8,199, and, in like manner, the average strength of the army for 1820 will be 9,611.

Abstract of the recruiting returns, showing the number of men enlisted in each of the following years, viz:

1817,	3,939
1818,	4,238
1819,	4,304
1820,	3,211

The number of recruits for this year is taken from the returns of the three first quarters, and an estimate for the present quarter.

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *December* 2, 1820.

D. PARKER, *Adjt. and Inspec. Gen.*

Statement of the annual expenses of the army proper, consisting of the following appropriations, viz: pay, subsistence, forage, clothing, bounties and premiums, expenses of recruiting, hospital department, contingencies, quartermaster's department, and military academy, (building excepted,) during the years 1818, 1819, *and to the 30th November*, 1820, *inclusive.*

For the year 1818,	$3,748,445 01
1819,	3,351,363 12
1820,	2,616,526 11

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *December* 5, 1820.

WILLIAM LEE, *Auditor.*

D.

The expenditure for the army, in 1818,		$3,748,445 01
The expenditure for the army, in 1820, estimated not to exceed,	2,700,000 00	
Add forty per cent. on $537,976 00 (the appropriation for subsistence for 1820) being the estimated difference of the prices of provisions at the time of completing the contracts for the supply of the army in 1818 and 1820,	215,190 40	
Add seven per cent. on $342,145 (the amount of the appropriations for clothing, and for the medical and hospital departments, for 1820,) being the estimated difference of the prices of the articles of those departments in 1818 and 1820,	23,950 15	
Add (excess of recruits in 1818 over 1820,) 1,137 men at $24 per man,	27,288 00	
	2,966,428 55	
Deduct (excess of the aggregate of the army in 1820 over 1818,) 1,412 men at $195 per man,	275,340 00	
The amount that the army in 1818 would have cost, on the basis of the present expenditure, allowing, as above, for diminution of prices since that period, and the excess of recruits made in that year over 1820, and deducting for the excess of the number of men in the latter over the former,		2,691,088 55
		1,057,356 46
Deduct the estimated increased disbursements under the regular heads of appropriation, on account of the Seminole war,		100,000 00
Reduction in consequence of the improved organization,		957,356 46

NOTES.—For other items of expenditure than those in the subsistence, purchasing, and medical and hospital departments, see the body of the report. In addition to the appropriation for the service of the militia, the Seminole war caused an increase of disbursements under some of the regular heads of appropriation, the exact amount of which cannot be ascertained without dissecting most of the accounts of the disbursements in that quarter, during its operation. The principal increase of disbursements was on account of subsistence. It is believed that the sum proposed to be deducted is ample.

The year 1818 is assumed instead of 1817, the year preceding the present organization of the staff of the army. It would have been desirable to have formed the table on the data to be furnished by that year, but, on examination, it was found, that some items of expenditure, growing out of the late war, were so blended with the current expenditure of that year, as to render the separation impossible, without great labor and much time. It is believed, however, that, could the current expenditure of 1817 be ascertained, the result would be not less favorable. It is proper to observe, that, although the act modifying the staff, as it is now organized, passed in April, 1818, it did not go into operation so as to produce any material effect on the disbursements until after the termination of that year.

The full effect of the present organization, it is believed, is not yet experienced; as it requires considerable time to carry into perfect operation a system which comprehends so great an extent of detail. As far as can be judged by the estimates for 1821, the disbursements of that year will show a still more favorable result than that of this year.

E.

A table containing, 1st, the present organization and force of the army; 2d, the proposed organization at its minimum; 3d, the proposed organization raised to its maximum, but without doubling the battalions or augmenting the number of officers; 4th, the maximum to which it can be raised, in case of necessity, by doubling the battalions and officers of infantry.

	PRESENT ORGANIZATION.								PROPOSED ORGANIZATION AT ITS MINIMUM FORCE.					PROPOSED ORGANIZATION AT ITS MAXIMUM.					PROPOSED ORGANIZATION, DOUBLING THE BATTALIONS AND AUGMENTING THE OFFICERS OF INFANTRY.
Artillery officers.	Ordnance corps.	Light artillery, each company.	Light artillery regiment, 10 companies.	Artillery comp. 32.	Artillery battalion, 4.	Total artillery, 4 battalions, 32 companies.	Total of the 3 corps.		Each company of light artillery.	Each company of foot artillery.	Each regiment of artillery, of one company of light and 8 of foot.	Total, including the ordnance department.		Each company of light artillery.	Each company of foot artillery.	Each regiment of artillery, 1 company of light and 8 of foot.	Total, including ordnance.		Observations on the artillery.
OFFICERS.																			
Colonels,	1	-	1	-	-	-	2	-	-	-	-	2	-	-	-	-	2		The artillery cannot, like the infantry, have the number of its officers and companies augmented on a sudden. Its force, when its 45 companies are raised to their maximum, cannot, therefore, be augmented nor pass the number in the last table. The number of matrosses may be increased if absolutely required, but, by recurring to the preceding table, it will be seen that the present 45 companies, at 100 men each, can serve 90 guns in the field and 1800 in forts and batteries.

F.

Statement showing the saving of expenditure by the proposed organization of the army.

Pay for officers and men, subsistence for officers, forage for officers, and clothing for officers' servants,	$419,702 70
Subsistence department,	194,595 76
Quartermaster's department,	100,000 00
Clothing department,	153,650 00
Bounties, premiums, and recruiting,	25,296 00
Medical department,	11,960 00
Total amount of saving by the proposed organization,	$905,204 46

NOTE.—The estimate of saving is made on the basis of the expenditure for 1820, and on the supposition of the rank and file of the army, under the existing organization and that which is proposed, not being full by one-sixth. Should a reduction be made as proposed, the actual appropriations of the next year, under the various heads, must be determined by the principles which have governed in forming the general estimates for that year, and may differ in some respects from the saving above calculated. As the ranks would be nearly full in the first year after the reduction, some allowance would have to be made on that account.

16th CONGRESS.] No. 198. [2d SESSION.

ILLEGAL PUNISHMENTS INFLICTED ON DESERTERS AND OTHER DELINQUENTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 14, 1820.

SIR: WAR DEPARTMENT, *December* 14, 1820.

In answer to that part of the resolution of the House of Representatives of the 9th instant, requiring this Department to show whether the order given by Colonel King of the fourth infantry, for shooting deserters taken in the fact, was approved by any general officer in the service of the United States, or was known to and passed over in silence by him, as stated in the defence of said Colonel King, I have to enclose an extract of the letter of Major General Jackson on that subject, which was transmitted to the House of Representatives with the copy of the trial of Colonel King, and which is published in the appendix of that trial. This extract contains all the information within the knowledge of this Department on that subject.

In relation to that part of the resolution which requires any information this Department may possess, showing that corporeal punishment has been inflicted on any soldier, whereby he came to his death, I have the honor to state that the only report of that kind which has reached this Department was the case of a soldier at Fort Preble, near Portland, in Maine. Major Brooks, a correct and intelligent officer, commanding that post in September last, reported that the death of a soldier, an habitual drunkard, who had been on a fatigue party under Lieutenant Hobart, and had been confined by him, had caused much excitement among the citizens, who attributed the death of the man to the conduct of Lieutenant Hobart; that the civil authority had taken up the affair for investigation, to which Lieutenant Hobart had readily submitted himself. The report was accompanied with the enclosed certificate of the jury of inquest, as to the correct conduct of Major Brooks, and the other officers of the post, in relation to the transaction. It thus appearing that the affair would undergo an investigation in the district court of the United States, the Department did not think it proper to order a military investigation.

I have the honor to be, with perfect respect, your obedient servant,

J. C. CALHOUN.

To the SPEAKER OF THE HOUSE OF REPRESENTATIVES.

Extract of a letter from Major General Jackson to the Secretary of War, dated

NASHVILLE, *December* 28, 1819.

The proceedings of the general court-martial in the case of Colonel King of the United States' fourth regiment of infantry have been presented to me by the judge advocate of division; but they are herewith submitted to your consideration for approval or disapproval.

The enclosed document, marked No. 1, is a copy of the letters from Colonel King, the receipt of which is acknowledged in my letter to that officer, bearing date the 13th of April, 1819, a copy of which accompanies the proceedings of the court. In that letter I expressed my entire approbation of the conduct of Colonel King during his command in Florida; in doing so, I had reference only to those circumstances mentioned in his letters, and such other official acts as were then within my knowledge.

But, however unwilling I am to detract from the merit of this officer, who I have ever considered one of the most superior of his rank and profession, it is a duty which I owe myself, here to state, that, at the date of his letter, I was entirely ignorant of the order given by Colonel King for shooting deserters taken within the province of Florida, and not until a short time previous to the arrest of Colonel King did I become acquainted with these facts.

I have the honor to be, &c.

ANDREW JACKSON.

The Hon. J. C. CALHOUN.

SIR: PORTLAND, *August* 28, 1820.

The gentlemen composing the late jury of inquest at Fort Preble, sensible of the obligations they are under to you, and to the other officers of the garrison, request you to accept of their unfeigned thanks for the facilities rendered them, and the very gentlemanly and respectful conduct you were pleased to manifest towards them while engaged in the discharge of an arduous, most unpleasant, and painful duty.

For and in behalf of the jury of inquest.

OLIVER BRAY, *Foreman.*
JOHN McLELLAN, *Coroner.*

Major ALEXANDER S. BROOKS.

16th CONGRESS.] No. 199. [2d SESSION.

SYSTEMS OF MARTIAL LAW, AND FIELD SERVICE, AND POLICE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, DECEMBER 26, 1820.

SIR: DEPARTMENT OF WAR, *December* 22, 1820.

Pursuant to a resolution of the House of Representatives, passed at the last session on the 22d of December, 1819, directing the Secretary of War "to cause to be prepared and laid before the House, at the next session of Congress, a system of martial law, and a system of field service and police for the government of the army of the United States," I have the honor of transmitting herewith a system of field service and police, and a system of martial law; the former prepared under the directions of this Department by Major General Scott, and the latter by Judge Advocate Major Storrow.

I have the honor to be your obedient servant,

J. C. CALHOUN.

Hon. JOHN W. TAYLOR, *Speaker of the House of Representatives.*

HEAD-QUARTERS, FIRST AND THIRD MILITARY DEPARTMENTS,

SIR: ELIZABETHTOWN, N. J., *September* 2, 1818.

I have the honor to enclose herewith the analysis of a work long since projected by me. The accomplishment of some similar design seems an important desideratum in our code of military instruction or legislation. But on this point the analysis, compared with existing regulations, will best speak for itself. I can only say that the formation of it has cost me much study and reflection, aided by the experience of a ten years' service in peace and in war, in the line and in the staff, in the infantry and in the artillery.

When in Europe I collected every work, in French or in English, (not obsolete) on the service, police, discipline, instruction, and administration of an army. These have been carefully read and collated, and, under the sanction of the War Department, I am now ready to compile a book, to correspond with the several articles of the accompanying analysis; taking, as a basis, our own laws, regulations, orders, and practice, as far as the paucity of the materials may suffice.

Should the idea of a Board occur in connexion with this offer, I would beg leave to suggest that joint labors of the literary kind but rarely succeed; and that I have personally a repugnance to that sort of employment, which nothing but a positive order could induce me again to forego. Indeed I am persuaded (and from a personal experience somewhat in point) that, of five individuals of equal qualifications, either might make a better book than the five taken together.

From what is here said, I hope it will not be inferred that I should be unwilling to advise with officers of experience in the several branches of service embraced in my design, should I receive an order to attempt its execution. On the contrary, if my proposition is accepted, I shall be very happy to consult with many gentlemen with whom I have had the good fortune to serve; for example, on the 9th section of the analysis with the present physician and surgeon general, whose hospital I inspected daily for several months in the campaign of 1814.

I foresee that, in the progress of the compilation, I should be tempted, perhaps not infrequently, to propose certain changes in parts of what is laid down above as *the basis* of the projected work; but all such modifications would be carefully submitted for the approval of the Department before I should venture to adopt them.

After writing out all the articles it would be my desire to read them over to you personally; and, if you chose, in the presence of some two or three officers of experience, with a view to objections and explanations. If I should be so fortunate as to pass this ordeal, the work might next be remitted to a committee of Congress for legislative sanction should that be thought necessary, under the thirteenth and sixteenth paragraphs eighth section first article of the constitution. Here the same explanations might be repeated, and should the book be finally ordered to the press, I could then, without neglecting my ordinary duties, superintend the printing of it.

To indemnify the publisher (without limitation of the copy-right) against loss, it would still be necessary for the Department to subscribe for a certain number of copies. According to the present supposition, this would be, it is presumed, a matter of course.

From the best calculation I have been enabled to make, all the articles given in the analysis may be compressed into something less than four hundred 8vo. pages; or into a volume about the size of our Infantry Tactics; but the expense of publication would be less, inasmuch as the proposed work would not require more than five or six engraved plates, and the other has forty.

Under the head of *expense* it remains for me to speak of myself. I should wish to be allowed, whilst employed on the work, the pay, &c. of my brevet rank; that is, the same allowances to which I was entitled whilst in the

command of a department under the original act creating brevet rank. This is the only shape in which I should be willing to receive compensation for what might be termed *extra services*, and in this mode my pride, as an officer, would not be offended; particularly, as I still think (with due deference to the National Legislature) that the rights acquired by brevet officers, under the act of 1812, cannot be taken away except by dismission or disbandment. This, however, is said incidentally, and in explanation of my own personal feelings. The compensation suggested might, no doubt, be granted on other considerations within the discretion of the Department.

Permission to report myself on *extra duty* would be inferred from an acceptance of my general proposition. This would be necessary, as well with a view to the undivided attention which should be given to composition, as, also, to enable me to consult you personally on certain principles and details which might require settling before they were embodied. My absence from these departments can, it is presumed, be easily arranged with the general of the division without prejudice to the service; and by the spring I should hope to be ready to return to New York to my ordinary duties with my manuscript prepared for the press.

Perhaps it might be well to give the titles, &c. of the works from which I should expect to compile; but as this might also seem ostentatious without a more apparent necessity, I will, at present, confine myself to the mention of the two following, which are the principal:

1st. "Législation Militaire, ou recueil méthodique et raisonné des lois, décrets, arrêtés, réglemens, et instructions actuellement [1812] en vigueur, sur toutes les branches de l'état militaire," par Berriat, &c. five large 8vo. volumes, pages 2,509. Notwithstanding the title and the bulk of this manual of the French army, it does not contain, except by reference, a syllable of the *tactique* of the several corps.

2d. "General Regulations and Orders for the army;" edition of 1813; pages 326, in 8vo. The British Manual, like the above, merely refers to the regulations on tactics. In the execution of the work now proposed, similar references would occasionally be necessary.

I doubt not that further study and reflection will enable me to make many necessary retrenchments in and additions to my analysis, and also to render its parts more consecutive. The latter improvement is extremely desirable, as it would enable one, in respect tot he work itself, by an easy reference to what is settled in previous articles, to avoid a multitude of repetitions. But, after all, no labor or combination of talent can render that perfect which is, in its nature, uncertain and miscellaneous. Much may be done, but much will remain to be desired. There are only a very few of the branches of the art of war which have been reduced under the laws of positive science; and not one of those with which I propose to charge myself is of that number.

In such an undertaking literary fame is neither to be promised nor expected; and even the humble praise of usefulness is only to be acquired by great labor and minute attention. Nevertheless, as that usefulness, if attained, would be a perpetual improvement to our army in health, in pride, and in efficiency, and, by consequence, extend the national fame in some future war by the number and the brilliancy of our victories on the land, I should not deem the essay as unworthy of any talents or rank which the country possesses. But far from arrogating to myself any peculiar fitness for the employment, I have constantly wished, since the war left us at leisure, that some other officer, better qualified, might present the army with such a work; and now it is only because others have tacitly declined the service that I offer myself as a volunteer.

With sentiments of the highest respect, I have the honor to remain, sir, your most obedient servant,

WINFIELD SCOTT.

To the Hon. J. C. CALHOUN, *Secretary of War.*

TABLE OF CONTENTS.

SECTION 1.—*Rank and command.*

ART. 1. Rank of corps and regiment.
2. Base of discipline.
3. Principles governing the rank of officers.
4. Succession in rank.
5. Succession in command.
6. Relative rank and precedence of land and sea officers.

SECTION 2.—*Military compliments or honors.*

ART. 7. Compliments by individuals as such.
8. Compliments by guards and sentinels.
9. Compliments by troops under review.
10. Compliments by the line.

GENERAL REGULATIONS FOR THE ARMY.

SECTION I.

RANK AND COMMAND.

ARTICLE 1.—*Rank of corps and regiments.*

1. The rank of corps shall be as follows: 1st, the light or horse artillery; 2d, the light dragoons; 3d, other regular cavalry; 4th, the foot artillery, 5th, the infantry; 6th. detachments of the United States' marine corps, serving on land; 7th, the riflemen; 8th, volunteer corps; 9th, militia draughts. In operations near an enemy, the forces will, nevertheless, be drawn up according to the orders of the general or other commanding officer.

2. In any particular corps, regiments will take rank among themselves according to numerical order.

ARTICLE 2.—*Base of discipline.*

1. It is the intention of the Government that there be established in every regiment and corps, and throughout the army, as one corps, a gradual and universal subordination or authority, which, without loss of force, shall be even, mild, and paternal, and which, founded in justice and firmness, shall maintain all subordinates in the strictest observance of duty. It requires that enlisted soldiers shall be treated with particular kindness and humanity; that punishments, sometimes unavoidable, shall be strictly conformable to martial law; and that all in commission shall conduct, direct, and protect inferiors, of every rank, with the cares due to men from whose patriotism, valor, and obedience, they are to expect a part of their own reputation and glory.

2. Under the President of the United States, as commander-in-chief, the following are the grades of army rank: 1st. major general; 2d. brigadier general; 3d. colonel; 4th. lieutenant colonel; 5th. major; 6th. captain; 7th. first lieutenant; 8th. second lieutenant; 9th. third lieutenant; 10th. cornet or ensign; 11th. cadet; 12th. sergeant; 13th. corporal; and the latter shall be superior to all private soldiers, including, under that denomination, private musicians, artificers, and the like.

3. The non-commissioned staff of regiments or battalions shall take rank as follows: 1st. sergeant majors next immediately after cadets; 2d. quartermaster sergeants, trumpet majors, and drum majors, next immediately after sergeant majors.

4. The officers of the general staff, clothed with rank assimilated to lineal rank, as those of the adjutant general's department and several others, will be considered, in respect to rank, on the same footing as if their rank was lineal.

5. In other departments of the general staff, which give not rank assimilated to that of the line, as in the surgeon general's, &c., subordination shall have place in each department according to pay proper; the higher the annual or monthly pay of any officer therein, the higher his rank in his own particular department. And all persons subject to martial law, and not *commissioned*, shall be subordinate to any commissioned officer in the service, whether the officer be or not clothed with lineal rank or rank assimilated thereto.

6. No officer of the staff, not having lineal rank, or rank assimilated thereto, shall command any officer whatever having such rank; but, on the other hand, the whole of the former shall be subordinate to the latter, under the following restrictions: 1st. the commissary general of purchases, the surgeon general, the paymaster general, and the apothecary general, to general officers only; 2d. an assistant surgeon general, and a deputy commissary of purchases, to any officer, not under the rank of colonel; 3d. a judge advocate, a chaplain, and a regimental or battalion paymaster, to any officer not under the rank of major, unless, (in the case of the paymaster) it be the commandant of his regiment or battalion; 4th. an assistant commissary of issues, and a regimental full surgeon, to the orders of any officer not under the rank of captain; 5th; a post surgeon to any officer not under the rank of first lieutenant, unless it be the commandant of his particular post.

7. When several commissioned or non-commissioned officers of the same grade find themselves on duty together, the senior, in either case, shall be the superior.

8. An officer holding a commission from the United States will command all officers of the same grade in the service of the United States, who hold commissions from the particular States, without reference to the dates of commissions: and no such State or militia officer, not actually called into the service of the United States, shall command any part of the United States forces.

9. In all that concerns the good of the service, the Government requires that the superior shall always find in the inferior a passive obedience, and that all orders given shall be executed with alacrity and good faith; but, in prescribing this kind of obedience, it is understood that orders shall not be manifestly against law or reason; and every superior is strictly enjoined not to injure those under him by abusive or unbecoming language, or by capricious or tyrannical conduct.

ARTICLE 3.—*Principles governing the rank of officers.*

1. Questions respecting the rank of officers, arising from the sameness of dates in commissions of the same grade, shall be decided: 1st. by reference to the relative rank of the parties in the regular forces, (including the United States' marine corps,) at the time the present appointments or promotions were made; 2d. by reference to former rank therein, taken away by derangement or disbandment; 3d. by reference to former rank therein given up by resignation; 4th. by lottery.

2. Brevet rank shall take command or effect only in the following cases: 1st. when it renders an officer, present on duty, with a separate command, comprising troops of different corps, the superior thereof; 2d. in the person of every brevet officer on courts composed of officers of different corps; 3d. by special *assignment* made by either the President of the United States, or the general-in-chief of a particular army in the field, whereby a brevet officer may be invested with a separate command, comprising troops of different corps, although not previously on duty with it.

3. By the terms "separate command" shall be understood: 1st. the army, or a particular army in the field; that is, an army, the chief of which is in correspondence with the Executive; 2d. A detachment for temporary or occasional service, that is, a detachment marched beyond the chain of sentinels; 3d. A geographical division or department; 4th. a particular post.

ARTICLE 4.—*Succession in rank.*

1. The Executive will fill *original* vacancies, when created, by selection; *accidental* vacancies, below the rank of brigadier general, by promotion, and according to seniority, except in extraordinary cases.

2. Promotions to commissions in the line, below a captaincy, will be made by regiments; to commissions between those of first lieutenant and brigadier general by corps; and no officer shall succeed to a higher rank, until notified of his advancement thereto by the proper authority.

ARTICLE 5.—*Succession in command.*

1. An officer who supersedes or succeeds to another, in any command whatever, will consider himself precisely in the situation of the predecessor, in respect to previous orders or instructions (not abrogated) relative to the particular command; and the successor, although of an inferior rank, shall be authorized to demand to be put in possession of such orders and instructions, if they exist in writing, or to be informed of their nature and import, if they exist in memory only.

2. A superior officer, marching or passing by or through the command of another, or temporarily halting or sojourning within the limits of the latter, will not supersede him, or interfere with his duties, except on urgent considerations, founded on the good of the service, for the sufficiency of which he will hold himself responsible to the next common commander; and, in the case of not assuming the command, the superior, whilst in the limits of the particular commander, will give to his police regulations, as in the instance of a post, camp, or cantonment, all due respect and support.

3. An officer relieved in a command, although junior to his successor, shall have the right to demand of the latter, written duplicate receipts, setting forth the state and condition of every article of public property, for which the relieved officer was personally responsible, turned over with the command. One of those receipts will be remitted to the proper administrative department, and the other retained in the possession of the officer.

ARTICLE 6.—*Relative rank and precedence of land and sea officers.*

1. The military officers of the land and sea services of the United States shall rank together as follows: 1st. a lieutenant of the navy with captains in the army; 2d. a master commandant with majors; 3d. a captain of the navy, from the date of his commission, with lieutenant colonels; 4th. five years thereafter with colonels; 5th. ten years thereafter with brigadier generals; and 6th. fifteen years after the date of his commission with major generals: But, should there be created in the navy the rank of rear-admiral, then such rank only shall be considered equal to that of major general.

2. Nothing in the preceding paragraph shall authorize a land officer to command any United States' vessel or navy yard, nor any sea officer to command any part of the army on land; neither shall an officer of the one service have a right to *demand* any compliment, on the score of rank, from an officer of the other service.

3. Land troops, *serving* on board a United States' vessel as marines, shall be subject to the orders of the sea officer in command thereof. Other land troops, embarked on board such vessels for transportation merely, will be considered, in respect to the naval commanders, as passengers; subject, nevertheless, to the internal regulations of the vessels.

SECTION II.

MILITARY COMPLIMENTS OR HONORS.

ARTICLE 7.—*Compliments, by individuals, as such.*

1. Courtesy among military men is indispensable to subordination and discipline. The good or the brave officer or soldier is always respectful towards superiors. He feels that in honoring them he does honor to the service and himself. His respect will not then be confined simply to martial obedience, but will be extended to all occasions and all circumstances. Thus it is always the duty of the inferior to *accost*, or to offer first the customary salutation, and of the superior to return such complimentary notice.

2. The salutation among officers in uniform will be made by touching the cap or *chapeau*, without inclination of the head or body; out of uniform, by uncovering the head. In this case the inferior would be the last to recover the head.

3. The non-commissioned staff and sergeants, when in uniform, will, without halting, salute officers as above; out of uniform they would take off the hat or police cap and hold it down by the right side until the officer passes or is passed.

4. Every corporal or private soldier will in general salute officers in like manner; but if the officer be a general, the colonel or other commander of the regiment or post, and the corporal or soldier be in uniform, he would halt, face to, and salute such officer by touching the cap as above, and then remain as under arms for a moment, or until passed. By this form, at the same time the compliment is rendered the individual submits his person to an inspection.

5. Every non-commissioned officer or soldier will, if out of uniform, uncover the head on speaking to or being addressed individually by an officer. If in uniform, the cap would be touched as above, under the same circumstances.

6. A non-commissioned officer or soldier, being seated, and without particular occupation, will rise on the approach of an officer, and make the customary salutation. If standing, it would be proper to turn towards the officer for the same purpose.

7. If the parties remain in the same place, or on the same ground, such compliments would not in general be repeated.

8. The foregoing cases suppose the inferior to be without arms, or with side arms only. With arms in hand, the inferior would, in reporting or on receiving orders addressed to him, individually, bring the sword or firelock to a *recover*.

9. It is required that an officer who calls at head-quarters officially, or calls to make a visit of respect to a superior, shall present himself in uniform, unless the latter has been dispensed with by the chief or superior. If not, an apology or explanation will always be tendered by the inferior who makes such call out of uniform.

Article 8.—*Compliments by guards and sentinels.*

1. A sentinel will *carry arms* to all officers, whether in uniform or not, and *present arms* to his particular *officer of the day*, and to any other officer wearing two epaulettes and a sword. The latter compliment shall be paid to any armed body of men passing near a sentinel.

2. A sentinel, seeing himself approached, will halt, face to his proper front, and bring his firelock to a *support*. From this position he will salute the officer or armed body of men passing near him, if in a direction to be seen without turning the head. A guard shall take the same position and observe the same rule when approached by an officer or an armed body of men entitled to a salute.

3. All guards, except the personal guards of general officers, turn out and present arms to the particular *officer of the day*, or to any general officer with sword and epaulettes, once. On subsequent visits from the same officer, a guard will turn out and stand by its arms.

4. The personal guard of a general will observe a like courtesy towards the general, or any superior general; and as often as passed or visited by an inferior general officer, or the *officer of the day*, it will turn out and stand by its arms.

5. Police guards and others inferior to them will compliment the commandant of the regiment or post, respectively, in the manner prescribed in paragraph above.

6. A guard will turn out and present arms to a new guard or any armed body of men passing in front of it, and if the armed body is marching to music, the drums of the guard will join in the same air.

7. No compliment will be paid by a guard or sentinel between sunset and sunrise; but, during the same period, guards will turn out and stand at shouldered arms on an official visit from the *officer of the day*, a general, or staff officer.

8. The courtesy of the service requires that officers shall acknowledge in a suitable manner all compliments paid to them, whether by individuals, guards, or corps.

9. When a guard presents arms, if it be to the President or Vice President of the United States, the drums shall play a march; if to the Secretary of War or a major general, the drums shall beat two ruffles; if to a brigadier general, one ruffle.

Article 9.—*Compliments by troops under review.*

1. A battalion being in the order of battle, the commander will give the caution—*the battalion will prepare for review;* when the ranks will be opened in the manner prescribed in the Regulations for the Exercise and Manœuvres of Infantry.

2. At the word *march*, the field and staff officers dismount; all the company officers, the colors, and the sergeant between, will advance four paces to the front of the first rank, and place themselves opposite their respective positions in the order of battle; the surgeon's mates, the surgeon, paymaster, quartermaster, and adjutant, will place themselves on the right of the rank of company officers, in the order in which they are here mentioned, at intervals of a pace from each other; the adjutant, who is on the right, will dress this entire rank; at the same time the band (if there be one) will advance through the centre and place itself in one rank midway between the colors and the line, the color guard will replace the colors, and the quartermaster sergeant and sergeant major, in the order of their rank, will place themselves on the right of the front rank of the battalion.

3. The field officers shall superintend the execution of these movements, and, on giving the word *front*, the colonel will place himself eight paces, the lieutenant colonel and majors six paces each, in front of the first rank, opposite their respective places in the order of battle.

4. With a view to an increased front, when the battalion is to be reviewed singly, the division of drummers, with the drum-major on its right, may be formed on the right of the battalion; next, the division of pioneers, with the corporal on its right; and, lastly, the quartermaster sergeant and sergeant major on the right of the whole.

5. In this parade order the battalion will await the approach of the personage who is to review it, for whose guide a camp color will have been placed eighty or one hundred and fifty paces in front of the colors, according to the extent of the line and the plain in front of it.

6. When the reviewing personage is midway between the camp color and the colonel, the latter will face about and command, *battalion, present arms;* resuming immediately his proper front, when the whole will salute, the last motion of the sword to correspond with the last motion of the firelock. The drums or band will beat or play according to the rank of the reviewing personage; if it be the President or Vice President of the United States, a march; if the Secretary of War or a major general, two ruffles; if a brigadier general, one ruffle. The regimental color alone will be dropped to a brigadier general, both colors to the Secretary of War or a major general, and all colors and standards to the President or Vice President of the United States.

7. If the reviewing officer be under the rank of brigadier general, no compliment will be paid by either the colors or music; neither will arms be presented to him if he is inferior in rank to the commandant of the parade. In the latter case he will be received with arms carried.

8. When the reviewing personage has advanced nearly up to the colonel, and the proper compliments are paid, the colonel will bring his sword to a carry, face to the line, and order, *battalion, shoulder arms;* when the whole will remain perfectly steady, except the colonel, who resumes his proper front.

9. The reviewing personage now turns off to the right of the battalion, passes thence in front of all the officers to the left, around the left and behind the rank of file closers to the right again. Whilst he is passing round the

battalion, no matter what his rank, the drums or band will play, and when he turns off to take his station near the camp color, the music will cease.

10. When the music ceases, the colonel will face about and command, *battalion, rear ranks, close order—march.* At the third word, all persons, except the colonel, who are in advance of their proper places in the order of battle, will face about; and, at the word *march*, the whole battalion will return to that order, the proper officers remounting.

11. If a brigade is to be reviewed standing, the battalions composing it will, from the order of battle, assume the parade order as above. The brigadier and his staff, on foot, will place themselves as follows: The first, two paces in front of the rank of colonels, opposite the centre of the brigade, his aid on the right, one pace retired; other brigade staff officers, if field officers in rank, will place themselves in the rank of lieutenant colonels and majors, behind the brigadier; if below that rank, behind him in the rank of company officers. If there are bands of music with the brigade, they will be united with the drums and formed in the intervals between the two battalions. If there be more than two battalions, and no interval in the line behind the brigadier, the music may be placed in any other situation that he may designate.

12. A brigade thus formed will receive the reviewing personage in the same manner that he would be received by a single battalion, with a slight difference in the words of command and the repetition of them, which need not be here noticed.

13. If several brigades are to be reviewed together, or in one line, this further difference will be observed: the reviewing personage, joined by the general of the division on the right of his division, will proceed down the line parallel to its front, and when near the brigadiers, respectively, will be saluted by their brigades in succession. The music of each, after the prescribed salute, will play whilst the reviewing personage is in front or in rear of it, and only then.

14. The reviewing personage having taken a position near the camp-color, previously placed at a proper distance, the colonel, or other commander of the line, will cause the battalion or line to pass in review, as is partially prescribed at the end of section five, of the *regulations for the field exercise and manœuvres of infantry*, to which the following paragraphs, Nos. —— inclusive, will be in the way of addition or explanation.

15. The column will first pass in common time, and afterwards, if required, in quick time, in both instances, with closed ranks; but in passing in quick time no particular salute or compliment will be paid.

16. The line, if consisting of one or more battalions, will break into column of companies, each battalion column having its music headed by the drum-major, six paces in front of the colonel, the pioneers, with the corporal at their head four paces in front of the drum-major; the quartermaster sergeant in a line with the pioneers, two paces from the then reverse flank, and the quartermaster, paymaster, surgeon, and surgeons' mates, in one rank, four paces behind the file closers of the rear-most company.

17. When within six paces of the reviewing personage the adjutant will be dressed in a line with the second division of the battalion column, and the sergeant-major with the last but one, each six paces from the (then) reverse flank.

18. Passing in common time, the colors remaining in the ranks, will, at the distance of six paces, again salute the reviewing personage, according to his rank, and the music will cease playing for the drums to give the prescribed number of rolls or ruffles, when the same march or air will be resumed or continued, as is directed in the regulations above cited. At the same distance the officers will salute as they successively come up. The commander of the column, having saluted, will place himself near the reviewing personage, and remain there until the rear has passed.

19. If the reviewing officer is inferior in rank to the commander of the column, the ruffles or rolls, and the color and sword salutes will be omitted in the passing, as has been directed for the standing review, but the troops would march past—arms carried.

20. When the column has passed it will return to its original ground, and be wheeled up into line. From this position such further exercises and manœuvres will be performed as may be required by the reviewing personage, and according to a card which he will have handed to the commander of the battalion or line.

21. In performing the required manœuvres the camp color, previously placed in front of the parade, shall be the point on and from which they are to be made, although the reviewing personage should be occasionally absent from that point.

22. A number of companies, less than a regiment, would be reviewed as a regiment or battalion, and a single company would be reviewed, the captain, &c. in the same positions, both in the standing and passing salutes, as if the company were with the battalion. But the company would pass in column of platoons or sections, according to the order of the reviewing personage.

Article 10.—*Compliments by the line.*

1. The line will turn out in the order of review, the whole on foot, in uniform, and with side arms only, whenever the President or Vice President of the United States, the Secretary of War, or a general-in-chief, (having under him more than a division of troops) passes along the front of the camp, previous notice being given. The colors, the staff resting on the ground, will be unfurled, each color bearer holding the staff of his color with the right hand. The drums will be piled up behind the colors. The whole, without paying any particular compliment, will remain steady until the personage has passed down to the left of the line, when it will be dismissed.

Article 11.—*Compliments by troops in passing each other.*

1. Columns meeting in route will each incline to its right, and will pass as in review, each paying to the other the highest compliments. The colors of the one will only salute the colors of the other. Officers will salute as they successively come up with the commander of the other column.

2. If there be not space for them to pass each other, the column commanded by the inferior officer will be wheeled up into line on its own side of the way, and in that order will reciprocate the highest salutes, colors only saluting colors, and the officers of the passing column saluting as they successively come up with the colors of the standing line. In the face of the enemy the above compliments will, of course, be dispensed with. Under the latter circumstance corps will take particular care not to cut each other in their movements.

Article 12.—*Compliments by posts, as such.*

1. A salute shall be fired by any military separate post, garnished with long pieces of ordnance, from such ordnance, on a visit from either the President or Vice President of the United States, the Secretary of War, or a

general officer in command, as follows: if the visitor be the President or Vice President the national salute will be fired; if the Secretary of War, a major general in the command of a particular army in the field, or a geographical division or department, the salute will consist of fifteen guns; if a brigadier, in either of those commands, the salute will consist of eleven guns; due notice being given of the intended visit in all cases.

2. In respect to general officers these further limitations will be observed: they will be saluted as above only whilst making the tour of their respective commands, and the same general not oftener than twice a year by the same post.

3. Posts, within gunshot of water, will reciprocate similar salutes, gun for gun, with a ship of war not under the rate of a frigate, in passing, or as soon thereafter as may be agreed upon; but in no case shall the compliment exceed the national salute.

4. If the squadron or ship be American, the inferior, in relative rank, of the two land and sea officers, in the respective commands, will fire first the salute agreed upon.

5. If there be several such posts in sight of, or within six miles of, each other, the principal only shall reciprocate compliments with ships passing.

6. The national salute shall be conformable to the number of States composing the Union; one gun for each State.

7. Salutes shall not be fired from calibers exceeding twelve pounders, if it can be avoided, and an interval of —— seconds will be observed between the guns.

8. The flag of the post, or fort, that fires a salute, and others in sight, will be displayed whilst the salute is firing, and all guards will turn out under arms.

Article 13.—*Compliments to the national anniversary.*

1. On every fourth of July, at —— o'clock, a national salute will be fired at every separate camp and post provided with long guns, when, also, if the weather permits, the troops will be under arms.

2. If there be several camps or posts so near each other that the firing at the one would be confounded with the firing at another, the salutes will be fired successively, observing an interval of ten minutes between them, and beginning at the principal camp or post.

Article 14.—*Honors to the dead.*

1. The commander of any camp or post, on receiving certain intelligence of the death of the President of the United States, shall, on the following day, cause a gun to be fired at every half hour, beginning at sunrise, and ending at sunset. If two or more camps or posts be so situated that the firing at the one would be confounded with the firing at another, that which is commanded by the superior officer will alone fire.

2. Funeral escorts will be composed as follows: for a major general's funeral, a battalion, a squadron, and two pieces of artillery; for a brigadier's, a battalion and one troop; for a colonel's, a battalion; for a lieutenant colonel's, six companies; for a major's, four companies; for a captain's, two companies; for a subaltern's, one company; for a sergeant's, twenty men; for a corporal's, twelve men; and for a private's, eight men; with a suitable allowance of music in each case—the whole escort on foot.

3. The funeral escorts of staff officers not having rank assimilated to lineal rank, will be regulated according to the qualified assimilation contained in paragraph 6, article 2.

4. A funeral escort will be commanded by an officer or non-commissioned officer of the grade of the deceased, or that next below or above such grade, according to the rank of the persons present, but in the case of a deceased private the corporal will command the escort.

5. The pall-bearers, six in number, will be detailed from the grade of the deceased, or from the grade or grades next above or below it.

6. At the funeral of an officer as many in commission of the army, division, brigade, or regiment, according to the rank of the deceased, as can conveniently be spared from other duties, will join in procession, in uniform, and with side arms only. The funeral of a non-commissioned officer or private will be attended, in like manner, by the non-commissioned officers or privates of the regiment or company, according to the rank of the deceased.

7. The escort, at shouldered arms, bayonets unfixed, being in line opposite the tent or quarters of the deceased, will receive the coffin with the highest salute. When it has cleared the right of the escort, the latter will break into open column, left in front, and in that order precede the deceased to the grave. Artillery and cavalry, if a part of the escort, will be preceded by the infantry.

8. Before putting the column in march the commander will cause arms to be reversed, which will be executed by bringing the firelock under the left arm, the butt to the front, the barrel downwards, the muzzle within —— inches of the ground, the left hand sustaining the lock, and the right steadying the firelock behind the back; swords are reversed in a similar manner under the right arm.

9. Persons joining in the procession follow the coffin in the inverse order of their rank, side arms by their sides.

10. The column will be marched to solemn music, and with its pivot flank next to the grave; when opposite, the commander will cause arms to be shouldered, and the line to be formed.

11. When the coffin is brought along the front the escort will salute it as before; and again shoulder arms when it reaches the grave; when the commander will give orders to prime and load.

12. As the coffin is let down the escort, including the artillery, will fire the first round; and a third, or last, at the moment the interment is ended. The column will be re-formed, right in front, and march off to music in quick time.

13. If there be a chaplain to perform divine service, the escort, after saluting at the grave, will *rest on arms*, which is done by placing the muzzle on the left foot, both hands on the butt, the head on the hands, and the right knee a little bent. In this case, the three rounds will be fired after the interment is ended.

14. On the day on which the general-in-chief of an army in the field is interred, a gun will be fired at every half hour, beginning at sunrise, and ending when the procession moves; and the whole line present will be under arms from the commencement of the procession until the interment is ended.

15. When the commander of a regiment falls under its colors, the regimental color will be faced with black crape four inches in width, and so remain for the space of two months.

16. Officers in funeral processions will wear black crape attached to the hilts of their swords. As family mourning, crape will be only worn by officers (when in uniform) around the left arm.

17. The drums of a funeral escort will be covered with black crape or thin black serge.

ARTICLE 15.—*Miscellaneous.*

1. Similar compliments to those which are due to a major general from guards, troops under review, or posts, as such, may be paid to either of the following personages, present by invitation of the commanding officer, to wit: the chiefs of the executive department of the United States' Government not before mentioned; the President *pro tem.* of the United States' Senate; the Speaker of the House of Representatives of the United States; the Chief Justice of the United States; and the Governors of States and Territories, within their respective geographical limits.

2. Any compliment or honor due to officers of the land forces may be paid to naval officers, according to relative rank, by order of the commanding officer.

3. Foreign officers, present by invitation from the general of an army in the field, or the commander of a geographical division or department, may also be complimented, according to relative rank, by guards, troops under review, or posts, by order of such commander.

SECTION III.

INTERIOR ECONOMY OF REGIMENTS AND COMPANIES.

ARTICLE 16.—*Unanimity, or l'esprit du corps.*

1. A spirit of good-will, and even of brotherhood, particularly among the members of the same regiment, is essential to the good of the service, and to establish which the colonel will use the legal power and moral influence belonging to his rank and station. Timely interference to prevent disputes among officers, or to heal them if they should unfortunately arise, advice to the young and the inexperienced, parental reprehensions (in private) of the disorderly, and prompt arrests of the disobedient, are among his surest means of accomplishing those highly important ends, and towards the attainment of which he cannot fail to receive the assistance or support of every well-disposed officer. The general deportment of officers towards juniors or inferiors will also be carefully watched and regulated. If this be cold or harsh on the one hand, or grossly familiar on the other, the harmony and discipline of the corps cannot be maintained. The examples are numerous and brilliant in which the most conciliatory manners have been found perfectly compatible with the exercise of the strictest command; and the officer who does not unite a high degree of moral vigor with that civility which springs from the heart cannot too soon choose another profession, in which imbecility would be less conspicuous, and harshness less wounding and oppressive.

ARTICLE 17.—*Instruction.*

1. The colonel will exert himself to the utmost in the instruction of the entire regiment under him; he will cause it to execute frequently the exercises and movements prescribed for the arm of service to which he belongs, and more particularly those which are most likely to be necessary in the presence of an enemy; he will at those exercises direct the field officers and captains, successively, to give in his presence the words of command, and superintend their execution; he will march the regiment, successively, two, three, four, and five miles, in hot weather, without halting, to accustom it to service under that circumstance; he will establish athletic and encourage all manly exercises (including swimming) among both officers and men; he will cause the latter to be instructed how to clean and preserve their arms, accoutrements, and clothing; to preserve their ammunition; to make cartridges, gabions, and fascines; to form trenches and abattis; to pitch and strike tents; to pack knapsacks; to construct camp ovens and kitchens; to make bread and soups; and, in general, to do every thing necessary to the health, pride, and efficiency of the regiment, with a view to a vigorous campaign.

ARTICLE 18.—*System of responsibility.*

1. The colonel will be responsible to his immediate commander for the good order and efficiency of the regiment, and will himself conform to, and cause to be executed, the military laws, regulations, and orders applicable to his command.

2. In campaign, when the regiment is divided, he will remain with that part the position of which he may judge to be the most important, unless otherwise ordered by his immediate commander.

3. The organization of a regiment in the order of battle will be taken as the basis of its division, with a view to interior police or economy. The lieutenant colonel will be charged with the care of the right wing, and the major of the left, under the supervision of the colonel; and the captains will be immediately responsible to the field officers of their respective wings.

4. Every company will be divided into four squads, and numbered, beginning on the right of the company in the order of battle, and ending on the left, with a non-commissioned officer at the head of each, who will be immediately responsible to one of the lieutenants, among whom the squads will be distributed, as the latter will be to the captain.

5. If there be not a sufficient number of non-commissioned officers with the company to take charge of the squads, exclusive of the first sergeant, (who is never to be put on that duty, nor on any other which takes him from the company,) privates the best qualified will be substituted, as lance corporals.

6. The band will form a separate squad, under its proper chief, who will be immediately responsible to the adjutant; or the musicians will fall into the squads of their respective companies, at the discretion of the colonel.

7. As far as practicable, squads will be kept separate, whether in tents or quarters; and the men of each will be numbered according to their qualifications, in order that the highest in number present may, as lance corporal, command the squad in the absence of the non-commissioned officer habitually charged with the care of it; and the inexperienced soldiers will be mixed with the old.

8. The adjutant, assisted by the sergeant major; the quartermaster, assisted by the quartermaster sergeant; the paymaster, assisted by a non-commissioned officer; and the surgeon, assisted by his mates, will be immediately responsible to the colonel in their respective departments of duty. The surgeon will also be responsible to the field officers of the respective wings, that the sick, in tents or quarters, do not suffer for the want of medical assistance.

ARTICLE 19.—*Appointment of certain commissioned staff officers; appointment and degradation of non-commissioned officers.*

1. Adjutants, quartermasters, and conductors of artillery will be selected by the commander of the regiment or battalion, and announced in orders. These staff appointments will be held during the pleasure of the colonel or other permanent chief, and cannot be vacated at the pleasure of a temporary commander.

2. The appointment of paymasters is reserved to the Executive.

3. It is at all times competent for the commander, when he shall judge that the good of the service requires it, to put an individual of his staff temporarily on lineal duties; that is, when the individual holds rank in the line.

4. In the absence of the permanent staff at head-quarters, a temporary staff may be appointed to *act* as such. So, if two or more companies be serving together without a permanent staff, the commander of the detachment may appoint an *acting* staff.

5. The non-commissioned staff will be selected by the colonel; the non-commissioned officers of companies will also be appointed by him, but on recommendations made by the respective captains, where no strong objection exists to the individuals nominated. In the latter case, other individuals will be offered to the colonel.

6. Every non-commissioned officer will be furnished with a certificate of his rank, signed by the colonel, and countersigned by the adjutant, which will be assimilated, as near as may be, to the commission of an officer.

7. The appointment of every non-commissioned officer will be announced in regimental orders; after which he cannot be degraded, except for incapacity or misconduct proven before a court, and, if found guilty of a slight offence, the punishment shall not exceed reduction to the ranks.

8. As far as practicable, the selection of company sergeants shall be made from the corporals. Appointments to the rank of corporal, or promotions to that of sergeant, may be made from one company into another company of the same regiment, having the approbation of the captain into whose company such transfer is made.

9. No appointment or promotion to the rank of non-commissioned officer shall be made in any company which has at the time its full proportion of non-commissioned officers, according to the number of privates therein, with reference to the legal establishment.

Article 20.—*System for encouraging good conduct by the appointment of lance corporals.*

1. The three officers highest in rank present with the regiment, assisted by the adjutant as secretary, will hold a board on the first day of every other month in the year, for the purpose of considering the pretensions of such privates as may offer themselves in person, or may send in their names for the rank and distinction of lance corporal, which shall be accorded to every private, on satisfactory proof that he has been *active* in the performance of his duties, and exemplary in his general deportment during the preceding six months.

2. This distinction will not change the pay of the individual, nor exempt him from the duties of a private soldier, under which character he will still be borne on all reports and muster-rolls; but it shall give him the command of squads or detachments consisting of privates only, or other lance corporals, his juniors.

3. A lance corporal thus appointed will be announced in orders, and shall wear a distinctive badge, after which other privates or lance corporals, his juniors, shall treat him with the respect due to a corporal, (that is, when he is in command as such,) nor shall he be deprived of his badge, except by the judgment of a court, and if found guilty of a slight offence, the punishment shall not exceed such deprivation.

4. As far as practicable, the selection of corporals will be made from lance corporals.

5. Companies stationed singly at a distance from head-quarters may, by permission of the colonel, hold boards consisting of three officers for the purpose of conferring the rank of lance corporal as above, or the names of applicants may be sent to the regimental board.

Article 21.—*Selection of pioneers.*

1. Intrepidity, strength, and activity, are the qualifications which will be considered the most necessary for pioneers, who will be nominated and put in orders in the manner prescribed for company non-commissioned officers. The colonel will select one of the corporals of the regiment to command them when embodied.

Article 22.—*Selections for flank companies.*

1. Activity, lightness, hardihood, and a spirit of enterprise, are the qualifications to be sought for by the colonel in the selection of light infantry and rifle officers, and men from the mass of the regiment.

2. On a war establishment the flank companies will be kept as nearly complete as practicable. Under the other circumstance, selections will be made to keep them up to the average of the battalion companies present with the colors.

3. In time of peace, the colonel, to avoid jealousies, will, as often as practicable, rather fill the ranks of flank companies by selections from the mass of recruits brought to head-quarters, than by selections from the ranks of the battalion companies.

Article 23.—*Employment of soldiers as clerks, mechanics, and waiters.*

1. As these occupations impair, or derogate from the military character, they are to be strictly limited and watched; and the designation or employment of men, not non-effective in the ranks, as standing or permanent clerks; or the designation of men as permanent mechanics, in cases not expressly provided for, is positively prohibited.

2. If a soldier be required to assist his first sergeant in the clerical business of the company, to excuse him from a tour of military duty the captain will previously obtain the sanction of his own commander, (if he has one present,) and, whether there be a superior present or not, the captain will be responsible that the man so employed does not miss four successive tours of guard duty by reason of such employment.

3. A clerk required by a staff officer, for office business, will be selected, as far as practicable, with the approbation of his captain; or, if required by a general staff officer, with the approbation, in like manner, of the commander next above the captain present.

4. The mechanics found in a regiment may be relieved from ordinary military duty to make, to alter, or to mend soldiers' necessaries; but no soldier shall be so relieved to work for the private benefit of an officer.

5. Captains will cause the men for whose benefit the mechanics have done work to pay for the same at the next pay day, at the rate previously fixed by the council of administration. See par. 6 and 19, art. 41.

6. Work done by soldiers, in the intervals of duty, for the private benefit of officers, will be paid for as soon as finished, at the rate previously and voluntarily agreed upon; and an officer known to have employed a soldier on such work, will be liable to arrest and punishment, as in the case of breach of orders, if he cannot produce a written receipt in full of such payment.

7. Work done by soldiers on necessary furniture for offices and quarters, will not be considered for the private benefit of the officers who use the furniture, if it be reported and registered as the property of the United States.

8. Each company officer, whilst actually with his company, will be allowed to take therefrom one private soldier as a waiter, with the voluntary consent of the latter; and, in the case of a subaltern, with the approbation also of the captain as to the particular man selected. No other officer will be allowed to take a waiter from the line.

9. Occasional *voluntary* services rendered by private soldiers, as waiters, in the *ordinary* intervals of duty, will not be considered as falling under or violating the 6th and 8th paragraphs of this article.

10. Waiters will be exempted from all ordinary duties, excepting one tour of guard duty per month; but their employers will be responsible that they, and also company clerks, fall into their respective companies at all drills, (when not expressly excused by the commanding officer,) at all reviews, musters, and inspections, and as often as a meeting with the enemy is expected.

ARTICLE 24.—*Designation and consolidation of companies.*

1. At the first organization of a regiment or independent battalion, the companies will be designated by letters of the alphabet, giving the first letters to the flank companies, according to the rank of the respective captains, or, if the rank be not settled, by lottery; and the next highest letters of the alphabet to the remaining companies, on the same principle.

2. Designations so given will be as permanent as the regiment or independent battalion. A change in the relative rank of the captains will of course change the positions of the companies in the habitual order of battle, whether the captains be present or not, but will not change the letters of the companies.

3. When any company, serving with the colors, cannot be kept up to the number of thirty privates, the commander will designate a recruiting party, and transfer the remainder of the company to the other companies present. In this case, the captain and the party designated and sent on the recruiting service would retain the letter of the company and the books and papers belonging to it, excepting such papers as ought necessarily to go with the men transferred.

4. On the return to the regiment of a company sent on the recruiting service, the colonel will, if he thinks it expedient, re-transfer to it a part of the old soldiers in lieu of as many recruits.

5. In war the minimum strength of companies, as fixed above, may be changed in any particular army in the field by the commander thereof.

ARTICLE 25.—*Base of interior police and service.*

1. A captain or subaltern, according to the strength of the regiment present, will be detailed daily as *officer of the day*, to watch over the execution of the police of the regiment, whose duties, nevertheless, will not dispense other officers from their habitual attention to similar objects, each within his sphere.

2. A police guard will be detailed daily, having a trumpeter or drummer attached to it, to sound the signals hereinafter prescribed, and such others as may be particularly ordered. See article 50.

3. The commandant of the guard will be immediately responsible to the *officer of the day* for the security of the prisoners in its charge; for the tranquillity of the tents or quarters of the regiment; for their safety from fire; and for the due execution of the signals, &c.

4. There will be daily five stated roll-calls. The result of each, except that made at retreat parade, will be verbally and promptly reported by the first sergeants to their respective captains, and, by the latter, in case of *absence without leave*, or *desertion*, to the adjutant, for the information of the colonel.

5. At the dawn of day a signal or call will be made for the music to repair to the regimental parade, and five minutes after the call the whole will commence the *reveille*, when both officers and men will rise. As soon as the music ceases, the first sergeants will call their rolls in front, (when the weather will permit,) of the tents or quarters of the respective companies, each company being in the habitual order of formation. In bad weather, permission may be given to make the call in tents or quarters, by the chiefs of squads.

6. The rolls being called, the chiefs of squads will immediately cause the men to put their tents or quarters in order; to sweep the space in front of them, (when the weather will permit,) and, in camp, that between the tents and kitchens; to water and feed horses; to dress them; and to clean the stables or ground on which the horses are picketed. At the same time, the commandant of the guard will cause the tents or quarters of the guard to be put in order, and the space around him to be swept, employing for these purposes the prisoners in preference to the guard. The duties mentioned in this paragraph shall be termed *the general fatigue*.

7. The result of this roll-call having been reported, verbally, in the first instance, will afterwards constitute the foundation of the written morning reports of companies, to be handed in to the adjutant before eight o'clock, A. M. after being verified by the signatures of the respective first sergeants and captains. The reports will be consolidated in the next hour by the adjutant, for the information of the colonel, and if the consolidation is to be sent to a higher commander, it will be signed by the adjutant and colonel.

8. Thirty minutes before nine o'clock, A. M., the surgeon's call will be given, when each first sergeant will conduct to the dispensary the sick of the tents or quarters who are able to go thither without prejudice, and, at the same time, hand in to the surgeon a report of all the sick of the company other than those in hospital. The patients who cannot attend at the dispensary will be, immediately after, if not before, visited by the surgeon.

9. The second stated roll-call will be at nine o'clock, A. M, and the third at three o'clock, P. M.; the former immediately preceding breakfast, the latter immediately preceding dinner. For these purposes, the police drum, or trumpet, will sound appropriate signals, which will be immediately answered by the music of the several companies, by *peas on the trencher* for breakfast, and *roast beef* for dinner. At both meals, the roll of each company will be called before commencing, by the first sergeant, if the company mess together, otherwise by the non-commissioned officers of the respective squads, and the result, in case of absentees, promptly reported to the first sergeant. The *officer of the day* will, as often as practicable, make a visit of inspection to the mess-rooms at meal hours.

10. Thirty minutes after *peas on the trencher*, a call will be sounded for the fatigue party daily detailed for that purpose (that is, when the number of prisoners confined in the police guard shall be insufficient) to turn out and sweep the regimental parade, and such other parts of the camp or place as were not swept or cleaned after the *reveille*. This party shall be termed *the daily fatigue*.

11. In cavalry corps there shall be a stable-call forty minutes before noon, for watering, feeding, and dressing horses.

12. For the fourth roll-call or dress parade, a signal will be sounded thirty minutes before sunset for the music to assemble on the regimental parade. At the same time each company will turn out under arms, for inspection by its officers, on its own parade.

13. Ten minutes after that signal, the adjutant's call will be given by the assembled musicians, at which each company will be marched to the regimental parade, and formed in its relative position, *ranks opened, arms ordered*, and standing at ease; the company officers will at the same time march out six paces to the front, face about to the

line, each opposite to his place therein. The parade will be commanded by a field officer, or the senior officer present, who will take post at a suitable distance in front, opposite the centre, and facing the line.

14. The music will be formed in two ranks, on the right of the line, and from the *adjutant's call* to the *retreat* the band, if there be one, will play.

15. Ten minutes before the setting of the sun, the adjutant will order the music to *beat off*, when the whole will commence on the right, beat to left, and back again to their former position, marching along the front in both instances. The *retreat* will be concluded by three rolls, at the first of which the adjutant and company officers will draw swords, and at the last the company officers will face about from the line.

16. When the music ceases, the adjutant, being on the right, will command, 1st. ATTENTION; 2d. *Shoulder* ARMS; 3d. *Right* DRESS. When he sees all the ranks well aligned, he will add, 4th. FRONT; and march along the front to the centre, face to the right, and pass the line of company officers eight or ten paces, come to the right-about, and again command—*Present* ARMS.

17. Seeing this executed, he will face about to the commander, salute, and report, "*Sir, the parade is formed.*" The adjutant will then, on an intimation to that effect, take his station on the left of the commander, a pace retired, and put up sword.

18. The commander will draw sword, after acknowledging the salute of the line, and command, 1st. *Shoulder* ARMS; 2d. *Eyes* RIGHT; 3d. *Eyes* LEFT; 4th. FRONT; and such other exercises as he may think proper; concluding with, *Order* ARMS; *Stand at* EASE.

19. On an intimation to call rolls, the adjutant will draw sword, advance upon the line, halt at a proper distance, and order, 1st. *First sergeants to the front;* 2d. MARCH. At the first word, they will advance arms; at the second, march four paces to the front, and halt; when the adjutant will add, 3d. *Call* ROLLS; at this word, the captains and first sergeants will face to the right-about, and the latter execute the command, each under the inspection of his captain. Both captains and sergeants will then resume their proper fronts.

20. The adjutant will continue, 1st. *First sergeants, inwards*—FACE; 2d. *To the centre*—MARCH. When they meet and close on the centre, (halting as they close,) he adds, 3d. *Front* FACE; 4th. REPORT. At the last word, each in succession, beginning at the right, will bring his firelock to a *recover*, and report distinctly, "all present or accounted for," "one absent," or the like, according to the fact.

21. The adjutant again: 1st. *First sergeants;* 2d. *Outwards* FACE; 3d. *To your posts*—MARCH. At this word, each will resume his place, and order arms. The adjutant will now face to the commander, salute, and report the result of the roll-call; then, on an intimation to that effect, face about to the line, and read such orders as he may have for the purpose, after the caution, *Attention to orders;* when he will put up sword.

22. The reading ended, the adjutant again draws sword, faces to the commander, salutes, and reports; when, on an intimation from the commander, he will again face to the line, and announce "*the parade is dismissed.*" At this, all the officers put up swords; the first sergeants will close ranks, and march off their respective companies; the adjutant places himself in the centre, in the rank of company officers; the latter face inwards, and close on the adjutant; when the senior captain orders, 1st. *Front* FACE; 2d. *Forward* MARCH. When within six or eight paces of the commander, they salute him with the hat, and disperse.

23. When the extent of the line renders it difficult for the flanks to hear the orders read at the centre, the commander may cause the ranks to be closed, and one or two companies on each flank to be thrown forward, before the caution "*attention to orders.*" In this case, the whole will be thrown back into the original parade order, before the annunciation "*the parade is dismissed.*"

24. All company officers will be present at evening parade, unless specially excused, or on some duty incompatible with such attendance.

25. The parade itself may be dispensed with for some special reason, as on account of the weather, or on account of fatigue consequent on a march, or resulting from some particular service.

26. After *retreat*, when the regiment is in quarters, the chiefs of squads will cause the arms to be placed in the arm-racks, with the accoutrements attached to them. At the same hour, when in camp, the arms will be lodged in the bell-tents or bells-of-arms, if the companies are provided with such tents; otherwise, the arms will be secured under the same cover that shelters the men. In camp, when the weather will permit, the arms will be stacked after the general fatigue that follows the *reveille*, and sentinels placed over them, to be furnished by the police guard.

27. Ten minutes after *retreat* or evening parade, a stable-call will be sounded for watering, dressing, and securing horses, and for spreading litter.

28. At a signal given, the music will again be assembled for *tattoo;* after which the rolls will be called the fifth time, as at the *reveille*. As soon as dismissed, the chiefs of squads will cause the lights to be extinguished, when the men will retire to rest, and remain perfectly quiet.

29. The signal for *tattoo* will be sounded at eight o'clock in summer, and at nine o'clock in winter, except for midsummer, when it shall not be given sooner than thirty minutes after the evening parade is dismissed. During the latter period, the signal for the *reveille* shall be made at sunrise.

30. In these regulations the summer will be understood to commence on the 20th of March, and the winter on the 20th of September, each period embracing six months; and midsummer will be understood to embrace that period when the sun is above the horizon at seven o'clock, P. M.

ARTICLE 26.—*Arrests—confinements.*

1. At the head-quarters of the regiment, the commander alone will have the power to order an officer into a state of arrest, except for mutiny, or wilful disobedience of orders, or for some other offence expressly designated, as in the — article of the Rules and Articles of War. Such arrests will be promptly reported to the commander for his approbation.

2. An application for the arrest of an officer, however formal, is not obligatory on the commander. He will exercise a sound discretion on the subject.

3. In ordinary cases, an officer above the rank of captain will be placed in arrest by sealed instructions to that effect, addressed to him. If under the rank of major, he may be placed in arrest by a verbal order, in any case. The sword of an officer in arrest need not be taken from his tent or quarters under ordinary circumstances. The arrest itself will sufficiently deprive him of the use of it.

4. An arrested officer may have larger limits than his tent or quarters assigned him, on written application to that effect, addressed to the commander, at the discretion of the latter.

5. The arrest of an officer, or man serving immediately under another officer, will be promptly reported or notified to the latter by the authority ordering the arrest.

6. Individuals placed in arrest may be released therefrom: 1st, by the commander of the regiment, unless the arrest was ordered by higher authority. 2d. By the commander of the company, under the same restriction; and

further, unless the individual be under guard; in which case the sanction of the authority that detailed the guard would be necessary. 3d. By the commander of the police guard, immediately after guard mounting, in the case of prisoners not confined by virtue of a written charge or accusation, signed by competent authority; the intention of this regulation being, that no individual shall be confined under guard longer than twenty-four hours at the same time, without such charge or accusation. 4th. By due course of trial.

7. On a march, company officers and non-commissioned officers in a state of arrest will follow in the rear of their respective companies, unless otherwise particularly ordered. Field officers and commissioned staff officers, under the same circumstances, will follow in the rear of their respective regiments. Other persons in arrest will be escorted by the police guard, or a detachment from it. This last class of prisoners will march with their coats turned.

8. The arms, &c. of non-commissioned officers and privates in arrest will be deposited with the first sergeant of the company. On a march they may be transported with the baggage of the company.

9. An officer under arrest will not make a visit of etiquette or courtesy to a superior, without express invitation; and in case of business, he would make known his wants by communication in writing.

Article 27.—*Messing.*

1. Bread and soup are the great items of a soldier's diet, in every situation; to make them *well* is, therefore, an essential part of his instruction. Those great scourges of a camp life, the scurvy and diarrhœa, more frequently result from a want of skill in cooking, than from the *badness* of the ration, or from any other cause whatever. Officers in command, and more immediately regimental officers, will therefore give a strict attention to this vital branch of interior economy; with a view to which, as well as to multiply their resources in time of siege or scarcity, they will do well to read the articles "baking," and "bread," in the different Encyclopædias.

2. The colonel will frequently cause the quartermaster or quartermaster sergeant to visit the bakery, and to inspect all the materials of which the soldiers' bread is made. It is also prudent to send occasionally a well qualified man to watch over the process of kneading, to guard against the mixing of cheap but deleterious substances with the dough, as damaged flour, &c.

3. No quartermaster or quartermaster sergeant can be deemed instructed in his duties, until he has followed up, once at least, the whole process of converting a barrel of flour into good bread.

4. A barrel, or 196 pounds of flour, when in dough, holds about 9½ gallons, or eighty pounds of water, 2 gallons yeast, and 3 pounds salt, making a mass of 295 pounds, which evaporates in kneading, baking, and cooling, about 34 pounds, leaving, in bread weighed, when stale, about 262 pounds.

5. The weight and quality of bread will be frequently and carefully verified. Its quality will be judged by color, smell, and, still more, by taste.

6. Bread ought not to be burnt, but baked to an equal brown color. The crust ought not to be detached from the crumb. On opening it, when fresh, one ought to smell a sweet and balsamic odor.

7. In making biscuits or hard bread, the evaporation is about 54 pounds, so that the barrel of flour yields but 182 pounds of biscuits. Double baked bread loses, in like manner, about 95 pounds, and keeps much longer than that which is singly baked.

8. The troops ought not to be allowed to eat soft bread, fresh from the oven, without first toasting it. This process renders it nearly as wholesome and nutritious as stale bread.

9. Fresh meat ought not to be cooked before it has had time to bleed and to cool; and meats will generally be *boiled* with a view to soup; sometimes roasted or baked, but never *fried*.

10. Fresh meat issued to the soldiers in advance, in hot weather, may be preserved by half boiling it; or, if there be not time for that operation, the meat may be kept some twenty-four hours, by previously exposing it for a few minutes to a very thick smoke.

11. To make soup, put into the vessel at the rate of five pints of water to a pound of fresh meat; apply a quick heat to make it boil promptly; skim off the foam, and then moderate the fire; salt is then put in, according to the palate. Add the vegetables of the season one or two hours, and sliced bread some minutes, before the simmering is ended. When the broth is sensibly reduced in quantity, that is, after five or six hours cooking, the process will be complete.

12. If a part of the meat is to be withdrawn before the soup is fully made, the quantity of water will be proportionably less. Hard or dry vegetables will be put in earlier than is above indicated.

13. The choice of water for bread, soup, or for boiling vegetables, is essential. As far as practicable, limpid water, without scent or peculiar taste, and which dissolves soap freely, only will be used. River or rain water is preferable to that of springs, wells, or ponds. Hard or dry vegetables, as pulse, rice, and the like, cannot be well cooked in water that rests on, or passes over, calcareous earths.

14. Vinegar, particularly in hot weather, is essential to the soldiers' mess. Great care will be taken to procure that which is of a good quality, and the surgeons will frequently be consulted on the subject of this article, as on every other interesting to the health of the troops.

15. Messes will be prepared by privates of squads, including private musicians, each taking his tour; and the greatest care will be observed in scouring and washing the utensils employed in cooking. Those made of brass or copper will not be used, unless, in the case of copper, the vessel be well lined with tin.

16. The chiefs of squads, after *peas on the trencher*, will cause the messes of their respective men on guard to be set apart for them, until they are relieved, and send by the cooks the soup, &c. which may be due them after *roast beef*. These attentions will never be omitted in cases not provided for in par. 3, article 50, and par. 4, article 52.

17. The messes of prisoners will be sent to them in a manner similar to the above.

18. The difference between bread and flour being about —— per centum, the troops will bake their own bread as often as practicable, and the saving operated thereby carried to the debit of the post or regimental fund. See par. 11 and 14 inclusive, article 41.

Article 28.—*Dress, personal cleanliness, and neatness.*

1. The uniform of regiments is prescribed in article 65.

2. It is essential to cleanliness and health, that the soldiers should change their linen at least thrice a weak in midsummer, and twice a week, (on Sundays and Thursdays,) during the remainder of the year. See par. 30, article 25.

3. All the parts of the dress will be kept in a state of the greatest neatness possible. Those which are of woollen cloth will not be washed.

4. White cloth clothes will be cleaned in the following manner: extend the garment on a table; sprinkle it with bran very dry, mixed with a little Spanish whiting; rub them in well, and beat the garment with a smooth roll or mallet until the dust disappears; then brush it.

5. Spots of dirt and grease, or stains, will be taken out by the application of pipe clay moistened with saliva from an empty stomach. Scratch the place lightly, when it is dry, and then beat it. If the spot remains, moisten it with a little soap and water, and then wash out the soap.

6. To take out spots of tar, dissolve the tar with fresh butter, and then proceed as in par. 5.

7. Spots on scarlet cloth are removed by the application of lemon juice or vinegar.

8. Buttons will be cleaned with chalk or Spanish whiting, moistened. To protect the cloth during the operation, the buttons will be separated from it by means of a thin board, having a long slit to receive the eyes, terminating in a circular aperture, through which the buttons are passed. Every squad will be provided with two such boards.

9. When on fatigue or police parties, the soldiers will not be permitted to wear their parade dress.

10. Laundresses employed to wash soldiers' clothes will be paid by the piece, according to a rate previously fixed by the council of administration. See par. 6 and 19, article 41.

11. Non-commissioned officers, in command of squads, will be held more immediately responsible that their men strictly observe what is prescribed above, (par. 2 and 9 inclusive,) that they wash their hands and faces daily—habitually, immediately after the *general fatigue;* that they, at the same time, shave themselves (if necessary) and brush or comb their heads; that, afterwards, those who are to go on duty, put their arms, accoutrements, dress, &c., in the best order; and that such as have permission to pass the chain of sentinels are in the dress that may be ordered.

Article 29.—*Roster, or details of service.*

[See article 49.]

Article 30.—*Accoutrements.*

1. Buff or white leather will be cleaned as follows: First method. Take several handfuls of bran, and boil it in water, which afterwards draw off clear; make a paste of pipe clay with this water, and, when cold, apply it to the buff. Second, Take pipe clay and steep it a quarter of an hour in pure water; change the water, and dissolve a sufficient quantity of soap in it. This mixture is recommended for the cleaning of buff or white leather. Third. Clean the buff with a brush dipped in clear water; leave it to dry in the shade; take white lead, steeped at least twenty-four hours in pure water, (several times changed, to deprive the lead of its corrosive quality,) and, by means of a brush, put on as many coats of this whiting as may be necessary, taking care to let each coat dry in the shade before another is added. The whiting should be tempered with water so as not to be too liquid or too thick.

2. Cartouch boxes will be kept polished with varnish or blacking. The former is preferable, as the polish it gives will last several years, if protected by a cover or case, and occasionally aided by the application of a little oil to the inside of the leather.

3. To make blacking, melt a pound of white bees' wax, and add to it about an ounce of gum arabic; pour a part of the wax on an ounce of ivory black, and mix them well together; place the whole on the fire; stir the composition gently until it simmers, then strain and mould it.

4. If white wax cannot be had, yellow may be substituted; but in this case the quantity of gum arabic will be doubled; that is, something less than two ounces will be necessary. When ivory black cannot be had, that procured from grape vines may be substituted.

5. If the cartouch box is new, the entire surface will be scraped, and afterwards rubbed smooth with pummice stone, to receive the blacking, which will be laid on strongly and equally, exposing each coat to a light blaze from a few very dry straws, before another is applied, taking care to warm the wax and not the leather. Each coat of blacking will be rubbed in with a polished bone, or some other hard, smooth substance, and, when the last coat is quite even, polish it with a piece of fine, smooth cork; then, when cold, wipe the surface with a roll of linen, or fine cloth; and, finally, rub it lightly with the palm of the hand, to make it shine.

6. Old boxes, which are greasy, or which refuse a polish, will be scraped with a knife, after exposing them to a blaze, as above, when they will be polished anew.

Article 31.—*Preservation of arms.*

1. Fire-arms are very liable to be damaged, or rendered unfit for service, under the operations of dismounting, cleaning, and re-mounting; to guard against which, with the exception of the flint-screw, not a screw nor a pipe will be moved by the soldier, without express permission from the proper authority; and the non-commissioned officers of squads will be habitually charged with the care of the screw-drivers, ball-screw, and other similar implements, appertaining to the respective squads.

2. If there be an armorer present, he alone will be entrusted to dismount, or take to pieces the lock, or to remount it. A hand-vice will be necessary in this operation, and great care required in the compression of the springs.

3. Anvil dust, well sifted through an old stocking, and moistened with sweet oil, or emery, will be employed to remove rust, and very soft wood for rubbing or polishing. In cases of necessity, brick dust, sifted and moistened with oil, may be substituted for emery or anvil dust.

4. When the barrels of the arms are not brown, great care will be taken, in rubbing them, to prevent bruising or bending. The barrels ought never to be rubbed lengthwise, particularly without being laid flat on a board or table.

5. Brass mountings will be cleaned with fine brick dust moistened with vinegar, and all the parts of the firelock will be carefully wiped after cleaning.

6. The bore of the firelock will at all times, except in exercise, be secured against the weather by means of a tompion. After firings, it will be necessary to wash it out, to wipe it dry, and then to pass a bit of cloth, slightly greased, to the bottom.

7. In these operations, a rod of wood, with a loop in one end, is to be preferred. The ramrod is never to be employed if it can possibly be avoided.

8. The soldier, to secure his firelock against approaching dew or rain, will carefully oil the metallic parts, wiping the oil off when the weather brightens. A rind of fresh pork, without salt, may be well substituted in this operation for a cloth steeped in oil. See par. 26. art. 25.

9. Under the same circumstances, he will place the lock cover or case, made of leather, as a particular security for the lock.

10. With a view to action, it is important that the fixture of the flints should be carefully examined; they will be fixed with a view to *effect* more than to uniformity; thus, it may be frequently necessary to place the flat side up, on account of the relative height of the cock and hammer.

11. The thick end of the flint will always be enveloped in a bit of sheet lead, cut to a shape corresponding with the part of the cock which receives it. After being closely screwed, the cock ought to be let down gently, to ascertain whether the edge of the flint strikes fully and equally the surface of the hammer. The lock will never be *snapped* without express permission. The flint ought to strike at the distance of about a third of the length of the hammer from the top.

12. In firings, the soldier will frequently cast his eye on the flint, and promptly correct any derangement which may take place in its fixture.

13. For exercise, each soldier will keep himself provided with a bit of wood as a substitute for a flint.

14. The following vicious practices, connected with the substance of this article, are not to be permitted or tolerated: using the ramrod to turn the flint-screw; heating the ramrod, under the pretence of enlarging its canal in the lower part of the stock; cutting or filing any part of the stock, under the pretence of making the firelock *tell* or resound in exercise: putting oil on screws which *let into wood* instead of tallow; displacing the butt-plate and the trigger-guard, (they ought to be cleaned on the stock;) polishing the barrel with the ramrod; sticking the bayonet, fixed or unfixed, into the ground; and, finally, all other similar practices which go to injure the firelock or any of its parts.

Article 32.—*Knapsacks and havresacks.*

1. If these be too heavy, the soldier will be fatigued in marching, and encumbered in exercise or action. If they are taken off on approaching the enemy, the loss of them is almost certain, whether he pursues or is pursued. They therefore will be *worn* on such occasions, unless the contrary be expressly ordered by the highest in rank in the field; and, to remedy the other evils or inconveniences, those equipments ought to be light, of a convenient form, and so adapted to the body as to give the least possible fatigue or constraint.

2. Knapsacks, valises, &c. will be carefully and frequently inspected, and, if found on a march to contain any thing beyond the *necessaries* hereinafter mentioned, such excess will be thrown away.

3. The necessaries which will be allowed to each knapsack are as follows: two shirts, a pair of socks or stockings, a handkerchief, a pair of shoes, a blanket, a forage cap, a fatigue apron, a spoon, some blacking, some whiting, a bit of greased cloth, and, in latitudes or seasons in which linen pantaloons are worn, one pair of pantaloons.

4. There will be allowed, in addition, per squad, four brushes, a shaving case, a flask of oil, two button-boards, some cork, and a polisher, (for cartouch boxes,) and four ball screws, to be distributed among the knapsacks of the squad. Knives, combs, and screw-drivers may be carried in knapsacks, but, near the enemy, the screw-drivers ought to be more at hand.

5. The necessaries will be put into the knapsack in such manner that those most in use or first wanted may be at the top. Each garment will be rolled, or folded and compressed into the smallest space. The blanket will be folded to a size corresponding with the flap, and placed between it and the knapsack.

6. Great coats, allowed the troops in certain latitudes, will, when not actually worn, be neatly rolled, (beginning at the collar,) strapped, and buckled on the knapsack, in a uniform manner. Small tin kettles or stewpans will also be buckled on the knapsacks on a march; those of a larger size will be carried in the hand by the privates, in rotation, to prevent injury to the dress or appointments.

7. Havresacks will be strictly confined to their proper destination, to wit: the reception of provisions issued in advance. To prevent blood or grease from injuring the dress through the havresack, the soldier will wrap his meat in cloth, paper, or leaves, and place his bread on the inner side. Havresacks will be frequently washed.

Article 33.—*Colors—Drums.*

1. In the night the colors or standards will always be kept furled, and cased in oilcloth, and also during the day, except when approaching the enemy, at reviews, inspections, and on other occasions of show.

2. In barracks or cantonments they will be lodged in the quarters of the commandant; at all other times, when not carried, a sentinel will be placed over them, with strict instructions to prevent removal, handling, or injury. This sentinel will be furnished by the police guard.

3. Drums, when not slung for *beating*, will be cased, and at all times protected against the weather as far as practicable; at the same time their cords will be slackened.

4. The drummers will be furnished with a piece of sheepskin dressed with the wool on, (the color of the wool to correspond as nearly as may be with that of the pantaloons,) as a guard to the left thigh, and fastened around the waist and at the knee by means of straps and buckles.

5. When in camp, the colors will be planted ten paces in front of the centre of the regiment, and the drums piled up behind them. See par. 11, art. 47.

Article 34.—*Ammunition.*

1. Service ammunition issued to the troops will be charged against them, and, to prevent waste or injury, the boxes will be inspected twice a day, and particularly at evening roll-call. Each man will be made to pay for the rounds expended without orders, or not in the way of duty, or which may be damaged by his neglect. Ammunition will frequently be sunned.

2. After guard dismounting, the arms will be discharged at a target erected for the purpose; and if there be not one, the charges will be drawn, and the powder and ball delivered over to the quartermaster by the non-commissioned officers of the squads or guards.

3. At no time, and under no pretence, are the arms to be left charged when the men are off duty, or not in expectation of an attack, as the most fatal effects would frequently follow a neglect of this injunction.

4. Ammunition used for exercise will be carefully inspected to guard against accidents. This security will be much aided by making up blank cartridges in paper of a color different from that used for service ammunition.

Article 35.—*Marking of public property and of individuals' necessaries.*

1. Arms numbered by the manufacturer may be sufficiently designated by such number, without other marks.

2. United States' horses and draught cattle, in the use of a regiment, or of individual officers, will each be branded with the letters "U. S." on some conspicuous part. The same letters will be placed on public carriages of every description, and on these the number of the regiment will be added to the letters "U. S."

3. Knapsacks, havresacks, water-flasks, (or canteens,) tents, and other camp equipage, will be conspicuously marked with the number of the regiment, the letter of the company, and a *running* number for each description of article. The tents of the field and staff officers will each be similarly marked, with the rank of the occupant.

4. The same marks as in the case of knapsacks will be placed on the *inside* of accoutrements.

5. In charging the foregoing articles of property or of equipment in the proper books, the *marks* will be noted.

6. All soldiers' necessaries will be durably marked, as far as practicable, with the number of the regiment, the letter of the company, and the names of the individuals to whom they appertain.

7. Officers' trunks, cases, portmanteaus, and the like, will also be particularly designated by the names and additions of their owners.

ARTICLE 36.—*Injunctions in respect to standing interior regulations or orders.*

1. No officer in the temporary command of a regiment (or garrison) shall make any interior regulation or standing order, for the government of it, which shall contradict those established by the colonel, (or, in the case of a garrison, the permanent commander,) without the express approbation of the general, or other officer next in command.

2. The same principle will be applied to companies.

ARTICLE 37.—*Books.*

1. SUBDIVISION.

Besides the roster of officers and companies, the adjutant, under the direction of the colonel, and assisted by the sergeant major, will be charged with the keeping of the following books, viz:

1. *General order book.* This will contain the entry of all orders, circular letters, &c. from any authority exterior to the regiment. A proper number of pages at the end of the book will be appropriated to an index, showing the *date* and *purport* of each entry; by whom or what department issued; date of reception and page of entry.

2. *Regimental order book*, for the entry of *regimental* orders, with an index.

3. *Description and succession of officers.* This book will contain the names by rank, of the officers, showing the dates of appointments or promotions; dates and places of birth; dates of first commissions in the army; and to whose vacancy each has succeeded. It will be kept in a regular form, with a column for *remarks*, to show how the officers cease to be members of the regiment. A part of the book will be appropriated to the registry of the non-commissioned officers, according to rank, and an alphabetical index of the names of the whole will be given at the end of the volume.

4. *Description of enlisted soldiers.* This volume will, according to a regular form, embrace the names of all persons in the regiment, other than officers, following the order of enlistments, with the dates and terms of enlistments; from what corps received; ages; description of persons; places of birth; and former trades or occupations. In a column for *remarks* will be noted promotions, internal transfers, and how each man ceases to be a member of the regiment. Index as in number 3.

5. *Letter book*, which will contain entries of all official letters, written by the commanding officer, or by his orders, relative to the matters of this subdivision. Index at the end.

6. *Return book.* This will contain exact copies of all monthly returns, made up at the beginning of each month, for the preceding month, and according to the prescribed form. The book will be printed in blank.

7. *Morning reports.* Apply what is said under No. 6 to this book, substituting *morning reports* for "monthly returns."

8. *Registry of furloughs—that is, of all furloughs.* One part of the book to be appropriated to the officers, and the other part to enlisted soldiers. The entries to give the name of each person to whom leave of absence is granted; by whom; for what period; and the place at which orders may find him; to which will afterwards be added the date of his return to the regiment or duty.

9. *Description of deserters;* to be printed in blank, according to a prescribed form.

10. *Court-martial book;* to contain a correct entry of the proceedings of every regimental court-martial, to be signed by the president thereof, and countersigned by the commander of the regiment, as approved, with a copious index at the end.

11. *Registry of deceased soldiers.* To ensure accuracy and fidelity in the settlements with their relatives, a book of this denomination will be kept, into which will be inserted the name of the soldier; the place, date, and cause of his decease; the amount of his private effects, and the sums due him at the time of decease, in pay proper, and extra pay for public work done according to regulations.

12. *Record book*, will state the period and circumstances of the original formation of the regiment; means by which it has been, from time to time, recruited; stations at which it has been employed; periods of arrival at, and departure from, such stations; the battles, or other military operations, in which it has been engaged; together with any particular achievement; names of officers killed, and the name of any individual, without regard to rank, who may have, in a peculiar manner, distinguished himself on such occasions: the badges, or devices which the regiment may be permitted to bear; any particular alteration in clothing, arms, accoutrements, colors, horse-furniture, and the like, with dates, the alterations which may be made in its *composition*, as the introduction or suppression of flank companies, and the like, and in its *establishment* in respect to legal complement. With a view to historical accuracy, all those entries will be made under the eye of the commander, and, from time to time, attested by him.

13. *Description of horses.* This book will contain a registry of the age, height, color, &c. of the United States' horses in the use of the regiment; the names and residence of the persons of whom purchased; or, if received from other regiments, or some branch of the staff, the *fact* will be specified, together with date of reception. In a column for *remarks* will be shown how each horse is lost or disposed of. This book will not be necessary in foot regiments. The few public horses, &c. employed by them, occasionally, will be registered by the quartermaster.

These thirteen books will be of two widths, or twelve inches for the larger size, and about eight and a half for the smaller; and of two lengths, or seventeen and a half inches for the first, and thirteen inches for the other. Each book will contain a quantity of paper, according to destination.

For security, and the convenience of portage, the thirteen volumes will be put up in a strong case, of suitable dimensions, with spare spaces, and of the following form:

Paper, &c.					Files of papers.		Files of papers.						
1 Say of 4 quires of paper.	2 Say of 3 quires.	4 Say of 6 quires.	6 Say of 2 quires.	Space for blanks, &c.	3 Say of 2 quires.	5 Say of 2 quires.	7 Say of 2 quires.	8 Say of 1 quire.	9 Say of 1 quire.	10 Say of 3 quires.	11 Say of 1 quire.	12 Say of 1½ quires.	13 Say of 1 quire.

The door will be made to turn on hinges at the bottom, and thus serve as a portable desk.
The placing of the figures in the above form shows the length of the books represented by those figures.

2. *Subdivision.*

In a similar manner the quartermaster will be charged with the keeping of the books described in this subdivision. 1st. *An account of clothing.* 2d. *An account of accoutrements, arms, and ammunition.* 3d. *An account of fuel, forage, and contingent disbursements.* 4th. *Account current book*, showing in detail the distribution of all articles of supply made by the quartermaster to the several companies. 5th. *Letter book* No. 2 will be kept in the artillery, by the conductors of artillery. Those books will show how each article is distributed or expended, and the last book will contain entries of all letters written by the commanding officer, or by his orders, relative to those matters.

3. *Subdivision.*

The books to be kept by the paymaster are as follows: 1st. *Account book*, showing the receipt and expenditure of all public money confided to his care. 2d. *Letter book*, to contain entries of all official letters written by the commanding officer, or by his orders, relative to the business of the pay office.

4. *Subdivision.*

For the books to be kept by the surgeon, see article —.

5. *Subdivision.*

The following books will be kept by every commander of a company in the service: 1st. *Memorandum book*, in which each soldier will be debited with the issues made to him, that is, with such articles as he is to account for, by *exhibition*, under the penalty of paying for them, and such as he is, as a matter of course, to pay for by stoppage from his pay. 2d. *The leger*, to be made up in the form of debtor and creditor at the end of every second month in the year, that is, just before every pay day, with a view to a general settlement. All the entries made in the memorandum book will be fully posted in this, which will be kept in two parts; the first appropriated to such issues as the soldier is to pay for, as a matter of course; and the second to those for which he is liable to account in the case of loss or injury by reason of neglect or misconduct. On ascertaining, by the sentence of a court-martial or the admission of the soldier, such loss or injury, the amount in dollars and cents will be carried over to the debtor side of the first part, which will also embrace all other sums the soldier may be so sentenced to pay or refund. Each issue and each settlement will be signed by the soldier, as an acknowledgment of its correctness. 3d. *Order book;* this will contain entries of all orders required to be read to the men, also an account of the men furnished for duty, by detail. 4th. *Description book*, to correspond, in respect to the company, with No. 4, first subdivision. 5th. *Captain's book;* this will exhibit the supplies of every kind which are received from time to time by the commander, on account of the company, balanced as often by abstracts of issues or expenditures taken from the leger. 6th. *Description of horses*, for troops or companies furnished with horses. This book will correspond, in respect to the company, with No. 13, first subdivision.

SECTION IV.

ECONOMY OF DIVISIONS, DEPARTMENTS, AND POSTS.

ARTICLE 38.—*Organization of Departments.*

1. In order to embrace the regular and militia forces of the United States in the service and pay of the General Government, and with a view to the national defence, the President of the United States will from time to time

arrange or designate the limits of geographical commands or departments, to correspond with the several military frontiers and the distribution of the troops.

2. Besides the troops of the line serving therein, there will be assigned to each commander of a geographical division or department a number of general staff officers proportioned to circumstances; but the officers of the corps of engineers, of the ordnance, of the topographical engineers, who may be serving within such division or department, (and also detachments of United States' marines,) and not assigned as above, shall not be diverted from their ordinary or peculiar duties, except in some unforeseen case of public exigency.—See par. 2, art. 5.

3. Besides the inspections made from division head-quarters, the commandant of each department shall, if practicable, (which practicability will always be presumed unless otherwise specially decided by the general of division,) make two circuits of inspection and review yearly, embracing all the posts within his command, unless specially permitted by the said general to substitute, in respect to some of the posts, the assistant inspector general, or some other well qualified officer, having at least the rank of major.

4. The first of these circuits will be made during the three spring months, and the second during the three months of autumn, the objects of which will be to ascertain critically the state of the several bodies of troops, under the heads of discipline, police, instruction, service, and administration, within the command; to ascertain whether the several branches of the administrative departments of the staff under his command, be well executed; to point out on the spot all defects or irregularities under either of the above heads, and, in case the inspecting officer be superior in rank to the delinquent, to cause him to be arrested, or (according to the nature of the case) to give such other orders as may be necessary to correct promptly the defect or neglect observed.

5. If the inspecting officer be junior to the commander of the post or corps where the delinquency in any of the foregoing cases occurs, the commandant of the department will apply the proper remedy on receiving the report of the particular inspection.

6. Other objects of these tours of inspection, whether made from division or department head-quarters, will be to make the commander of the division or department, and the Government, well acquainted with the frontier defences of the command; with the repairs which these may from time to time require; the new works or posts which may be necessary under probable contingencies; the resources of the neighboring country, in subsistence, forage, means of transportation, &c. &c.; and, finally, with the communications and distances between proximate posts by land and water.

7. The terms *police*, *discipline*, *instruction*, *service*, and *administration*, will be understood technically as follows:

8. Police, interior and exterior. 1st. *Interior police:* system of *prevention*, to assure the presence, comfort, healthiness, and efficiency, of the troops or corps. Guards, patrols, fatigues, roll-calls, visits, inspections—are its *means;* and the following may be enumerated, more in detail, among its *objects:* the preparation of the men's messes; the condition of camps, quarters, camp equipage, arms, ammunition, equipments, clothing, and other necessaries in use; the condition or keeping of military horses, &c., their equipments, harness, stables, and forage; the condition of all carriages in the use of the army; the order or condition of hospitals, prisons, arsenals, magazines, storehouses, and sutlers' shops or stalls; and, finally, the condition of the books or papers (which each corps and company ought to possess) containing the regulations, orders, &c. for the government of the troops or army. 2d. *Exterior police* presupposes a state of war, and regards the tranquillity of the camp or post against false alarms; the exclusion of improper persons, as spies; the conduct of suspicious persons, as deserters, the bearers of flags of truce, &c.; and, finally, it regards the safety of the camp or post against *surprises.*

9. Discipline. Correction, or the enforcement of subordination; the award and infliction of punishment consequent on a breach of that subordination, that is, consequent on a neglect or breach of some duty. This strict sense is employed in contradistinction to the general or popular one, which makes *discipline* include also police and instruction.

10. Instruction. This is divided into *theoretical* and *practical.* 1st. By theoretical instruction will here be understood more particularly the study or knowledge of the laws, regulations, and orders, for the government of the army and the regulations of exercise for the different arms of service, as the cavalry, infantry, &c. The scientific instruction and general attainments of the superior officers, engineers, and others, however indispensable or useful, are not within the immediate contemplation of these regulations. 2d. *Practical instruction:* mode of, and dexterity in, executing the several objects of theoretical instruction.

11. The theoretical and practical instruction of both officers and troops will be exemplified to the inspecting officer, in many particulars, by the prescribed reviews and inspections, [see art. 9 and 39,] and he may further require the performance of any of the duties mentioned in par. 1, art. 17; and, in fact, will generally require such performance in respect to field trenches, abattis, gabions, fascines, ovens, and kitchens, (specimens of each may be prepared before the arrival of the inspecting officer, per company,) and also in respect to *tents.* Theoretical instruction, understood as above, and which cannot be practically exemplified (as in the case of abattis, tents, &c.) with convenience, may be put to the test by questions raised for the purpose, touching any prescribed duties under the laws, regulations, &c. for the government of the army or some particular corps thereof, as thus: What is the first duty of an officer commanding a grand guard, after taking up his post? Commanding the escort of a convoy, and being attacked, what would be your dispositions for defence? Who are to be considered prisoners of war? &c. &c. Indeed, it is only by questions of this kind, put to the younger officers promiscuously, that one can be assured, in time of peace, that they have studied those regulations, &c. which are peculiarly applicable to a state of war. But no superior officer shall thus be interrogated by any junior, although the latter may be the particular inspecting officer.

12. *Service.* By this term will be understood, 1st. The *distribution* of duty among the integral parts, or among the individuals of the same army or corps, as by the roster, including the *execution* of the duty; 2d. The assignment of duty according to its nature, as among the several branches of the staff, or among the several arms of service, including its *execution* as above.

13. *Administration*, in its comprehensive sense, will be understood to mean the just direction and economical application or expenditure of the several sums of money appropriated by Congress for the army or military defence of the country on land. These objects are enforced by a good system of responsibility for the several paying or administrative departments, or officers; securing alike fidelity to the troops and to the Government.

Interior administration of corps.—A branch of the above is here more immediately under contemplation. Thus limited, it particularly regards the regularity of payments made to the troops; regularity in issues or supplies of subsistence, clothing, and all other allowances accorded to the troops; and, finally, the *quality* of those articles.

14. A detailed report of each circuit of inspection and review will be made to the adjutant and inspector general of the army, through the general of the division, in the case of the commandant of the department, including all the posts or bodies of troops under the several heads of police, discipline, instruction, service, and administration, also including every thing *new* or important relative to the objects mentioned in par. 6, above.

15. The report of the first circuit will be despatched in time to reach the War Department by the 15th day of the succeeding July, and that of the second circuit by the 15th day of the succeeding January.

16. The customary place for the head-quarters of each department will be designated by the general of the division, and, previous to a tour of review and inspection, the commandant will report to the War Department and to the general of the division the time at which he expects to commence the tour; the order in which he proposes to visit the posts, and the probable time of *arrival* and detention *at* each. He will also take such measures, or leave behind him such instructions that extraordinary communications may reach him with the least delay practicable whilst absent from his habitual head-quarters.

ARTICLE 39.—*Form and course of Inspections, &c.*

1. The inspection of the troops will generally be preceded by a review, the form of which has been prescribed under article 9. The present example embraces a regiment of infantry. The inspecting officer and the field and staff officers will be on foot, that is, in the case of a foot regiment.

2. The battalion being in the order of battle, and all the men of each company standing contiguous to each other, on an intimation from the inspector, the colonel will cause the regiment to break into open column of companies, the right in front, each company entire. He will next order the ranks to be opened, at which the colors and color guard will, under the conduct of the adjutant, be placed ten paces ahead of the column.

3. The colonel, seeing the ranks aligned, will add: *Officers and non-commissioned officers, to the front of your companies*, MARCH; on which the officers will form themselves in one rank eight paces, and the non-commissioned officers in one rank six paces in advance, along the fronts of their respective companies in the order of rank, the highest on the right, and the lowest on the left; the pioneer and music of each company at the same time take post two paces behind the non-commissioned officers.

4. Seeing the last order in train of execution, the colonel will command: *Field and staff, to the front*, MARCH. The commissioned officers thus designated will form themselves in one rank six paces in front of the colors, and in the following order, beginning on the right: Lieutenant colonel, major, adjutant, quartermaster, paymaster, surgeon, surgeon's mates. The non-commissioned staff form themselves in a similar manner, two paces in the rear of the preceding rank. The band, if there be one, will be formed in one rank ten paces in the rear of the column, the chief musician four paces in its front.

5. The colonel will now take post on the right of the lieutenant colonel; but such of the field officers as may be superior in rank to the inspector will not take post as above.

6. The inspection will commence in front. After inspecting the dress and general appearance of the field and commissioned staff under arms, accompanied by these officers, the inspector will pass down the open column, looking at every rank in front and in the rear with a view to the same objects, viz. dress and general appearance under arms.

7. The colonel will now command: *Order arms;* stand at EASE, for the whole column; when the inspector will proceed to make a minute inspection of the several ranks or divisions in succession, commencing in front.

8. On approaching the non-commissioned staff and the band, the adjutant will give the necessary orders for the inspection of boxes. In like manner, in the case of the color guard, &c. he will give the orders for arms, boxes, and knapsacks. To enable the color bearers to display their knapsacks after bringing the colors to an order, (as arms are brought to an order after inspection) they will be planted firm in the ground. This division being inspected, the adjutant may direct the arms to be piled, and the non-commissioned officers to disperse until the colors are to be escorted back to the place from which they were taken. The non-commissioned staff may be dismissed as soon as inspected.

9. As the inspector successively approaches the companies, each captain will command: ATTENTION; *spring* RAMRODS; *shoulder* ARMS; *open* PANS; when the inspector will commence with those of the non-commissioned officers, and go through with the whole company. The captain will then add: *open* BOXES; (see "inspection of arms," *Field Exercise, &c. of Infantry.*)

10. The boxes having been inspected, the captain will next command: ATTENTION; *shoulder* ARMS; *front rank, right about* FACE; *rear rank, close order*—MARCH; *trail* ARMS; *pile* ARMS; *front rank, right about* FACE; *rear rank, open order*—MARCH; *unsling* KNAPSACKS; *stand at* EASE.

11. The knapsacks will be placed at the feet of the men, the flaps from them, with the great coats on the flaps, and the knapsacks leaning forward on the great coats. In this position the inspector will examine the contents of the whole, or of as many as he may think necessary, beginning again with the non-commissioned officers, noticing in passing the tools, &c. of the pioneers, and the drums of the musicians.

12. As the inspector passes the companies, they will successively, under the orders of the respective captains, repack and resling knapsacks, resume their arms, and file off to their tents or quarters, excepting the company that is to re-escort the colors, which will await the further orders of the colonel.

13. In an extensive column some of the rearmost divisions might, after the inspection of dress and general appearance, be permitted to pile arms, awaiting the approach of the inspector. In this case, such divisions would resume the position above supposed before the minute inspection.

14. If the troops are to be mustered with a view to the payment, it will be done after the inspection, when the injunction contained in the latter part of par. 23, art. 44, will be strictly observed. The original or proof-roll of each company by which the muster is made, with the remarks and verifications in the hand-writing of the inspector, will be the check on the duplicates or triplicates to be made out by the captains for the signature of the mustering officer.

15. The inspection of the troops ended, the field and staff will next accompany the inspector to the hospital, magazine, arsenal, quarters, sutler's shop, &c. &c. The captains and subalterns will precede him in his visits to their companies and sections respectively.

16. The hospital is at all times an object of the most particular interest. No neglect or defect under this head will be overlooked or tolerated.

17. The surgeon will show the inspector the wards, the patients, bunks, dispensary, kitchen, &c. &c. The whole will be carefully inspected.

18. On entering the company quarters, the inspector will be received by the men arranged around their chambers, standing. At the word ATTENTION, given by the non-commissioned officer of the squad, the men, if in uniform, will compliment the inspector by the hand salute; if not in uniform, by taking off foraging caps.

19. The inspector will examine the general arrangement of the interior; the bunks and bedding; cooking and table utensils, &c. &c.; and afterwards the exterior neatness of the quarters.

20. The adjutant will cause the sergeant major to exhibit to the inspector the regimental office, or books and papers. In like manner each captain will cause those of the company to be exhibited to the inspector whilst he is making the tour of the quarters.

21. In the inspection of the quarters, &c. as well as in that of the troops under arms, the inspector will make written memoranda on the spot, or cause one of his staff to do so, of every defect or neglect observed, together with any particular excellence that may strike his attention.

22. On these memoranda will be founded the censure or commendation which may afterwards be given in orders; and also the semi-annual confidential report made to the War Department.

23. The commander of every regiment or garrison will make similar inspections of hospitals, magazines, quarters, &c. &c.; also of arms, clothing, &c. monthly, and as much oftener as may be deemed necessary.

24. Captains will do the like on every Sunday morning, and the lieutenants of sections on every Thursday morning, each in regard to his company or section respectively; and the surgeon will make a thorough inspection of his hospital, &c. every Sunday morning.

25. Besides those *inspections*, daily *visits* will be made to the quarters of their men, or patients, by the officers mentioned in the preceding paragraph respectively; and the colonel or other commander will make frequent general *visits* in the course of the month to the men's quarters, the hospital, guard-house, &c. &c.

Article 40.—*Troops in quarters.*

1. The interior police, service, &c. of regiments and companies have been prescribed in section 3, which will apply, as far as it goes, (with a few obvious exceptions,) to garrisons, or other troops in quarters. Under this article will be noticed some circumstances peculiar to the latter; that is, the troops in barracks or cantonment.

2. The chambers in the same building, or set of buildings, will be numbered in the same series, and the numbers inscribed on the outer doors.

3. The name of each soldier will be labelled on his bunk, in the place the most apparent, and the number which he bears in his squad (see par. 3, art. 35) placed against his firelock and accoutrements. The arms and accoutrements of non-commissioned officers will, in like manner, be designated by the rank and name of each.

4. Fire-arms will be habitually placed (the cock let down, and the bayonet in its scabbard) in the arm-racks; the accoutrements suspended over the firelocks; swords hung by the belts, on pegs.

5. The knapsack of each man will be placed on the lower shelf, at the foot of his bunk, ready to be slung and charged with his effects, excepting such as are habitually in use. The latter will be arranged and placed as follows: The great coat, rolled and strapped, on the same shelf; the coat and vest folded, wrong side out, under the knapsack; the cap in its labelled case, on the second or upper shelf; shoes, after being well cleaned and tied together, soles out, hung on a peg over the bolster.

6. Dirty linen, &c. will generally be kept in an appropriate part of the knapsack; the men not to be allowed to put any article whatever under the bedding.

7. Cooking and table utensils, after being well cleaned, will be arranged in closets or recesses. Blacking, whiting, and brushes, will be placed as much out of sight as practicable, the whiting pot well covered. When there is a necessity of keeping a supply of fuel in the chambers, it will be put in boxes near the fire-places.

8. Bread will be placed on shelves prepared for the purpose. Fresh meat hung out at the back windows on hooks, but not in the sun.

9. When circumstances do not permit a strict observance of the foregoing dispositions the *spirit* of them will be adhered to, in order to establish a convenient uniformity in all the chambers; uniformity, which facilitates inspections, favors neatness and comfort, and enables the men to find promptly all their equipments and effects. Accordingly, as often as the troops change quarters, a chamber will be established as a model for the others.

10. Unless under special circumstances, Saturdays will be more particularly appropriated to police. The chiefs of squads will cause bunks and bedding to be overhauled; floors to be washed, sanded, or scoured, according to orders; tables and benches to be scoured; arms to be cleaned; accoutrements to be whitened and polished; and every thing else to be put into the most exact state of order and neatness.

Article 41.—*Sutlers—Council of administration.*

1. The comfort or well-being of the troops, particularly of those at remote stations, and the honor of the service, require that the business of suttling should receive a character of permanency, fairness, and respectability which heretofore it has but infrequently possessed. In this view it is proper to give to sutlers a definite and respectable rank, and to subject their business to fixed and uniform regulations, in order to secure competent supplies of necessaries for both officers and men; fairness of dealing with the latter; a moderate but certain profit to the sutler, and a freedom from imputed *secret interest* on the part of those who supervise this important branch of interior economy.

2. Accordingly, there shall be one sutler for every military post, who shall have the exclusive privilege of suttling with the troops thereof, and (to cause him to be respected by the enlisted soldiers) a rank assimilated to that of cadet; but the said rank not to entitle him to pay or emolument in any shape as cadet, nor subject him to be commanded beyond the immediate line of his duties, nor to entitle him to command except in defence of his person or property.

3. The appointment of sutlers will be made by the Secretary of War on such recommendations as he may deem sufficient; but in case of non-appointment, accidental vacancy, or suspension, the commanding officer of the post may appoint. Such appointment to be immediately reported to the Secretary of War, and to remain valid until his pleasure be made known thereupon.

4. Every sutler shall hold his appointment during the pleasure of the Secretary of War, for the time being; but besides his amenability to a general court-martial, for capital offences, he may be suspended or wholly dismissed from the privilege of suttling, by the sentence of a garrison or regimental court-martial, duly approved by the officer ordering the court, on proof of a violation of any of the provisions contained in this article, or other conduct prejudicial to the troops, or to good order and military discipline; the punishment to be, suspension or dismission, according to the nature and degree of the offence; to which may be superadded, in the case of conviction for conduct highly prejudicial to the troops, a fine, not exceeding twenty-five cents, for every enlisted soldier at the post, and imprisonment until the fine be paid.

5. For the exclusive privilege accorded to the sutler above, he shall be assessed, and held to pay at the end of every two months, or oftener, as may be determined by the council of administration hereinafter mentioned, at the rate of not less than ten cents, and not more than fifteen cents per month for every officer and enlisted soldier serving at the post; the monthly average number of such persons to be determined equitably by the said council.

6. For the purpose of carrying the provisions of this article into effect, and such others as may be prescribed, the commander of the post shall, from time to time, but at least once in every two months, call a *council of administration*, to consist of the three individuals next in rank to himself, and a *fourth* to act as secretary; which coun-

cil shall cause its secretary to minute in a book, to be kept for the purpose, its proceedings and transactions, to be submitted to the commanding officer for his approval or disapproval, and orders or remarks thereupon.

7. If there be not a sufficient number of officers, under the commander, to constitute the council, senior non-commissioned officers may be substituted to make up the deficiency.

8. If the commanding officer approves the acts and decisions of the council, the general result will be published in orders for the government of all persons concerned. If he disapproves and sends back the proceedings, and the council, after giving due weight to his objections, shall unanimously adhere to the first decision or decisions, the same shall be considered as final, and be published in orders, as in the case of approval by the commanding officer.

9. The secretary of each meeting, after entering the whole proceedings of the council in the council book, together with the final order of the commanding officer thereupon, will deposite the book with the latter. The proceedings, &c. will be authenticated by the signature of the president and secretary of the council. In like manner the approval, or objections of the commanding officer, entered in the book, will be signed by his own hand.

10. The council shall have power, from time to time, to prescribe the quantity and kind of clothing, small equipments, or soldiers' necessaries, groceries, &c. &c. which the sutler may be held bound to keep on hand, to supply the probable wants of the officers and men at the post; to examine the sutler's books and papers, and, on actual inspection, to fix the tariff, or prices of the said goods, or commodities; to inspect the sutler's weights, measures, &c. &c.

11. The assessments and fines imposed on, and collected of, the sutler, under paragraphs 4 and 5 above, shall constitute the basis of what shall be called the *post fund*, which fund shall be under the exclusive administration of the council.

12. The money will be collected by, and held in the hands of, a treasurer, who shall be the paymaster, if there be one at the post; otherwise some discreet officer to be appointed by the commander.

13. The treasurer shall open an account with the fund, subject to the inspections of the commander and the council, and make payments, or purchases, on the warrants of the commander; which warrants shall only be drawn in pursuance to specific resolves or decisions of the council.

14. The following are the objects to which the fund will be more immediately held pledged, and in the order in which they are mentioned. 1st. Immediate relief to indigent widows and orphans of officers or soldiers. 2d. Immediate relief to deranged or decayed officers, or to infirm or disabled soldiers, discharged under circumstances which may not entitle them to pensions from the Government. 3d. The education of soldiers' children at the post school. 4th. The purchase of books, &c. for a library, one section of which to be adapted to the wants of the enlisted men. 5th. The maintenance of a *post* band, &c. &c.

15. The tariff fixed, as above, shall be hung up in some conspicuous place, in the sutler's shop or stall, for the information of all concerned. The prices, so limited, shall not be exceeded; neither shall the sutler make any difference, as to price, between the officers and enlisted men, either on *cash* or *credit* sales.

16. The sutler shall not *credit* any enlisted soldier, within the same month, (as January, February, &c.) to an amount exceeding one-half of his monthly pay, without the express sanction, in writing, of the man's company commander; neither shall he *sell*, or give, to any enlisted soldier, even the smallest quantity of distilled, vinous, or fermented liquor, without such sanction.

17. The consideration payable under paragraph 5, being a highly valuable one, the commanding officer will lend his authority, as often as may be necessary, to protect, within his local command, the exclusive privilege so purchased by the sutler; and no further tax or burthen, in any shape, beyond what is herein authorized, will be imposed on him. Accordingly, if there be a suitable spare building at the post it shall be freely accorded to the sutler. If there be no such house, he will be freely allowed to erect one suitable to his purposes.

18. In consideration of the premises it is also proper that every facility should be afforded to the sutler in the collection of the just debts contracted to him, within the limitations of this article. Accordingly the paymaster, when about to make payments to the troops, will always notify the sutler in order that he may take his place at the pay-table with his books or accounts; and at least one officer per company will be held bound to attend the pay-table, if practicable, on a like notice from the paymaster.

19. If the soldier admits the amount demanded by the sutler to be just, it will be handed to the latter as a matter of course by the paymaster, and deducted from the pay of the soldier. If the account be disputed, the sutler shall be required to produce the due bill, or written acknowledgment of the soldier, duly attested, which shall be sufficient, *as to the then settlement.* But the company officer and paymaster will be required to see that the stoppages on account of Government be first made; next the just accounts of laundresses presented and resting on equal evidence to that required in the case of the sutler (see par. 10, art. 28.) The accounts of tailors, &c. (see par. 5, art. 25,) would follow those of the sutler.

20. The foregoing stoppages, except those on account of Government, need not be noted on the pay and receipt rolls; it will be sufficient that the soldier gives to the paymaster a receipt in full that his creditors above mentioned be satisfied; that he receives a proper acquittance on account of those payments, and that he receives the balance, if any, of his pay; the whole settlement being made openly and under the guardianship of his officer.

21. If the troops be removed, or a part of them detached from the post, leaving unsatisfied debts due to the sutler, he, or his agent, shall, on demand, be admitted to the pay-table at the next settlement with all such men, and with the same right, &c. as in par. 20.

22. If an individual leaves the post on furlough or on command, the commanding officer of his company will note on the descriptive roll the amount demanded by, and which may appear to be due to, the sutler, in order that the same may be stopped by the paymaster making the next payment, in case the soldier should be settled with whilst absent from the post. In such case the paymaster shall make the stoppage, and transmit the amount to the sutler.

23. In the case of the death or desertion of any enlisted soldier, at the time a debtor to the sutler, the latter would submit his demand to the council of administration, whose duty it shall be, in every such case, to receive and audit the account, and if satisfied, on unequivocal evidence, that the debt was justly due, at the time of the death or desertion, the said council shall certify accordingly.

24. Such accounts, so certified, and made out by company, and transmitted by the sutler to the paymaster general, shall entitle him to receive from the latter the amount ascertained, out of any arrears due to the deceased or the deserters, at the time of decease or desertion, without waiting, in the case of deceased soldiers, for the ordinary process of administration in a civil court.

25. If the troops at the post consist of detached companies, and the companies are about to be separated, that is, one or more to be removed to another post, and one or more to remain, it shall be the duty of the commander, previously, to call a council of administration to make an equitable distribution of the post fund remaining un-

expended. In this case he would detail senior officers to compose the council, so that its members might fairly represent the whole.

26. If all the companies are to be detached, and to *different* posts, a similar course would be pursued, not only in respect to the post fund unexpended, but also as to the objects purchased out of the fund, as the library, instruments of music, and the like.

27. In this article mention has heretofore only been made of the connexion between sutlers and troops serving *at posts*, whether in regiment, detached companies, or parts of companies. But it is also necessary to provide for the connexion of a sutler with a *regiment*, whilst the latter is on marches in the interior, or during a campaign, or whilst on board transports.

28. Accordingly, a sutler appointed to a regiment would be permitted to follow its head-quarters, generally, under any of the circumstances above supposed; to all of which the provisions of this article would be extended, substituting *regiment* (or *regimental*) for the word "post," as often as the latter occurs, except in paragraphs 26 and 27, which are not intended to apply to a regiment, under any circumstances. See article 59.

Article 42.—*Assembly—Inspection and parade of guards.*

1. All guards will be turned off at noon, except when a different hour is appointed by the commander of the army, troops, or post, on account of the heat of the weather, or some other special reason.

2. Thirty minutes before that hour a signal will be made for the details to turn out, when the men from each company will be inspected by the first sergeant, under the superintendence of an officer of the company.

3. Ten minutes after the preceding signal a second will be sounded, at which the first sergeants will conduct the company details to the regimental parade, each detachment for the same guard taking post on the left of that which preceded it, (under the direction of the adjutant,) in open order, arms shouldered and bayonets fixed. The adjutant, as he successively accepts the detachments, will dismiss the supernumerary men under the conduct of the respective first sergeants.

4. The guards are either organized on the regimental (or garrison) parade, or, according to the nature of the case, partly on that and partly on the grand parade. In the latter case, the senior officer of the details or guards furnished by each regiment, and intended for the grand parade, will conduct them *from* the regimental parade. On arriving at the grand parade, each detachment will take post in the order above prescribed, under the direction of the staff officer from head-quarters, or his assistant, the *adjutant of the day*.

5. *The adjutant of the day* will accompany the details of his regiment to the grand parade, and will be replaced on his own parade by the second officer of the new police guard, if there be two; by the commander, if there be but one; and if there be no officer of that guard, by the sergeant-major of the regiment. The regiment that furnishes the *adjutant of the day* will also furnish the music for the grand parade.

6. The *officer of the day* will always be present at guard mounting; no other, except a general officer, will interfere with, or give any order on the parade, to the staff officer on duty there. The commander of the troops, (or garrison,) though under the rank of general, is, of course, an exception to this rule.

7. The following form regards, more particularly, the grand parade. With a few obvious variations, it will equally apply to the regimental parade.

8. When the detachments or guards open ranks, the officers of them take post twelve paces in front of the centre, in one rank, in the order of seniority, and with swords drawn; the sergeants in one rank, four paces in the rear of the officers; the corporals in another rank, four paces in the rear of the sergeants.

9. The *adjutant of the day* will dress the line, count the files, verify the details by reference to the written orders, and tell off the guards, whilst the other staff officer appoints the officers and non-commissioned officers to the several guards, and designates the posts which they are to occupy. The larger guards, if necessary, may be told off into platoons.

10. The staff officer will next command: *officers and non-commissioned officers—outwards* FACE: *inspect your guards*, MARCH. The two highest in rank, of each guard, will divide the ranks between them, accompanied by the other officers, &c. The commander of each guard will give the necessary words of command for the inspection of arms and boxes. See par. 9, art. 39.

11. The inspection ended, the officers and non-commissioned officers take post, considering each guard as a company of a battalion, in open order, under review.

12. The staff officer will now command: *the troop*, BEAT OFF; when the music will pass down the line to the left, and back to the right; it will then cease to play, and resume its position. The last command will be the signal at which the new *officer of the day* will take up his position, at a suitable distance in the front of the parade, having the *old officer of the day* on his right, or *reverse* side, a pace retired.

13. The staff officer will continue—*attention; shoulder* ARMS: *rear ranks, close order*, MARCH: *present* ARMS; at which word he will face to the new *officer of the day*, drop sword and report, "Sir, the guards are ready to receive your orders." The *new officer of the day*, after acknowledging the salute, will direct the staff officer what is next to be done. But, if the staff officer should be senior to the *officer of the day*, he would report without saluting with the sword, and immediately retire. In this case the *adjutant of the day* would be instructed to give the orders contained in the following paragraph, or the *officer of the day* would give them himself.

14. The guards having performed such exercises as were required by the *officer of the day*, the staff officer will again command: *guards, (or platoons) right wheel*, MARCH: *column support*, ARMS: *forward, guide to the right*, MARCH; when the whole will pass the officer of the day, in the manner prescribed for passing in review, in common time, (par. 18, art. 9,) the staff officer (if still present on duty) marching on the (then) reverse flank of the first division, and the *adjutant of the day* on that of the last division, or, in the absence of the staff officer, the *adjutant of the day* would be dressed on the first division.

15. When the column has passed the guards break off under their respective commanders, and take the route to the several posts assigned them, at the same time the two staff officers break off, or the remaining one breaks off; the music ceases, and the old *officer of the day* salutes and gives the old or standing instructions to him who relieves him. See par. 1, art. 5.

16. Guards which are assigned to new posts will be conducted to and established in them by the *officer of the day*, and the staff officer or officers detached from head-quarters for the purpose.

17. In bad weather the ceremony of *turning off* guards on the usual parades may be dispensed with by the *officers of the day* respectively, and the inspections be made under shelter. Also, in the case of guards which may have to mount in the night, or at the close of the day, after fatiguing marches, the ceremony of *turning off* will be dispensed with, but that of *inspection* never.

ARTICLE 43.—*Service of guards on their posts.*

1. Every guard will be superintended by the *officer of the day* under whom it mounts, who will visit the guard and its sentinels once before sunset, and again between midnight and day-break, and as much oftener as may be necessary, or may be required. With a view to this superintendence, the *officer of the day* will always call at the proper head-quarters for new instructions immediately before guard mounting, and he will give particular instructions to the commanders of the guards under him, where he may probably be found at any time during the twenty-four hours.

2. Habitually, guards will be relieved daily, and sentinels every two hours. Each guard will be divided into three or more reliefs, according to its strength, or the number of sentinels to be furnished; and the service equalized among the reliefs according to the principle, *the longest off post, the first on.*

3. In freezing weather, and also near the enemy, sentinels may be relieved hourly or oftener. Frequent reliefs will serve the purpose of patroles, and also to keep the men more on their feet, and on the alert, when near the enemy.

4. The commander of the guard, as soon after arriving at his post as practicable, will cause a roll to be made of the guard, by reliefs, and, in detaching a relief, will designate the post that each sentinel is to occupy, which posts will be numbered. The most steady and experienced will be placed over the arms, (that is, at the body of the guard,) and at the remote points; the others in the intermediate or neighboring posts, so that they may be more under the instructions of the officers, &c.

5. No sentinel will be posted so distant as not to leave the guard the power of hearing him, either directly, or through the intermediate sentinels.

6. Before a relief marches, it will be presented to the commander of the guard, who will assure himself that the arms are well loaded and primed, and the flints well fixed. These precautions will be particularly attended to during the night, and, if near the enemy, in the day time also.

7. A guard will turn out under arms for inspection and roll-call as often as a relief is detached, and remain formed until the old relief returns.

8. The *relief corporal* will, on returning to the guard, present the old sentinels to the commander, and render an account of every thing material that has occurred during the relief. A similar course will be observed by the commander of a patrol.

9. A sentinel on post will always keep himself very much on the alert, observing every thing that takes place within the reach of his sight or hearing. He will never quit his arms, but move about briskly on the walk assigned him, and occupy himself solely with his duties, without noise and without speaking, except when necessary.

10. He will habitually carry his firelock supported, the bayonet fixed. In wet weather, if there be no sentry box, he will *secure firelock.*

11. He will not suffer himself to be relieved except by the *relief corporal*, or some other superior of his guard, or by some officer of the army whom he well knows to be such.

12. If a quarrel or other disorder happens near him, he will call out "*the guard,*" which being repeated up to the guard by the intermediate sentinels, the commander will send a non-commissioned officer with several men to enforce order. If a fire breaks out, he will cry "*fire.*"

13. If, in either of the foregoing cases, the disorder or danger is great, and the sentinel is remote from the guard, he will first discharge his firelock in the air, and then call out as above.

14. A sentinel, who, under some urgent necessity, wishes to be relieved for a few minutes, or before the regular hour, will call out "*relief corporal,*" when the latter, with a sentinel, will be sent to relieve him.

15. The sentinel placed over the arms, that is, *at the body of the guard*, when he sees a guard or other detachment, a general or other officer entitled to a complimentary notice, approaching, will call, "*turn out the guard.*" For the compliments to be paid by guards, see article 8.

16. A sentinel placed over the colors will suffer no person whatever, under the rank of officer, to touch them, unless it be the color-bearers of the regiment, or a non-commissioned officer of the sentinel's guard.

17. If placed over a stack of arms, he will suffer no person to touch them, except by order of some officer, or a non-commissioned officer of the guard.

18. If placed over prisoners, he will suffer no person whatever, under the rank of officer, to communicate with them, unless it be a non-commissioned officer of the guard; nor will he suffer the prisoners to leave their place of confinement. If necessary, he will in either case call out "*post corporal.*"

19. Placed over a magazine or arsenal, or over supplies of any kind, he will call for the *post corporal*, if any person under the rank of officer wishes to enter the former, or to touch the latter.

20. The commander of the guard will not suffer his men to take off their accoutrements, or wander more than twenty paces from the post. Water and other necessaries will be sent for by a non-commissioned officer and some men, with arms, if near the enemy.

21. During the day, the reliefs off post may be permitted to rest themselves as much as may consist with safety, but during the night no individual will be suffered to lie down or to sleep on any account, if near the enemy, nor at any other time, unless it be expressly permitted by the *officer of the day.*

22. The commander of the guard will, in person, occasionally visit his sentinels during the twenty-four hours, and between the reliefs they will generally be visited by a patrol consisting of an officer, if there be two on the guard, otherwise a non-commissioned officer; and, in either case, a file of men, to make the sentinels repeat their instructions; to correct the instructions if they be defective, to inform the sentinels under what circumstances and at what signals they are to retire on the guard; and, finally, to place or displace them, as may be decided by the commander of the guard.

23. Immediately after *retreat*, the commander of the guard will give out the countersign, &c. to the sentinels on post, and if there be some smaller guard detached from or dependant on his own, he will send the countersign, &c. to it a few minutes earlier.

24. The *officer of the day* will be responsible that the guards under him receive the parole, countersign, &c. before retreat. The interior guards, that is, guards inside the chain of sentinels around the camp, or inside a fortress, need not receive a countersign, unless it be so ordered expressly by the commander of the troops or garrison.

25. The sentinels commence *challenging* immediately after receiving the countersign. No sentinel will suffer any person to approach nearer than the point of his bayonet until he has received the countersign, placing himself in the position of *charge bayonet* for that purpose.

26. A sentinel will be instructed to challenge by calling out "*who comes there?*" If he is answered "*friend, with the countersign,*" and the sentinel is instructed to pass persons with the countersign, he will reply, "*advance friend with the countersign;*" if the challenge is answered "*relief,*" "*patrol,*" "*rounds,*" or "*grand rounds,*" he will reply, *stand! Advance corporal (or sergeant) and give the countersign;*" and satisfy himself that the party is

what it represents itself to be. If the sentinel is answered in the first manner, and has no authority to permit a person to pass him even with the countersign, or if he is answered in any manner other than is above prescribed, he will call out, "*the guard!*" in order that the *relief corporal* may be sent to decide on the case. So would he call out "*the guard!*" if the countersign given should be wrong, in either of the other cases supposed above.

27. When the *officer of the day* wishes to make his grand rounds, he will repair to the body of the guard, give the parole to the officer commanding it, assure himself of the presence and condition of the men, and demand an escort proportioned to circumstances; generally, a non-commissioned officer and a file of men.

28. Grand rounds will also be made by general officers and officers commanding corps or garrisons, when they shall judge proper, or a staff officer may be detached from head-quarters for that purpose; but such persons will be careful to notify the *officer of the day* of all material instructions which they may find it necessary to give to a guard whilst going the grand rounds. In like manner, all material instructions given to sentinels on post by persons entitled to make grand rounds, ought to be promptly notified to the commander of the guard.

29. On the approach of the new guard, the old will take a position the most convenient for the ceremony of relieving. Guards under twelve men, or six files, will be formed in one rank; of or above that number, in two ranks.

30. The new guard will take the position in relieving which may be designated by the senior of the two commanders; but, near the enemy, such position shall not place the two guards front to front, nor the rear of either towards the enemy. For the compliments to be paid on this occasion see par. 6, art. 8.

31. The new guard having taken its position near the old one, and both standing at shouldered arms, the officers and non-commissioned officers will advance to meet each other respectively, when the *new* will take the instructions of the *old*. See par. 1, art. 5.

32. The commander of the new guard will designate a corporal or sergeant, to be termed *post corporal* or *post sergeant*, to take possession of the guard-house or tent, and its furniture; also, other articles (or prisoners, as in the case of a police guard,) in the charge of the guard.

33. The new *post corporal*, (accompanied by the old) will note any *new* injury which may have been committed, and point it out to the new commander, on whose report the relieved commander will be held responsible.

34. The commander of the old guard will have prepared for the signature of the commander who relieves him, an inventory of the property or articles in the charge of the guard, also a roll of the prisoners in its custody.

35. The first relief having been designated, the commander of the new guard will order it two paces to the front, when the new *relief corporal* will take charge of it, and go to relieve the sentinels in the order hereinafter prescribed, accompanied by the *relief corporal* of the old guard, who will take command of the old sentinels when the whole are relieved.

36. A corporal commanding a small guard may call to his aid, in performing the foregoing duties, a lance-corporal, if there be one under him, or an old soldier; and any commander of a guard may, when the sentinels are numerous, designate more than one *relief corporal*, or order a sergeant to take charge of a relief.

37. During the time of relieving sentinels, and of calling in the small posts, the commandants of the two guards will, near the enemy, visit together the avenues leading to the post, the old commander giving to the new all the information he may possess relative thereto, or relative to the enemy.

38. The detachment and sentinels from the old guard having rejoined it, it will take up its march, the drums, &c. of both guards beating a march, unless music be prohibited at the out-posts, on account of the nearness of the enemy.

39. On arriving at the camp or post, the commander of the guard will, if it consists of several detachments, break it up accordingly, and send each to its regiment or company under an officer or non-commissioned officer. See par. 2, art 34.

40. On rejoining their companies, the chiefs of squads will examine the arms and other appointments of their men returning from duty, and cause the whole to be put away in the accustomed good order. See par. 2, art. 34.

41. When the old guard has marched off fifty paces, the commander of the new will cause his guard to face about, to recover arms, and to place them in the arm-racks, or on a *traverse*, that is, a pole supported by two forks. If there be neither convenience at the post, the arms will be stacked.

42. The commander will immediately after read over the general and particular instructions for his post, if there be such in writing; next visit his sentinels to ascertain, and (if necessary) to correct, the instructions they have received; and question, in a similar manner, the officers and non-commissioned officers under him, relative to the instructions they may respectively have received from the corresponding persons of the old guard.

43. A relief, with arms supported, and formed in two ranks, will march to a flank headed by the corporal; but, if of twelve or more sentinels, the relief will be formed in two sections.

44. The sentinel at the body of the guard will be first relieved and left behind; the one most distant will be next relieved, and the others returning to the guard.

45. When a sentinel sees the relief approach, he will face to it and halt. At six paces the corporal will command: *carry* ARMS; HALT; and add *No.* 1, or the like (for the two sentinels) *recover* ARMS. At this word, the two sentinels approach, when the old, under the correction of the corporal, will whisper the instructions of the post to the new sentinel.

46. This done, the old sentinel will pass in quick time to his place in the rear of the relief, the new sentinel facing the relief, when the corporal will command, (for the two sentinels) *No.* 1, or the like, *shoulder* ARMS; and add, *relief*, *support* ARMS—MARCH.

47. For the compliments to be paid by sentinels, see article 8.

SECTION 5.

ECONOMY OF AN ARMY IN CAMPAIGN.

ARTICLE 44.—*Organization and Composition.*

1. As the troops arrive at the appointed rendezvous, the general-in-chief will cause them to be organized into brigades, divisions, and army corps.

2. Two regiments will constitute a brigade; two brigades a division; and two divisions an army corps; each of which will be placed under the orders of a general officer of appropriate rank.

3. The cavalry and infantry will each be brigaded by itself, and more than two regiments, if much below the legal establishment, may be thrown into the same brigade.

4. There will be attached, as *chief of the staff*, to a brigade, a major; to a division, a colonel; to an army corps, a brigadier general; and, if the particular army consists of two or more army corps, a major general will be attached to it as chief of the staff.

5. Accidental or temporary vacancies which occur in the command of an army, an army corps, division, or brigade, will immediately devolve on the next in rank therein, respectively, until the decision of the War Department can be made known; but, if there be present with the army a supernumerary general officer of the appropriate grade, *he* may be assigned to the vacancy that has occurred by the general-in-chief, without reference to the War Department.

6. The brigades, divisions, and army corps, will be numbered according to the rank of their first, or original commanders, which numbers will fix their rank, respectively, in the order of battle. Nevertheless, in reports of battles, and other operations in the face of an enemy, those bodies of troops, as well as regiments, will be designated by the names of the officers who actually commanded them in person: as, for example, *Green's* army corps; *Lafayette's* division; *Wayne's* brigade; *Howard's* regiment.

7. At the commencement of the campaign, the chief of the general staff will, under the direction of the general-in-chief, draw up a *plan* or *order of battle*, that is to say, the habitual arrangement of the troops in camp and in battle; a copy of which will be given to each general or commander for his information and government. This will be repeated as often as the army experiences an augmentation, or diminution, of an entire regiment or brigade.

8. The minimum of a company has already been fixed under article 24. Regiments will be consolidated when they fall below six companies, in such manner that brigades be not made to exceed some twenty-five or thirty companies each; and, if necessary, the number of brigades, divisions, and army corps, diminished accordingly.

9. The officers rendered supernumerary by such consolidations, will be attached either to the remaining corps, or otherwise disposed of as the good of the service may require.

10. During these temporary consolidations, the men of each regiment will, as far as practicable, be kept under their own proper officers.

11. The order of the regiments in brigades, of brigades in divisions, of divisions in army corps, and of army corps in the army, will not be invariable. The generals, each within his sphere, are authorized to change the habitual order, if important reasons should require it, such as the weakness of some component part, or to relieve one of them from the fatigue of marching too great a distance at a time, in the rear of a column.

12. The generals may, moreover, when necessary, place in different positions, or cause to march singly, the regiments, brigades, divisions, and army corps under them, respectively, all pretensions of the corps, or their commanders, being subordinate to the paramount interests of the service. Nevertheless, the generals who break or invert the habitual order of battle of the corps under them, will report the change to the general-in-chief, through the intermediate generals.

13. A regiment, brigade, &c., which shall have been detached, will, on its return, resume its place in the primitive order of battle, saving the case provided for in the preceding paragraph.

14. The number and description of staff officers, as adjutants general, inspectors general, &c. &c., at the disposal of the War Department for any particular army, will depend on creations made by Congress; but, of the staff officers who may be assigned to an army in the field, the commandants-in-chief of the engineers and of the artillery; the superior officer of the quartermaster department; the superior commissary of subsistence; the superior of the clothing department; the superior of the pay department; the superior judge advocate; the superior surgeon, and the superior apothecary, will be attached to general head-quarters, for the direction or administration of their respective departments of service. Other officers of the staff will be assigned to the several corps, or branches of service, as the good of the service may require.

15. The superior officer of the corps of engineers, or the artillery, serving with one of the army corps, or a detached division or brigade, will receive the orders of the commandant thereof, to whom the said superior officer of engineers or of artillery will communicate any orders he may receive from his own particular commandant-in-chief, attached to general head-quarters.

16. Officers of the staff, having lineal rank, or rank assimilated thereto, and officers of the line without troops, may be assigned to temporary and separate commands, correspondent to rank, by the general-in-chief. (See par. 2 and 3, art. 3; and par. 5, above.)

17. A staff officer charged with a particular expedition, or *reconnoissance*, accompanied by a detachment, the commandant of which may, or may not, be his superior, will, without assuming the command, have a right to require that the latter should make all proper dispositions of the detachment to protect him in his operations; and the commandant of the detachment shall refer to the staff officer for the route of march, and the periods of halting and of marching, no matter which of them be the superior.

18. At the commencement of each campaign, the number and rank of orderlies to be allowed to the general officers and chiefs of the staff, and whether to be mounted or not, will be determined by the general-in-chief. In like manner will be determined the period at which these orderlies are to be relieved, and the regiments which are to furnish them.

19. These determinations will be announced in orders, but may be varied according to circumstances. In route, mounted orderlies will follow the generals or chiefs of staffs to whom they respectively appertain, and will perform at once the service of orderlies and of escorts. Those on foot will march at the head of the divisions or brigades, of the generals or the chiefs of staffs to whom they appertain.

20. All orderlies will be inspected before sent to their destinations. If not conducted by an officer, each will take with him a billet from the adjutant, showing the period of setting out for his destination.

21. A like rule will be observed in the discharge of orderlies, (an officer of the staff signing the billets) and again, when one of them is sent with some despatch, he will take with him a similar billet, with instructions to ask the officer to whom he is sent, to acknowledge the receipt of the despatch, and to note the hour of the receipt on the billet.

22. Generals of divisions and of brigades will assure themselves of the execution of the regulations of discipline and police, of instructions and administration, among the troops under them. Each major general, accompanied by the respective brigadiers and colonels, will personally inspect, in detail, each company of the division, after reviewing the corps composing it. Each brigadier general will act similarly at the moment of receiving his brigade; again, when about to open the campaign, or resume active operations, after any considerable repose or suspension, and, in general, as often as the good of the service may require. The inspecting general will cause a staff officer, and each captain (for his company) to note down, on the spot, the repairs to be made, and the defects to be remedied, without delay, or as soon as circumstances will permit; and he will designate the men and horses to be left in depot, or to march with the baggage train, on account of debility or lameness. (See articles 9 and 39. And generally, *interior police*, par. 9, art. 38.)

23. The more important results of these reviews and inspections will be reported to the general-in-chief through the proper intermediates; and, to render the scrutiny more complete, the inspector general will take with him the last morning reports, or monthly returns, of the regiments, which shall be verified as to every individual comprised therein.

Article 45.—*Theory of the staff—Summary of its duties.*

1. Staff officers, *as such*, have no direct command over the troops; they are the organs through which their respective commanders or chiefs communicate orders and instructions, either verbally or in writing; and a staff officer will add, "by order of," or "by command of," such a one; or premise, "I am commanded, or, instructed by," such a one; or, "the general, &c. commands, or orders," leaving the particular general, &c. to be understood. These forms will not be indispensable in cases in which the person to whom the order is addressed is inferior to the staff officer, and they may always be dispensed with in mere matters of course, as on parades.

2. The foregoing is applicable to the chiefs of staffs and to their assistants, (see par. 4, art. 44.) also to aids-de-camp and adjutants. The officers of the administrative or disbursing departments of the staff are not within the contemplation of this article. (See articles 66, 67, 68, 69, 70, 71, 72, 73.)

3. The several chiefs of staffs will form a chain of subordination among themselves. Thus, the colonel who occupies that station in a division will have a direct authority over a major; chief of one of the brigade staffs, in the same division, independent of the commander of the division; but should, in this example, the colonel give an order to the major incompatible with the duties of the latter towards his brigade, such order would not be obeyed, until communicated to the brigadier general for his approbation. The same rule will apply equally to any two proximate chiefs of staffs, from the major general, atgeneral head-quarters, down to the adjutant of a regiment.

4. The duties of a chief of staff, including always his assistants, whatever may be the corps to which he is atached, fall under the heads *sedentary* and *active*.

5. *Sedentary duties*, or the business of the bureau, as publishing orders in writing; making up written instructions, and the transmission of them; reception of reports and returns; disposing them; forming tables, showing the state and position of the corps, or its several parts; regulating details of service; corresponding with the corps, detachments, or individual officers serving under the orders of the same commander; corresponding with the administrative or disbursing departments relative to the wants of the troops; and, finally, the methodical arrangement and care of the records and papers of his office.

6. *Active duties.* These consist principally in establishing camps; visiting guards and posts; mustering and inspecting troops; inspecting guards and detachments; forming parades and lines of battle; the conduct or control of deserters and prisoners, (from the enemy;) making reconnoissances; and, in general, discharging such other exterior duties (exterior to the bureau) as may be specially assigned.

7. This article regards more particularly the staff of an army in the field, but will equally apply, in many particulars, to the staff of a geographical military department, or to that of a post, in time of peace or war.

Article 46.—*Necessaries of officers—Baggage train.*

1. The mobility and efficiency of an army in the field are much impaired by useless baggage or luggage. He ought to be considered the most meritorious officer who preserves his health and martial appearance, and performs all his duties with the fewest stores and the least incumbrance to the baggage train. Luxury will, therefore, be discountenanced throughout the army during a campaign, and particularly at head-quarters.

2. The following allowances of baggage for officers with marching troops in time of war will on no account be exceeded. Any excess will be rejected or thrown away by the wagon-masters or the conductors of the train, without regard to the rank of the owner or owners.

3. For personal clothing or necessaries, and for articles of stationary and books of regulation, a captain or subaltern will be allowed —— pounds; a major —— pounds; a lieutenant colonel —— pounds; a brigadier general —— pounds; and a major general —— pounds. Add to the foregoing, ten pounds for the instruments of an engineer officer, and five pounds for those of an officer of artillery; —— pounds for the commander of a company, on account of the books and papers thereof, and for an adjutant, the regimental bureau or bookcase described in art. 37.

4. Staff officers in general will be allowed the books and papers necessary to each, and a surgeon his medical chest and necessary hospital stores. In doubtful cases arising under this paragraph, the commander of the column will, on the report of the conductor of the train, appoint a suitable officer to inspect the articles in question, and to determine on their necessity.

5. Officers' bedding shall not exceed the following rates: for a subaltern or captain —— pounds; for a major, lieutenant colonel, or colonel, —— pounds; and for a general officer —— pounds. In latitudes north of the fortieth degree ten pounds may be added to each officer's bedding during the winter months; and between the fortieth and thirty-fifth, five pounds may be added during the same period.

6. A further allowance, on account of table and kitchen furniture or utensils, will be as follows: for the officers of a regiment, a canteen or case not exceeding —— cubic feet; for a brigadier general and his staff, a canteen not exceeding —— cubic feet; and for a major general and his staff, a canteen not exceeding —— cubic feet.

7. Officers' bedding will be neatly rolled into the smallest compass practicable, and secured in a sack or case for transportation; and the trunks, portmanteaus, &c. ought to be made of a convenient shape for carriage, either on bat horses or in wagons. The conductor of the train will not receive any such trunk, case, or parcel, which is not well secured and marked with the name and addition of the owner.

8. In the field every officer will be held bound to have about him at all times, when on duty, pen, ink, paper, and wafers, and, in addition thereto, for officers above the rank of captain, (including aids-de-camp, the captains of engineers and of artillery,) a spy-glass, or small telescope.

Article 47.—*Camps and cantonments.*

1. By the term *camp* will be understood the ground occupied by troops for a night, or for a longer time, either under canvas or in *bivouac*, that is, without shelter, or with such shelter only as they may hastily construct, as sheds, bowers, and the like. Troops are said to be *cantoned*, or in *cantonments*, when distributed at any time among the villages or houses of the country, or when placed in huts constructed for the purpose, as at the end of a campaign. *Barracks* are permanent military quarters.

2. Camping parties will consist of the pioneers, (or a private per company,) under the quartermaster, or quartermaster sergeant of each regiment, who will be sent in advance to prepare the camp, under the directions of the chief of the staff or one of his assistants, and it may be aided by an engineer officer. The latter will be more particularly charged with the *reconnoissance* of the ground, with a view to the works, intrenchments, and communica-

tions which it may be proper to construct or to open. When necessary, an escort will be ordered to protect the foregoing operations. Officers' spare or led horses, and their servants, will not be allowed to accompany these parties.

3. Guides of the country will accompany camping parties, when necessary; and the cavalry officers and non-commissioned officers of these parties will reconnoitre the watering places about the new camp, cause those to be opened that may require it, and designate such as are dangerous.

4. The object of the camp will determine the choice and the form of it. If it is simply a camp of rest on a march, the dryness of the soil and the proximity of wood and water need only be considered; if it is to be intrenched, if it is to cover a country or a siege, if the object be to give the enemy an exaggerated notion of the strength of the army, the camp will be chosen and established accordingly.

5. The general officers will establish the troops as they come up, with as little delay as possible, particularly after long and fatiguing marches or operations. Immediately after arriving on the ground, orders will be given, personally, by the brigadier generals to the colonels, and by the latter to the field officers and captains, *determining* the number of men to be furnished for piquets and guards; the hours at which they are to assemble; the posts to be occupied by them; the orderlies to be furnished or to be relieved, &c.; the places of distributions of subsistence, wood, straw, and the like; the fatigues to be sent for them; the communications and the intrenchments to be opened; the works to be constructed; and, in general, any thing else that concerns the interior and exterior police or service of the camp. The captains will add aloud such instructions as may be necessary for their respective subalterns and non-commissioned officers; and as soon as the adjutants have determined the number of men to be furnished by the several companies in their respective regiments, the first sergeants will cause those to step out who are to go immediately on post or on duty.

6. When the police and other guards are ordered out, the colors will be planted, and the arms stacked, in a line between them, (the weather and the ground permitting;) afterwards the ranks will be broken, and the tents pitched on the ground indicated by the quartermasters and quartermaster sergeants. In the cavalry, before pitching the tents, the piquets and the cords will be placed, and the horses attached thereto.

7. Until these duties are completed the officers will not be permitted to leave the troops, or to employ any soldier for their own accommodation.

8. The terms *front*, *flank*, *right*, *left*, *centre*, and *rear* of a camp have, in respect to a camp, the same acceptation as in respect to the order of battle.

9. If the camp is to present the same front as the troops in the order of battle, four hundred military paces will be necessary per regiment of five hundred files front; and for any other number of files, deduct therefrom a fifth to find the front in paces. Add, in every case, twelve paces for the interval between a regiment and the next on the left in the order of battle.

10. The number of tents per company will depend on their dimensions. They will be pitched in two ranges, one tent behind another, having their openings facing inwards. The interval between the ranges (or the company street) will thus be perpendicular to the front of the camp. The tents in the same range will be placed one pace apart, and the intervals between contiguous companies will be two paces. Each flank company will thus have a range of tents isolated.

11. The stacks of arms will be ten paces in front of the tents; the colors in the same line, opposite the centre of the regiment; and the kitchens twenty paces behind the tents.

12. The sergeant majors, quartermaster sergeants, trumpet or drum majors, the sutlers, and laundresses will encamp on the same line, fifteen paces in rear of the kitchens; the company officers on the same line, fifteen paces in rear of the preceding; the field officers and commissioned staff on the same line, fifteen paces further to the rear; and the wagon or baggage train on the same line, twenty-five paces in the rear of the field officers.

13. The police guard will be placed two hundred paces in front of the arms, facing the centre of the regiment, if the ground will permit; the prisoners' tents two paces in rear of that of the guard; the sinks for the men one hundred and seventy paces in front of the arms; those for the officers ten paces behind the baggage train.

14. If the army is in two lines, the second will encamp four hundred paces in rear of the first.

15. Each squadron, or two troops of cavalry, will encamp in such manner that the tents may form two single and one double range; giving, besides, a narrow street of three paces between the double range of tents, (back to back,) two wide streets of —— paces each, in which the horses of the respective troops will be placed, in two ranks, (crupper to crupper,) the piquets being planted two paces from the range of tents on either side. There will be a space between every two tents in the same range of five paces for forage, and ten paces between the last two tents in each range, in order that there be not forage on the side of the kitchens.

16. A camp established as above will serve as a model for others in cases where the ground or particular instructions from head-quarters may render variations necessary. In campaign, cords can be but seldom used in tracing camps. On actual service, distances will be generally determined by the eye and the legs.

17. The staff officer charged with the establishment of the camp will designate the positions to be occupied by the shambles, and will require that the entrails of the cattle slaughtered shall be buried. For this fatigue, and that of the sinks, convicts will be employed as often as the guards can furnish them.

18. Fires will be permitted in the kitchens only, except in seasons of rigor. In the latter case, the places for building additional fires will be designated.

19. No officer will be allowed to occupy a vacant house, even on the ground of his camp, without express permission from brigade or division head-quarters, as the neighboring buildings may be required for the sick.

20. General officers will establish themselves near the centres of their commands; the brigadiers very near their brigades; the commanders of divisions and army corps on the grand communications between the corps. When the troops *bivouac*, the generals of all grades will *bivouac* also.

21. Near an enemy, as soon after the troops are established in the camp, or cantonments, as practicable, the superior officers, whether of the line or of the staff, will take opportunities of reconnoitering the immediate environs, and of learning the names of the principal objects therein; as roads, rivers, bridges, fords, houses, woods, and the like. The generals, with portions of their staffs, will push their observations to a greater distance.

Article 48.—*Orders; mode of distribution.*

1. Verbal orders, addressed to officers, will be transmitted by officers, and preferably by staff officers. Written orders may be transmitted by orderlies. In this case the orders would, in general, be sealed.

2. Orders may be written in the form of letters; but, in general, they will take the form of *orders* purely military. They will always be transmitted through the intermediate commanders, in the order of rank, except in some extraordinary case, when copies, or notice of their nature, will be promptly sent to the officer omitted by the officer who made the omission.

3. Orders for corps, after orderly hours, will be sent to them; and if the titulary commander of the particular corps (as brigadier for a brigade, colonel for a regiment, and the like) be absent, the order will be received and put in execution by the next in command, present with the corps; that is, by the actual commander.

4. All orders will be numbered; those of a general nature in one series, and special orders in a different one. Each series for the army, an army corps, a division, or brigade, will commence with its organization, and terminate with the campaign. For departments, regiments, companies, and garrisons, the series will commence and terminate with the year.

5. The *head* of the order will indicate the source from which it emanates; as "*Adjutant* and *Inspector General's Office;*" "*Head-quarters, Northern Army*," for a particular army in the field; "*Head-quarters, 1st Army Corps; 1st Division, 1st Brigade, 1st Regiments*," and the like; "*Detachment Head-quarters;*" "*B Company, 1st Regiment*," and the like, (omitting head-quarters;) or, "*Head-quarters, Northern Division;*" "*Head-quarters, 1st Military Department*," and the like; "*Head-quarters, Fort Columbus*," and the like, where the garrison consists of more than a company; otherwise, omit "*Head-quarters.*" The *commencement* of the order will show its character, as "*Special Orders*," or simply "*Orders*," for those of a general nature.

6. *Special orders* are such as relate to the march of some particular corps; to the establishment of some particular post; to the detaching of individuals; to the granting of requests; and, in general, to such other matters as do not interest or affect the troops generally, under the orders of him who gives the orders; and, therefore, special orders need not be published to the troops generally. The parole and countersign are in the *nature* of special orders. (See par. 17, below.)

7. General orders will be given as often as there is matter. They will indicate, 1st. The hours and places of distributions. 2d. The hour of calls; of assembling guards and detachments. 3d. The number, grade, and kind of orderlies; and the force and composition of guards of honor, and the periods at which they are to be relieved. 4th. The regulations of police, and the prohibitions to be made according to circumstances. 5th. The requisitions to be made, and the returns to be furnished by the corps. 6th. Transcripts from, or an analysis of, all such new laws, or decisions of the War Department, as may affect the troops, and which it may be necessary for them to know. 7th. The thanks or reproaches which may be due to corps or individuals. 8th. Exhortations; and, in general, every thing which may be of importance for the army to know. The *watchword* is in the nature of a general order, though published at a particular hour, and under special injunctions. (See par. 17, below.)

8. An inferior commander, to whom orders are addressed, will add to them such dispositions as may be deemed necessary to ensure their execution in his particular corps.

9. There will be established, for each head-quarters, an orderly hour. That for the head-quarters of an army corps will follow the orderly hour at general head-quarters, and so of the other corps in the order of inferiority. The chief of the staff of an army corps will send one of his assistants to general head-quarters, at the hour appointed, to copy orders, and a similar method will be pursued by the chiefs of staffs in the divisions. The chief of a brigade staff will go in person to division head-quarters at the orderly hour of the division, or the brigadier general may substitute an aid-de-camp. In like manner an adjutant will repair to the head-quarters of his brigade, or, by permission, he may substitute his sergeant-major. Finally, at regimental head-quarters the adjutant will dictate the orders to the first sergeants.

10. When orders, which may require the immediate attention of the captains, reach regimental head-quarters after the orderly hour, they will be published as above, the *first sergeant's call* being sounded for that purpose.

11. Orders which relate to the duties of the administrative and medical departments of the staff will either be sent to their respective chiefs, or the latter may be required to send for them as the respective generals may regulate. The same rule will be observed in respect to the two commandants-in-chief of the engineers and artillery.

12. An adjutant or other officer of a battalion or company of artillery, serving with an army corps, division, &c. will be required to attend at the regular orderly hours appointed for the corps. During marches and active operations, when the regular orderly hours cannot be observed, all orders will be specially published, that is, they will be either sent to the corps, or their respective commanders will be notified when to send to head-quarters for them. Under the same circumstances, orders will be read to the troops during any halt without waiting for the regular evening parades.

13. Certain orders ought to be read more than once to the same troops. When this is thought necessary the orders will carry with them a direction to this effect: "The foregoing will be read or read and explained at the head of every company in the ———.

14. In transcribing orders, great care will be taken to avoid errors, which may affect their meaning or intention. The chiefs of staffs in dictating orders will look to this object, and the commandants of regimental parades will be responsible that orders are correctly read to the troops by the adjutants. Captains will be equally responsible for the correctness with which orders are read at the heads of companies.

15. Officers who go up to take orders will always request leave to correct their watches by the time at the head-quarters. This rule will be observed throughout all the corps of the army.

16. The chief of the general staff will address to the Secretary of War monthly extracts of all the more important general orders issued from his bureau during the preceding month.

17. In peace and in war a *countersign* will be given daily, to enable guards and sentinels to distinguish persons, and to execute the police regulations during the night. For officers (and *not* non-commissioned officers) commanding guards a second word denominated *parole* will be given, at the same time, as a check on the former, and by which visits of inspection or *grand rounds* will be received in the night. Near an enemy, a third or *watch-word* may be added to enable the troops to know each other, and to rally in night encounters.

18. These three words, *parole*, *countersign*, and *watch-word*, will always emanate from the highest in command; the name of a departed worthy will be preferred for the first; that of a place for the second; and for the third some noun which is not a proper name, as thus: *Washington*, *Vernon*, *victory*.

19. Detachments and posts in the neighborhood of the army, or within the immediate sphere of its operations, ought to use the same parole, &c. In such cases it may be necessary to send a series of words for some days in advance. Ordinarily they will be issued at the same time with other orders; and always in time to reach the several commanders, posts, and guards before the setting of the sun.

20. In transmitting them they will be carefully put under seal, separate from other orders, and endorsed "parole," &c. If they are lost by the way, or a man deserts with either of them, the highest in rank, according to the nature and emergency of the case, will immediately make the necessary change, notify the neighboring posts and corps in order that the information may be carried promptly to general head-quarters, and a remedy applied for the whole line.

ARTICLE 49.—*The Roster, or details of service.*

1. In each regiment the adjutant will be charged with equalizing the service done by detail according to the principle, *the longest off duty the first on.* Consequently, he will keep a *roster* exhibiting the officers (under the colonel) by class, name, and rank, and also exhibiting the effective strength of companies. (See forms annexed.)

2. In general the lieutenant colonel and major will be considered of the same or first class, and the subalterns, in like manner, as forming but one or the third class. The captains constitute the second. The members of each class will alternate together, that is, relieve each other in succession, as far as practicable, in the same rotation of service; of which practicability the commander will always be the judge, who may, in case of necessity, even order a sergeant to relieve a subaltern, or *vice versa.*

3. The adjutant in making details for guards and distant services, will be careful not to leave a company without an officer if it be possible to avoid it; and when a number of officers and men are required equal to a company, he will, when practicable, designate one rather than make up the quota by details from several companies.

4. Like principles will govern the first sergeants in equalizing service among the platoons, sections, squads, or individuals of their respective companies under the rank of officer. The company roster will be divided into three classes, to wit: sergeant, corporal, and private. The roster of the drummer, &c. will be kept by the drum-major.

5. There shall be two tours of service, to wit: 1st. *Service with arms.* 2d. *Fatigues.*

6. The first tour will comprehend, 1st. Detachments for reconnoitering, foraging, and the like; 2d. Grand guards and other exterior posts; 3d. General courts-martial and courts of inquiry; 4th. Guards of honor or personal guards; 5th. Regimental and garrison courts-martial; 6th. Police guards; 7th. Interior guards, as those of magazines, hospitals, and the like; 8th. The service of orderlies; 9th. The piquet.

7. The service of the *officer of the day* will fall under the head of the guards turned off before him, and at posts where the number of officers is not sufficient for the ordinary reliefs; the services mentioned under the third and fifth heads above will not exempt a member from being detailed as *officer of the day*, that is, when the court sits at the post to which the member so detailed is attached.

8. As soon as a court adjourns *sine die*, or for several days, the president will cause the fact to be reported to the commander of the post, when and during such adjournment all the members of the court (excepting the acting judge advocate) attached to the post will be liable to be detailed for any other duty of the post.

9. Those different services, (par. 6.) excepting detachments and courts, will commence and finish daily at guard mounting, excepting also the termination of the service of orderlies, who will be relieved weekly, or oftener, as may be determined by the commander of the troops or post.

10. Officers and others will be detailed in the order indicated above. Consequently, the first in rank of each class for duty will be put on detachments, &c.; the next on the grand guards, &c.; the last in rank of the same class for duty will always be placed on the piquets. On days when there is no detachment to march, the first in rank of each class for duty will be put on the grand guards, and so of other services in numerical order.

11. For the first tour of service officers and non-commissioned officers will be detailed according to seniority, beginning at the head of the class; platoons, sections, squads, or individual privates according to their places in the order of battle, beginning on the right; and drummers, &c. according to the number of companies, beginning with the first. Details for the second tour will be made in the reverse order.

12. Every service not included in paragraph 6 shall be reputed *fatigue;* thus: the second tour of service will comprehend the fatigues of the camp or post, done by detail; also, fatigue parties sent out armed or not armed, including their escorts; and, finally, all other parties not armed.

13. An officer, &c. who will be absent when called for a particular service, or otherwise disabled from taking it, shall be replaced by the one next on the roster, and the former will take the place of the latter if present in time.

14. The second tour will always be considered subordinate to the first, thus: if it happens that a senior officer, &c. is in a situation to be detailed for either tour, he shall have the right to prefer the first. If he is on some duty of the second tour, and *present* or within reach at any time before the departure of the detachment, the mounting of the guard, &c., he shall be relieved.

15. The service of the first tour will be accounted as made for officers, &c. when the detachment marches beyond the limits of the camp or post, or the guard has taken its post, although the one or the other may be immediately after ordered in. The same in respect to the members of a court after it is organized, and in respect to an orderly after he has reported to the officer under whom he is to do duty. Finally, the service of the piquet shall not be considered as made before the next day at the hour of guard parade, excepting always for the individuals of the piquet who may have actually been drawn from it to make part of a detachment or guard, or to be employed on some other armed service.

16. An officer, &c. whose turn for fatigue may arrive at the same time that he is also first for duty on the roster for armed service, or when he may be actually employed on the latter, shall not then take his tour of fatigue, neither shall he be credited for it unless he was on some armed duty, by detail, of more than twenty-four hours.

17. The second tour of service shall be accounted as made when the individual has been actually employed on some fatigue at the camp or post, or (if beyond the camp, &c.) if he has passed the guards.

18. In the cavalry the dismounted men, or those whose horses are unfit for active service, will be employed on foot in preference; taking care not to overcharge them with duty.

19. A captain commanding two or more companies may be exempted for the time from details as such, at the discretion of the next in command.

20. In campaign and near an enemy, flank companies (as grenadiers, light infantry, riflemen, and the *elite* in cavalry) will be exempted, when not embodied into battalions, &c. separate from their respective regiments, from all duties done by detail, excepting company police and the services numbered 1 and 2 of the first tour; but the officers may be detailed for courts-martial or courts of inquiry. In like manner, artillery companies, &c. with trains serving with infantry corps, will be exempted from the general or ordinary details, as they furnish their own park-guards, &c.; but the field-officers of the artillery may be placed on the roster for the duties of *field-officer of the day*, that is, when serving with brigades of infantry.

21. The roster of the army, and that of each army corps, will comprise the general officers by name and rank, and the effective *strength* of the respective corps. The roster of a division will comprise the commandants of brigades by name, &c. and the effective *strength* of the brigades; and the roster of each brigade will comprise the field-officers in it by name, &c. and the effective *strength* of the regiments. (For the field officers not in immediate command of troops, see par. 16, art. 44.)

22. The principles prescribed for details in a regiment will be observed in larger corps. (See par. 1 and 3.)

23. All guards will be turned off according to their destination, either from a regimental or grand parade. (See art. 42.) In an army in the field, the brigade parades are the grand parades, and all details for them will be made at the respective brigade head-quarters, to which orders from a higher source, calling for details, will be addressed accordingly, through the intermediate commanders.

Article 50.—*Police Guard.*

1. Police guards and their duties have already been noticed, necessarily or incidentally, under several of the preceding articles. (See 16, 42, and 43, generally; par. 2 and 3, art. 25; par. 2, art. 33; par. 6 and 13, art. 47; and par. 6, art. 49.)

2. The police guard of each regiment (or post) will in future take place of camp (or garrison) guards. Its force will be sufficient to furnish the requisite sentinels around the camp (or post,) together with those herein particularly mentioned, and to make the patroles which the localities and other circumstances may render necessary. It will be turned off from the regimental (or garrison) parade.

3. The *officer of the day* will decide when the commander of the guard may permit his men, by reliefs, to eat their meals with their companies, taking care that each relief promptly returns. He will also decide whether the guard shall detach from it one or more small posts or guards, when the extent of the ground to be covered by the sentinels shall render such division necessary or convenient. Each of these small posts will act in the manner prescribed for the main guard on which they depend.

4. Besides the sentinel placed over the army at the body of the guard, the sentinel over the prisoners, the one over the colors, and the one at the tent or quarters of the colonel, (which shall be posted at the tent or quarters of the next in command if the colonel lodges out of camp or quarters,) the guard will furnish others to be posted on the front and rear of the camp, and over the arms of the regiment when they are stacked or in bells-of-arms.

5. If the army is encamped in two lines, the regiments of the first line will furnish the sentinels for all the front of the camp, and the regiments of the second line will furnish the sentinels for the rear. The sentinels in the rear will be posted twenty paces behind the baggage train. (See par. 12, art. 47.)

6. Regiments on the right and left of the camp will place sentinels on their exterior flanks, for which augmentation of their police guards they will have credit on the brigade rosters.

7. The duties of the four first sentinels mentioned in par. 4, and those of the sentinel over the arms, have already been particularly noticed under the references of par. 1. The others, forming the chain about a *camp* (or post,) will be instructed not to suffer any person under the rank of officer to pass out without permission; and during the night, in the case of a camp, no person whatever to pass *in* or *out*, except by the body of the guard, after being recognized by the commander.

8. The *officer of the day* will cause patroles to be made during the day, if he judges it necessary for the police of the camp (or post.) During the night these patroles will always be made, (commencing immediately after *retreat*,) to cause the fires of the kitchens to be extinguished at the hour indicated; to order out from the sutler's shops the men who may be found there; and to arrest and commit to the guard the men who may be found out of their tents (or quarters) after *tattoo*, unless they be going to or from the sinks, or on some duty.

9. During retreat, the guard will be under arms for roll-call and inspection, and, immediately after, the additional sentinels for the night will be posted. These will be called in after the *reveille*.

10. Besides the sentinels forming the chain, there may be others posted (particularly in the night) more in advance, in such manner as to give prompt notice of the approach of danger, or to correspond with the grand guards, if there be such established.

11. When the *assembly* is beaten, preparatory to a march, the sentinels of the guard will be called in, and the whole ordered to join their companies, excepting the prisoners' escort, and excepting also such part of a *new* police guard as may be required to march with the camping party of the regiment, as its escort. (See par. 2, art. 47.)

12. When the ground of the new camp is designated, the commandant of the escort of the camping party will furnish the sentinels which may be required by the staff officer who designates the ground. As soon as the regiment arrives, the guard will take up its position and resume its regular duties.

13. The commander of the police guard will hand in to the *officer of the day* a written report of his tour of service, and of the prisoners and articles in the charge of the guard, immediately after being relieved. (See par. 32, 33, and 34, art. 43.) The prisoners will be reported by name, grade, and corps, showing when and by whom committed, and on what charges.

14. The *officer of the day* having added to the guard report such remarks as circumstances required, noting the visits and rounds made by him, and at what hours, &c. &c., will hand over the report to head-quarters.

Article 51.—*The Piquet.*

1. In camp there will be detailed daily, by regiment, a piquet, composed habitually of two subalterns, two sergeants, four corporals, a drummer, and a number of men proportioned to the strength present, and on every other day a captain will be added to this detail, so that one of the regimental piquets in the same brigade may have an officer of that rank to command it. This regiment will be the one that does not furnish the *adjutant of the day* for the grand parade.

2. The service of the piquet will begin and end at the same hour with that of the other guards. It will always assemble on the regimental guard parade, on the left of the police guard, and be inspected and turned off with the latter. In the cavalry, it will be mounted and the horses equipped.

3. The piquet having marched past the regimental officer of the day, will return to the same parade or march to any other rallying post that may be assigned to it, and be dismissed, with instructions to reassemble promptly when called. The ceremony of relieving one piquet by another, as in the case of other guards, will be dispensed with.

4. The piquet being destined to furnish extraordinary or unexpected detachments and guards called for during the twenty-four hours of its service, the officers, &c. drawn from it for such purposes, before the hour of retreat, will be immediately replaced. Those furnished after that hour need not be replaced, unless there be an express order given to that effect.

5. The officers, &c. of a piquet will at all times be ready to march, armed, clothed, and equipped at all points, and will not leave the camp during the twenty-four hours of their service, unless in one of the cases above provided. The regimental *officer of the day* will cause the piquet to assemble for roll-call and inspection of arms, &c. several times during the day.

6. By means of these dispositions, which assure the presence of the men and their condition for prompt service, it will not be necessary, in the cavalry, to keep the horses saddled, without an express order to that effect. The horsemen of the piquet will perform their stable duties as usual, with this difference—they shall remain booted.

7. The piquets in the cavalry will only assemble mounted by an express order to that effect from the colonel, the *officer of the day*, or some general officer. For inspection, by either of those officers, it will ordinarily assemble on foot, with side-arms.

8. When it is designed to assemble the piquet during the day, a signal will be sounded by the drummer or trumpeter of the police guard. If during the night, (which will only take place in case of alarm, or when the

piquet is to march in whole or in part,) the *officer of the day* or the adjutant will wake up the officers, the latter the non-commissioned officers, and these the men. The whole, without noise, will immediately form in the order of battle, ready to march.

9. Immediately after retreat, the piquet will be assembled for roll-call and inspection of arms, &c. by its commander, assisted by his officers, &c., after which the whole will retire to their tents. In the cavalry, the piquet will ordinarily be on foot for this inspection.

10. The commander will note down the tents of the officers and non-commissioned officers, and the latter the men's tents, to the end that the whole piquet may be promptly assembled in case of need.

11. If the piquets should be ordered to *bivouac*, the colonel would indicate the place. In this case the horses would be kept equipped.

12. As often as the regiment is under arms for reviews, manœuvres, marches, or action, the piquet will be ordered to rejoin its companies.

ARTICLE 52.—*Grand Guards and other outposts.*

1. Grand guards are the advanced posts of a camp or cantonment, and ought to occupy the approaches or avenues leading to it.

2. The force and positions of the grand guards will be regulated by the generals of brigades, subject, of course, to the orders of their lineal superiors, each brigadier general being held responsible for the maintenance of the ground occupied by his brigade.

3. To the grand guards of infantry there will be generally attached a portion of cavalry, as well with a view to the common service of the posts, as also to communicate prompt intelligence of the enemy in urgent cases.

4. Habitually they will be composed (by brigade) of a captain, two subalterns, two sergeants, four corporals, two musicians, and a number of men proportioned to the objects in view and the effective strength of the regiments present, and will mount with havresacks, &c. charged for twenty-four hours.

5. Besides the general superintendence which the generals of every grade and their chiefs of staffs may give to the grand guards furnished by their respective corps, the superintendence of them will be more especially confided to a *field officer of the day for each brigade.*

6. The lieutenant colonels and majors will be classed together on the roster for this service. When their number is less than three, the colonels will be brought into the same class, and, in cases of necessity, one or two of the senior captains, in order to make three or four reliefs.

7. The grand guards will mount habitually at the same hour with the other guards. (See art. 42 and 43.) Nevertheless, the generals of brigades, with the approbation of their superiors, may cause them to mount a little before the break of day, when it may be thought advisable to double the outposts about that time; or they may mount at any other hour, when some special reason may render it necessary.

8. In the night a grand guard will assemble and depart without noise, throwing out flying sentinels on the march, to scour the country. It will do the same thing by day, at the time of establishing itself in a post, and whenever circumstances may require it.

9. It will be conducted to a new post by the *field officer of the day*, or by some staff officer, who may have reconnoitered the ground; these reconnoissances being among the principal duties of the staff. See par. 4 and 6, art. 45.

10. The commandant of an established outpost will send to the *field officer of the day*, as often as may be necessary, a steady man of the guard, as a guide to the relieving *field officer of the day*, or grand guard. He will also send, in the evening, a corporal, or some trusty man, to the *field officer of the day*, for the billet containing the parole, countersign, &c. (See par. 17 and 19, art. 48.)

11. A grand guard, if there be no principal avenue to be occupied or defended, will be established, as nearly as may be, in the centre of the ground to be covered, and in a bottom, or in some covered place, in order that the enemy may not reconnoitre its force, &c. Outside, and near the edge of a wood will be avoided.

12. When very near the enemy the guard may change position after retreat, particularly cavalry guards, which ought to occupy, during the day, positions very much advanced. But even cavalry guards will not be advanced too near to the enemy, in a country covered, broken, or mountainous, particularly if the enemy be favored by the neighboring inhabitants.

13. Grand guards, posted in a plain, and exposed to cavalry attacks, will cover themselves by trenches, (of a circular form,) or by abattis. A similar precaution may generally be observed when near an *Indian* enemy. Under other circumstances they will only intrench and fortify themselves by express permission of the brigadier generals, as those defences are apt to impair the alertness of the guards, and even to render them timid. This remark will not apply to a *detachment*, which would, if menaced, intrench itself, or use, for its safety, all other means furnished by the localities.

14. The first care of a *field officer of the day*, and of the commander of a grand guard, the moment that the latter is in position, is to obtain intelligence of the enemy; of his position; of the roads or passes leading from him to the guard, or the army. It is on this information that the small or more advanced posts, and the additional sentinels for the night, will be established.

15. The first subaltern will command the largest or most important of these small posts, a sergeant the next, and corporals the others. Generally, one of the non-commissioned officers, with some six or twelve men, will be most advanced, and dependent on the subaltern, the latter (having a corporal and some twelve or twenty men with him,) occupying a position between the advanced non-commissioned officer and the body of the guard. The other small posts will generally be detached to the right and left of the guard, and all of them will throw out sentinels proportioned to their strength, and according to the instructions given.

16. The commander of the grand guard will give the most detailed instructions as to the service of the several small posts, particularly as it respects the reports to be made to him; general vigilance; the defence expected from each; and as to retreats; which will always be made on the body of the guard. The *field officers of the day* will act similarly in respect to the commanders of grand guards under them respectively.

17. The particular instructions to be given to a grand guard will depend on a variety of circumstances, but there are others which are general and variable, to wit: that it shall inform the nearest corps, and the *field officer of the day*, or the general of the brigade, of any threatening or important movement of the enemy, and of any attack that it has reason to apprehend; that it shall arrest all suspicious persons who may approach without passports; and every soldier or waiter who shall attempt to pass *out* without permission; also, persons who shall profess to belong to the army coming into camp, unless they are well known to be such; and, finally, that they shall turn back even marketing people who may offer to pass *in*, unless instructions have been given for their admission.

18. The sentinels the most advanced will be doubled, (particularly during the night,) and posted behind trees, fences, and the like, from which they can best observe or intercept the enemy, without being seen by him. They

will not be allowed to sit or to lie down, if they can be otherwise concealed, as in either case they would be liable to fall asleep.

19. When doubled one of them will be instructed, under particular or extraordinary circumstances, to fly to the guard with information. During the day intelligence may be communicated from distant sentinels by signals, as thus: the cap placed upon the bayonet and elevated may signify the approach of danger, &c.

20. During the night it will be useful to employ a different kind of signals to precede the countersign. The patroles, grand rounds, flying sentinels or reliefs, may, for example, when challenged, answer by clapping hands, striking on some part of the firelock, and the like, without dispensing with the countersign. These signals may also be substituted for the challenge, "*Who comes there?*" when the enemy is near enough to hear the challenge. In this case, if the concerted signal is not given in reply, the sentinel ought to be instructed to fire, in the ordinary case of not answering, or answering unsatisfactorily.

21. In detaching flying sentinels the most intelligent men will be chosen, and limits assigned to them, as it may be imprudent for them to go more than one hundred paces beyond the guard; and it is repeated that too much care cannot be taken in the choice of sentinels for the posts most remote from the guard.

22. The strength and frequency of patroles and rounds, and the number of flying sentinels to be thrown out, will depend upon the proximity of the enemy, his facilities for attacking or passing the post, the temper of the neighboring inhabitants, &c. In general a commander cannot too much multiply his precautions.

23. He will, personally, during the day, reconnoitre the routes which the patroles and rounds will have to take during the night, having with him some of those who will compose them as guides for the rest. Of course all patroles, rounds, reliefs, and flying sentinels, will be challenged on their return to the guard, in common with all other persons whatsoever, who approach it during the night.

24. Towards daybreak the patroles ought to be more frequent, and not restricted to the environs of the guard and its sentinels. They will march with the greatest precaution; examine the hollow ways, the woods favorable to the designs of the enemy, and neglect nothing to avoid being cut off, or to avoid engaging in an unequal contest. If they are attacked, or if they meet an enemy, they will fire, and seek to arrest his march. While they are out the guard will be under arms, and the horsemen mounted, or ready to mount.

25. Cavalry patroles will push their discoveries still further than those of the infantry; and patroles of both kinds, sent out towards break of day, will not return until broad daylight. Then, and not before, the additional sentinels of the night will be withdrawn.

26. The commanders of *reconnoissances* or patroles will look back, from time to time, to judge the aspect of the ground, in order to note the points and objects which may become favorable for defence in case of attack, or serve as guides in the case of retreat. The roads or ways, their crosses, branches, and directions, will likewise be carefully observed, and, in returning, these parties, especially in the night, will frequently halt to look round and to listen, in order to be certain that they are not pursued, or, if pursued, to make the proper resistance.

27. When it is to be apprehended that the small posts may be surprised, they will not be permitted to kindle fires; and, in order that the number and position of the grand guard may not be betrayed to the enemy by lights, other fires will be made at some distance from it, and kept up by flying sentinels. Similar fires might usefully be established in passes or on points which, from the want of men, cannot be occupied.

28. When a part of the horses are sent to water, in cavalry guards, the remainder will be mounted, or they will hold themselves ready to mount, as in the case of detaching a patrole.

29. The guard, and particularly a sentinel, will not allow a deserter, or other suspicious person, to approach, until he has thrown down his arms. All such persons will be promptly sent from post to post to the *field officer of the day*, who will report or send them to brigade head-quarters. In the night, if there be a difficulty in sending them off from the post, they will be strictly guarded.

30. The brigadier general, having examined them, will send them to division head-quarters. The commander of the grand guard will, himself, have previously caused them to be searched and questioned relative to whatever may be of *immediate importance to his post.*

31. The bearer of a flag of truce, and his trumpeter, &c. will always be stopped by the first sentinel whom they may approach, who will cause them to halt, and face about from the post and the army, and, if necessary, they will be directed to place bandages about their eyes. A non-commissioned officer, at least, ought to remain with them, as well to cause an obedience to those directions as to avoid the indiscretion of sentinels, and further, to seek, by adroit replies, to deceive the curiosity of those persons, whose secret and principal object may be to make a *reconnoissance* under the protection of a flag.

32. The bearer of a flag of truce, who presents himself in a proper manner, and who obeys the necessary directions given him, will be treated with the greatest civility by all persons belonging to the army. A written acknowledgment having been given by the commander of the grand guard of the letters or packages brought, the bearer of the flag, &c. will be immediately dismissed; after which, if he is found loitering or reconnoitring about the outposts, he will be treated as having dishonored his flag. The letters or packages will be promptly sent, through the *field officer of the day*, to general head-quarters.

33. The moment that an enemy approaches a guard it will commence the attack, and keep its position, if he is not in too great force, or the guard is not in danger of being cut off. In the latter case it may take a new position, and make all necessary movements to resist and delay his march, combating in close or open order to effect those objects. Finally, when sufficient time has been given for the army to take up its order of battle, and the enemy continues to *force in* the guard, it will join its regiment or regiments.

34. A guard placed in some enclosed post, or in an important defile, with *special* instructions to resist to the utmost, will not fall back or change position on the approach of even an overwhelming force, but will hold firm, and risk every thing by the most stubborn resistance, with a just reliance on timely support, and the highest approbation.

35. The posts about an army in the field ought not to be intrenched, unless the army is acting purely on the defensive; or, unless it be to cover certain weak points, or points which the enemy cannot avoid in attacking or pursuing, if he is successful; or, finally, unless it be to close a defile, or in a mountainous country.

36. Under either of these circumstances an enclosed post would become united to the army, and enter, necessarily, into its plan of general operations. Consequently, every intrenchment that requires artillery ought to become a post; to receive a guard or garrison; and a particular commander not subject to be daily relieved.

37. Such post will only be established according to the orders of the general of division, under the sanction of the general-in-chief; the former giving to the particular commander written instructions relative to its defence, and the circumstances under which the defence may cease.

38. After the commander has thoroughly examined the interior and exterior of his post, he will distribute the service and the ground among his officers, &c., establish a reserve, and give the necessary instructions for every

case that can be foreseen. He will suppose an attack, and will dispose his garrison for defence, to the end of being the better prepared for a real attack, whether by day or by night.

39. In dark or foggy weather he will change the hour and direction of his patroles, and at no time suffer a flag of truce, a deserter, or a stranger to enter his post. If it be necessary to let a flag pass by or through, he will first cause a bandage to be placed about the bearer's eyes. Deserters will be treated in a similar manner, if permitted to enter or to pass. He will not suffer to enter even a guard sent to relieve him, until he has carefully examined it beyond the post.

40. If his post is attacked, he will act without waiting for orders, and without calling a council, as he alone will be responsible for the determinations which he may take.

41. If, after employing all the means under him, and all the resources of his genius, to repel the enemy; if, after exhausting his ammunition and subsistence, or losing the greater part of his men, and all hopes of succor have vanished, he is at length compelled to give over the defence of the post confided to him, there will still remain one gallant effort more which he will not fail to attempt, to wit, to surprise some one of the posts by which he is surrounded, and thus seek to regain the army. (See the 52d and 59th articles of the Rules and Articles of War.)

42. Grand guards will be instructed to march to their posts, if very near the enemy, without music, and to pay no compliments in their posts. Neither will their sentinels, under the same circumstances, take any complimentary notice of officers passing near them.

Article 53.—*Marches.*

1. The object of the movement and the nature of the ground will determine the order of the march, the number of the columns, and also the relative number of troops composing them.

2. In general, the greater the number of columns the better, provided that the distance between them be such that they can mutually communicate with and sustain each other—that is, readily unite in case of need.

3. The force and composition of the advanced guard (formed of companies or battalions of light troops) will be regulated according to the relative position of the enemy. These troops will be destined to cover the movements of the column to which they appertain, and to arrest the enemy until the general may have had time to make his dispositions. The advanced guard will not always be at the head of the column; in a march to a flank, for instance, it will seize and occupy, in succession, the positions which may serve to cover the column.

4. The *long roll*, or *to arms*, will never be sounded but when the whole of the troops are to form suddenly to meet the enemy. In this case, the first company formed will hasten to the colors, and the police guard, excepting a detachment to guard the prisoners, and guards of honor, will rejoin their companies. Other guards will not fall in unless specially ordered.

5. When the army or the corps is to march under other circumstances, the *assembly* will be substituted for repairing to the colors. It will be preceded by the *générale* for striking tents, loading wagons or bat horses, calling in guards, extinguishing fires, &c. &c. The straw, &c. of the old camp will not be fired, as it might serve to indicate the movement to the enemy.

6. Those dispositions will be executed with the greatest promptitude. If the chief of some corps is absent, the next in rank present will take his place and commence the march.

7. The generals will, when necessary, unite the pioneers at the heads of columns, to smooth difficulties in the way of the march, and send forward a quartermaster, or other staff officer, to superintend those operations.

8. In bad roads, and particularly in night marches, it will frequently be necessary to post corporals or mounted men to mark the way, or to advertise the troops of the direction of the march and of difficulties to be avoided. The corporals, or other men employed for those purposes, will, for distinction, be called *jalonneurs*. They will be posted or relieved by company, or as often as may be necessary, under the direction of the regimental quartermasters, the adjutants, or other officers, and without interrupting the march.

9. The generals and other field officers will cause knapsacks, valises, and havresacks to be frequently searched on the march, in order to throw away every thing found about the men exceeding what is prescribed, and further to furnish them, if necessary.

10. In passing through a city or village, there will be left behind, by battalion, in succession, an officer and a certain number of non-commissioned officers, to prevent the men from straggling and loitering behind.

11. When necessary, the commander of the column will, in addition to the above dispositions, cause a platoon or company towards the rear to be detached from the column, as a rear guard, to force up stragglers. Under important circumstances, he will cause one or more non-commissioned officers per regiment to be attached to this guard to aid it in that duty. The guard will also be particularly instructed to prevent marauding, even in an enemy's country. If taken in the fact, the marauder will be sent to his corps with the proper charge, in order that he may be severely and publicly punished for the infamous offence. (See the 52d and 54th articles of war.)

12. The generals and colonels will occasionally halt till their columns have passed, in order to see whether the proper distances are observed. They will frequently send an aid-de-camp or other staff officer to the rear for the same purpose, on whose report the march may be regulated.

13. In passing defiles or obstacles, the troops which first pass will successively relax their pace, or even halt, if necessary, to give time to those in the rear to regain their distances. Each division will reform after passing, before accelerating its march to rejoin the column.

14. The column will halt as often as the object of the march and the distance to be made will permit. Halts serve the double purpose of resting and reforming the troops. In marches, and at those temporary halts, the troops pay no honors, except as in article 11, which see.

15. Officers' led saddle horses will follow the regiments of the owners; the same of the horses of the dismounted men in the cavalry. Bat horses and others will be with the wagons, under the orders of the conductors of the trains. They ought not to be permitted to accompany the columns.

16. When it can be avoided, troops, preparatory to taking up the line of march, will not be assembled in ways, routes, or other places, so as to interrupt the movements of the other troops. The generals of divisions will each send a staff officer in advance to the rendezvous appointed, to receive the corps as they arrive. Each corps, when others are to come up, or are already at the rendezvous, will take its habitual position in the order of battle or of march, unless a different one be specially assigned.

17. The time of commencing the march for each corps, when several are to take the same route, will be regulated by the general-in-chief, or the senior general present, in case the former has not given his orders on the subject.

18. In marches in the interior, when the immediate object is simply to overcome distance, corps larger than regiments may be broken into regiments, and the latter follow each other at intervals, say of twelve or twenty-four hours. If the troops are without tents, the same rule will be applied to the companies of a regiment, in order to increase the chance of finding shelter at night for all the companies.

19. In the interior troops will be generally furnished with *routes*, specifying the place on the route where subsistence, forage, &c. may be found; and, whether these supplies be previously provided or not, the commander of the corps or detachment will send forward every morning a quartermaster, or some other agent, to prepare for the arrival of the troops and their wants.

ARTICLE 54.—*Battles, general dispositions.*

1. It will not here be attempted to fix, with precision, the manner of disposing of an army in the field of battle, as such dispositions ought to vary according to the respective numbers and kinds of troops opposed to each other, the nature of the war and of the ground, and, finally, to the particular objects in view; nevertheless, certain bases will be laid down not to be departed from except under peculiar circumstances.

2. The advance guard ought to be preceded in marches and attacks by its *tirailleurs*, (that is, marksmen or skirmishers,) to occupy, to harass, to disconcert the enemy; to repel *his tirailleurs;* to reconnoitre the passes leading to him; the position he occupies; and, finally, to open the way to victory.

3. After overthrowing the enemy's outposts, this guard will occupy, in advancing, the principal points which may serve to cover and to facilitate the march of the corps to which it appertains, as well as the points the possession of which may be necessary in case of retreat, such as bridges, defiles, stone houses, woods, and heights. Those objects accomplished, it will complete its chain of *tirailleurs*, and attempt, without committing itself, such attacks as may serve to occupy the enemy, and to deceive him as to the march and the projects of the corps which follow.

4. Those small detachments left behind in advancing will rejoin the guard when other troops come up to them. If a position be taken by the line, and the advanced guard be separated from it by heights or by defiles, in order to preserve a union with the guard, such points ought to be occupied by troops drawn from the line.

5. When sufficiently near the enemy, the troops will be drawn up in a number of lines, according to the force of the column or columns, with some battalions placed behind the wings of the first.

6. The lines may be composed of troops in column and troops in the order of battle, according to the ground, the demonstrations made, or the attacks projected; but, in general, troops which have to advance some distance before attacking, and not exposed to a direct fire from the enemy's batteries, ought to be held in column, ready to advance or to display according to circumstances.

7. In order not to confound the advance guard with the other troops, after the battle opens the former will take position on the flanks, or in the intervals, in the villages or houses, on heights, behind advanced fences, &c. &c., taking care not to intercept the fire of the troops, and also to preserve a unity of design with them.

8. The *reserve* will be in the rear of the centre, or behind the points deemed the most important. As far as practicable it will be composed of the *elite*, both of foot and of cavalry, with a view to celerity. The object of a reserve is, to finish the defeat of the enemy; to re-establish a lost battle, or to cover a retreat.

9. The cavalry ought to be divided between the two wings, and placed in *echellon* if the ground be favorable to its operations in those directions. Vigor, swiftness, and to *turn the enemy*, will be recommended to it; also, rather to *give* than *receive* the charge; and, in order to preserve the superiority of shock given by its totality and unity, not to commence the gallop until within a hundred paces of the enemy.

10. The commandant-in-chief of the artillery, or the superior officer of that arm, attached to a *corps d'armée*, division, &c. will distribute his batteries along the front of the line; on the flanks, or in the intervals, according to the ground, or the orders he may have received—holding himself, personally, where his presence may be the most necessary. The artillery will be employed to extinguish the fires of the enemy's batteries which cover the chosen point of attack. In defence, it will direct its fire against the troops most in advance, and in both cases the fire will be united as much as possible; it being terrible and destructive only when concentrated.

11. In battles, and military operations in general, one ought always seek to take the *lead*, that is, to reduce the enemy to the defensive. As there seldom is more than one important and decisive point to be chosen in the enemy's position, this should be early selected, and every disposition made to attack it suddenly with a superior force; which may very well be done, without a nice regard to the relative numbers of the two armies, by covering the preparatives with false attacks; by presenting on the refused points columns which may afterwards be carried with rapidity to the true point of attack; by uniting in the same end troops concealed from the view of the enemy, whether by favor of the ground, trees, houses, &c. &c. or by a cloud of active *tirailleurs;* in short, by amusing or holding in check a larger portion of the enemy by a smaller number of the army.

12. Defence, like attack, has its important point. Every thing depends on a just knowledge of it. It is that where the enemy would have to make the least effort, whether to overturn one corps or another, or to pierce the centre, in order to carry himself on a point of communication, or of retreat, in the rear.

13. Besides the dispositions which ought to be made, relative to the probable design of the enemy, it is necessary to secure the wings by placing in *echellons* some battalions or squadrons behind them, if the ground does not afford that security. But the defence once well established, that is, the danger of being *cut* or *turned* having ceased, the army ought to assume the *offensive*, as the most certain means of disconcerting the enemy in his plans; of giving confidence to the troops; in short, of securing victory.

14. To guard against a reverse, it is important never to hazard an attack without having one's communications and retreat assured; accordingly, at the same time that the dispositions for the attack are prescribed, those to be followed in case of non-success, or retreat, ought also to be given. Thus will be indicated, in advance, the movements which the several corps, down to regiments inclusive, may have to make under the different contingencies which may arise; and the positions which they ought successively to seize and to occupy. But, however fully the general-in-chief may enter into the details of the day, to provide for probable or even possible results, yet as he cannot be every where, nor foresee every thing, the subordinate commanders may, according to circumstances, vary those dispositions, acting always in strict conformity to the general plan of battle, or in harmony with the other corps.

15. The Government expects that *corps d'armée*, divisions, and brigades, will, under the circumstances above supposed, (that is, in unforeseen cases,) give to each other a mutual support; as it would not acknowledge as an advantage, but would regard as culpable, the partial success that one corps might obtain in the place of preventing the total loss of another.

16. In the event of success, the light troops only will pursue with celerity. The others will re-establish order in the ranks, and then follow in quick or accelerated time, according to circumstances, but always with the ranks closed, and well aligned; ready to receive the enemy.

17. The general-in-chief, and other commanders, will, as far as possible, indicate, before the attack, the points where they may be personally found during the action; and in case a commander is thrown *hors de combat*, the circumstance ought to be promptly notified to the officer next below in rank, and the one next above, by an aid-de-camp, if a general, or the adjutant, in the case of his colonel.

18. To keep a general well informed of the actual situation of the corps not immediately under his eye, during an engagement, staff officers ought to be directed, successively, to follow their movements, and to report, from time to time, to the chief.

19. All commissioned and non-commissioned officers will compel those inferior to them to remain steady in the ranks during an action, and not suffer any inferior to dishonor the American name by quitting his post to despoil the dead or wounded. (See the 52d article of the Rules and Articles of War.) The quitting the ranks under the pretence of carrying off the wounded is the ordinary refuge of the cowardly, and ought never to be tolerated. (For the service of field, or flying hospitals, see art. 55.)

20. The senior officers of the artillery will, after the battle, send to collect the artillery, arms, and accoutrements left on the field.

21. A written report of the day will be made by the several commanders, including those of battalions and squadrons, to their respective chiefs, each in what concerns his corps. From the reports of those next below him, corroborated or corrected by his own observations, and those of his staff, the general-in-chief will make his detailed report to the Secretary of War, and put in orders the name of every individual, without regard to rank, who may have distinguished himself in an extraordinary manner.

22. As reports and orders relative to battles, and other military operations, constitute, in the case of subordinates, the foundation of military fame, and this fame the principal reward of merit, too much care cannot be observed by the general-in-chief in collecting information, before he offers the names of his companions in arms to the notice of Government, and the admiration of the country. Justice and policy equally require that the names of individuals or of corps failing to do their duty, should be given in like manner. Indeed, reports of military affairs are highly defective which do not notice faults committed as well as strokes of extraordinary courage or genius exhibited.

23. To enable the general-in-chief to execute, with impartiality and fidelity, this high and delicate trust, his first despatch to the Government ought, briefly and simply, to state the general and more important results of the affair; making his detailed report afterwards on full deliberation.

24. Private letters, or reports, relative to military marches and operations, are frequently mischievous in design, and always disgraceful to the army. They are, therefore, strictly forbidden, and any officer found guilty of making such report for publication, without special permission, or of placing the writing beyond his control, so that it finds its way to the press, within one month after the termination of the campaign to which it relates shall be dismissed from the service.

Article 55.—*Field hospitals.*

1. Besides the temporary or stationary hospitals established in the neighborhood of an army for the reception of the sick, &c. there shall be organized, by the medical director attached to general head-quarters, *field*, or *moveable hospitals*, to follow the corps during operations, and to give to the wounded the most prompt assistance.

2. For these purposes, the medical officers, &c. will be organized into a field depot, divisions, sections, and a flying hospital; the extent of each to correspond with the corps to which it is attached.

3. On the day of a battle, the field depot shall be placed, as near as may be, behind the centre of the army, and as near the line as practicable, without compromising its safety. The divisions will, in like manner, be posted behind the wings of the army, or the principal operating columns; the sections will follow the smaller or detached corps, or will be held in readiness near points at which partial shocks may be expected. The flying hospital will be with the advance guard; the surgeons, &c. lightly mounted and equipped, ready to fly to the points where the action is hottest, and to afford the earliest succor to the wounded.

4. The medical director will, in concert with the quartermaster general, cause a suitable number of light wagons and attendants to be attached to the several parts of the field hospital, each detachment under the conduct of an officer or agent of the quartermaster's department. When practicable, these attendants will be selected from the country people.

5. The field depot and the divisions will be provided with a sufficient number of litters, &c. for the removal of the wounded to the stationary or general hospitals in the rear. They will also be furnished with cases of instruments, blankets, some brandy, wine, vinegar, salt, bread, &c. &c. &c. Most of these aids and supplies will be equally necessary to the sections and flying hospital, and will be furnished accordingly.

6. As soon as the action commences, the field depot and divisions will be ready to receive the wounded, and hold displayed their instruments, medicaments, &c. &c. (For permanent or stationary hospitals, see art. 73.)

Article 56.—*Convoys and their escorts.*

1. The force and composition of the escort of a convoy will be calculated according to the nature of the convoy, the danger of attack, and the country through which it has to pass. If it be a convoy of powder the escort should be more numerous, in order that the defence of it, in case of attack, may not be so near the wagons, &c. as to risk explosion.

2. As often as possible there will be attached to large convoys, pioneers, or fatigue parties, with proper tools, as well to remove difficulties in the roads, as to repair the wagons, &c. With a view to the latter, every convoy should be furnished with spare wheels, spare axles, and the like.

3. The officer charged with organizing and putting a convoy in march will give to the commander detailed written instructions for his Government. The escort, in reference to the roster, will be considered as a detachment.

4. When an artillery officer is present with an escort of a convoy, consisting of ammunition or powder, the commandant, if of a different corps, ought to advise with him as to the order of marching and parking the carriages, and also as to the sentinels necessary to prevent accidents.

5. The caissons and other ammunition carriages, also those which contain the tools and spare pieces of carriages, will form the first division, or the one most remote from the enemy; next the travelling-forges, provision wagons, &c. &c. dividing the whole number of carriages, if it be a considerable convoy, into a suitable number of divisions; obliging those of each division to follow in close order, that is, at the distance of four paces apart, and preserving the distance prescribed between the divisions.

6. Prudence ought to be the principal quality of the commandant. He will regulate his march according to the proximity of the enemy, their respective force, the nature of the ground, &c. Before marching, he will seek to obtain the best information on those points, and afterwards push his reconnoitring parties as far in advance as circumstances may permit.

7. On discovering the enemy, those parties will report to the commandant, take a position, and wait for the approach of the column, or for orders. On resuming the march, they will throw out *tirailleurs* to scour the road sides, woods, hollow ways, &c.

8. If the head of the column is threatened, the commandant will advance with his principal corps, leaving only small detachments on the other points; occupying, as he advances, the defiles and other positions where the enemy might attack the column to advantage. To be master of those before the enemy, he will send forward an advance guard, and when he comes up with the latter, wait with the principal corps until the head of the column rejoins him.

9. If the rear of the convoy should be threatened, similar measures would be adopted. In this case, to multiply obstacles in the way of pursuit, it would be important to destroy the bridges left behind, to choke up the roads, &c. Near the enemy, villages are always to be considered as defiles, and consequently not entered until every precaution is taken.

10. If the country is open, the principal corps will habitually remain about the centre of the column, when small advance and rear guards will be sufficient.

11. If the flanks are threatened, the ground difficult of access, or broken, and there are several defiles to pass, the defence of the convoy would be more difficult. In this case, the principal corps would occupy, in advance, the positions which serve to cover the convoy, and hold them until the rear of the latter passes.

12. It will frequently be useful, when threatened, and the width of the road will permit, to diminish the ground to be defended, by causing the carriages to form in double column, and in that order to pursue the march.

13. If a carriage is overturned, it must be promptly unloaded and set on its wheels; if broken, and the spare pieces to repair it are not at hand, it will be thrown aside the column, and the load divided among the other carriages.

14. During the night the convoy will be *parked*, and the necessary sentinels and outposts established.

15. If the enemy is announced and is in force, the commandant will promptly cause the carriages to be parked in the form of a square or triangle, the horses inside. If the ground is unfavorable, he will double the files of carriages, to diminish the space to be defended. The drivers ought to be on foot, and at the horses' heads, the better to govern them. These persons will be held strictly to their duty. (See Articles of War.)

16. The *tirailleurs* thrown out for the purpose will hold the enemy at a distance as long as possible. If it becomes necessary to sustain them, the commandant will do it with the greatest circumspection, as it is important to hold his principal corps prepared for the moment and the point at which the enemy may be expected to make his greatest effort.

17. Although it is prudent for an escort to avoid combat as much as possible, yet, if the enemy seizes, by anticipation, a defile or position which commands the route, it would be necessary, after leaving suitable detachments with the column, to attack him with vigor. In this case, the column would remain at a halt until the defile or position be carried.

18. If the convoy is fired when in park, every exertion will be promptly made to remove the carriages in flames. If this cannot be done, the others to the leeward should be removed, beginning with those loaded with ammunition or powder. In march, the carriages fired would be overturned by the way.

19. It may happen that, by delivering a part of the convoy to pillage, the remainder may be saved. This, the commander may do under an extreme necessity; saving the carriages charged with ammunition and subsistence in preference.

20. When, in consequence of a very great superiority on the part of the enemy, and the duration of the combat, the commandant has lost the greater part of the escort, or, being attacked on all sides, he finds himself no longer able to resist, and that in the one case or the other, he is without hope of succor, he ought to cause the convoy to be fired, and, with the whole of his detachment united, seek to make good his retreat by cutting his way through the enemy.

Article 57.—*Baggage train.*

1. The necessaries of officers have already been limited and regulated, (see article 46;) but the camp equipage, as tents of officers and corps, cannot be reduced to equal certainty. The quartermaster general will, therefore, under the orders of the general-in-chief, furnish wagons, or bat horses, in proportion to the necessaries allowed under the above-cited article, and in proportion to the camp equipage supplied by the Government, and permitted by the general-in-chief, as indispensably necessary to the comfort of the officers and troops.

2. The trains belonging to the general head-quarters and the head-quarters of army corps, will be confided to the several wagon-masters attached to those quarters respectively. The generals of divisions and brigades will appoint sergeants for the trains of their respective head-quarters.

3. The train of each regiment will be under the conduct of the quartermaster sergeant or some other sergeant; that of a brigade under the conduct of a wagon-master, with authority over the sergeants; and when the several trains of a division are united the senior wagon-master shall have charge of the whole, if there be not some superior officer of the quartermaster general's department designated for that duty.

4. Those several conductors of trains shall be responsible to the quartermaster general, or the superior officer of his department, for the prescribed order of march and of parking, and for the conduct of all inferiors under them respectively, including sutlers, drivers, and servants.

5. The wagons and bat horses contemplated in this article, and those in par. 2, art. 46, together with officers' spare or led horses, and horses and carriages belonging to the corps or to the United States, constitute the baggage train of an army. None others will be allowed to enter or march with it, without special permission from general head-quarters.

6. The trains of general head-quarters, the head-quarters of army corps and of divisions may, when in march, have a guard of infantry proportioned to the number of sentinels necessary for the night, which will be regulated by each particular chief of the staff, under the approbation of his general. In the cavalry, this service would be assigned to the dismounted men in preference, and, in every case where it is practicable, generals who keep guards of honor will rather detach sentinels from those guards to protect their baggage during the night than cause a distinct detail to be made for this purpose.

7. The trains of brigadiers will be served and protected in march by the men attached to the trains of the first regiments in their respective brigades. The regimental trains will be guarded in march, as far as practicable, by convalescents or men non-effective in the ranks, and in the cavalry by those who are dismounted.

8. When the trains are to be escorted with a view to defence they will then fall under the nature of convoys, and the wagon-masters and other conductors will be under the orders of the commanders of the escorts. (See art. 56.)

9. The several trains will march in an order analogous to the rank of the generals, and that of the corps to which they belong. The wagons, &c. charged with the general supplies of the army will have a place specially assigned them.

10. Great care will be taken to prevent the trains from cutting or intercepting the march of the troops, and in no case will they be allowed to occupy a place in the midst of a column. Habitually, the divisions will be followed by their trains, which will be united at the rendezvous of the brigades. If it is otherwise ordered, the instructions given for the movements of the divisions, brigades, and regiments, will regulate for each of those corps what may concern the union and direction of their trains.

ARTICLE 58.—*General Police.*

1. When it shall become necessary in the opinion of the general-in-chief, a provost guard for the army, or one for each army corps or division, may be detailed, each of which, under a provost marshal, shall receive in relief of the regimental police guards such convicts and other prisoners with the army as may be confined for the graver offences; or such prisoners in general as may be committed to it. (See the 80th article of the Rules and Articles of War.)

2. Provost guards will be detailed from brigades in succession, and relieved with other guards unless otherwise ordered. Their force and composition will be proportioned to the number of prisoners to be guarded. In respect to the roster, provost guards will be classed with other police guards.

3. Private servants will not be allowed to wear the uniform of any of the corps of the army; but in order that they may be known, each will be bound to carry about him, at all times, a certificate signed by the officer who employs him. The regimental officers' certificates given to their servants will be countersigned by the colonel. Out of regiments certificates of character given by officers under the rank of colonel, will be countersigned by the chiefs of the staff of the corps to which the officers are attached. Each certificate will contain a description of the person of the servant who bears it, and shall be recalled if the servant is discharged.

4. Washerwomen in the proportion authorized per company, and other laundresses permitted to follow the army, will be furnished with certificates stating them to be such, signed as in the preceding paragraph; and no woman of bad character will be allowed to follow the army.

5. Other persons with the army, and not officers or soldiers, such as guides of the country, interpreters, &c. will carry about them similar attestations from the head-quarters that employs them.

6. Deserters from the enemy, after being interrogated, will be secured for some days, lest they should be spies in disguise; and as opportunities offer sent off to the rear; after which, if they are found lurking about the army or attempting to return to the enemy, they will be treated with severity.

7. The arms and accoutrements of deserters will be remitted to the quartermaster or quartermaster general, on account of the Government, and their horses to the corps in want of them, after being branded with the letters "U. S." The compensation to be accorded to deserters for such objects will be according to appraisement, made under the orders of the quartermaster's department.

8. The enlistment of deserters, without express permission from general head-quarters, is prohibited. For the conduct, &c. of prisoners of war, see article 60.

9. As a special security, any general-in-chief, general of an army, corps, or division, is authorized to give *safe-guards* to hospitals, public establishments of instruction, of religion, or of charity, also to mills, post offices, and the like. They may, further, give them to individuals whom it is the particular interest of the army to protect.

10. "Whosoever, belonging to the armies of the United States, employed in foreign parts, shall force a safe-guard, shall suffer death," (article of war.) Within our own country, persons and property are, at all times, and under all circumstances, under the safe-guard of the laws; and wantonly to abuse the inhabitants, or to injure their possessions, even in foreign parts, and in the absence of special safe-guards, would be highly disgraceful to the army, and injurious to the American name. Offences of this character will, therefore, always be punished with rigor. (See —— articles of the Rules and Articles of War.)

11. A safe-guard may consist of one or more men of fidelity and firmness, generally non-effective sergeants or corporals, furnished with a printed or written paper, purporting the character and object of the guard; or it may consist of such paper only, delivered to the inhabitant of the country, whose house, &c. it is designed to protect. To disrespect such paper, when produced, constitutes the offence, and incurs the penalty mentioned in the article, &c. above cited.

12. The men left with a safe-guard may require, of the persons for whose benefit they are so left, reasonable subsistence and lodging; and the neighboring inhabitants will be held responsible by the army for any violence done them.

13. The bearers of a safe-guard left by one corps, may be replaced by the corps that follows; and if the country is evacuated, they will be recalled; or they may be instructed to wait for the arrival of the enemy, and demand of him a safe conduct to the outposts of the army.

14. The following form will be used:

SAFE-GUARD.

BY AUTHORITY OF MAJOR GEN. ———— (or Brigadier Gen. ————.)

The person, the family, and the property of ———, (or such a college, and the persons and things belonging to it; such a mill, &c.) *are placed under the safe-guard of the army of the United States. To offer any violence or injury to them is expressly forbidden; on the contrary, it is ordered that safety and protection be given to him, or them, in case of need.*

Done at the head-quarters of ————, this — day of ———, 18—.

The foregoing will be filled up and signed by the general, and countersigned by the chief of his staff.

15. Forms of safe-guards ought to be printed in blank, headed by the article of war relative thereto, and held ready to be filled up, as occasions may offer. A duplicate, &c. in each case, might be affixed to the houses, or edifices, to which they relate.

16. The purchase of horses in the enemy's country, occupied by the army, of persons not well known, is forbidden. If it is ascertained, afterwards, that a horse so purchased was stolen, he shall be restored *gratis*, as a punishment for the neglect of the above injunction.

ARTICLE 59.—*Sutlers in the field.*

1. The number of sutlers, of sutlers' wagons, and horses in the field, shall not exceed the following proportion; but the number may be reduced at the discretion of the general-in-chief, to wit: For general head-quarters, the head-quarters of an army corps, or of a division, one sutler each, with a wagon drawn by four horses; for the head-quarters of a brigade, one sutler, with a wagon drawn by two horses; and for every regiment, one sutler, with a wagon drawn by four horses; each sutler, of course, to find his own wagon and horses.

2. For the appointment and government of regimental sutlers, see article 41. The other sutlers will each, on the recommendation of the general to whose quarters he is attached, be furnished with a certificate of the privilege accorded, signed (by order) by the chief of the general staff.

3. A sutler of one regiment shall not sell, either for cash or on credit, any article to an enlisted soldier of a different regiment, having a sutler present, without the sanction of the commander of the latter regiment. A similar restriction is extended to the sutlers at the head-quarters of corps greater than a regiment.

4. Every sutler will be bound to have his wagon, stall, or shop, conspicuously marked thus: "Sutler, general head-quarters;" "Sutler, 1st brigade, 1st division," &c.; "Sutler, 25th infantry," and the like.

5. The stalls, shops, and wagons of sutlers will be frequently inspected, in order to detect prohibited articles, pillage, &c.

6. Nothing in this article shall be construed as prohibiting the general-in-chief from granting permission to persons, other than sutlers, to bring occasional supplies of necessaries and comforts within the chain of sentinels.

Article 60.—*Prisoners of war.*

1. Prisoners taken from the enemy, from the moment that they yield themselves, and as long as they obey the necessary orders given them, are under the safe-guard of the national faith and honor. They will be treated at all times with every indulgence not inconsistent with their safe-keeping, and with good order among them. Officers in whose power they are will bear in mind, and recall to the recollection of the soldier, that courage is honored by generosity; and it is expected that the American army will always be slow to retaliate, on the unarmed, acts of rigor or cruelty committed by the enemy, in the charitable hope of recalling the latter to a sense of justice and humanity by a magnanimous forbearance.

2. Prisoners will be promptly disarmed, and escorted to some place of safety in the rear. They will be reported from head-quarters to head-quarters, as soon as the action is over, or as soon as practicable, in order that they may be sent off to the depots destined to receive them, and that a return of them may be made to the War Department. This return will specify rank, number, and corps.

3. Wounded prisoners will be treated with the same cares as the wounded of the army, and other prisoners will be subsisted at the rate of one ration each, (excepting the liquor part of the ration,) without regard to rank. The general treatment of prisoners, under the head of *administration*, as clothing, pay, &c. will depend on particular conventions made with the enemy relative thereto.

4. The ordnance, carriages, horses, and other public property, captured, and the arms, accoutrements, and horses, of the prisoners, will be remitted to the proper accounting officers or departments, on account of the Government. The horses will be branded with the letters "U. S." before they are distributed among the corps in want of them. The officers' arms will be restored to them, together with their private effects, as soon as practicable; but officers' horses need not be returned, as they are not *necessaries*, and it being understood that they will be indemnified therefor by their own Government.

5. The persons to be considered as prisoners of war, and those to be released as non-combatants, together with the exchange of the former, will depend on the conventions or cartels agreed upon by the belligerents; or, in the absence of such agreements, on the usages of war, the example of the enemy, and the particular instructions given by the Government to the commanders of the American forces.

6. Prisoners of war, in depot, if numerous, will be organized into battalions, and placed under a proper number of non-commissioned officers, selected from their own body, who will be charged with the interior police of the battalions and companies; subject, of course, to the orders of the commander of the depot.

7. The officers among the prisoners will not, in general, be confined with the other prisoners. The general-in-chief, or the commander of a depot, may, according to instructions, and the deportment of the officers, give them permission to repair, without escort, to such places, and by such routes, as may be designated; taking from each his *parole* in writing, binding him to act accordingly.

8. Every such officer who violates his parole; that is, who shall depart from the route prescribed, or the limits assigned him; or who, being permitted to return to his own country, shall serve again against the United States or their allies, before exchanged, or in violation of his parole given, every such officer being retaken, shall at least be put and kept in irons, and may be otherwise punished, according to the particular circumstances of the case, the instructions of the Government, and the usages of war.

Article 61.—*Distributions.*

1. Under this head will be comprehended the *mode* of issuing and of receiving rations of subsistence, forage, straw, wood, &c. or the *service* of these supplies as it respects the troops.

2. As to the formation, and the placing of magazines to anticipate the particular or the general wants of the army in the field; these are preparatives which will depend on the plans and the foresight of the Government or the general-in-chief, and which enter too much into the greater operations of war to be treated of in this place.

3. To confine, then, this article to its proper limits, it may be stated that, as subsistence of some sort is indispensable to life, so is it important to the health and the cheerfulness of the troops, and, by consequence, to their efficiency, that they, at all times, receive the full allowance of provision accorded to them by the Government, in good condition, and with regularity; but more particularly on the approach of battles, or at halts after long or fatiguing marches.

4. These objects will, therefore, command and receive the undivided attention of the commissary general of subsistence, and a large portion of that of the general-in-chief, of commanders of corps, and of the quartermaster general, each within his sphere.

5. The same place of distribution may be specified for a particular army corps, but preferably for a particular division or brigade, from the head-quarters of which a staff officer will be detached to cause justice to be done, on the spot, to the several component regiments or corps in the issues made to them.

6. With a view to promptitude, and to diminish the fatigue of the troops, the bread-wagons, &c., ought, as often as possible, to be brought behind and near the corps which are to participate in the distribution.

7. The quartermaster-sergeant of each regiment, with a suitable number of men per company, furnished with the proper returns, (see art.— and ——,) will repair to the place of distribution at the hour specified. If the field and staff are to participate in it, some additional men would be added to the detail.

8. These fatigue parties will be conducted as a relief detached from a guard, (see par.—, art.——,) it being a principle that men on duty, with or without arms, and not encumbered with burthens, as wood, straw, and the like, shall always be formed and marched in military order.

9. The quartermaster, or some other officer substituted by the commander, will always be present at distributions in which his regiment is interested, to judge of the quantity and quality of the supplies or allowances tendered;

and, in case of deficiency under either head, to make the proper remonstrance on the spot, or, if without effect, to report the circumstances promptly to his commander, in order that the report may pass, from head-quarters to head-quarters, until it reaches the authority competent to apply a corrective: officers being expressly forbidden to redress themselves or regiment by a resort to violence.

10. In general, bread, salt meat, and the smaller part of the men's rations, will be issued four days in advance.

11. The use of blankets for the carriage of the men's subsistence is a proof of a want of decency and economy. A sack at least per company ought to be substituted, and at the expense of the company when not furnished by the Government.

12. When practicable, supplies or allowances may be issued per company, and in mass, at the place of general distribution. The interior distribution per company will afterwards be made to the squads by lot.

13. In any particular corps, the regiments composing it will be served, commencing with the highest and the lowest numbers, alternately, and going through the series each way, unless some particular regiment is to march before the others, in which case *that* would be the first served; but a regiment, the first in the above order, shall not have a right to stop an issue to another regiment commenced before the arrival of the party of the first. A like principle will be applied to the companies of the same regiment, when the regiment is served in mass.

14. The foregoing presupposes an ample supply for all the corps; but should a contrary case arise, the same deduction would be made from the full allowance of each individual, according to a previous calculation made by the issuing department in question.

Article 62.—*Sieges.*

1. A siege is here supposed to be conducted by two divisions of infantry and a brigade of cavalry. This example will serve for a greater or smaller number of divisions, or even for a brigade, substituting in the latter case colonels in the place of generals for the duties of the trenches.

2. The generals of divisions and of brigades will alternate together for the duties of the trenches. There will be one or more of them detailed daily for this service, according to the extent of the trenches and number of attacks.

3. Their duties will be to dispose the troops so as to protect the operations going on; to defend them in case of attack; and to maintain good order, &c. among the troops of every arm employed in the batteries or in the trenches. Each of these generals will have put at his disposal a certain number of staff officers, in addition to his aids-de-camp, to transmit orders, and to superintend the details of the day.

4. According to the orders of the general-in-chief, the commandant-in-chief of engineers will draw up the general plan of the siege, with the necessary developments.

5. This projet will be discussed first by the commandant-in-chief of engineers, with the commandant-in-chief of artillery, when they will make their common report (or each a separate one) to the general-in-chief, who will order it to be carried into execution, or make such previous alterations in it as he may judge proper. The same course will be pursued as often as the more important events of the siege may render a change of the original plan necessary.

6. In the daily service of the trenches, the superior officer of the engineers on duty there will propose, in like manner, to the general of the trenches the measures proper to carry into effect the general project. The general of the trenches will approve or modify those propositions, and cause them to be executed.

7. The encampment of the troops, and the service interior and exterior of the camp, will remain as habitual; but the service of the siege will be particular, and as follows:

8. The service of the trenches will be daily, and by battalion; and, in order that each may participate therein, and that the line may not be too much weakened at any one point, if only one battalion be required for the trenches, this shall be the first of each brigade, successively, next the second, and so on alternately. If two battalions be wanted, each division will furnish one in the same order; if three, the divisions will furnish the third battalion in rotation; and if four, each division will furnish two, the chiefs of the staffs making the details accordingly.

9. The battalions will be posted at the trenches in a manner corresponding with their places in the habitual order of battle. They will be detailed the over night, and those which mount will only leave in camp the men necessary for the ordinary police guards, which ought, in this case, to be composed of individuals the least fitted for the trenches.

10. When the general-in-chief, or the general of the trenches, makes a visit to the trenches, the troops not engaged in the labors will form themselves behind the banquet, and rest on their arms. No other honors shall be rendered at the trenches.

11. The troops the first to mount in the trenches will march without noise; and those which follow will avoid every thing that would attract the attention of the enemy, varying for this purpose the hour of relieving, as may be necessary.

12. The colors will remain at the camp, except when the battalions march to repel a sortie, or to give the assault. In these cases, they will be unfurled only when the general-in-chief shall so expressly order.

13. The troops to be relieved will send non-commissioned officers (or officers) to the openings of the trenches, to conduct the relieving corps. The former will march out by a flank.

14. The earth-sacks, fascines, gabions, or the like, and the tools necessary for the labors, will be collected at the openings of the trenches, under a sufficient guard, to be taken preferably from the artillery.

15. The munitions, &c. of the ordnance shall be delivered on the returns of the commandants of the batteries; those for the infantry at the trenches, on the returns of the commanders of the battalions, approved by the general of the trenches.

16. The guards of the trenches to be added to the flank companies, (grenadiers and light infantry,) and the laborers in the trenches will be furnished by the battalions which mount there; the guards from the right, and the laborers from the left of the battalions. The laborers out of the trenches, or in the rear, will be detailed as ordinary fatigues, and from the remaining battalions.

17. In case of extraordinary calls, fatigue parties may be taken from the customary piquets of the camp.

18. When the sappers and miners of the corps of engineers are insufficient for the mines and saps auxiliaries may be selected from the other corps.

19. Sacks of earth will be placed on the *epaulement* of the trench to cover the sentinels.

20. At the trenches, alarm-posts will be established for the assemblage of the laborers, in which they will deposite their arms whilst at work. Those posts will be chosen so as to give the least embarrassment to the passage of the laborers, or other troops.

21. As soon as a sortie is repelled, the officers will recall the laborers to their work.

22. The guards which cover the laborers will be ordered to lie or to sit, as their safety may require, until the trenches are sufficiently deep—always with arms in hand. The sentinels, particularly in the night, will be instructed frequently to put their ears to the ground, in order the better to hear any movement made by the enemy.

23. In case of a sortie, the moment the garrison ceases to cannonade, (which very generally announces the approach of a sortie,) the laborers and other troops will repair promptly to the alarm-posts, the batteries, the angles, &c., which may be assigned them respectively, and from which they can best defend the trenches, or take the enemy in reverse and in flank. During the sortie, all the batteries will direct their fire on the *front* of the attack.

24. When the troops shall have repulsed the garrison, they will not pursue, but wait for the orders of the generals to resume their posts and labors, which will be given as soon as the retreat of the enemy leaves his batteries free to play on the troops.

25. The grenadiers or other select troops will form the reserve. The general-in-chief will be free to organize the grenadiers into temporary battalions, and to cause them to encamp apart, or they will mount with their respective battalions.

26. The light infantry companies will mount with their respective battalions, to be employed at the advance-posts as guards, or as *tirailleurs* of the trenches. It follows, that the grenadier and light infantry companies do not furnish laborers for the trenches.

27. When circumstances shall imperiously require it, the cavalry may be employed (dismounted) in the service of the trenchers. The cavalry, also, will generally be employed in assaults, to carry fascines or other materials to fill up ditches, or to form passages. In this case the regimental officers of every grade will accompany their men.

28. General officers attached to the cavalry will be employed with the corps or detachments placed in observation to cover the siege. They will also be employed, together with the field officers of their arm, during the siege, with escorts of convoys whatever may be the corps which furnish them.

29. The officers of the engineers employed at the trenches will make to the general of the trenches similar reports to those made to the commandant-in-chief of that arm. The superior engineer officer on duty at the trenches will, when relieved, make a general report of his twenty-four hours' tour, and remit it to the general-in-chief.

30. All the commanders of corps who mount at the trenches will report, when relieved, to their respective head-quarters (as in other cases) the losses which their corps may experience whilst on duty there, noticing, at the same time, the conduct of their officers, &c. &c.

31. The general-in-chief will order such additions to be made to the ordinary rations of the troops employed at the trenches, whether armed or unarmed, as he may think necessary.

32. He will also, before giving the assault, designate certain select companies to be exclusively occupied, from the moment the place is carried, in preventing pillage and violence; and all officers will use their utmost efforts to restrain their troops to a strict observance of good order, and of the dictates of humanity.

33. Being in possession of the place, the general-in-chief may impose a special contribution on the inhabitants (in the case of a fortified city) to be distributed on the spot, to the troops who carried the place.

34. Whether the place be taken by assault or by capitulation, all ordnance, stores, and other public property, will be turned over to the proper departments or officers, on account of the Government.

Article 63.—*Defence of places.*

Every commander of a fortress, fort, or other strong place, will consider his post as liable to be attacked unexpectedly; consequently, he will regulate his plan of defence, and the order of service according to the several probable modes of attack he may have to sustain; and will determine, for the principal cases, in advance, what each corps or individual will have to perform, on the actual occurrence of either.

2. He will, more particularly, make himself acquainted with the condition of the works, their strong and weak points; the exterior ground within the circle of investment; the force, composition, and state of the garrison; the condition of the batteries, and the quantity and state of the munitions or supplies of every kind.

3. From the moment that the enemy is within one march of his post, he will compel all useless mouths to leave the place, and cause to be demolished every thing within the interior which may be in the way of a free circulation of the garrison. He will, at the same time, cause to be demolished, or cut down, all houses, trees, and the like, about the exterior, which might cover the approach of the enemy.

4. If, within the United States, such objects belong to individuals, he will first request their owners to remove them, having the property duly appraised in either case, if practicable.

5. The commander may consult the several commanders or chiefs under him, either separately, or in a council of defence; but he alone will be held responsible for the decisions he may form, whether in conformity with, or against the advice given by the council, or of its numbers separately.

6. He will defend his works, successively, by all the means within his power, but in those successive defences he will husband his resources in men and munitions in such manner, 1st. That he may have for the assaults, and especially the assault of his citadel, (if there be one,) a reserve of fresh troops, chosen from the oldest or best corps of the garrison; 2d. That he may have, to the last, the subsistence and the ammunition necessary for the most vigorous resistance.

7. The Rules and Articles of War, (see the 54th,) and the usages of nations, condemn to death any commander who shamefully abandons a fort or post he may be charged to defend. To escape such ignominy, he ought, in the case of a fortress, to compel the besiegers to approach by slow and successive labors, and to repel at least one assault. (See par. 41, art. 52.)

8. Finally, if compelled to capitulate, the commander will not separate himself from his officers or troops, but will participate in the common lot, after, as during the siege; exerting himself to the utmost to ameliorate the fate of the garrison, of the sick and the wounded; for whom he will stipulate every clause of exception, or of favor, which it may be in his power to obtain.

9. Every commander who loses a fortress or post confided to his defence, shall at least be called before a court of inquiry to justify his conduct.

section 6.

Article 64.—*Troops on board of Transport.*

1. The Government will generally designate a naval officer to take up ships or vessels for the transportation of troops, and also to superintend (or to give instructions for) fitting up the men's berths therein. In this latter duty he will receive the proper assistance, in labor and materials, from the commanding officer of the troops to be embarked, or from the quartermaster's department.

2. The commanding officer of the troops, or other land officer, superintending the embarcation, will appoint one or more medical officers to accompany the particular commanders, who are to embark on board the several transports, for the purpose of making a most minute and particular inspection of their respective vessels, previous to the embarcation of the troops.

3. Each of these commanding officers will make a report of the inspection, (in the annexed form) signed by himself and the accompanying surgeon, to the officer who ordered the inspection.

4. As soon as the troops are on board, the commanding officer will cause the arms to be placed in the racks previously prepared, and the accoutrements, &c., over or near the men's berths. Cleats, or slings, if not already prepared, will be immediately put up for the accoutrements and knapsacks. The men will not be dismissed until these duties are performed.

5. As far as practicable, each company will be assigned to the same part of the hold, and the squads in the same manner, to contiguous berths. Sections of berths will be distributed among the companies, according to rank, reserving a particular section for all the men having wives.

6. Service ammunition, in the possession of the men, will require great care, and frequent inspections, to prevent damage. The quantity left in the cartouch boxes will be limited according to circumstances. The reserve ammunition will be under the charge of the commanding officer, the quartermaster, or conductor of artillery.

7. The men, including non-commissioned officers, will be divided into three watches, one of which will constantly be on deck, day and night, under at least one subaltern, having the particular charge of the watch.

8. *An officer of the day* for each transport will be detailed, whose duty it shall be to cause good order to be preserved by the troops, and to see that the regulations of service and police are duly executed. The subalterns of the several watches, as well as the commander of the guard, will be immediately responsible to the *officer of the day*.

9. A guard, proportioned to the number of sentinels required, will be detailed daily. In harbor, the guards will mount with arms, as usual; at sea with side arms only.

10. Besides the sentinels who may be required at the hatches, between the main and quarter decks, and at the forecastle, one or two will always be posted at the caboose, with orders not to allow fire, in any shape, to be taken without permission.

11. The men of each watch will be appointed to stations in a manner so as to afford the readiest assistance in working the vessel. Those not of the watch will be ordered below when required by the master, or his mates, in order that they may not impede the working of the vessel.

12. The commanding officer will make arrangements, in concert with the master of the vessel, for calling the troops to quarters, so that in case of alarm, caused either by fire or the approach of the enemy, every man may repair promptly to his station. But he will take care not to crowd the deck. The troops not wanted at the guns, or to assist the sailors, and those who cannot be advantageously employed with small arms, will be formed as a reserve between decks.

13. All the troops will turn out at ———, A. M. without arms or uniform, and (in warm weather) without shoes or stockings; when every individual will appear as clean as circumstances will possibly allow; his hands, face, and feet, washed, and his hair combed. The same personal inspection will be repeated thirty minutes before sunset. The cooks alone may be exempted from *one* of those inspections per day, if necessary.

14. Recruits, or awkward men, will be drilled in the morning and evening in the use of arms, an hour each time, when the weather will permit.

15. In warm weather, frequent bathing will be essential to the preservation of health. Large tubs will be fixed on the forecastle for this purpose, when they can be had; or the men may be placed in the *chains*, and have buckets of water thrown on them as a substitute.

16. The men will shave themselves and put on clean shirts at least twice a week, and it is very important that they should have the means of changing their clothes when wet. It is also very desirable that each should be provided, except for short passages, with a fatigue frock, to wear on board.

17. It will be easy to place small frames over the sides of the vessel's bows, to serve as privies. These, and the sides of the vessel near them, will be well washed by throwing down buckets of water at the commencement and at the middle of each watch, by the men of the watch.

18. When the weather will permit, bedding of every kind will be brought on deck, every morning, for airing, This rule will be applied equally to the soldiers having their wives with them. The partitions, as boards, curtains, &c. which divide their families, will be removed at the same hour, in order that the circulation of air may not be interrupted during the day.

19. The men will next proceed to sweep, scrub, and scrape the berths and decks, except the upper deck, which will be washed every morning by the watch then on duty, previous to the removal of the bedding. *Between decks* will not be washed oftener than once a week, and only when the weather is fine. The boards of the lower berths will be removed once or twice a week to change the straw, &c.

20. The *officer of the day* will give a particular superintendence to those operations, making his reports to the commanding officer.

21. During cooking hours, the *officer of the day* will frequently visit the caboose, to see that the messes are well prepared, and that an officer per company attends at meal hours, to cause justice to be done to the company, to preserve good order therein, &c. The coppers are to be regularly and well washed, both *before* and *after* use.

22. Every precaution is to be taken to prevent the secreting of liquor on board transports, and that issued to the troops, as a part of their rations, will be drank only at dinner, well diluted with water.

23. The bedding will be replaced in the berths at sunset, or at any earlier hour, when there is a prospect of bad weather; and at —— o'clock, P. M. every man not on guard, or of the watch, will be in his berth. The women will retire at the same time, and, in order to ensure a due execution of this regulation, the *officer of the day*, with a lantern, will make a tour between decks.

24. All lights will be extinguished at eight o'clock, P. M. except such as are placed under sentinels. The *officer of the day* will report, at the time, the execution of this injunction. The officers' lights will be extinguished at ten o'clock, unless special permission be given to continue them for a longer time, as in case of sickness or other emergency.

25. No smoking will be allowed between decks, nor any lights among the men, except in lanterns.

26. For the sake of exercise, the troops will be occasionally called to quarters by the beat *to arms*. Those appointed to the guns will be frequently exercised in the use of them.

27. The arms and accoutrements will be frequently inspected. The metallic parts of the former will be often wiped and greased again, as they are particularly liable to contract rust at sea.

28. Frequent fumigation between decks will be highly necessary to the health of all on board. The materials for fumigation may be brimstone, with saw-dust; or the brimstone may be thrown over hot coals; nitre, with the

addition of a little vitriolic acid; or common salt, with the same addition; gunpowder wetted, or a heated loggerhead in the pitch pot. This operation will always be performed under the immediate direction of the surgeon, to prevent improper quantities of the articles being used, and also under the eye of the *officer of the day*, to guard against accidents by fire.

29. During voyages in hot weather, the best effects are derived from windsails. If they be not already provided, the master of the transport will be desired to have them immediately made, and kept constantly hung up. The officer of the watch will frequently examine them to see whether they draw well, and send non-commissioned officers to notice whether their vents be tied up, or otherwise obstructed.

30. The men will not be allowed to sleep on deck in hot weather, or in the sun, as such practice would generally result in fevers and fluxes.

31. Exercise is at all times indispensable to the preservation of health. The men will therefore be encouraged to take as much as practicable, as in dancing, wrestling, &c. The commanding officer will also cause squads of twenty or more to move quickly round the vessel, each squad for ten or twelve minutes at a time, until the whole has participated in this exercise. An hour or two in the morning, and the like in the evening, will be employed in this manner, as often as circumstances will permit.

32. In harbor, or in calms, and when there is no danger to be apprehended from sharks, the men may be permitted to go overboard by tens to bathe, on the same side of the vessel, accompanied always by a boat well manned, to pick up the men.

33. At morning and evening parade, the surgeon will examine the countenances, &c. of the men, to observe, in general, whether there be any appearance of disease in any of them.

34. The sick will, as far as practicable, be separated from the healthy men. On the first appearance of malignant contagion, a signal will be made for the hospital vessel (if there be one in company) and the diseased men removed to her; otherwise the surgeon will call all his resources into action to prevent the spread of the contagion, in which duty he will be aided by the commanding officer.

35. Hospital stores, or comforts, are no where more necessary than on board transports. A good supply ought to be taken on board of each, and strictly applied to their destination, to wit: *the use of the sick and convalescent.*

36. The surgeon will be careful to guard the men against costiveness on approaching a hot climate. In passing through the West Indies to the Mississippi or the Mobile, for instance, and for some weeks after landing in those latitudes, great care will also be required to prevent the men from eating green or bad fruit, as strangers would not be competent to judge of that article, and as most kinds, after long voyages, are highly prejudicial.

37. Regularity and decency of conduct, which are at all times required of troops, are indispensably necessary on board of transports. The commanding officer will therefore exert his utmost care and abilities, and call into action those of his subordinates, in enforcing the regulations of discipline and police among the troops, and particularly the observances required by this article. If these be strictly followed, the troops embarked may reasonably hope for as good health as on shore.

Article 65.—*Uniforms.*

The coat of the infantry and artillery shall be uniformly blue, no red collars or cuffs, and no lace shall be worn by any grade, excepting in epaulettes and sword knots.

The rank and file will wear coatees; the button holes of these will be trimmed with tape on the collar only. Leather caps will be substituted for felt, and worsted or cotton pompons for feathers.

General officers, and all others of the general staff not otherwise directed, shall wear cocked hats without feathers, yellow gilt bullet buttons, and button holes in the *herring bone* form.

The epaulettes of major generals will have on the gold ground of each strap, two silver stars.

The epaulettes of brigadiers will have on each strap one star.

The uniform of the hospital surgeons and mates shall be black, the coats with standing collars, and on each side of the collar a star of embroidery, within half an inch of the front edge.

Undress uniform, and all other dresses resembling the military without conforming to regulations, are prohibited, excepting that black cockades with yellow eagles will always be worn by all officers of the army. Pattern buttons for all corps, and information relative to uniform, will be furnished by the commissary general.

Caps for the non-commissioned officers and privates of all corps the same as that worn by the infantry, with white pompons, black cockades, and yellow eagles; the other ornaments of the cap to correspond with the trimmings of the corps.

Dirks will never be worn in lieu of swords by officers of the army.

OF THE GENERAL STAFF.

The coat—Single breasted, with ten buttons, and button holes worked with blue twist in front, five inches long at the top and three at the bottom, standing collar, to be united in front to the edge of the breast of the coat, not to rise higher than the tip of the ear, and always as high in front as the chin will permit in turning the head. The cuffs not less than three and a half nor more than four inches wide. The skirts faced with blue; the bottom of each not more than seven nor less than three and a half inches wide; the length to reach to the bend of the knee. The bottom of the breast and two hip buttons to range.

On the collar one blind hole, five inches long, with a button on each side.

The blind holes on each side of the front, in the herring bone form, to be in the same direction with the collar, from the top to the bottom.

Blind holes (in the like form) to proceed from four buttons placed lengthwise on each skirt. A gilt star on the centre of the bottom, two inches from the edge.

The cuffs to be indented within one and a half inch of the edge, with four buttons lengthwise on each sleeve, and holes to the three upper buttons, corresponding with the indentation of the cuff, on the centre of which is to be inserted the lower button.

All general officers will be permitted to embroider the button holes.

The adjutants general, inspectors general, quartermasters general, and their assistants and deputies, will be permitted to embroider the button holes of the collar and cuffs only.

Vest, breeches, and pantaloons—White, (or buff for general officers.) Vests single breasted, without pocket flaps. Blue pantaloons may be worn in the winter and nankeen in the summer. Breeches with four buttons on the knees, and gilt knee buckles; or pantaloons.

High military boots and gilt spurs.

Black stock—Of leather or silk.

Chapeaus—Of the following form: the fan not less than six and a half nor more than nine inches high in the rear, nor less than fifteen nor more than seventeen and a half inches from point to point, bound round the edge with black binding a half inch wide.

Button and loop black; cockade the same, four and a half inches diameter, with a gold eagle in the centre.

Swords—Yellow mounted, with a black or yellow gripe. For the officers of the adjutant, inspector, and quartermaster general's department, sabres; for all others, straight swords.

Waist belts—Of black leather; no sashes.

Epaulettes—Of gold, according to rank.

Officers of the corps of engineers will wear the uniform already established for that corps.

The uniform of the ordnance department will be the same as that of the corps of artillery, except in the buttons, which will have an appropriate device.

The dress of the hospital staff will conform, as to fashion, to the uniform of the staff, except that they will wear pocket flaps, and buttons placed across the cuffs, four to each, and covered buttons in all instances of the color of the coat, (black.)

Chaplains, judge advocates, commissaries, storekeepers, and paymasters, are to wear cockades only.

OF THE LIGHT ARTILLERY.

Coatee—Of dark blue cloth, single breasted; three rows of buttons, nine in each; button holes worked diagonally, in blue twist; standing collar, the height of the collar not to extend beyond the tip of the ear; the button holes of blue twist; cuffs blue, with three buttons placed vertically upon the sleeve, the button holes worked with twist; pocket flaps diagonal, with three buttons worked at the sleeve, two buttons at the waist, the skirts sloping from the hip; wings instead of epaulettes, yellow bullion. [*General Order, March* 13, 1817.—Officers, when off duty, are allowed to wear coats of the same length and general description with that of the staff, buttons and other trimmings corresponding with the regimental coat, and epaulettes instead of wings.]

Vest—White cassimere or doe-skin for the winter, plain white jean or nankeen for summer; single breasted, with nine yellow buttons.

Pantaloons—White cassimere or doe-skin for parade, dark blue cloth for service.

Boots—Hussar.

Stock—Black leather, ribbed.

Spurs—Shanks one inch.

Buttons—Yellow, half inch diameter.

Surgeons and mates—Same uniform as described except the cape, which is of black velvet; cocked hat.

Cloak—Hussar, blue cloth, cape eight inches large.

Equipment—Plain saddle.

Housing—Scarlet cloth, extending eight inches from the saddle, and brought to a point on the flank of the horse.

Medical staff—Blue housing.

Holsters—Bear skin, with double flaps.

Bridle—Double bit, yellow mounted; reins, martingal, &c. black leather.

Portmanteau—Black leather, two feet long, nine inches diameter.

Armament—Sabres, gilt scabbards, black belt two inches broad, gilt plate in front with the eagle in relief; belt worn over the sash, which is red, and tied on the right side; the sabre suspended by a chain.

Pistols—Caliber of the cavalry, yellow mounted.

Dress of non-commissioned officers and privates—The same as that prescribed for the officers, with the exception of worsted being substituted for gold band and tassel, and other trimmings.

OF THE ARTILLERY.

Coat—Of the same length and general description with that of the staff.

Pocket flaps cross indented below, not less than two and a half nor more than three inches wide, with four buttons and blind holes, two buttons at the opening of the pocket of each skirt, and a diamond of blue cloth, ornamented one and a quarter inch on each side, the centre two inches from the bottom of the coat.

The blind holes on either side of the front, with the coat buttoned close to the collar, accurately to form lines with the corresponding ones opposite, from the top to the bottom, that is, not to represent *herring bone*.

The cuffs with four blind holes, extending from four buttons placed across on each.

One blind hole on the collar, five inches long, with one button on each side.

Gilt buttons of the size and insignia furnished the commissary general of purchases from the War Department.

Vests, breeches, and pantaloons—For the field and staff, the same as those described for the general staff; and vests and pantaloons for the officers of the line the same, except the first and second particular articles.

Boots to reach to the calf of the leg.

Stocks and chapeaus—Of the same general description with those of the general staff.

Button and loop of the chapeau, yellow.

Black cockade of leather, four and a half inches diameter, with a gold eagle in the centre; a white feather, to rise eight inches.

Swords—Cut and thrust, yellow mounted, with a black or yellow gripe.

Waist belts—Of white leather, two inches wide, yellow oval plate of the same width.

Sashes—To be worn only on a tour of duty, and round the waist; the knot tied a little within the left hip, the end to hang over the left thigh.

Epaulettes—Of gold, (bullion and strap,) according to rank. The adjutant, quartermaster, and paymaster, to wear a counterstrap on the opposite shoulder.

Post surgeons will wear the same uniform, except the cape, which is of black velvet.

OF THE INFANTRY.

The same as that pointed out for the officers of artillery, (surgeons and mates same as post surgeons,) with the following exceptions:

[*General Order, March* 13, 1817.—The officers of the light companies will wear short coats with wings; when off duty, they are allowed to wear the regimental coat, with epaulettes.]

The sword of the sabre form, and with mounting silver or plated. For the medical staff, small swords.

Epaulettes, wings, buttons, spurs, buckles, and trimmings, silver or plated, and caps may be worn on duty.

The light infantry companies of regiments are allowed wings of worsted or cotton.

OF THE RIFLEMEN.

The uniform for the non-commissioned officers, privates, and musicians, of the rifle regiments, will hereafter be as follows, viz:

A short coat of gray cloth, single breasted, flat yellow buttons, which shall exhibit a bugle surrounded by stars, with the number of the regiment within the curve of the bugle; one row of ten buttons in front, three on each sleeve, and three on each skirt, lengthwise, with blind button holes of black twist or braid, in herring bone form.

A waistcoat of gray cloth, with sleeves of the same. Pantaloons of gray cloth.

The Jefferson shoe, rising two inches above the ankle joint, and not higher.

For field or active service, the officers will wear uniforms like those of the privates, excepting as to the quality.

On other occasions they are permitted to wear the uniform of the artillery, (surgeons and mates as post surgeons,) except as to the buttons, the position of them, &c. which shall be the same with the field coat.

Epaulettes of gold.

Yellow mounted sabres for officers and non-commissioned officers.

OF THE CADETS.

A coatee of gray satinet, single breasted, three rows of eight yellow gilt bullet buttons in front, and button holes of black silk cord in the herring bone form, with a festoon turned at the back end; a standing collar, to rise as high as the tip of the ear; the cuffs four inches wide; the bottom of the breast and the hip buttons to range. On the collar, one blind hole of cord, formed like that of the breast, four inches long, with a button on each side. Cord holes in the like form to proceed from three buttons placed lengthwise on the skirts, with three buttons down the plaits. The cuffs to be indented, with three buttons and cord holes lengthwise on each sleeve, corresponding with the indentation of the cuff, in the centre of which is to be inserted the lower button.

Vest—Gray cloth, for winter, single breasted, yellow gilt bullet buttons, and trimmed with black silk lace. For summer, white vest, single breasted, with white buttons, but without trimmings.

Pantaloons—Gray cloth, for winter, trimmed down the sides with black silk lace, and the Austrian knot in front; no buttons on the sides or at the bottom, but made with understraps. Russia sheeting or white jean for summer, without trimmings, the form the same as for winter.

The Jefferson shoe, rising above the ankle joint under the pantaloons.

Black silk stock.

Common round hat.

Cockade black silk, with yellow eagle, to be worn at all times.

Sword, cut and thrust, yellow mounted, with a black gripe, in a frog belt of black morocco, and worn over the coat.

No dress resembling the military, without conforming to the regulation, will be worn on any occasion, excepting that, when attached to corps, cadets will wear the uniform of the company officers, without epaulettes.

ARTICLE 66.—*Adjutant and Inspector General's Department, or Military Correspondence.*

The general orders of the Executive, and the military correspondence of the War Department relative to details of service, will be through the Adjutant and Inspector General's office; and all communications connected with army detail, the recruiting service, reports, returns, courts-martial, rank of officers, furloughs, discharges, and the redress of grievances, will be made to the Department in the same way.

DUTIES OF ADJUTANTS GENERAL.

These will be divided under the following heads, viz:

Distribution of orders.

Details of service.

Instruction of the troops in the manual exercise, and the evolutions and arrangement of them when brought into action; and

Direction of the military correspondence.

1.—*Distribution of orders.*

The general orders of the day having been received from the commanding general, the adjutant general or his assistant will carry them to the office of distribution, where they will be recorded in a book kept for that purpose, whence, at an hour which shall have been previously assigned, they will be transcribed by the aids-de-camp of general officers, by the adjutants of all separate corps, by a deputy or assistant deputy quartermaster general, by a surgeon's mate detailed for that duty by the senior surgeon, and some commissioned officer from each corps of engineers; and, when so transcribed, they will be carried without delay to the corps to which these officers respectively belong, and be there promulgated under the orders of the officers commanding the corps, and become to them a rule of conduct.

2.—*Details of service.*

These shall be made agreeably to prescribed rules and the usage of war.

All corps will furnish according to their strength—the longest off duty the first on duty. When it may be found practicable, the troops are to act by companies, battalions, or regiments.

Return detachments will not be excused from duty more than two days.

Seniority of corps with respect to troops, and priority of rank with respect to officers, will entitle to precedence for command, subject to deviations under the orders of the commanding general.

In details the following gradations will govern:

1. Reconnoitring parties and corps of observation.
2. Foraging before the enemy.
3. Detachments and outposts.
4. Guards of trenches.
5. Van-guards in approaching an enemy.
6. Rear-guards in retiring from an enemy.
7. General courts-martial.
8. Guard of the general commanding in chief.
9. Camp or garrison guards.
10. Other guards mounted from the grand parade.
11. Guards of general officers and the staff, according to rank.
12. Pickets.

13. General fatigues.
14. Police.

In the routine of duty, the law of detail will always give it to the officer longest off duty; and when two have been credited with the same grade of service on the same day, reference to the former tour on the roster will determine the detail.

Should a tour of service of higher grade occur to an officer while on any subordinate duty, he shall be relieved, and the tour on which he is be passed to his credit.

If an officer's tour for general court-martial, picket, or fatigue, occur while he is on any other duty from the grand parade, he shall not be relieved, but stand for the next tour.

3.—*Instruction of the troops.*

This shall be governed by circumstances as to time, place, and frequency, of which the commanding general will judge. The mode of infantry discipline adopted by regulation of the War Department will be observed.

4.—*Military correspondence.*

Reports of services performed, and demands for courts of inquiry or courts-martial, will be made through the adjutant general of division or department. Returns intended to exhibit the strength of corps, made agreeably to the nineteenth article of war, and accounting for the absent non-commissioned officers, musicians, and privates, will be addressed to the adjutant general of division, from which he will make out a general return, agreeably to the forms prescribed, to be transmitted quarterly to the Adjutant and Inspector General's office, for the information of the War Department. These returns will exhibit regiments, and detachments of regiments and corps, separately, by number if regiments, and by name if corps, and also the strength of each post and garrison within the division. Reports of the hospital and of the quartermaster's departments, and of ordnance and of ordnance stores attached to the army, will also be transmitted to the adjutant and inspector general through the adjutant general of division.

Returns of ordnance and ordnance stores will be made agreeably to the forms furnished by the colonel of ordnance.

Departures from forms and inattention to regulations will be regarded and punished as acts of positive disobedience.

The original proceedings of all general courts-martial ordered by the War Department will be transmitted to the Adjutant and Inspector General's office by the judge advocate of the court. Whenever a court-martial is appointed by a general or other officer commanding an army or district, the judge advocate will lay before the officer ordering the same the whole proceedings of the court; and it is made the duty of the adjutant general, or officer doing that duty, to transmit all such original proceedings to the Adjutant and Inspector General's office, as soon as practicable, with a copy of the order of confirmation or disapproval. On application for that purpose, a suitable non-commissioned officer or private will be detailed as a clerk to the judge advocate of any general court-martial.

The proceedings of all courts-martial will be made on *letter paper*, to preserve a uniformity in the records. The record of the trial of an officer will not include the trial of a non-commissioned officer, musician, or private. The trial of a soldier sentenced capitally will also be recorded separately, and the record reported accordingly.

DUTIES OF INSPECTORS GENERAL.

These will be divided under the following heads, viz:
Mustering and inspecting troops of the line and militia detachments serving with them.
Selecting places of encampment and posting guards.
Superintending the police of the camp and of the march.
Inspecting parades; and
Making half-yearly confidential reports to the Adjutant and Inspector General's office, for the information of the War Department, of the state of the army, division, or detachment to which they belong.

1.—*Mustering and inspecting the troops of the line and militia detachments.*

Troops of all descriptions shall be mustered once in two months for payment, nor shall any payment be made but upon muster-rolls signed by an inspector general or his assistant, or, in the absence of these, by some officer of the army of the United States especially assigned to this duty by the general or other officer commanding the department in which the said troops so mustered shall be.

Two muster-rolls of each company, or detachment of a company, are to be furnished to the paymaster; and none except the semi-annual muster-rolls, to be made on the 30th of June and 31st of December in each year, showing all casualties which have occurred within the time for which the muster is made, will be forwarded to the Adjutant and Inspector General's office.

An officer of each regiment, station, garrison, or post will be designated in department orders to muster the men and sign the rolls at the regular periods, when no inspector is present for that purpose. A copy of the order, designating the time for such musters, will be furnished to the regimental and battalion paymasters assigned to pay the troops.

Whenever a muster shall be made of any company, or detachment of a company, of the regular army, for the purpose of pay, (which musters are directed to take place every two months, and which shall show the place and date of muster,) an inspection will at the same time be made of such company or detachment, and a return, agreeably to the form prescribed, will be transmitted to the Adjutant and Inspector General's office.

Inspections of the troops are of two kinds, stated and occasional. The former shall take place monthly, and, when practicable, on the last day of each month; the latter as often as the general or other officer commanding the department may think proper. The general object of both shall be to ascertain the exact state of the arms, equipments, and clothing, and of every other circumstance tending to show the actual condition of the troops so inspected.

All horses belonging to the public will also be subjects of inspection; those unfit for service will be branded in the presence of the inspecting officer with the letter C, and immediately transferred to the quartermaster general's department for public sale; nor shall any horse so branded be thereafter accepted by any inspecting officer. Returns of cast horses will be made quarterly.

2.—*Superintending the police of the camp and of the march.*

It will be the duty of this department to designate all guards for the security and good order of the camp; to take charge of all prisoners made by these, or otherwise; to examine and report the several cases to the command-

ing general, and to take his orders in relation to their future disposal; to inspect the state of tents, barracks, and hospitals; to punish any want of care or cleanliness therein; to regulate all sutlers and markets within any camp, cantonment, or garrison; and to inspect and enforce the order of march, and to punish all infractions of it.

3.—*Inspecting parades.*

The troops detailed from each regiment for the service of the day will be brought to the parade ground of the brigade, under the command of the senior officer present and on duty; these detachments will there be embodied and marched to the ground of division parade, accompanied by the adjutant of the day, under command of the senior officer; the whole will then be marched as aforesaid to the ground of general parade, where they will be received by an inspector, or assistant inspector general, reviewed, and detached for the service of the day.

4.—*Selecting places for encampment and posting guards.*

This duty shall be performed under the directions of the commanding general; and the inspector, in performing it, shall call to his aid an officer from each corps of engineers.

5.—*Making half-yearly confidential reports for the War Department.*

These reports will relate to the conduct of corps, and to that of individuals composing them. They shall be submitted to the general of division, and shall receive from him his remarks, in writing, before they are transmitted to the Adjutant and Inspector General's office. They shall specify—

1st. The progress made by each corps or regiment in military discipline, in general, and particularly in a knowledge of the evolutions prescribed for the practice of the troops; in habits of obedience and of attention to personal appearance, adhering to the prescribed uniform and to the rules of interior economy.

2d. Whether the field and company officers respectively know their duty, and are able and willing to perform it; whether the subalterns are severally sober, active, and industrious, careful to acquire knowledge, and to communicate it to the non-commissioned officers and privates; whether the adjutant, quartermaster, and paymaster are competent to the duties assigned to them; whether the regimental books are kept with accuracy and regularity; and whether the non-commissioned officers perform their duty with promptitude and effect.

3d. Whether the meat and bread furnished by contract are of good quality; and whether these and other articles composing the ration are regularly issued.

4th. Whether the forage be good, and of sufficient quantity.

5th. Whether the hospital supplies and regulations be sufficient, and regularly dispensed in the one case, and observed in the other.

6th. Whether there has been any irregularity in the proceedings of courts-martial, or in the execution of sentences pronounced by them; and

7th. The state of the ordnance and ordnance stores generally; whether the quantity of ammunition in store is sufficient and well secured; and whether the ordnance department, the arms, and equipments are in proper order.

On each of these heads there will be a special report, and in what may be said on the second all possible frankness is expected. One motive the more to this will be found in the solemn declaration of the Government, that, while it shall be its invariable practice to distinguish and to reward merit of every description and in every grade, all pretensions not having that foundation, however propped and patronized by names, will be utterly disregarded.

ARTICLE 67.—*Engineer Department.*

The functions of the engineers being generally confined to the most elevated branch of military science, they are not to assume, nor are they subject to be ordered on any duty beyond the line of their immediate profession, except by special authority through the War Department; and, when so arranged to other duties, either on detachment or otherwise, they will have precedence according to their commissions, which, at all times, entitle them to every mark of military respect.

Whenever an officer of engineers is sent to any military department fortress, garrison, or post, a duplicate of his orders will be sent to the commanding officer by the adjutant and inspector general, when the order is given by the War Department, and by the chief of engineers, when the order is given by or through him. On his arrival, the engineer shall communicate his orders, and will receive the necessary facilities for the accomplishment of the same from the commanding officer. While so on duty, without being specially put under the direction of the commanding officer, the senior engineer present will be furnished with copies of all orders and regulations of the command, relative to etiquette and police, and will be regularly served with the countersign of the post or garrison, when quartered within the chain of sentinels. When leaving the limits of the department or command, under orders, the engineer will report the same to the commandant.

Under the orders of the Executive, the engineer department is charged with the direction of fortifications.

The duties of the department will comprise:

1. Military reconnoitrings, embracing surveys and examinations of the country, and surveys of sites that may be designated for defence, with maps and plans of the same. These reconnoitrings, surveys, maps, and plans, will be made from time to time by such engineers as may be assigned to those duties.

2. Construction and repairs of works. See construction and disbursements, and duties of engineers.

3. Inspections which shall be made of all works when completed by such engineer, as may be designated by the chief engineer. Occasional inspections may be ordered upon works, during their construction, if deemed necessary.

4. Correspondence, including reports of inspection, and of reconnoiterings, and surveys, accompanied by maps, plans and estimates, returns of public property in the possession of engineers, to be made to the engineer department on the 30th June and 31st December in every year. Summaries of reports of reconnoiterings and surveys to be forwarded through the War Department for the use of generals commanding divisions.

5. General direction of disbursements, which will embrace purchases of sites and materials, hiring workmen, purchases of books, maps, and instruments, and contracts for the supplies of materials, and for workmanship.

Constructions and disbursements.

There shall be detailed an engineer to superintend the construction of fortifications and as many assistants as may be deemed necessary.

Duties of Engineers.

Plans of the work which it is contemplated to construct, and such directions as may be thought necessary, shall be transmitted to the superintending engineer, with an order to construct the work agreeably thereto, and the superintending engineer shall be held responsible for the faithful execution of the work, agreeably to the plan. The superintending engineer shall make requisitions upon the agent of fortifications, for such materials and workmen as he may deem necessary to construct the work.

An inspection of the materials shall be made by the engineer or assistant, as to quantity, quality, and price, at the time the materials are delivered. Upon this inspection, the materials may be received or rejected by the engineer; if received, a receipt for the materials shall be endorsed by the engineer upon the bills of parcels, which shall be the authority for the agent's disbursement.

Agents.

There shall be appointed as many agents of fortifications as the service may require, who shall give bond for the faithful discharge of their duties.

Duty of Agents.

They shall be governed by the orders of the engineer department in the dirbursement of the money placed in their hands, and by the following instructions, in keeping and rendering their accounts:

1. For all articles purchased they will take bills of parcel, with fair and explicit receipts of the party from whom the purchase is made, and each bill, before payment, must be certified by the superintending engineer or assistant, that the article charged has been received: it results that the certificate must, in all cases, be dated.

2. For all labor performed, a roll must be made out monthly, under the direction of the engineer or other officer superintending, in which each person's name must be inserted, the time he commenced and ended, the price per day, and the whole amount due him, with his receipt for the amount opposite, and the roll must also be certified by the officer above named. If soldiers are employed, a separate roll must be made out, as per established regulations of the Secretary of War, of which the officers are apprized.

3. A roll must also be made out monthly, and certified by the engineer or officer superintending, for the pay of all mechanics employed, as pointed out in the case of labor performed. From the foregoing vouchers abstracts are to be made out, in which they are to be entered, according to their respective dates, and numbered in regular progression: 1st. "Abstract of articles purchased," to include all bills for articles purchased; 2d. "Abstract of labor performed," to include the rolls receipted for as directed; 3d. "Abstract of pay of mechanics," to include all charges under that head; and 4th. "Abstract of contingent expenses," to include all other expenditures on account of fortifications, not above provided for. These abstracts, with the vouchers, regularly numbered and filed with each respectively, are to be forwarded to the auditor, when the agent's accounts are directed to be rendered for settlement, accompanied by an account current, in which their respective amounts are to be entered to the debit of the United States, and all moneys previously received are to be credited, and the balance due to or from the United States will be stated. As a general remark, it must be observed that, in all cases, the payments of the agents must be accompanied by the certificate of the engineer or officer superintending the fortifications; and as much depends upon the correctness of the agent's accounts, it will be expected that the forms and instructions made known will be strictly attended to.

Duties of Topographical Engineers.

To make such surveys, and exhibit such delineation of these as the commanding general shall direct; to make plans of all military positions which the army may occupy, and of their respective vicinities, indicating the various roads, rivers, creeks, ravines, hills, woods, and villages, to be found therein; to accompany all reconnoitering parties sent out to obtain intelligence of the movements of the enemy, or of his positions, &c.; to make sketches of their route, accompanied by written notices of every thing worthy of observation thereon; to keep a journal of every day's movement, when the army is in march, noticing the varieties of ground; of buildings, of culture, and the distances and the state of the roads, between given points, throughout the march of the day; and lastly, to exhibit the relative positions of the contending armies, on fields of battle, and the dispositions made, whether for attack or defence.

ARTICLE 68.—*Ordnance Department.*

The duties of the officers of the ordnance department will consist in providing, distributing, and preserving, the various articles coming under the denomination of ordnance and ordnance stores, and in supplying the troops, posts, and garrisons, conformably to the regulations, and according to the exigencies, of the service.

Under the general denomination of ordnance and ordnance stores, will be comprehended—

1. Cannon, howitzers, and mortars, for the land service, gun-carriages, and their equipments, caissons, travelling forges, pontoons, and their carriages, and all machines and apparatus, destined to the service and manœuvres of artillery in garrison and in the field, together with the materials for their construction and repairs.

2. Small arms and accoutrements for the artillery, cavalry, infantry, and riflemen.

3. Ammunition for cannon and small arms, and all stores of expenditure, for the service of the artillery.

4. Materials, utensils, and stores, for the laboratories.

5. Intrenching and miners' tools, armorers' tools, and artificers' tools, of every description required for the use of the army.

Ordnance stores may be provided by purchase, fabrication, or contract, as may be judged most advantageous to the public service, but no contracts can be considered valid, except such as shall be made by the chief of the ordnance department, under the direction of the Secretary of War.

The artillery for field service will be distributed into divisions and sub-divisions.

Each company of the corps of artillery, serving in the field, having attached to it six pieces of ordnance, and the proper allotment of stores, will constitute a division of artillery.

The six pieces of ordnance allotted to a division, shall consist either of four pieces of cannon of the same caliber, and two howitzers, or of six pieces of cannon, all of the same caliber.

A sub-division of artillery will consist either of two pieces of cannon of the same caliber, or two howitzers.

To ensure greater simplicity and uniformity, in future, in the calibers, and patterns of cannon, &c. the cannon, howitzers, and mortars, to be provided hereafter for the land service, will be as follows:

For the field—

Cannon.—Light six pounders, light twelve pounders, medium eighteen pounders.

Howitzers.—Twenty-four pounders, eight inch.

For sieges, (including, also, field pieces of the foregoing description:)

Cannon.—Heavy twenty-four pounders. Mortars.—Eight inch, ten inch, and thirteen inch.

For the fixed batteries on the sea board and forts in the interior, (including also field pieces of the foregoing descriptions:)

Cannon.—Heavy twenty-four pounders. Mortars.—Ten inch and thirteen inch.

All ordnance to be provided hereafter of any of the natures and calibers above expressed, are to be invariably of the same pattern; and it will be the duty of the ordnance department to adopt proper measures for ensuring uniformity in the ordnance hereafter, by gradually abolishing and replacing the guns of other calibers than the fore-

going, which have been introduced into the service, as well as guns of patterns different from those which have or may be established, so as eventually to bring all the guns of any one caliber to a uniform pattern.

Whenever guns of a larger caliber than twenty-four pounders shall be demanded for the fixed batteries on the seaboard, or the forts in the interior, it shall be the duty of the ordnance department to provide cannon of such calibers and patterns as may be eventually established for the naval service.

To guard against the embezzlement of ordnance stores, the articles shall, as far as practicable, be distinctly and permanently marked, previously to their being sent from the arsenals, so as to identify them, as being the public property of the United States.

Whenever any person, in the military service of the United States, shall fraudulently sell, or otherwise dispose of any arms, ammunition, or other ordnance stores, or convert the same to his own use, or deface their marks, for the purpose of concealing them, or wilfully waste and destroy them unnecessarily, it shall be the duty of any military officer, to whom the facts shall be known, or credibly reported, to communicate the circumstances to the ordnance office at the seat of Government.

Whenever a commissioned officer shall receive from any arsenal or depot, or otherwise obtain, or be possessed of, any swords, pistols, rifles, or other small arms or accoutrements, the property of the United States, for his personal use and service, it shall be the duty of the ordnance department (credible evidence thereof appearing) to charge against such officer the value of such arms, at the contract, or other just price of the same, and shall transmit to the office of the paymaster general, a copy of such charge, to the intent that the amount may be stopped from the pay of such officer.

When it shall become necessary, or expedient, to sell any arms, timber, gunpowder, or other ordnance stores, whether on account of their being damaged, or the inconvenience of their removal, or for any other valid reason, it shall be the duty of the officer in command, or having charge of the same, to cause a survey to be taken by two or more commissioned officers, one of whom to be of the ordnance department, if convenient, or by two or more respectable inhabitants, in the absence of officers, who shall make an accurate account and schedule of the articles proposed to be sold, and report their state and condition, together with their own opinion of the expediency of their being sold, with their reasons therefor, *pro* or *con*, which survey and opinion shall be transmitted to the ordnance office, at the seat of Government, whereupon an order may be sent to dispose of such stores, it being understood that the sales in such cases shall be made at public vendue, with suitable previous notice, unless otherwise expressly directed. The marks in such cases must be cancelled or obliterated, previously to the sale.

In time of peace, no ordnance or ordnance stores in the charge or custody of an officer, storekeeper, clerk, or agent of the ordnance department, shall be delivered from an arsenal or depot, except by virtue of a direct authority from the ordnance office at the seat of Government; cases of extreme danger or necessity being alone excepted.

Any general officer who may require authority, in time of peace, to call, at his discretion, for arms, artillery, ammunition, and other ordnance stores, from the arsenals and depots within the extent of his command, will make application for that purpose to the Secretary of War, who will, if it be judged expedient, direct the ordnance office to give to such general officer an unlimited control over the arms, artillery, ammunition, and other ordnance stores, at the several arsenals and depots within the extent of his command.

All requisitions for artillery, ammunition, and other ordnance stores, for the use of any post, garrison, or corps of troops, in time of peace, shall be regularly transmitted to the general officer within whose immediate command such post, garrison, or corps may be situated, who will sanction, countermand, or modify such requisition, at his discretion, and, after due examination, will transmit the same to the ordnance office at the seat of Government, from whence the necessary order will be sent for the supply of the articles embraced by such requisition. However, in case there may be danger of great loss of time, or other manifest inconvenience, in transmitting the requisitions through the general officer immediately in command, it will be permitted to send the requisitions directly to the ordnance office, duplicates thereof being at the same time forwarded to the general, for his examination and sanction.

Any general officer may change the route or destination of any ordnance or ordnance stores issued on his own requisition, or on that of any officer under his command; in other cases, no general or other officer will be permitted to vary the route, or divert the whole or any part of a convoy of ordnance stores from the destination given to it by the ordnance department; cases of extreme danger and necessity being alone excepted.

Requisitions for arms and accoutrements for recruits must be made by the officer superintending the recruiting service, and will distinctly express the regiment or the particular battalion of the corps of artillery to which the recruits belong. The officer requiring the arms and accoutrements will give a receipt on the delivery; and such arms and accoutrements will be charged on the books of the ordnance office to the proper regiment or battalion, to the end that distinct and separate accounts may be kept with the several regiments and battalions.

When several companies of artillery shall be assembled permanently in garrison, the officer highest in rank among the conductors of artillery shall have the special charge and custody of the ordnance and ordnance stores, and shall keep the accounts of their expenditure. He will be aided in that duty by the other conductors of artillery. The quarterly returns of ordnance and ordnance stores for the garrison will be prepared under his direction, and be signed and transmitted by him.

It is to be understood that the charge and custody of all ordnance and ordnance stores, (except small arms and accoutrements,) and the task of preserving and accounting for the same while in actual use and service, belongs to the officers of artillery and the conductors of artillery; and such charge and accountability will not cease until such ordnance and ordnance stores shall have been regularly returned to the arsenals or depots, or shall have been regularly delivered over to an ordnance officer, acting with an army in the field, and stationed in charge of the main depot of the artillery of reserve belonging to such army.

At posts and garrisons where no regular conductor of artillery shall be serving, nor can be obtained without great loss of time or manifest inconvenience, the commanding officer, if he shall judge it to be necessary for the good of the service, may select and recommend a suitable person, not belonging to the army, to serve as an ordnance storekeeper, whose duties shall be similar to those of a conductor of artillery in garrison. To ensure despatch and regularity, the recommendations may be transmitted, in the first instance, to the ordnance office at the seat of Government. Should such recommendation and selection meet the approbation of the Secretary of War, and the person so recommended be appointed as a storekeeper, he will be considered entitled to the pay and emoluments of a conductor of artillery, from the period he may have entered upon the duties. Storekeepers so appointed will be always considered subordinate to the regular conductors of artillery, and not subject to be removed from the station to which they have been assigned.

Any officer of the ordnance department who may be attached to an army in the field shall be stationed at, and have the principal charge and direction of, the main depot of ordnance and ordnance stores for the supply of such army. Orders and requisitions for ordnance and ordnance stores shall regularly be transmitted to him, through the

commanding general, or the senior officer of artillery acting with such army. With the latter the officer of the ordnance department having charge of the depot will constantly correspond, so as to ascertain the actual and probable wants of the army relative to his department, and be prepared to furnish all supplies at the shortest notice. He will also correspond with the ordnance office, and with the officers of that department at the nearest arsenals and laboratories, so as to anticipate, if possible, and provide for, all the wants of the army in his department. He will, at the depot, cause the gun carriages to be put in order and repaired, the cannon to be remounted, the ammunition to be provided and prepared, the ammunition wagons to be replenished, the damaged arms and accoutrements to be taken care of, and undergo the necessary repairs. For these purposes, he is not only to be furnished with all proper aid by the commanding general, but is to employ any extra aid of artificers, armorers, and laborers, which the service may require.

The general commanding will, from time to time, communicate to him such instruction and information as may be deemed proper, and will indicate the locations and transfers of the depots, which are, on no account, to be changed, except by his orders, or from absolute necessity.

Duties of the conductors of artillery.

The conductors of stores attached to the divisions or companies of artillery, aided, when necessary, by a trusty non-commissioned officer for each division, will have charge of, and be accountable for, the ordnance and ordnance stores attached to their respective divisions, in camps, on marches, and in detached posts. The drivers, harness, and horses of the artillery, will also be under their particular charge.

Besides the ordnance, ammunition, and stores appropriated to each division of artillery, the senior officer of that corps in command with the army will apportion to the respective divisions, according to his judgment, the spare arms, ammunition, &c. destined for the infantry; also, the artificers', entrenching, and miners' tools, the laboratory stores and utensils, the spare gun carriages, equipments, &c. At the period of such distributions, inventories ought to be taken by the conductors of stores of every thing attached to their respective divisions. Suitable books are to be furnished by the ordnance department to the conductors of stores, to enable them to keep their accounts.

The conductors of stores will issue ammunition and stores of expenditure for their respective divisions, on the orders, written or verbal, of the commanding officers of the respective divisions, or on their own responsibility. No receipts shall be exacted on such issues, but the quantities and kinds of articles delivered shall be entered in the books of accounts of the conductors of stores, together with the name of the officer ordering the same. Ammunition and stores are not to be delivered by the conductor of one division for the use of another, except by the order of a general officer, or of a field officer of artillery, on the commanding officer of the post. In such cases, besides the proper entries in the books, receipts for the articles shall be passed.

The conductors of stores will receipt to the officers of the ordnance department for all ordnance, ordnance stores, arms, accoutrements, ammunition, &c. received from the arsenals and depots, and keep correct accounts of their expenditure. Quarterly abstracts of these accounts are to be transmitted to the ordnance office, exhibiting the species of articles received, those remaining on hand, and those expended or delivered over.

The conductors of stores will, from time to time, as opportunities may offer, and under the direction of the senior officer of artillery in command, disencumber the divisions of the empty ammunition wagons, carriages needing repairs, damaged arms, &c., and, in general, of all ordnance and ordnance stores which may be deemed unserviceable or superfluous; which are to be sent either to the depot or an adjacent arsenal, and delivered to an officer of the ordnance department, who will receipt for the same.

The conductors of stores will keep the senior officer of the corps of artillery in command acquainted with the state of the ordnance and stores of their respective divisions, in order that prompt measures may be taken to obtain from the depot or neighboring arsenals the requisite supplies.

Musket cartridges and flints shall be issued by the conductors of stores, on the orders of the commanding officer, or of any general officer; if to regiments, by the requisitions of the colonels or other field officers commanding them; if to detachments, by the requisitions of their commanding officer; if to posts or garrisons, by the requisitions of such persons as may be designated by the orders.

Intrenching and artificers' tools, &c. shall be issued on the requisitions of the officers, respectively, commanding the working parties, to whom tickets shall be furnished containing lists of the tools delivered; the same tickets to be handed to the relieving officers, and, finally, to be returned with the tools on the discharge of the working parties. In case of loss or damage, beyond ordinary wear and tear, it shall be the duty of the conductors of stores to report to the commanding officer, in order that the loss or damage may be made good.

Regulations relative to the distribution of small arms and accoutrements, and the mode in which they are to be accounted for.

Small arms and accoutrements shall, in time of peace, be issued from the arsenals and depots only on the requisitions of the colonels or other field officers actually commanding the regiments, and the officers superintending the recruiting service for each regiment, battalion, and corps; which requisition shall not exceed the effective strength of the regiments, respectively, and of the recruits to be raised. The receipts of the colonels, &c. shall be given for the arms, &c. when delivered to an officer of the regiment appointed by him to receive them; which receipts shall be transmitted to the ordnance office, where an account shall be opened with each regiment, for arms, &c.; and the commanding officer of the regiment shall be held strictly accountable, during his command, for the arms, &c. charged to the regiment, and shall transmit quarterly returns to the ordnance office, by which he shall strictly account for the arms delivered to the regiment; failing whereof, his name shall be reported to the Second Auditor of the Treasury Department, for further inquiry. Duplicates of such quarterly returns shall regularly be entered in the regimental book, and a particular inspection and examination be made, in the event of a change of command.

The colonels shall distribute to the captains or subalterns commanding the companies the arms, &c. received for the use of the regiment, taking their receipts for the same; and shall particularly see that the arms, &c. of each company be strictly accounted for afterwards in the inspection returns.

The captain or subaltern commanding a company shall distribute to the non-commissioned officers and privates the arms received for the company. The distribution must be witnessed by a non-commissioned officer of the company, and be recorded in the company book, as conclusive evidence to hold the soldiers accountable for the arms, &c. so distributed.

Surplus arms may be returned, if in good order, to the conductors of stores, who shall grant receipts to the colonels for the same, which receipts being transmitted to the ordnance office by the colonels, the regiments shall, respectively, have credit for the arms so returned.

In case of arms, &c. being lost or damaged by unavoidable accidents, a certificate, on honor, under the hand of a commissioned officer, shall be furnished to the conductor of stores, distinguishing those totally lost from such

as may be merely damaged; the latter being delivered up to the conductor of stores, who, besides transmitting such certificate to the ordnance office, shall be bound to make further inquiry, and report the circumstances, if he have reason to distrust the accuracy of the certificate. The regiments shall, respectively, have credit on the books of the ordnance office for all arms, &c. lost or damaged by unavoidable accidents.

Arms damaged or lost by negligence or misconduct shall have their value exacted from the delinquent; for which the colonel or field officer commanding the regiment shall be responsible.

He shall require the captain or subaltern commanding a company, to charge, in the company book, to the soldiers in fault, the amount of all arms, &c., so lost or damaged, noting the same on the muster-rolls, to be deducted from their pay. The damaged arms to be returned to the conductors of stores, with minutes of the amount charged for the same, specifying the name of the individual to whom charged, together with that of the company and regiment; and the conductors of stores shall transmit quarterly abstracts of such charges to the ordnance office.

For arms, &c., thus accounted for, as charged to individuals, the conductors of stores shall grant receipts to the colonels of the regiments, distinguishing arms totally lost, from such as may be merely damaged; which receipts being transmitted to the ordnance office, the regiment shall have credit for such arms.

Small arms and accoutrements, for the use of the corps of artillery, shall be issued to the field officers of that corps commanding battalions, in the same mode, and subject to the same regulations, for the respective battalions, as are provided above for the regiments of infantry.

The component parts of the musket and accoutrements are valued as follows, viz:

Stand of arms.

The bayonet,	$1 25
The ramrod,	0 75
The lock,	3 25
The stock,	1 75
The barrel,	4 00
The mounting,	2 00
Stand of arms, complete, total,	$13 00

Accoutrements.

The cartouch box and belt, bayonet, scabbard, and belt, } as a set, the whole,	$2 50
The brush and picker,	0 06
The ball screw,	0 25
The screw driver,	0 25

ARTICLE 69.—*Quartermaster's Department.*

The objects of this department are, to ensure an efficient system of supply, and to give the utmost facility and effect to the movements and operations of the army.

The regulations and instructions for the department are embraced under the following heads:

1. General instructions for the department.
2. Table of allowances, regular and incidental.
3. Returns, statements, estimates, and reports required.
4. Forms of returns, reports, and statements required, with forms of vouchers for disbursements, and for issues of regular supplies.

1. *General Instructions.*

1. The quartermaster general will be stationed at the city of Washington, and will, under the direction of the Secretary of War, have the control of the deputies and assistants, and of all officers and agents acting in or making disbursements on account of the department, in every thing relating to the administrative branch of their duties, and their accountability. He will be allowed one assistant, and as many subalterns as may be necessary, for the discharge of the duties of his office.

2. All communications relating to the duties of the department, or to any branch or officer thereof, except from the commanding generals of divisions or armies, shall be addressed to the quartermaster general.

3. It shall be the duty of the quartermaster general to make himself acquainted with the frontiers, both maritime and interior, and with the avenues leading to the contiguous Indian and foreign territories; with the resources of the country in military supplies, and the means of transportation, particularly of the districts on the frontiers; with the most eligible points for concentrating troops and collecting supplies, whether in relation to offensive or defensive operations; with the relative expense of concentrating at particular positions, and the relative military advantages of those positions. It shall also be his duty to designate the routes of communication between different posts and armies, the course of military roads and the sites, for permanent and temporary depots of provisions and military stores.

The deputies, assistant deputies, regimental and battalion quartermasters, are required to collect information in relation to all those points, and to make themselves acquainted with the state of the roads, the course and description of the rivers, and the most direct routes between the different military posts within their respective departments.

4. A deputy quartermaster general shall be stationed at Philadelphia, an assistant deputy at Pittsburg, one at New York, one at Detroit, one at St. Louis, and one at New Orleans; neither of whom shall be removed from his station except by the quartermaster general, or by authority from the War Department. All other deputies and assistants will be subject to the disposition of the generals or other officers commanding divisions or departments.

5. Officers of the quartermaster general's department will not be subject to detail, nor be employed on any other duties than those of their departments, except by order of the Secretary of War.

6. It shall be the duty of the officers of this department to provide for the quartering and transporting of the troops, and for the transporting of all military stores, camp equipage, and artillery; for opening and repairing roads, and constructing and repairing bridges which may be necessary to the movements of the army, or any detachment thereof.

7. To provide good and sufficient storehouses for all military supplies, and for provisions deposited by the commissary general or his assistants, or under contract between individuals and the Government, and to appoint storekeepers for the custody of said stores and provisions, or of any property of the public which may be placed there.

8. To provide all forage, fuel, straw, and stationary, for the use of the troops, and to have the same transported and issued agreeably to the regulations; to purchase dragoon and artillery horses, and horses, oxen, wagons, carts, and boats, for the transportation of baggage; to provide boards, plank, nails, and other materials for constructing and repairing barracks, hospitals, and bridges.

9. No purchase, in time of peace, on public account, will be made by the quartermaster's department, but of the articles above enumerated, except by special authority of the War Department, communicated through the quartermaster general.

10. Officers of this department will receive from the departments of purchase, subsistence, and ordnance, all clothing, camp equipage, provisions, arms, ammunition, and ordnance, and transport the same to the place of destination, and make distribution thereof agreeably to the direction given to the articles by the commissary general of purchases, the commissary general of subsistence, the chief of the corps of ordnance, or the general commanding the division or department to which they are destined.

11. Quartermasters in the intermediate departments, between the places of receipt and delivery, will be held responsible for the safe and prompt transmission of all articles through their respective departments.

12. Articles for conveyance by this department will be transported in bulk, and, with each quantity of stores conveyed, the quartermaster of the post from which it is sent shall, if he think it necessary, furnish a conductor, who shall have charge of it, and for whose conduct in the safe keeping and delivery thereof the quartermaster shall be responsible.

13. Quartermasters shall not be required, in time of peace, by generals or other commanding officers, to make payments on contracts made by officers not of the quartermaster's department. They may be required, however, to report such cases to the quartermaster general, in order that they may be submitted to the Secretary of War for his decision.

14. All officers are prohibited from ordering purchases or directing disbursements, not provided for by the regulations of the War Department. But should any officer of the quartermaster's department be required to make disbursements or allowances not authorized by such regulations or by law, he shall submit to the officer ordering the same a statement, in writing, of his opinion in regard to the law or regulations in the case. If the officer, after receiving such statement, persist in requiring the allowance or disbursement to be made, he shall certify and return the statement to the quartermaster, and it shall be the duty of the quartermaster to forward the statement, thus certified with his accounts to the quartermaster general, who will transmit them to the proper accounting office; and the amount shall be charged to the individual account of the officer, unless he shall show satisfactorily that the disbursement or allowance was necessary, and that the urgency of the service was such as to preclude the possibility of communicating with the War Department previous to the purchase.

15. No expenditure will be made at permanent posts, in time of peace, for the erecting or repairing of barracks or quarters, when the whole sum required to complete the work shall exceed five hundred dollars, unless it be authorized by the Secretary of War.

16. Whenever any building occupied by troops as barracks shall have been left by them in a filthy state, or shall have suffered unwarrantable injury by them, the quartermaster of the post, or of the party succeeding them, shall, in the one case, have the quarters cleansed, and in the other repaired, and the expense of so doing shall be deducted from the pay of the officer commanding the party which immediately preceded in the occupation of the building so cleansed or repaired; where this shall not have been done and reported, the last occupier shall be considered responsible.

17. Whenever it shall be found necessary to occupy private buildings or lands for encampments by the troops of the United States, a reasonable compensation shall be paid to the proprietor by the quartermaster of the post or department. When the rate of compensation cannot be satisfactorily agreed on, discreet and disinterested persons shall be appointed by the quartermaster and the proprietor, to appraise and determine the rent. Any damages sustained by buildings or lands thus occupied shall be paid for or repaired, as above provided.

18. Quartermasters will not issue due bills in any case. When purchases have been made or supplies furnished, no receipt shall be taken unless the money be actually paid. Nor shall any officer or other person employed in the quartermaster's department be concerned directly or indirectly, either for himself or others, in the purchase of any claim on the Government, either of a soldier or of a citizen. Any officer violating this regulation shall be stricken from the rolls of the army.

19. Whenever any quartermaster, officer, or agent, making disbursements on account of the department, shall be relieved or ordered from his post or station, he shall furnish his successor with a certified statement of all the outstanding debts of the department, whether for supplies furnished or services rendered; a duplicate of which he shall transmit to the office of the quartermaster general.

20. Officers of the quartermaster's department will not be allowed to engage, directly or indirectly, in trade or traffic of any description.

21. All moneys received on public account by the deputies, assistant deputies, or other officers or agents, acting in the quartermaster's department, shall be deposited in such banks as the quartermaster general, by direction of the Secretary of War, may designate.

22. Regimental and battalion quartermasters and military storekeepers may be required to perform the duties of assistant deputy quartermasters general, at their respective posts or stations.

23. All moneys for the service of the quartermaster's department will be furnished on requisitions of the quartermaster general, predicated on the estimates of the several quartermasters, agents, and disbursing officers. The senior quartermaster of each military department may be required to receive and distribute all moneys necessary for the use of his department.

24. All officers and agents of the quartermaster's department, and commanding officers of posts where there are no quartermasters, will keep and render their accounts, both of money and property, according to the annexed forms; and each officer and agent of the department shall forward his accounts to the office of the quartermaster general, within twenty days after the expiration of the quarter. It shall be the duty of the quartermaster general to examine and transmit them with his remarks to the proper accounting office of the Treasury Department. On report being made to the quartermaster general of any voucher being disallowed or suspended, he shall require from the officer or agent proper vouchers, or the necessary explanation.

25. Any officer or agent of the quartermaster's department, who shall fail to forward his accounts for settlement at the time prescribed, shall be recalled, and his place be supplied by another.

26. The quartermaster general may, whenever he shall deem it necessary, cause a thorough inspection to be made of the books and accounts of the quartermasters, and of all officers and agents making disbursements on account of the department. This inspection shall embrace property as well as money; shall extend to contracts, to prices paid for articles purchased, prices paid for transportation, and generally to every article of supply, and to all objects connected with the department.

The books and accounts of the quartermaster general will be subject to a similar inspection.

Inspecting officers will notice in their reports all orders of commanding officers requiring the expenditure of money contrary to the regulations, and they will state particularly whether supplies are forwarded promptly.

27. Generals, and other officers, are prohibited from appointing officers or agents, to make disbursements on account of the quartermaster's department, except on the most urgent occasions, when they will immediately report the necessity for such appointments to the Department of War. The general, or officer making appointments of this nature, shall, in all cases, receive the funds which are to be placed in the hands of the officer or agent, and shall himself be held individually responsible for the proper application of the same.

28. Quartermasters will not be required to make purchases of medicines and hospital stores, except in cases where an extra supply may be found necessary by the marching of a detachment, the arrival of a greater number of men at a post than had been estimated for, the loss or miscarriage of any article, or unusual expenditure from sickly seasons, &c. In these cases only, they are authorized to purchase and issue on the requisitions of the attending surgeon, countersigned by the commanding officer of the department, post, regiment, or detachment.

29. It shall be the duty of the officers of the quartermaster's department, to provide cooking utensils, and other articles of hospital furniture, when they cannot be conveniently obtained from the purchasing department. Their vouchers for such supplies will be the requisition of the attending surgeon, countersigned by the commanding officer of the regiment, post, or department.

30. Quartermasters will not be required to make payments to citizen surgeons for medicines furnished, or medical services rendered to the troops, whether in garrison or detachment, or the recruiting service. Claims of this character must be referred to the surgeon general at Washington City. Nor will they be required, under any circumstances, to made payment for the hire of stewards, wardmasters, nurses, or attendants in hospitals.

31. Officers of the quartermaster's department shall not be furloughed for a longer period than twenty days, without first obtaining the sanction of the War Department, through the quartermaster general; and in all cases where furloughs are granted to them, they are required to report the same immediately to his office.

32. Quartermasters will not be required to make expenditures of any description connected with the recruiting service, except for transportation, until the recruits shall have joined the main recruiting depot, at some military station. All expenses incident to the recruiting service must be paid by the recruiting officer, out of the fund for that service. When the recruits shall have been embodied, at the main recruiting depot, supplies will be provided by the quartermaster's department.

33. Quartermasters are prohibited making expenditures for the printing of blank forms and returns of any description, except those connected with their own accounts.

34. Whenever quartermaster's stores become damaged, or unfit for issue, whilst in the charge of a quartermaster, he shall report the same to the commanding officer of the post or department, who shall immediately institute a board of survey, to be composed of three officers, when practicable, to examine and report on the same. They shall report, particularly, the nature of the damage, the causes which led to it, and whether, in their opinion, it was produced by the neglect of the quartermaster. All stores found damaged, from causes other than the neglect of the quartermaster, shall be immediately sold at public auction, and the auctioneer's bill of sale, with a duplicate of the report of the board of survey, shall be entered in the proper abstract, and will entitle the quartermaster to a credit for the stores thus condemned and sold. But in case the board be of opinion, that the damage was occasioned by neglect on the part of the quartermaster, the stores will be thrown upon his hands, and their original cost deducted in the settlement of his accounts.

35. Quartermasters will not be required to make expenditures immediately connected with the operation of the subsistence department, except for the hire of store houses and transportation of supplies. All stationary, scales, weights, and measures, for the use of the issuing commissaries, and all other expenditures, incident to the operation of that department, must be paid from the fund of that department.

36. Quartermasters will purchase, on the authority of the ordnance department, such horses as may be required for the use of the several ordnance depots. The cost of horses, thus purchased, together with the forage necessary for their support, will be charged to the fund of that department.

2.—*Regular and incidental allowances.*

1. Fuel and quarters.
2. Forage.
3. Stationary.
4. Transportation.
5. Straw.
6. Camp equipage.
7. Incidental allowances.

1.—*Fuel and quarters.*

GRADES, &c.	QUARTERS.		FUEL PER MONTH.	
	Rooms.	Kitchen.	From 1st May to 31st Oct.	From 1st Nov. to 30th April.
			Cords.	Cords.
Major generals,	3	1	1	6
Brigadier generals,	2	1	1	4½
Colonel, lieutenant colonel, major, judge advocate, chaplain, regimental and battalion pay-masters, and every other officer having the relative rank of field officers, each	1	1	1	3
Captain, regimental surgeon, post surgeon, and military storekeeper, each	1	-	½	1½
All other commissioned officers, to every two,	1	-	½	1½
To each mess of six or more officers,	-	1	½	1
To the commanding officer of a department or separate post, and to the principal officer of each branch of the division staff, for an office,	1	-	-	2
At post where there are less than six officers,	-	1	½	1
Every six non-commissioned officers, musicians, and privates, including the authorized number of washerwomen and servants,	-	-	½	1

The allowance of fuel for the quarters of the sick will be regulated by the commanding officer and surgeon.

At all posts, garrisons, and cantonments, north of the fortieth degree of latitude, the allowance of fuel may be increased one fourth, during the months of December, January, and February.

Coal may be issued in lieu of wood, in proportion to the cost thereof.

No fuel furnished for the use of a garrison, post, camp, or cantonment, shall be removed therefrom, but by the quartermaster attached thereto: and any overplus of fuel, beyond what has been used, or may be necessary for the use of the troops at such post, camp, or cantonment, shall revert to the United States.

No fuel to be issued but within the month for which it is due, and no fuel or quarters to be allowed to officers whilst on furlough.

Officers in their requisitions for fuel will state that they are ordered on duty at the place, and for the time, for which the fuel is required.

The senior officer shall, in every instance, have the choice of quarters, in succession from the highest to the lowest grade, except in regular cantonments, when company officers shall take their stations as in camp.

Quarters will not be rented for officers of the army, when there are public quarters suitable for their accommodation, at the place where they may be stationed, except in cases where the peculiar nature of their duty requires them to be stationed remote from the public quarters. This will rarely occur: and it is made the duty of the officers of this department to keep the public quarters in suitable repair, so that their bad condition shall not be made a pretext for renting.

On the arrival of an officer at a post, he shall immediately make a written requisition on the quartermaster for quarters, who shall in all cases furnish public quarters, where there are any vacant.

At all posts in the vicinity of public or Indian lands, which afford fire wood, the necessary fuel will be provided by the troops, under the direction of the several commanding officers.

Requisitions for fuel must state the number of non-commissioned officers, musicians, privates, servants, batmen, and washerwomen, for whom it may be demanded, and certified by the commandant of the regiment, garrison, or recruiting rendezvous.

2.—*Forage.*

To all horses in actual service there shall be allowed fourteen pounds of hay, and twelve quarts of oats, or in lieu of oats, eight quarts of corn per diem.

Officers will be allowed to draw forage *in kind*, when on actual service in the field, or when under orders to hold themselves in readiness for the field, for the number of horses they may actually keep in service, not exceeding the following rates:

Major Generals,	7
Brigadier Generals,	5
Colonels,	4
Lieutenant Colonels and Majors,	3
All other officers entitled to forage,	2 each.

On all other duties, officers entitled to forage for three or more horses, will be allowed to draw forage *in kind* for two horses: all others entitled to forage, to draw *in kind* for one each.

Officers when on furlough, or leave of absence, will not be allowed to draw forage in kind.

At all posts in the vicinity of prairies belonging to the public, hay for the public horses and oxen will be provided by the troops, under the direction of the quartermaster of the post, or the officer commanding.

3.—*Stationary.*

To a major general, or other officer, commanding a division or department, so much stationary as may be necessary for the discharge of his public duties.

To every other general officer, or officer commanding a brigade, twenty-four quires of paper per annum.

To a colonel or other officer, commanding a regiment, or battalion, eighteen quires per annum.

For the use of any company, whether in garrison or otherwise, twelve quires per annum, and a large company book once in five years.

For the use of every other commissioned officer in the army of the United States, three quires per annum.

A proportion of other stationary, at the rate of twenty-five quills, twenty-five wafers, and one paper of ink powder, to each six quires.

4.—*Transportation.*

When officers are ordered on courts-martial, temporary commands, or other duty, the following rates will govern in the allowance made to them for transportation of their baggage, at two dollars per hundred weight, per hundred miles:

To a Major general,	pounds 1,000
Brigadier general,	900
Colonel, or assistant surgeon general,	800
Lieutenant colonel,	750
Major, judge advocate, paymaster, or chaplain,	700
Captain, or regimental surgeon,	600
Every other commissioned officer,	500
Cadet,	450

The most direct post route will determine the distance for which transportation will be allowed, whether the conveyance be by land or water, unless the route be designated in the order for the performance of the duty.

If an officer require it, he will be allowed his transportation *in advance;* or, if he prefer it, and the amount can be ascertained, he shall be allowed his stage fare *in advance*, where there is a direct stage route. In either of these cases, a certified copy of the original order, and certificates on honor, that he has neither been furnished with transportation, nor money in lieu thereof, will be necessary to entitle him to the allowance.

Immediately on arriving at the place to which he has received this allowance *in advance*, he will transmit to the quartermaster general's office, a certificate in the following form: I certify, on honor, that the route from ——— to ———, for which I received transportation in advance from ———, at ———, has been performed. The quartermaster paying the allowance for transportation, or stage fare, in advance, will make a certificate thereof on the original order, which will remain in the hands of the officer. If the original order be not in the possession of the officer drawing the allowance in advance, the certificate will be made on a certified copy of the same: but in no case shall the original order be dispensed with, when it can be had.

An advance on account of transportation will in all cases stand charged to the officer receiving it, until a certificate of the above nature be forwarded.

Officers, prisoners of war, shall be allowed for transportation of baggage, from the places where they are paroled, to their respective homes, unless transportation be furnished by the enemy, or the Government.

Each company or detachment of seventy-eight men, shall be allowed for the conveyance of camp equipage, and the baggage of company officers, when marching with the companies or detachments, to which they belong, one four-horse wagon and team, or two two-horse wagons and teams.

For the conveyance of the baggage of the field and staff officers of a regiment or battalion, when marching with their regiment or battalion, one two-horse wagon and team.

To each regimental hospital, for the conveyance of medicines, hospital furniture, hospital stores, and cooking utensils, one two-horse wagon and team.

For other hospitals and the sick, the transportation will be regulated by the commanding officer, and the attending surgeon.

No allowance will be made for transportation of baggage to officers fulfilling the first order after appointment.

Officers who seek and obtain transfers for their mutual convenience are not entitled to the allowance for transportation of baggage whilst executing the order for a change of stations.

5.—*Straw.*

One truss of straw, weighing thirty-six pounds, is allowed to every two men, at the commencement of the month. At the expiration of fifteen days, each truss will be refreshed with eight pounds; and at the expiration of the month the whole straw will be removed and a fresh bedding of one truss will be furnished.

The same quantity of straw is allowed to servants, or batmen, not soldiers, and for washerwomen, in the proportion of one to every seventeen men.

The allowance and change of straw for the sick in hospitals, will be regulated by the senior attending surgeon.

At all posts in the vicinity of prairies, belonging to the public, hay will be used in lieu of straw, and shall be provided by the troops.

6.—*Camp equipage.*

General officers, one markee, and one wall tent.

Field officers, two wall tents.

The officers of a company, two wall tents.

Medical staff of a regiment, two wall tents.

Military staff of a regiment or battalion, three wall tents.

To every six non-commissioned officers, musicians, and privates, including also the authorized number of washerwomen, one common tent, one iron kettle, and two tin pans.

7.—*Incidental allowances.*

Every officer of the army, whose duty requires him to be on horseback in time of action, and whose horse shall be killed in battle, shall be allowed a sum not exceeding two hundred dollars, on making satisfactory proof of the loss and value of the horse so killed within one year. The proof required shall be the affidavit of the quartermaster of the corps to which the owner may belong, or of two other credible witnesses.

Officers attending general courts-martial, either as members or witnesses, will be paid for each day occupied in travelling to, attending on, [the number of days which the court is actually in session,] and returning from said court, one dollar per day to those entitled to forage, and one dollar and twenty-five cents per day to those not entitled to forage. The allowance for travelling to and returning from the post where the court may convene, to be estimated computing at the rate of thirty miles per day.

Citizens who attend courts-martial as witnesses will be allowed the transportation of a lieutenant and three dollars per day for the time occupied in travelling to, attending on, and returning from the court, computing the travelling allowance the same as officers.

No compensation to be made to officers attending courts-martial, as witnesses, or members, if on duty, or on furlough, at the post or place where the court is held.

Officers performing the duties of special judge advocates to general courts-martial will be paid one dollar and twenty-five cents per day for every day they may be necessarily employed in the performance of said duties.

A reward of thirty dollars will be paid to any person who may apprehend and deliver to an officer of the United States' army a deserter from the said army. Rewards thus paid will be reported by the disbursing officer to the officer commanding the company to which the deserter may belong, for stoppage on the muster-rolls.

Non-commissioned officers, musicians, and privates employed at work on fortifications, in surveys, in cutting roads, and other constant labor, for a longer period than ten days, will be paid fifteen cents and allowed an extra gill of whiskey or spirits for each day whilst so employed. This allowance to be paid by the officer disbursing the contingent expenses of the work or expedition.

8.—*Returns, statements, and estimates required.*

1. The quartermaster general will make to the Secretary of the Department of War, on or before the 20th day of October, in each year, annual estimates of all moneys and supplies, which may be necessary in his department for the ensuing year.

He will make, on the 31st day of March, and 30th day of September, in each year, semi-annual returns to the Department of War, of the distribution of all supplies furnished by his department, noting the quantity on hand, and showing their state and condition.

He will make quarterly reports to the Secretary of the Department of War, of the state of the appropriation for the quartermaster's department, embracing the particular sums distributed to the officers and agents of the department, the amount disbursed by each, and the sums remaining in their hands unaccounted for; and in what manner each officer and agent has performed his duty. He will, in this report, exhibit a statement of the bank accounts of the regular disbursing officers of his department, and show as near as practicable, the rate of exchange between the principal points of disbursement, and the principal towns at which their commerce centers. This report to be made on the last days of January, April, July, and October, of each year.

2. The senior quartermasters of the military departments will make to the quartermaster general, on or before the 10th day of September, in each year, annual estimates of all moneys and supplies which may be necessary in their respective military departments for the year ensuing. They will, at the same time, make reports of all outstanding debts of the department within their respective military departments.

They will make semi-annual returns to the quartermaster general, on the 31st day of March, and 30th day of September, in each year, of all horses, and draught oxen, and other property of the public, which may properly belong to the quartermaster's department, within their respective military departments, agreeably to form No. 1.

3. All officers of the quartermaster's department, and all storekeepers, agents, and commanding officers, at posts where there are no quartermasters, will make, on the 31st day of March, and the 30th day of September, of each year, semi-annual returns, corresponding with form No. 1, to the senior quartermaster in their respective military departments.

4. All officers and agents in the quartermaster's department, and all commanding officers of posts, where there are no quartermasters, will make and transmit promptly to the quartermaster general, through the senior quartermaster in their respective military departments—

A monthly report of persons and articles hired, or employed in public service, agreeably to form No. 2.

A monthly report of non-commissioned officers and privates employed on extra duty, as mechanics and laborers, agreeably to form No. 3.

A monthly return of stores received for transportation and distribution, agreeably to form No. 4.

It shall be the duty of the senior quartermaster in each military department, to collect and transmit the above reports to the office of the quartermaster general, accompanied by his report of any failure on the part of the several officers, or agents, within his department.

5. All officers of the quartermaster's department, and all officers and agents making disbursements on account of the department, will make and transmit, *direct*, to the quartermaster general, to be transmitted by him to the proper accounting office of the Treasury Department, the following returns and accounts, viz:

Quarterly returns of quartermaster's stores received and issued agreeably to form No. 6, supported by vouchers corresponding with forms Nos. 7, 8, 9, 10, 11, 12, 13, and 14.

Quarterly accounts of current moneys received, expended, and remaining on hand on account of the quartermaster's department, agreeably to form No. 15, supported by vouchers corresponding with forms Nos. 16 and 17.

Quarterly accounts current of moneys received, expended, and remaining on hand on account of contingencies, agreeably to form No. 29, supported by vouchers corresponding with form No. 18.

These returns and accounts to be made on the last days of March, June, September, and December, in each year.

6. They will also make and transmit, *direct*, to the quartermaster General, immediately succeeding the close of every month, a monthly summary statement of moneys received, expended, and remaining on hand, agreeably to form No. 5.

7. All officers and agents of the quartermaster's department, and commanding officers of posts, where there are no quartermasters, will make such other returns, reports, and statements, as the quartermaster general may from time to time require.

Article 70.—*Purchasing Department.*

February 1, 1818. 1. The commissary general of this department, and his deputies, will purchase upon the orders and estimates of the War Department, all clothing, dragoon saddles and bridles, tents, tent poles, camp kettles, mess pans, bed sacks, and all other articles required for the public service, for the army of the United States; excepting, only, such as are ordered to be purchased by the ordnance and quartermaster general's departments, and the apothecary general.

[December 16, 1818. 2. Estimates and returns will be made in duplicate, and according to the prescribed form; one of which shall be transmitted to the Adjutant and Inspector General, and the other to the commissary general of purchases, (at Philadelphia,) on the 1st day of September, annually. A consolidated report of these estimates and returns will be laid before the Secretary of War, on the 1st of October, in each year, by the Adjutant and Inspector General, and by the commissary general of purchases, when the deficient and informal returns of regiments, corps, and battalions, will be stated, and on these reports a military investigation will be ordered on the commanding officer of any regiment, corps, or battalion, so reported.]

3. These estimates shall specify the company, or detachment, for which the clothing and camp equipage are intended, and shall designate the posts and places to which they are to be sent.

4. As all orders for the purchase and distribution of the clothing and equipments for the army appertaining to the purchasing department, will be predicated upon the estimates of the commandants of regiments, battalions, and corps, who shall be held strictly responsible for the correctness of the same and the due transmission thereof; they shall require from the officers commanding companies and detachments of their respective regiments, battalions, and corps, accurate estimates of all such clothing and camp equipage as may be necessary for the supply of their companies and detachments for the ensuing year, with a return of the articles on hand, and a report of their condition.

5. The articles purchased by the commissary general and his deputies shall be carefully packed and legibly marked with the name of the place or places where they are to be sent, and that of the company or detachment for which they are intended, accompanied by duplicate invoices of the articles contained in such packages, and shall be delivered to the issuing commissary or nearest military storekeeper.

6. For the purchases made by the commissary general and his deputies, quarterly accounts and vouchers shall be forwarded to the Second Auditor of the Treasury Department, agreeably to such forms as shall be prescribed; and, to the Secretary of War, monthly summary statements of the purchases.

7. For the delivery of the articles purchased by the commissary general and his deputies, the receipts of the issuing commissary or military storekeeper shall be the voucher, which will accompany his accounts of purchases, as above directed.

8. When the commissary general or his deputies shall have delivered the articles purchased by him or them to a military storekeeper or issuing commissary, he or they shall notify the quartermaster general or his deputy and assistants that transportation will be required, stating the time when the articles must be delivered at their destination. When the articles are received at the quartermaster's department, the officers of that department who furnish the transportation shall be held strictly responsible for the safe and speedy transit of the same.

9. The clothing department is subject only to the orders of the War Department and the commissary general of purchases. When by accident or casualty the clothing is lost before it arrives at its proper destination, the commissary general or his deputies, on a report of the fact, shall, with the least possible delay, furnish a duplicate supply, and deliver the same to the nearest issuing commissary or military storekeeper.

The commissary general will exercise his discretion and judgment in making contracts for the supply of clothing, and of all such articles as must be furnished by the purchasing department. The contracts proposed to his deputies shall be submitted to him, and must abide his decisions. He will judge of and decide upon the price and quality

of the clothing, and of all such articles as he may be ordered to purchase. For any error or delinquency in the discharge of this duty he will be held strictly responsible.

Duties of issuing commissaries and military storekeepers.

1. Issuing commissaries and military storekeepers shall be held strictly responsible for the safe keeping of all the articles delivered to them.

2. They shall cause to be forwarded to their respective places of destination all parcels delivered to them by the commissary general and his deputies, and for that purpose shall, when necessary and practicable, require of the quartermaster general's department transportation for the same; and when transportation cannot be procured from the quartermaster's department, they shall be authorized, and are hereby required, to provide the same. The voucher for the delivery of the articles by the issuing commissary or military storekeeper, ordered for transportation, shall be the receipt of the carrier, of which triplicates shall be taken; one to be forwarded to the officer commanding at the post to which the articles are directed, one to accompany his accounts to the Second Auditor, and the other to be given to the person having charge of the articles transported.

3. When by accident or casualty the clothing is lost or damaged before it arrives at its proper destination, it shall be the duty of the military storekeeper or issuing commissary, under whose direction such clothing was forwarded, immediately to collect the facts and circumstances attending all such losses or damages, and promptly to report these, in duplicates, to the Secretary of War and commissary general or deputy commissary by whom the original purchase was made.

4. Issuing commissaries and military storekeepers shall keep an account of all articles of public property by them received and delivered, and shall render their property accounts to the Second Auditor of the Treasury, with their cash accounts, quarter yearly, agreeably to such forms as shall be prescribed. In all cases when stores are forwarded by an issuing commissary or military storekeeper, he shall require from the officer to whom they are consigned a receipt for the same, which shall be sufficient to entitle him to a credit for such stores in the settlement of his accounts.

In all cases of transportation, an invoice of the articles transported shall accompany the same, and a duplicate thereof be forwarded by mail to the commanding officer for whom they are intended.

Distribution of clothing, &c.

On the receipt of the articles by the officer for whose company or detachment they are intended, and on examination or inspection of the same, he shall forward duplicate receipts therefor, one to the issuing commissary or military storekeeper from whom they were received, and the other to the Second Auditor of the Treasury Department, with which he will be charged and held accountable; for the distribution of which, according to law and regulations, he will render quarterly accounts and vouchers, agreeably to such forms as shall be prescribed.

Every officer commanding a company or detachment, upon the receipt of clothing, shall immediately cause an examination or inspection to be made of the same, by one or more officers or other proper persons, who, in case of a deficiency, either in quality or quantity, of the articles specified in the invoice, shall make duplicate reports of such deficiency, one of which shall be transmitted to the Secretary of War, and the other to the issuing commissary or military storekeeper by whom the clothing was forwarded.

He shall keep a company book, in which he shall cause to be entered a correct account of all articles received and issued for the use of his company or detachment, opening in said book, with each man of his company or detachment, a separate account, charging him with all articles to him delivered.

It shall be the duty of the commanding officer of each company or detachment to distribute the clothing semi-annually, in the months of April and November in each year, and in such quantities as may be deemed necessary and proper, provided that in all cases when clothing has been furnished by the Government, each non-commissioned officer, musician, and private, artificer, and laborer, shall receive in each year the quantity authorized by regulations.

If, upon an inspection, it shall appear that a soldier has lost or sold any article of his clothing or of his arms, the article is to be supplied and the price deducted from his wages.

All extra clothing shall be charged to the soldiers receiving it, and the amount thereof deducted from their monthly pay. Accounts of these charges and deductions shall be regularly kept in the company books, and the amount due from each soldier shall be stated on the muster-rolls, and shall be, by the paymaster, deducted on the next payment.

When a soldier of the regular army has clothing due at the time of his discharge, he shall receive pay from the regimental or battalion paymaster for the same, according to the annual estimated value, for such authorized articles of uniform.

Officers commanding companies and detachments shall render accounts to the Second Auditor of the Treasury Department semi-annually of their receipts and issues; and the receipts of the men under their respective commands shall entitle them to a credit for the distribution of clothing and equipments on settlement of their accounts.

Superintendents of the recruiting service for regiments and corps will continue to draw clothing, and issue the same as heretofore for that service.

Whenever a recruit may have drawn clothing, and shall afterwards desert previous to joining his regiment or corps, and leave such clothing, or any part thereof, it shall be the duty of the superintendent to take charge of the same, and he shall transmit quarterly to the commissary general of purchases an account, certified on honor, of all articles so left, which shall be kept separate from the other clothing, and be subject to the order of the commissary general of purchases; and, when delivered over to any officer, duplicate receipts shall be taken of the same, one of which shall be transmitted to the commissary general of purchases.

Clothing left by deserters who have joined their regiments or corps shall be taken care of and accounted for in the same manner, by the commanding officers of companies or detachments.

ARTICLE 71.—*Pay department.*

Regimental and battalion paymasters, in addition to the regular and punctual payment of regiments and corps, are to be considered district paymasters, and make individual and such other payments as may be regularly required of them within their departments.

To insure punctuality and responsibility, correct reports shall be made to the Paymaster General, once in two months, showing the disposition of the funds previously transmitted, with accurate estimates for the next payment of such regiment, garrison, or department, as may have been assigned to each; and shall at the same time render his accounts and vouchers of the last payment to the Second Auditor of the Treasury Department, through the Paymaster General.

If the statements of the expenditures thus made are found correct, and the estimates are approved and signed by the paymaster general, funds will be transmitted for the next payment.

Whenever paymasters shall fail to transmit estimates and render their accounts and vouchers to the auditor, through the paymaster general, for settlement, the provisions of the law will be enforced, and the army relieved from such embarrassment.

Generals commanding divisions, officers commanding military departments, and all officers while in the actual command of permanent posts and garrisons, separate from the stations of commandants of departments, which subject them to the additional expense of independent commands, are allowed double rations.

The pay account in which such charge is made must be supported by the officer's certificate, stating the post or garrison, and that he was actually commanding during the time charged.

No regimental or battalion paymaster will make payment of any supposed arrears of pay or bounty, to soldiers discharged by the civil authority.

The times for regular musters and inspections of troops, at the several posts and hospitals and infirmaries, will be communicated to the paymasters assigned to pay the same, by the commandants of departments; when this is distinctly known, there can be no excuse for neglect in the paymasters; and all deficiencies will be promptly reported to the office of the Adjutant and Inspector General.

No paymaster will issue due bills for the payment of the troops, nor take receipts where payment has not actually been made; and if any paymaster or other officer shall, either directly or indirectly, be accessary to the purchase of any non-commissioned officer's, musician's, or private's certificate or evidence of pay due, such certificate, receipt, or evidence of pay, will not be received as a voucher in settling pay accounts at the Second Auditor's office; and, on proof of the fact, such officer shall be dismissed the service.

Regimental and battalion paymasters will regularly pay all stewards, wardmasters, nurses, attendants, and patients, on the proper musters and inspections for that purpose, at the established hospitals and infirmaries within the district or department assigned to them.

Article 72.—*Subsistence Department.*

COMMISSARY GENERAL OF SUBSISTENCE.

The commissary general of subsistence will be stationed at Washington, and will have a general superintendence of his department. He will make all estimates of expenditure for his department; regulate the transmission of funds to his assistants; receive their returns and accounts, and adjust them for settlement.

ASSISTANT COMMISSARIES OF SUBSISTENCE.

It shall be the duty of assistant commissaries of subsistence, or storekeepers, to receive and account in the manner hereafter prescribed, for all subsistence stores entrusted to their charge; and to make and transmit to the proper accounting officer, through the office of the commissary general of subsistence, all returns and accounts. They will not receive subsistence stores from contractors, until duly inspected, according to the terms of the contract.

In case of failure on the part of the contractor, or a deficiency of rations, the military storekeeper, or assistant commissary of subsistence stationed at the depot where such failure happens, shall give immediate notice thereof to the commissary general of subsistence; shall, at the same time, make purchases of the necessary supplies, on the best terms possible; and will draw bills at sight on the commissary general of subsistence, for the payment of his purchases.

It shall be the duty of the several assistant commissaries of subsistence, or storekeepers, stationed at the depots where subsistence stores shall have been inspected and delivered, agreeably to the conditions of the contract, to give the contractor duplicate receipts for the same, stating at length the articles as enumerated in the contract.

Assistant commissaries of subsistence, at posts which are supplied from an established depot, will make early requisitions (approved and countersigned by the commanding officer) on the military storekeeper, or assistant commissary of subsistence, stationed at such depot; and as, in general, the deliveries at depots are made quarterly, it is preferred that requisitions should be made for the same period. Subsistence stores will, however, be furnished in such quantities and at such times as commanding officers may require.

Whenever it is found necessary to forward subsistence stores to an outpost, the assistant commissary of subsistence, or storekeeper stationed at the depot, will require the necessary transportation of the quartermaster's department, and will forward with the supplies triplicate invoices; two of which will be receipted and returned by the receiving commissary, and one of them must accompany the monthly return of stores received and issued.

The assistant commissary of subsistence, or storekeeper, will be held strictly accountable for the good condition of the supplies, when turned over to the quartermaster's department, for transportation. They will be held accountable for the safe keeping and storage of all supplies entrusted to their charge; and they will require of the quartermaster's department, good and sufficient store-houses for that purpose, and it will be their duty to examine frequently into the state of the stores, and to prevent damage or waste of every description.

Should subsistence stores become damaged or unfit for issue, the assistant commissary of subsistence, or storekeeper having them in charge, will report the same to the commanding officer of the post, who is hereby authorized and required to institute a board of survey, to be composed of two officers, when the service will permit; otherwise, of two respectable persons, well qualified, to act under oath; and all stores found damaged and unfit for issue, from causes other than neglect of the assistant commissary of subsistence, or storekeeper, shall be condemned and sold; the auctioneer's bill of such sale to accompany the account current, and an invoice of the stores thus condemned, with the cause of damage, certified by the board of survey, to accompany the monthly return of stores received and issued; and in case the board of survey be of opinion, that stores have been damaged by the neglect of the assistant commissary of subsistence, or storekeeper, they will make out an invoice of the articles damaged, and certify the same to the commissary general of subsistence, at Washington, who will have the amount of such damaged articles charged to the assistant commissary of subsistence, or storekeeper, in his accounts with the United States.

Issues to the troops will be made on provision returns signed by the commanding officer of the post agreeably to the form hereafter prescribed; and at the end of every month, the assistant commissary of subsistence will make out duplicate abstracts, which will be compared with the original returns, and certified by the commanding officer of the post, one of which abstracts must accompany the monthly returns of provisions received and issued. Issues will be made to men in hospital, on returns signed by the senior surgeon, and the cost of the component parts of the ration, drawn by the surgeon for the sick in hospital, will be charged to them, and they will be credited by the whole return computed at twenty cents per ration; the balance found due the hospital on each return will be expended by the assistant commissary of subsistence, for such articles of poultry, vegetables, milk, &c. as the surgeon may require, taking care that the amount expended does not exceed the sum due; the articles thus purchased

will be accounted for by the assistant commissary of subsistence, in his monthly return, in the same manner as the other stores received and issued. Abstracts for issues to the hospital will be made out by the assistant commissary of subsistence, and certified by the surgeon in the usual form, one of which will accompany the return of stores received and issued.

Officers commanding recruiting parties, distant from depots, will enter into a written contract for the rations necessary for his party; first giving the necessary public notice for proposals. The issues will be made on returns for complete rations, of which abstracts will be made at the end of each month, certified in the usual form; a duplicate or certified copy of the contract will be forwarded to the commissary general of subsistence, at Washington.

At all places where fresh beef can be procured for issue, the assistant commissary of subsistence will purchase, giving, if practicable, public notice for proposals, and he will enter into a written agreement for its delivery at the post, at such times as may be most conducive to the health and comfort of the troops, not exceeding twice a week; a duplicate or certified copy of the agreement to be forwarded to the commissary general of subsistence, at Washington.

When troops are detached to points, where there is no assistant commissary of subsistence, the commanding officer of the post or detachment may appoint an officer to do that duty, who will, while acting, be entitled to the additional pay of an assistant commissary of subsistence; but as such appointments are only made to meet the casualties of service, the officer thus appointed will not be considered on pay, after he has ceased to perform the duties. Officers making appointments of this nature will forthwith report them to the commissary general of subsistence, at Washington.

Assistant commissaries of subsistence and military storekeepers will be located by the commissary general of subsistence, at the several permanent depots, and established posts, and they will not be removed but by orders of the commanding general of the troops, or the commissary general of subsistence, except when posts are evacuated, in cases of arrest, or when required as witnesses before courts-martial; in such cases, a suitable person will be appointed by the commanding officer to do that duty.

The wastage on issues will be ascertained quarterly, or at such other periods, when from the small quantity of provisions on hand it can be readily ascertained; and the actual wastage thus found will be charged in the monthly returns of provisions received and issued.

The empty barrels and boxes, &c. will be sold by the assistant commissary of subsistence, and the amount accounted for in his quarterly account current.

The commanding officer of each garrison or post, where an assistant commissary of subsistence or military storekeeper is stationed, will detail a suitable non-commissioned officer or soldier, to be subject to such duties only, as the assistant commissary of subsistence or military storekeeper may require.

Extra issues of candles, soap, salt, and vinegar, will be made on returns expressing the number of pounds, quarts, &c. the returns will not be entered in the abstract of issues to the troops, or to the men in hospital, but will form an item of themselves, and be entered in the return of provisions received and issued. Should more than one return of this description be made within the month, they will be abstracted, and the abstract will be entered in, and accompany the return. Extra whiskey is usually drawn by the ration, and will be entered in the abstract of provisions issued.

When issues are made to Indians, a separate abstract will be made and entered in the monthly return of provisions received and issued.

At distant stations, where there is a difficulty of procuring provisions, assistant commissaries of subsistence are permitted to sell to officers of the army, such articles of subsistence as they may require, charging them the contract price, to which must be added the cost of transportation; the articles thus disposed of will be entered in the monthly returns of provisions received and issued; and the sums received in payment will be accounted for in the quarterly account current.

It is directed that monthly returns be made to this office, according to the form herewith of all subsistence stores received and issued. The upper columns of the return will exhibit the quantities received from contractors, assistant commissaries of subsistence, storekeepers, and of all purchases made during the month, which, when added together, will show the "total to be accounted for." The lower columns will explain the manner in which these stores have been disposed of. The issues made to the troops, to men in hospital, delivered to assistant commissaries of subsistence, and storekeepers, condemned and sold, wastage, and the quantity on hand, which, when added, ought to correspond with the total to be accounted for. The lower column of the return must be supported by abstracts of issues, to the troops, to men in hospital, receipts of an assistant commissary of subsistence, military storekeepers, the certificates of a board of officers, when provisions are condemned, and also a certificate on honor, as to the waste which has occurred in issuing.

Abstracts of provisions. The total number of rations will be converted into bulk, and placed at the lower line of the abstract, "quantity in bulk," according to the following table: One hundred and ninety-six pounds of flour to the barrel, one hundred and ninety-six pounds corn meal to the barrel, two hundred pounds of pork to the barrel, two hundred pounds of salt beef to the barrel, thirty-two gills of whiskey to the gallon, thirty-two quarts of salt to the bushel, thirty-two quarts of peas or beans to the bushel, and small rations, at the rate of four pounds soap, one and a half pound of candles, two quarts of salt, four quarts of vinegar, and twelve quarts of peas or beans to the hundred rations.

Accounts current will be forwarded at the expiration of each quarter of the year, ending 31st March, 30th June, 30th September, and 31st December. The debit side will exhibit the amount of all moneys expended in the purchase of provisions, and all authorized expenses. Two abstracts are required, the one for all purchases made of subsistence stores, the other of all contingencies, supported by bills regularly receipted, folded to uniform size, endorsed, and entered in the abstract according to date, and the amount of the abstract will be charged in the accounts of the quarter. The credit side will exhibit all moneys received from Government or its agents, and all sums accruing from the sale of damaged provisions, empty barrels, casks, &c.

A book will be kept at each permanent post and depot, ruled to correspond with the monthly return, in which will be entered all subsistence stores received, stating from whom received, and whether they were purchased and paid for; entries will also be made therein of all stores delivered to assistant commissaries of subsistence, and military storekeepers, and at the end of each month the amount of issues to the troops, and to men in hospital, must be included, so as to exhibit a full and accurate statement of all receipts and issues: in case of removal, the book must be left at the post for the benefit of the service.

The component parts of the ration is as follows: Three-quarters of a pound of pork, or one pound and a quarter of fresh beef, or one pound and a quarter of salt beef, or twelve ounces of bacon, eighteen ounces bread or flour, or twelve ounces of hard bread, or one pound and a quarter of corn meal, one gill of whiskey, and at the rate of four pounds of soap, one pound and a half candles, two quarts salt, four quarts vinegar, and twelve quarts peas or beans, to the hundred rations.

The most favorable results are anticipated from carrying into effect the objects contemplated by the general order of the 11th September, 1818, at the following places: Natchitoches, Belle Point, on the Arkansaw, the posts on the Missouri, above Belle Fontaine, and on the Upper Mississippi. At Green Bay and Chicago, and at every post which may be established in the vicinity of the upper lakes. The bread and other vegetable parts of the ration, not exceeding the quantity required for the subsistence of the troops, composing the several garrisons, will be purchased by the assistant commissary of subsistence, at the contract price of the depot, the amount of such purchases will be paid into the hands of the paymaster, or such other officer as the commanding officer may direct, and by him distributed among the officers, non-commissioned officers, musicians and privates of the several garrisons, according to the muster-rolls. The officers will be entitled to fifteen per cent. of the whole amount of sales to the assistant commissary of subsistence, to be equally distributed without regard to rank. It is understood that the stores thus purchased are to be delivered in good order for issue, without expense to the United States. To enable the commissary general of subsistence to make his estimates, frequent reports are required from commanding officers of posts, and assistant commissaries of subsistence, to him, relative to the state of the crops, and of the probable quantity of flour, and of peas or beans, they will be able to furnish.

Each assistant commissary of subsistence, and subsistence military storekeeper, will be allowed a half cord of fuel per month, for the months of November, December, January, February, March, and April, for the use of their storehouses, in addition to their individual allowances.

ARTICLE 73.—*Medical department.*

SURGEON GENERAL.

September, 1818. The surgeon general shall be the director and immediate accounting officer of the medical department. He shall issue all orders and instructions relating to the professional duties of the officers of the medical staff, and call for and receive such reports and returns from them as may be requisite for the performance of his several duties.

He shall receive from the assistant surgeons general and the medical directors of armies, districts, and departments, confidential reports relative to the condition of the hospitals and infirmaries, the character and conduct of the surgeons and mates, the state of their books and accounts, the medical topography of the several posts and stations, the nature of the prevailing complaints, their probable causes, and the treatment adopted.

He shall receive from every surgeon and mate performing the duties of surgeon, quarterly reports of sick, with such remarks as may be necessary to explain the nature of the diseases of the troops, the practice adopted, and the kinds of medicines and stores required; together with a copy of the entries made for the quarter in the book kept for the diary of the weather, accompanied with suitable observations.

He shall receive from every surgeon and mate, having charge of public property of any description for the use of the sick, duplicate semi-annual returns of the same in the form and manner prescribed; and also annual requisitions for the supplies required for each hospital, regiment, post, or garrison for the ensuing year; and transmit them with his remarks and instructions to the apothecary general, accompanied with a statement, to be obtained from the office of the adjutant and inspector general, of the probable number of troops to be stationed at the several posts, &c. for which they are made.

He shall receive from the apothecary general and his assistants duplicates of all invoices of supplies put up for, and delivered or forwarded to, the several surgeons and mates; and also a return of the several articles purchased, with the price or average price of each.

He shall examine the returns and accounts of the surgeons and mates; see that proper vouchers are sent for articles issued, and that the quantities expended with the sick are agreeable to the numbers on the sick reports, and the nature of their complaints; if so he shall certify it, and at the end of each year, and oftener if necessary, send the returns and accounts thus certified to the office of the Second Auditor for final settlement. If he does not receive proper vouchers for issues, and satisfactory evidence that articles so reported have been lost or destroyed by unavoidable accident, he shall forthwith obtain the necessary documents from the person making the return, or transmit the amount to the office of the Second Auditor, to be charged to his account. If, upon comparing the returns with the reports of sick, there appears to have been any improper expenditures of medicines or stores, either in quantity or quality, he will require an explanation thereof from the person making the return, and, if necessary, direct the assistant surgeon general or the medical director to examine the books and accounts of said person, and to ascertain how and why such expenditures have been made; and the amount of any articles proven to have been improperly applied will be charged in the office of the Second Auditor to the account of the person who has thus misapplied them.

He shall keep a register of all the medical officers in service, in which shall be recorded the dates of their appointments, promotions or transfers, the posts and stations at which they have been on duty, and for what length of time at each place, the furloughs they may receive, by whom and for what length of time they were granted, and the time of their return to duty; he shall also enter in this register his remarks on the several reports and returns made to him, together with the substance of the confidential reports of the assistant surgeons general and medical directors, as well as of all other communications he may receive relating to the character, conduct, and professional qualifications of the surgeons and mates, keeping a regular file of the original documents, and submitting the whole from time to time to the examination of the Secretary of War.

He shall make to the Secretary of War such reports and returns as may be necessary to explain all the concerns of the department under his charge; with such remarks relative to improvements in practice and police, and to the clothing, subsistence, &c. of the army, as may seem to be required for the preservation of health, the comfort and recovery of the sick, and the good of the public service.

ASSISTANT SURGEONS GENERAL.

The assistant surgeon general shall be the medical inspector for the division, district, department, or army to which he is attached. It shall be his duty to inspect the hospitals and infirmaries under his charge, according to the instructions he may receive from the surgeon general; to ascertain the manner in which each officer performs his duties; to see that the necessary supplies are received for the sick; that they are of a good quality, and that they are properly expended.

He shall strictly examine the case books, prescription books, and diet books of the surgeons and mates, and from them ascertain the nature of the diseases that have prevailed, their symptoms, the practice adopted, and the result; and hence judge of the professional abilities of the attending surgeon, and ascertain that the quantity and quality of the stores and medicines used are conformable to the nature and duration of the complaints.

From an examination of the book containing the diary of the weather, medical topography of the station or hospital, account of the climate, complaints prevalent in the vicinity, &c., and from suitable inquiries concerning

the clothing, subsistence, quarters, &c. of the soldiers, he will discover, as far as practicable, the probable causes of disease, and recommend the best means of preventing them; and also make such suggestions relative to the situation, construction, and economy of the hospitals and infirmaries, as may appear necessary for the benefit and comfort of the sick, and the good of the service.

He shall examine the books and accounts of the steward; see that his issues of hospital stores and furniture agree with the diet books and written orders of the surgeons and mates, and that he has kept a correct account of the number of rations drawn, agreeably to the register and muster-rolls of the hospitals. Ascertain, also, that the wardmaster keeps a strict account of the bedding, furniture, cooking utensils, &c. received for the use of the hospital; of the articles lost, worn out, or destroyed by order; and also of the clothing, arms, and equipments of every patient admitted, and that they are disposed of agreeably to the regulations on that subject; and that he pays due attention to enforcing the police prescribed, and to the order and cleanliness of the patients, wards, and kitchens.

He shall make to the surgeon general, at such times as he may direct, confidential reports, containing all the information he may obtain concerning the character, conduct, and attention to duty, of the several surgeons and mates; the order and condition of their hospitals and infirmaries, and the state of their books and accounts; with such remarks relative to the causes of diseases, the best means of preventing them, their symptoms, and the treatment adopted, as appertain to the report of a medical inspecting officer.

APOTHECARY GENERAL AND HIS ASSISTANTS.

The apothecary general and his assistants shall purchase all medicines, hospital stores, surgical and other instruments, books, and dressings, required for the public service of the army. The articles so purchased shall be carefully packed under their direction, and by them delivered either to the surgeons or to a military storekeeper, or to a quartermaster, for transportation to the places of their destination and use; and all parcels so packed shall be legibly marked with the name of the place to which they are to be sent, or of the regiment or corps for which they are intended, and accompanied with an invoice of the articles contained in them, a duplicate of which shall be forwarded to the surgeon general.

They shall make no issues but upon the annual requisitions or estimates received from the surgeon general, except in extraordinary cases, as the marching of a detachment, the arrival of a greater number of men at a post than had been estimated for, the loss or miscarriage of any articles, unusual expenditure from a sickly season, &c. All which issues shall be regulated by the standard supply table, and made upon the requisition of the attending surgeon, countersigned by the commanding officer.

They shall compound and prepare such medicines as may be thought necessary for the good of the service; cause suitable medicine chests to be constructed, according to the directions of the surgeon general, and furnished to the several hospitals, regiments, posts, and garrisons.

They shall make quarterly returns of their purchases to the Second Auditor, accompanied with invoices of the articles purchased, for which they shall be charged; and nothing will exonerate them from such charge but the receipt of a surgeon, military storekeeper, quartermaster, or other person authorized to receive supplies of this nature, or a certificate on honor, for what may have been expended in the apothecary's department, stating for what purpose. If articles become damaged or unfit for use, they will not be taken off the books of the Second Auditor to their credit until sold by order of the War Department.

They shall make an annual return to the surgeon general, on the 30th of September, of the medicines, instruments, hospital stores, books, dressings, bedding, and stationary purchased by them, with the price, or average price of each; and also a return of the articles remaining on hand at that time.

The assistant apothecaries general will purchase, receive, and issue whatever articles the apothecary general may deem necessary to have purchased or issued in their respective districts, making returns of the same to him.

SURGEONS ATTENDING GENERAL HOSPITALS.

The senior surgeon shall be *ex officio* medical director and inspector of hospitals for the army or district to which he is attached. He shall enforce the rules and regulations given for the government and direction of the surgeons and mates; examine, and if he approve, countersign all requisitions upon the apothecary general or his assistants, except that made on the 31st of December, for the ensuing year; and, as inspector of hospitals, he shall perform all the duties required of the assistant surgeon general.

The surgeon attending a general hospital shall observe the instructions of the assistant surgeon general and of the medical director in every thing relating to the hospital under his charge; superintend its construction, government, and police, and be held responsible for the manner in which the subordinate officers perform their respective duties.

He shall keep a register of all patients admitted into his hospital, in the form and manner prescribed.

He shall receive and carefully preserve the descriptive list of each individual, noting on it any payments made, or clothing issued to him while in hospital. Should any surgeon or mate send patients to his hospital, without the report required by the regulations, and certified copies of their descriptive lists, or should they be sent by any officer of the line without their descriptive lists, it shall be his duty forthwith to demand them, and if they be not sent within a reasonable time, or some good cause given for the neglect, he shall immediately apply to the commanding officer for the arrest of such delinquent on the charge of disobedience of orders.

He shall keep a *case book*, *prescription book*, and *diet book*, in which shall be daily recorded the symptoms in every important case, together with the medicines and diet prescribed; and these shall serve as a guide to the assistant surgeon or apothecary in delivering the medicines, to the steward in distributing the stores, and for the information of the medical inspector. He shall keep a diary of the weather, in the form and manner prescribed, noting every thing of importance relating to the medical topography of his station, the climate, complaints prevalent in the vicinity, &c., and also an orderly book, in which shall be transcribed all orders concerning, or any ways relating to, the medical department.

He shall divide his hospital into as many wards as he may have medical attendants, and every morning, at as early an hour as practicable, visit each ward, prescribe himself in all important cases, and consult with the attending surgeon; and in the evening inquire of the resident surgeon the state of the sick, and again visit such as may require particular attention.

He shall, as far as practicable, assign appropriate wards to the patients, according to the nature of their complaints; be careful that the wards are well ventilated, and the patients not too much crowded; by a rigid attention to police prevent, if possible, the origin of contagion, and, should it appear, make every exertion to counteract it by enforcing personal cleanliness, and by frequent changes of linen, bedding, &c.

He shall prescribe such rules and regulations as he may think necessary for the direction of the attendants, and the order, cleanliness, and convenience of his patients; and cause them to be printed or written in a legible hand, and hung up in some conspicuous place in each ward.

He shall, from the descriptive lists in his possession, make regular muster-rolls of the patients in his hospital, and also of his stewards, wardmasters, cooks, nurses, and matrons, in the form prescribed, for the examination and certificate of the inspector general, or officer acting as such, as in other cases of muster and inspection for payment.

He shall see that his steward makes out correct returns for rations, agreeably to the number of patients and attendants present; direct what part of the ration shall be retained, and sign the requisitions.

In lieu of the rations or parts of rations retained, he shall make requisitions upon the deputy commissary of subsistence for such supplies of vegetables, poultry, milk, &c. as he may think necessary for the use of the sick, provided that the cost of the articles so purchased does not exceed the value of the rations and parts retained, estimating the whole ration at twenty cents.

He shall once a month examine the books and accounts of his steward and wardmaster; see that the hospital stores have been properly applied; that the arms, clothing, and equipments of the patients are cleansed, numbered, marked, registered, and deposited in the wardmaster's room; and that a regular account is kept of the furniture, bedding, &c. in use in the hospital; and if any attendant or patient shall be convicted of wilfully destroying or purloining any article of public property, the amount of its value shall be charged to him by the surgeon on his descriptive list, and deducted from his pay at the next payment; and it shall be the duty of the surgeon to prosecute any citizen who may buy or receive public property of any description from any one attached to the army, agreeably to the law on that subject.

ASSISTANT SURGEONS TO GENERAL HOSPITALS.

The assistant surgeons shall obey the orders and instructions of the senior surgeons, see that subordinate officers attend strictly to their duties, and aid in enforcing the regulations of the hospital.

Each assistant shall accompany the surgeon in his morning visit to the ward assigned to his particular charge; make the proper entries in the case book, prescription book, and diet book; and from the latter fill up the diet table for the day. In the evening he shall again visit his ward, and, if necessary, report to the surgeon.

He shall be responsible for the proper distribution and administration of the medicines prescribed, for the manner in which the wardmaster and nurses perform their duties in his own division, and that the patients conform to the prescribed regulations.

One of the assistant surgeons shall be detailed daily to reside within or near the hospital, at all hours of the day and night. He shall prescribe in urgent cases; examine such patients as may be sent to the hospital; see that they are regularly entered in the register, that their descriptive lists are filed, and, if they do not bring them, report it forthwith to the surgeon; that the wardmaster takes charge of their clothing, arms, and equipments; that they are washed, furnished with clean garments, and placed in their appropriate wards, and report to the surgeon the next morning, and immediately in important cases. He shall make the proper entries in the book containing the diary of the weather, and, as police officer of the day, see that all the orders and regulations of the hospital are duly attended to.

One of the assistant surgeons shall take charge of the books of the hospital, viz: the register, case book, prescription book, and diet book, that containing the diary of the weather, and the orderly book; and shall call at the office of the adjutant generals every day, or as often as may be convenient, and transcribe all orders relating to the medical department. He shall also take charge of the descriptive lists of the patients, and have them regularly filed according to their companies and regiments or corps.

One assistant surgeon shall take particular charge of the dispensary, instruments, and medicines; keep an account of expenditures, agreeably to the prescription book; make out the regular semi-annual returns of medicines, instruments, stores, &c., and present them to the surgeon for his examination and signature.

HOSPITAL STEWARD.

It shall be the duty of the steward to receive and take charge of all hospital stores, furniture of every description, and supplies purchased for the use of the sick; to keep a roster of the nurses and attendants; and from this and the register to make out returns for rations agreeably to the number in hospital, and present them to the surgeon for his examination and signature; to receive and distribute the rations; and to submit his books and accounts to the surgeon for examination at the end of each month.

He shall issue the hospital stores and other supplies to the cooks and nurses, and enter in a book daily the amount of each article delivered; for which the diet book and written orders of the surgeon and assistant surgeon shall be his vouchers. He shall deliver to the wardmaster such articles of bedding, furniture, cooking utensils, &c. as shall by written orders be directed for the use of the hospital; be responsible for the order and neatness of the store room; and on no account allow any of the patients or attendants to enter it in his absence, or to remain there longer than may be necessary to obtain their supplies.

WARDMASTER.

The wardmaster shall receive from the steward all the furniture, bedding, cooking utensils, &c. required for the use of the hospital, and be held responsible for them. He shall keep a book in which shall be recorded the articles distributed to the several wards and kitchens, holding the nurses and cooks responsible for whatever he may deliver them. He shall once a week take an inventory of every thing in use, and report to the surgeon whatever is missing, worn out, or destroyed by order, and also the name of any patient or attendant whom he may suspect of wilfully destroying or purloining any species of public property.

On the admission of a patient, he shall take charge of his clothing, arms, and equipments; see that they are made perfectly clean; that they are registered in a book which he shall keep for the purpose, numbered, labelled with the name, rank, company, and regiment or corps of the owner, and deposited in an appropriate apartment; and, in case of his death, he shall deliver the surgeon an inventory of the abovenamed articles, together with any money, &c. left by him.

The cooks, nurses, and attendants shall be under his immediate direction, and subject to his orders. He is responsible for the cleanliness of the patients and attendants of the kitchens, wards, furniture, and cooking utensils. He shall call the rolls of the wards at sunrise and sunset, and report absentees; see that every patient is washed and his hair combed every morning, and shaved, when his case will permit, at least thrice a week; that the wards are swept and sanded, and the beds made, before the time of the morning visit of the surgeon; that the close stools and spit-boxes are made perfectly clean every morning, and the pans emptied and washed immediately after being used, and partly filled with powdered charcoal and water; that the beds and bedding are frequently aired and exposed to the sun, and the straw changed once a month, and oftener if necessary; and, when a patient dies, that the straw is burned, the bunk, bed-sack, and bedding cleansed and returned to the steward, if not wanted in the hospital.

REGIMENTAL SURGEONS.

The regimental surgeon shall obey the instructions of the assistant surgeon general and the medical director, be responsible for the order and neatness of his hospital or infirmary, for the manner in which his mates and attendants perform their respective duties, and for the comfort and convenience of those sick in quarters.

He shall observe all the regulations given for a surgeon attending a general hospital in relation to the register, case book, prescription book, diet book, orderly book, and that containing a diary of the weather, the medical topography of his post or station, &c., and also all those respecting the ventilation of his hospital; preventing or obviating the effects of contagion; prescribing suitable police regulations; making out muster-rolls of his nurses and attendants; signing requisitions for rations, directing what part shall be retained; making returns for vegetables, poultry, &c.; examining the returns, books, and accounts of his steward and wardmaster, and punishing those who wilfully destroy or purloin public property, or receive any property thus purloined.

He shall receive written morning reports of sick from the orderly sergeant of each company, who shall see that those reported present themselves at the place appointed by the surgeon, and be present himself at their examination; he shall immediately report all cases of feigned sickness to the commanding officers of companies, prescribe for those who are able to remain in their quarters, and send those who require it to the hospital; he shall then visit his hospital, prescribe himself in all important cases, and in the evening again see those who require particular attention.

Unless when specially directed, or in uncommon cases, he will send no patients to the general hospital, except his own be crowded, or he be ordered to march, when he will send all whom he may judge unable to accompany the regiment, and with them a report, in the form prescribed, stating their names, rank, &c., together with a general account of the symptoms and duration of their complaints, and the treatment adopted; and he shall on no account neglect to obtain from the commanding officers of companies certified copies of their descriptive lists, and to transmit them, together with their clothing, arms, and equipments, to the surgeon having charge of the hospital.

He shall designate to the commanding officer those who should be allowed to ride, or have their knapsacks, &c. carried in the wagons; accompany the regiment; be within call in case of accident; and at all times have his instruments and dressings ready and at hand to attend the wounded.

He shall accompany the officer appointed to select ground for an encampment, and, as far as consistent with other arrangements, recommend such places, and that the tents be pitched in such manner as may be best calculated to protect the soldier from the inclemencies of the weather; and, when necessary, advise that the floors be raised, or other means taken to prevent the bad consequences of low and uneven positions.

When his regiment is in quarters or permanent encampments, he shall immediately point out, and the quartermaster shall furnish, a suitable place for the reception of the sick; and, whenever it is practicable, he shall procure for this purpose some building in the vicinity, only putting his patients in tents when absolutely necessary. He shall frequently visit the tents, see whether they are kept as dry as the nature of the ground will permit, and whether they are clean, and occasionally aired and struck. When in quarters, he shall from time to time inspect the rooms and kitchens, and so far direct the manner of preparing the food as he may think necessary for the health of the soldiers; examine the quality of the various parts of the ration, and immediately report to the commanding officer any defects he may discover; see that the vaults are dug at a proper distance from the camp, and frequently covered with fresh earth; and, either by special reports, or in his remarks on his morning reports, make such observasions and suggest such improvements upon all these points, as he may think necessary to preserve the health of the troops, and for the comfort, convenience, and recovery of the sick; and the commanding officer of his regiment shall issue such orders as he may think necessary and proper to remedy the evils and supply the defects thus reported to him.

He shall report to the commanding officer of companies such men as are unfit for service; furnish a certificate to those entitled to pension, in the form prescribed; and accompany the inspecting officer on muster and inspection days, and see that they are mustered accordingly.

REGIMENTAL MATES.

When the number of patients permits, and both mates are present, the hospital shall be divided into two equal wards, which shall be under the immediate direction of the respective mates. They shall accompany the surgeon in his morning visit; make the proper entries in the case book, prescription book, and diet book; frequently visit the hospital during the day, and report to the surgeon in the evening, and oftener in urgent cases; attend to the preparation and distribution of the medicines; assist in making out the proper reports and returns; see that the nurses are attentive to the sick, and regularly administer the medicines prescribed; and that the regulations of the hospital are strictly attended to.

If both mates be present, the senior shall take charge of the register, and see that each patient be regularly entered therein; that the diary of the weather be properly kept; and that the steward and wardmaster attend to all the duties required by the regulations. The junior shall have particular charge of the medicines and instruments, and be responsible to the surgeon for their good condition; and see that all orders relating to the medical department are transcribed in the orderly book.

In the absence of the surgeon, the senior mate present shall perform his duties.

POST SURGEONS.

The post surgeon shall obey the instructions of the assistant surgeon general and medical director; be responsible for the order and cleanliness of his hospital, the manner in which his attendants perform their duties, and for the comfort and convenience of the sick.

He shall observe all the regulations given for the surgeon attending a general hospital, in respect to the books and accounts to be kept; the ventilation of his hospital; preventing and obviating the effects of contagion; prescribing suitable police regulations; making out muster-rolls of his nurses and attendants; signing requisitions for rations, and directing what parts shall be retained, making returns for vegetables, poultry, &c. examining the books and accounts of the steward and wardmaster; and punishing those who destroy or purloin public property, or who receive any property thus purloined.

He shall also observe all the regulations given for the regimental surgeon, in respect to receiving morning reports; reporting cases of feigned sickness; visiting his hospital, and prescribing for his patients, selecting a suitable place for their reception, inspecting the tents or quarters and kitchens, and directing the manner of preparing the food; examining the quality of the rations, making special reports to the commanding officer, or suitable remarks on his morning reports, upon whatever may conduce to the health of the troops or recovery of the sick, reporting those unfit for service; furnishing certificates for pension, attending the inspecting officer, and seeing them mustered accordingly.

STEWARDS AND WARDMASTERS OF REGIMENTS, POSTS, OR GARRISONS.

Every regimental surgeon may, with the consent of the commanding officer, select an active, intelligent non-commissioned officer, and every post surgeon a private, who shall be permanently attached to the hospital, and act as steward and wardmaster; and who shall observe all the regulations above given for the direction of the steward and the wardmaster of a general hospital. Citizens may be employed in lieu of soldiers, at the option of the surgeon; if engaged for the hospital or infirmary of a regiment, they will be allowed sixteen dollars per month, and one ration per day; if employed at a post or garrison, they will receive ten dollars per month, and one ration per day.

Of reports, returns, requisitions, &c.

Every surgeon, and mate acting as surgeon, shall make a quarterly report of the sick to the surgeon general in the form and manner prescribed, with remarks relative to the nature and symptoms of the complaints reported, the treatment adopted, and the medicines and stores most in demand; and also transmit therewith a correct copy of the entries for the quarter in the book kept for the diary of the weather, with his observations upon the medical topography of the post, station, or hospital; the climate, prevalent diseases, and their probable causes.

Every surgeon and mate, having charge of the sick, shall make a monthly report to the medical director of the army or district to which he belongs; and every one attending the sick of a regiment, post, or garrison, shall make a morning to report the commanding officer in the form prescribed.

All surgeons attending recruiting rendezvous will make monthly reports to the surgeon general of the number of men examined by them, in the form prescribed.

Every surgeon and mate, on being ordered to a new station, shall immediately inform the surgeon general thereof, and also from whom he received the order; on receiving a furlough, he shall also report it, stating by whom and for what length of time it was granted; and report himself once a month until his return to duty.

All applications of post surgeons for change of stations shall be made to the commanding generals of division; and will be immediately reported to the surgeon general, with the reasons assigned therefor.

Every surgeon and mate having charge of public property of any description for the use of the sick, shall make duplicate returns of the same to the surgeon general on the 31st of March, and the 30th of September, annually; and on the 31st of December, make also, agreeably to the standard supply table, duplicate requisitions or estimates of the supplies required for the ensuing year, noting the number of troops for which they are made.

On receiving supplies, they shall immediately report to the surgeon general their quality and condition; and whether the articles received agree with the invoice of the apothecary general or his assistant.

The regular supplies of medicines, instruments, hospital stores, bedding, dressings, medical books and stationary will be purchased by the apothecary general and his assistants only, agreeably to the annual requisitions of the surgeons and his mates. Whenever an extra supply is required, in consequence of the marching of a detachment, the arrival of a greater number of men at a post than had been estimated for, the loss or miscarriage of any article, unusual expenditure from a sickly season, &c. requisitions, agreeably to the standard supply table, will be made for them by the attending surgeon, and countersigned by the commanding officer of the regiment, post, or detachment; and if they cannot be conveniently obtained from the apothecary general or his assistant, they may be purchased by the surgeon, or an officer of the quartermaster's department. Duplicates of such requisitions will, in all cases, be immediately forwarded to the surgeon general, and the reasons stated which rendered them necessary.

Requisitions for cooking utensils and such other articles of hospital furniture as cannot be conveniently obtained from a commissary of purchases, or a military storekeeper, will be made upon an officer of the quartermaster's department, who will furnish the articles required, the requisitions being countersigned by the commanding officer of the department, regiment, or post.

When a surgeon is ordered away from the medical supplies under his charge, he shall immediately make to the surgeon general a return of all articles received, expended and issued since his last regular return, accompanied with a receipt in detail for the remainder, if he be relieved by a surgeon; but if he deliver it to the quartermaster of a regiment or post, a military storekeeper, or other person than a surgeon, he shall, with the returns, and one of the receipts given him, transmit an invoice of the articles delivered, certified on honor, a copy of which invoice, signed by him, shall be left with the medicines, stores, &c. And when any surgeon or apothecary receives the articles thus left with a quartermaster, military storekeeper, &c. he shall, in his next return, state by whom they were left, as well as from whom they were received.

Surgeons receiving a furlough will be held responsible for all public property under their charge; they will, therefore, take duplicate receipts for the same; and if they be absent three months, they will be required to transmit to the surgeon general returns, receipts, and invoices, as directed in the preceding regulation.

Medical and hospital supplies are not to be detained or diverted from their destination, except by generals of division, and commanding officers of departments, in cases of absolute necessity; when a report will be promptly made to the adjutant and inspector general, that further orders for deficiency may be given.

Whenever any instruments, stores, &c. put up for, and directed to one post, garrison, regiment or hospital, are, by the orders of any officer, taken for the use of another, it shall be the duty of the surgeon receiving them to report the circumstance immediately to the surgeon general, and to transmit to him a certified copy of the order, the reasons for which it was given, and a receipt for the articles; and also, when practicable, to notify the surgeon for whom they were intended, and on the receipt of his own supplies to furnish him with the same amount.

General instructions.

Surgeons of regiments will have precedence over post surgeons, and post surgeons will have precedence of regimental mates; in these several grades further reference will be had to date of commissions. In the choice of quarters, the medical staff will have precedence of subalterns, under the direction of the commanding officer, who may always claim precedence of those under his command.

Every surgeon having charge of a general hospital, shall appoint his own steward, wardmaster, cooks and nurses; and if they be taken from the line of the army, it must be with the consent of the commanding officer of the army, district, or department. Every surgeon of a regiment, post, or garrison, shall also, with the consent of his immediate commanding officer, select his attendants. They shall be permanently attached to the hospital or infirmary, and exclusively under the orders of the surgeon and mates; and shall not be removed, except for misdemeanor, and at the request of the surgeon, unless in cases of urgent necessity; and then only by the order of the commanding officer of the district, department, army, regiment, post, or garrison to which they belong.

The following will be the allowance of attendants on a hospital or infirmary in ordinary cases: To a general hospital, one nurse to every ten, one matron to every twenty, and one cook to every thirty patients. To a regimental hospital, one non-commissioned officer as steward and wardmaster, one cook, two matrons and four nurses.

To a post or garrison, with one company, one private, as steward and wardmaster, and two nurses, or one nurse and one matron; for each additional company, one nurse. The non-commissioned officer who acts as steward and wardmaster, to receive twenty cents per day extra pay, and the private employed as steward and wardmaster to receive fifteen cents per day extra pay. The matrons to receive six dollars per month, and one ration per day.

The allowance of quarters, fuel, and straw for the sick, and of wagons for transporting medicines, stores, furniture, &c. will be regulated by the surgeon and commanding officer or medical director; the requisitions to be made by the former and countersigned by the latter.

Hospital stores will be furnished only to the officers, non-commissioned officers, musicians, privates, and enlisted artificers and laborers in the service of the United States; and medicines only to them and their families.

Whenever a soldier is sent to a general hospital, or left in the hospital or infirmary of a regiment, post, or garrison, it shall be the duty of the officer or surgeon sending or leaving him, to furnish a certified copy of his descriptive list to the surgeon taking charge of him; who shall, on the return of the soldier to duty, transmit it to the officer under whose command he is put, with a certificate of any payments made or clothing issued to him while in hospital.

Should a soldier leave a hospital on furlough, he shall be furnished with a certified copy of his descriptive list; should he desert, it shall be the surgeon's duty to advertise him in the usual manner; and in case of his death, his descriptive list shall be preserved in the hospital for the benefit of his friends and heirs, and on it shall be stated the amount of clothing, money, &c. left by him; and the surgeon shall, in all these cases, forthwith inform the commanding officer of his company or regiment of the facts and the attending circumstances; and also of the time to which those who die were last paid, and the money and effects in their possession at the time of their decease.

Patients will not be removed from an hospital until reported by the surgeon for duty, except in cases of emergency; and then only by the order of the commanding officer of the post, regiment, or army.

Whenever a soldier is rendered incapable of performing military duty by reason of wounds or injuries received in service, and while in the line of his duty, any surgeon or mate of the army, upon obtaining sufficient evidence of the fact, the time, place, and manner of its occurrence, shall furnish him with the necessary certificate to obtain his discharge and pension in the form prescribed; *a duplicate of which, he shall, in all cases, forward to the adjutant and inspector general.*

No candidate shall receive the commission of surgeon or mate in the army, who has not obtained a diploma or certificate from some respectable medical school, college, or society, or passed the examination of an army medical board.

No surgeon of the army shall be engaged in private practice.

When any officer employs a citizen surgeon, he shall immediately inform the surgeon general of his name and place of residence, and also cause him to be furnished with a copy of the regulations of the medical department.

Citizens employed as surgeons will be allowed the following rates of compensation: For attending a post, garrison, or detachment of one hundred and upwards, including soldiers' wives, forty dollars per month; of from fifty to one hundred thirty dollars per month; and for attending any number under fifty, twenty dollars per month, exclusive of medicine. When they furnish their own medicine, they shall be allowed an addition of from twenty-five to fifty per cent. upon their pay, the proportion to be determined by the surgeon general or medical director. If engaged to accompany a regiment or detachment on a march or expedition, they will, while actually thus employed, be allowed the full pay and emoluments of a regimental surgeon's mate. They will be required to make quarterly reports of sick to the surgeon general, and morning reports to the commanding officer, in the form and manner directed for the surgeons of the army; and when they have charge of public property of any description, they will make returns of the same, at the times, and in the manner required by the regulations, or as often as the surgeon general may direct.

Their accounts must be accompanied with a certificate from the officer employing them, of the number of men under his command, and the length of time they were employed, and also with a report of the sick under their charge; or of the cases that may have occurred subsequent to their last quarterly reports.

Recruiting officers will, if necessary, employ citizens agreeably to these regulations; the rate of compensation to be determined by the average number present during the month. If engaged merely to inspect recruits, they will be allowed one dollar per man, for inspecting and signing the necessary certificates.

The accounts of citizen physicians for attendance upon officers of the army will state the charge for each visit, and be accompanied with a certificate from the physician, that they are the usual charges of the place, and by one from the officer that the attendance was given, that he was not on furlough during the time, and that no surgeon of the army could be obtained.

No citizen shall be employed to inspect or attend recruits at posts or places where there is a surgeon or mate belonging to the army. When there is more than one recruiting party in a place, the senior officer will engage a surgeon to attend the whole.

Surgeons shall be particularly attentive to the examination of recruits, and will suffer no man to pass, who has not, at his examination, been stripped of all his clothes, in order to ascertain, as far as possible, that he has the perfect use of all his limbs; that he has no tumors, ulcerated legs, rupture, nor chronic cutaneous affection, nor other infirmity, which may render him unfit for the active duties of the field; and it shall be their duty to ascertain, as far as practicable, whether he is an habitual drunkard, or subject to convulsions of any kind. With any of these defects the man is to be rejected as unfit for service; and any surgeon or mate, who shall suffer any one to pass, without a careful examination on all these points, shall be dismissed the service; and the accounts of no citizen shall be allowed who does not conform to this regulation in every particular.

Invalids having piles or other infirmity, not always to be discovered by the inspecting surgeon, who shall impose themselves upon recruiting officers as sound and able bodied men, shall previous to dismission be put into close confinement, or otherwise punished at the discretion of a court-martial as swindlers and impostors.

Whenever a recruit arrives at the post, garrison, station, or depot, to which a surgeon is attached, or joins the regiment or corps to which he belongs, it shall be his duty forthwith to ascertain whether he has had the variolous or vaccine infection, and if he has not, to see that he be vaccinated as soon as practicable; and for this purpose he shall constantly keep good matter on hand, making application to the surgeon general for a fresh supply as often as may be necessary.

Article 74.—*Recruiting regulations.*

Recruiting stations, or principal rendezvous of regiments and corps will be designated, and the recruiting carried on under the orders of the commandants of divisions and departments, conformably to arrangements of the War Department.

The colonel or commanding officer of each regiment and corps will, when required, select from his regiment or corps, a field officer, or captain, to superintend the recruiting thereof, and a competent number of platoon offi-

cers, non-commissioned officers, and musicians will be placed under his command for this service. A surgeon's mate will also be detailed with such party, subject to the orders of the superintending officer.

The officer charged with the superintendence of the recruiting service will distribute the parties within the district assigned for the recruiting of his regiment or corps, as he shall find most advantageous for this service. He will often visit the different parties, supply the officers with funds, and see that they attend to the duties assigned them; and whenever recruits are not obtained, from any cause, other than the fault of the officer, the station will be changed; but if it appear to arise from the fault of the officer, he will be reported to the commanding officer of the regiment, and recalled.

So soon as the recruiting station of a regiment or corps is fixed, the superintending officer will make his authorized requisitions, for clothing and camp equipage, to the commissary general of purchases, at Philadelphia, and his requisitions for arms and equipments to the ordnance department, Washington city; and at the same time will give notice to the contractor to supply rations. He will also transmit copies of those estimates and requisitions, with an estimate for recruiting funds, direct to the adjutant and inspector general's office.

In making enlistments, officers will be particularly careful to adhere strictly to the prescribed forms. They will see that the recruit has a perfect understanding of the period of time for which he engages to serve, and that such period of time be written at large in his enlistment.

All enlistments must be accompanied by the certificate of the examining surgeon, and the receipt of the recruit for the bounty he has received.

Enlistments will, in all cases, be taken in duplicate; one will be kept by the recruiting officer, as a voucher in the settlement of his accounts, the other he will forward to the officer superintending, who will, at the end of every month, forward direct to the adjutant and inspector general's office, such duplicate enlistments, accompanied with a roll containing the names of all recruits enlisted within the month, and by whom they were enlisted; also a return, in the prescribed form, of all recruiting parties under his superintendence, with the names, times, and places of all desertions and deaths within the month; and he will, at the same time, forward to the commanding officer of the regiment a duplicate of such return. And whenever recruits shall be enlisted at the station of any regiment, corps, company, or detachment, the commanding officer of the regiment or battalion, as superintendent, will require of the enlisting officer the like duplicate enlistments, and will himself forward direct to the adjutant and inspector general's office, such duplicate enlistments, roll of recruits, returns, &c., as are above required of the superintendent.

Superintendents of the recruiting service will transmit monthly accounts and vouchers for bounties and premiums, monthly accounts and vouchers for contingencies, and quarterly accounts and vouchers for clothing, arms, accoutrements, and camp equipage, to the Second Auditor of the Treasury Department.

As soon as practicable, every recruit will take and subscribe the necessary oath, agreeably to the tenth article of "the rules and articles for the government of the armies of the United States."

If any recruit, after having received the bounty, or part thereof, shall abscond, he is to be pursued and punished as a deserter.

Every officer superintending the recruiting service, where there shall be no quartermaster, will procure the necessary transportation, forage, fuel, straw, and stationary, taking the requisite vouchers.

No party shall be detailed on the recruiting service, unaccompanied by a commissioned officer, unless by a special permission of the superintending officer.

All recruiting officers are expressly forbidden to enlist any man having ulcerated legs, scalded head, rupture, or scurvy, or an habitual drunkard, or one known to have epileptic fits, or other infirmity, which unfits him for the active duties of the field; and any officer who shall enlist such man, and any surgeon or surgeon's mate who shall certify his fitness for service, shall, on proof thereof, be dismissed the service.

Surgeons are to be particularly attentive to the examination of recruits, and shall not suffer any man to pass who has not, at his examination, been stripped of his clothes, to the end that it be ascertained, as far as possible, that he is fit for active service in the field.

All free male persons, above eighteen, and under thirty-five years, who are able-bodied, active, and free from disease, may be enlisted, and whenever a recruit who is under age, shall have a parent, guardian, or master, his consent shall be obtained, in writing, and accompany the enlistment, which is sent to the adjutant and inspector general. Any loss accruing from non-observance of this rule will be borne by the recruiting officer.

The limitation of age does not apply to soldiers who may re-enlist.

Recruits shall not be mustered for payment until they join their regiments or corps.

The premium of two dollars to the recruiting officer is to be paid after the recruit has been mustered, and is in compensation for extra expense.

The bounty of twelve dollars to the recruit will be paid, the one-half when he shall have signed his enlistment, the other half when he shall have mustered and joined his regiment or corps.

Officers superintending the recruiting service may, whenever they think the good of the service will be promoted thereby, direct the recruits, or any part of them, to be sent to the principal rendezvous; and whenever a party of recruits shall be so sent, they will be accompanied by a perfect descriptive list and account of bounty, clothing, &c., agreeably to the prescribed form; and whenever the numbers at any principal rendezvous shall authorize the measure, a company shall be organized from the same, the proper descriptive roll and accounts be made out, and the company be put in march, with a competent number of officers, for the head-quarters of the regiment or corps.

Every superintending officer of recruiting service will be held strictly responsible for the order, discipline, and good conduct of the parties under his command. No recruiting officer shall be liable to orders, for other duties, until he shall be regularly relieved from the recruiting service.

Soldiers enlisted by the officers of any particular regiment shall be given over to that regiment, and no transfer of soldiers from one corps to another will be made, without the assent of the officers commanding both corps, or by the orders of the War Department. And whenever any transfer of soldiers shall be made, the commanding officer of the company or detachment to which they belong shall furnish a complete descriptive list, and account of pay, bounty, clothing, &c., of every soldier, so transferred.

[*January* 15, 1818. Recruits cannot be paid the retaining bounty until after they have joined the corps in which they are to serve, and have been mustered in the same.

Every soldier who may desert shall forfeit all the pay and bounty due to him at the time of his desertion.

Every recruit who has been mustered present, fit for duty, and who may be subsequently discharged as a minor, shall forfeit the pay and bounty due at the time of his discharge.

Every recruit who, at the first muster, is returned unsound, shall not be considered an effective, able-bodied citizen, and shall be discharged without pay or retained bounty.

Every recruit who has passed muster, and who shall within three months thereafter be discharged for inability, unless the inability be contracted by exposure in the performance of his duty, shall forfeit the retained bounty, and the pay due him at the time of his discharge.]

[*January* 29, 1819. The better to secure the accountability and preservation of the clothing, camp equipage, and arms, and equipments drawn by officers, on the recruiting service, and to prevent the accumulation of such supplies at recruiting depots, it is hereby ordered, that, except such clothing as may be left by deserters, which is to be reported to the commissary general, all surplus clothing, camp equipage, and arms and equipments, drawn by officers superintending the recruiting service, shall be transported to the head-quarters of the regiments and corps for which it was drawn, for the regular issue and use of such corps; and the recruiting officers who have had charge of such supplies, shall be accountable for all deficiencies in quantity and condition.]

Every departure from these rules, and every neglect in making the prescribed returns, will be considered a positive disobedience of orders, and punished accordingly.

All communications for the War Department, relating to the recruiting service, will be addressed to the adjutant and inspector general.

Article 75.—*Transfers.*

1. The transfer of officers will only be made by the War Department, in orders, on the mutual application of officers; and in no case will an officer of any regiment or corps be put into another, where the transfer would prejudice the rank of any officer in such regiment or corps; and, whenever officers are so transferred, the order for their change of stations shall specify the fact, and shall not entitle them to transportation of baggage.

2. Soldiers enlisted by the officers of any particular regiment, shall be given over to that regiment, and no transfer of soldiers from one corps to another will be made, without the assent of the officers commanding both corps, or by the orders of the War Department. And whenever any transfer of soldiers shall be made, the commanding officer of the company, or detachment, to which they belong, shall furnish a complete descriptive list, and account of pay, bounty, clothing, &c. of every soldier so transferred.

Article 76.—*Miscellaneous Rules.*

Generals will appoint their own aids-de-camp, who must, in all cases, be taken from the subalterns of the line. Major generals are allowed two aids-de-camp, and brigadier generals one aid-de-camp, each. No more than three aids-de camp will be taken from the corps of artillery stationed in either division, and not more than one aid-de-camp from a regiment.

No officer shall be permitted to hold two staff appointments at the same time.

The appointment of all aids-de-camp, and adjutants and quartermasters of regiments and battalions, will be forthwith reported to the adjutant and inspector general.

Whenever a storekeeper is required by the commissary general of purchases, or the ordnance department, the circumstances rendering such appointment necessary will be reported to the War Department, by whom the appointment will be made, if deemed necessary.

All officers, whatever may be their rank, passing through a garrison town, or established military post, shall report their arrival at such town or post, to the commanding officer, by written notice, if the officer arriving be elder in rank, and personally, if he be younger in rank than the officer commanding.

All officers arriving at the seat of Government will, in like manner, report to the adjutant and inspector general.

No furlough shall be given during a campaign, but by the general commanding the district or army, and for the cause of disability, which disability shall be certified by a regimental or hospital surgeon.

Furloughs shall, beside expressing the term of time granted to absentees, express also an order to join the regiment, post, or garrison to which they may belong.

No order shall be given to officers seeking a furlough for their own convenience, which shall have the effect of entitling them to an allowance for transportation of baggage.

Any commissioned officer of the army of the United States who shall send or accept a challenge to fight a duel, or who, knowing that any other officer has sent or accepted, or is about to send or accept a challenge to fight a duel, and who does not immediately arrest and bring to trial the offenders in this case, shall be dismissed the service of the United States.

No claims for extra services will be allowed on account of attendance on courts-martial, whether as members or as witnesses, if performed by officers on furlough, or on duty, at the post or place where such court is held.

All claims of allowance for extra services, and contingent accounts requiring the special sanction of the Secretary of War to the accounting officers, must be rendered within six months after the services, or expenditures, where it may have been within the power of the officers to comply with the regulations.

Medical and hospital supplies are not to be detained or diverted from their destination, except by generals of division, and commanding officers of departments, in cases of absolute necessity, when a report must be promptly made to the adjutant and inspector general, that further orders for deficiency may be given.

Surgeons of regiments will have precedence over post surgeons, and post surgeons will have precedence of regimental mates; in their several grades, further reference will be had to date of commissions. In the choice of quarters, the medical staff will have precedence of subalterns, under the direction of the commanding officer, who may always claim precedence of those under his command.

Patients will not be removed from a hospital, until reported by the surgeon for duty, except in cases of emergency, and then only by the order of the officer commanding the department, post, or army.

Whenever a soldier is sent to a general hospital, or left in the hospital or infirmary of a regiment, it shall be the duty of the officer or surgeon sending or leaving him, to furnish a certified copy of his descriptive list.

Whenever an officer employs a citizen surgeon, he shall immediately inform the surgeon general of his name, place of residence, and also cause him to be furnished with a copy of the regulations of the medical department.

When medical or surgical aid is required, if no surgeon or mate of the army be at or near the post or place, the senior officer shall have authority to obtain such, by special agreement in writing, agreeably to the regulations for the medical department.

Whenever it becomes necessary to employ a citizen surgeon, the circumstances of the case will be immediately reported to the commanding officer of the department, and to the adjutant and inspector general.

Whenever a body of troops shall arrive at any military station, accommodations for the *sick* will be first provided, and subsequently those for officers and privates who are well; and to accomplish this, all artificers and mechanics shall be instantaneously put in requisition.

Women infected by the venereal disease shall, in no case, nor on any pretence, be allowed to remain with the army, nor to draw rations.

More than four women shall not be allowed to a company when organized and completed agreeably to the establishment. Nor shall any be allowed to accompany recruiting parties, which shall be fewer than seventeen men, nor shall more than one accompany parties of that number.

No contractor or commissary shall be justified in issuing rations to women, who are followers of the army, beyond the number allowed.

Quartermasters of regiments, or of corps, will cause the company provision returns to be consolidated and carried to the commanding officers of regiments and of detachments or brigades, for their signatures. Abstracts of these, furnished and presented by the contractors, will be signed by officers commanding brigades, (or separate posts,) and will thus become vouchers for the contractors.

No officer, commissioned or non-commissioned, shall be the agent of a contractor.

Whenever a requisition is made at any cantonment, garrison, or post, for rations to troops on a march, or other than the regular command of the officer who signs the abstracts, the original general requisition shall be annexed to the abstract, and make part of the voucher in the settlement of the contractor's account.

No charge for extra issues of whiskey will be allowed to contractors or commissaries, unless made upon the written order of the commanding officer of the post or detachment, specifying the cause and daily amount of such issues, and the time that they shall be continued. A copy of such order will be transmitted without delay to the Third Auditor of the Treasury Department, by the contractor or commissary; in default of which, the charge will be disallowed. No order issued subsequent to the expenditure will be received as a voucher.

When it becomes necessary to purchase provisions, in consequence of the failure of contractors to supply, according to contract, the officer executing this duty shall immediately transmit to the Third Auditor of the Treasury Department the evidences of the failure on the part of the contractor to supply, according to contract; a duplicate copy of the bills of purchase, accompanied with his deposition, that the articles have been procured at the lowest price that the state of the market would permit, and no bill of exchange, or draught upon the War Department, on account of such purchase, will be accepted until this regulation is complied with.

It is made the duty of all officers, agents, or persons, who shall have received, or may be entrusted with, supplies, either in money or in kind, appertaining to the pay and clothing of the army, the subsistence of officers, bounties, and premiums, military and hospital stores, and contingencies, to render quarterly accounts of the disposition and state of such stores and supplies, to the Second Auditor of the Treasury Department; and in like manner it is made the duty of all officers, agents, or persons, who shall have received, or may be entrusted with supplies, appertaining to the subsistence of the army, the quartermaster's department, and generally all accounts of the War Department, other than those above mentioned, to the Third Auditor of the Treasury Department.

Whenever a commanding or other officer, charged with the safe keeping of public property, is removed from a garrison, post, or army, he shall deliver over to the officer who succeeds him in the duties of his department all such public property as may be in his possession or custody, and the duplicate receipts for the same, one of which he shall, forthwith, transmit to the Second or Third Auditor of the Treasury Department, as the case may be, and one of all ordnance, ordnance stores, arms, and equipments, to the ordnance office, Washington city.

Whenever public property is delivered over to any officer or agent, duplicate receipts will be taken for the same, one of which will be transmitted to the office of the Second or Third Auditor.

Whenever soldiers are transferred from one corps to another, (which can only be done by the consent of the commanding officers, or by the War Department, or ordered on distant command, or furloughed, or sent to the general hospital, or left sick, distant from the regiment or detachment, the officer commanding the company or detachment to which such men belong, will furnish a complete descriptive list, and account of bounty, pay, &c. agreeably to the prescribed forms.

Whenever a soldier, sick in hospital, or absent from his company from any other cause, shall die, the senior surgeon of such hospital, or the officer under whose immediate charge or command he may then be, shall immediately report the fact, in writing, to the commanding officer of his company, stating the time, place, and cause, of his death; to what time he was last paid, and the money or other effects in his possession at the time of his decease; and such report will be noted on the next inspection return of the company.

Whenever a soldier is rendered incapable of performing military duty, by reason of wounds or injuries received in the service, while in the line of his duty, his commanding officer shall certify the time and manner of receiving such wound or disability; and the senior surgeon of the hospital, regiment, or corps, shall furnish such disabled soldier with a certificate, on which the proper discharge shall be made by the inspector general, or officer doing that duty, or commanding officer of the post.

All discharges which shall be given to non-commissioned officers, musicians, or privates, shall specify the date and term of enlistment, the cause of discharge, and when injured in service, the time and place; the personal description; place of birth; trade or occupation; and place of discharge.

Whenever the proper authority shall direct that any non-commissioned officer, musician, or private shall be discharged, on account of the expiration of enlistment, surgeon's certificate of wounds or disability, or other cause, the commanding officer of the company to which he belongs shall make and furnish him with duplicate certificates, setting forth the date and term of his enlistment; where and by whom enlisted; his personal description; occupation; and place of birth; the bounty paid, and the bounty which is due him; to what time, and by whom, he was last paid; and also, whether he has, or has not, drawn the pay and subsistence allowed him to the place of his enlistment. These certificates will be given to the paymaster, who shall settle with him as vouchers; but no paymaster will take from the soldier his original discharge.

To prevent embarrassment and delay in settling the clothing accounts of paymasters, the commanding officer of every company will be constantly in possession of a company receipt book, in which shall be entered all requisitions of paymasters for clothing, and a copy of all receipts given to commissaries and storekeepers, in consequence thereof, in which shall also be taken the individual receipts of the men for articles delivered. When a captain leaves the company, this book will of course come to the custody of the officer succeeding him in the command, who will give a receipt for all articles on hand, to be entered in like manner in the company book, and duplicates delivered to the officer from whom the book and clothing is received; one of which shall forthwith be transmitted to the regimental or battalion paymaster. The company receipt book shall always be open to the examination of paymasters and inspectors, as well as the commanding officers of regiments, corps, and battalions, whose duty it is at all times to report any deficiency in the clothing and the disposition of the same.

[*May* 22, 1817.—The senior officer of a regiment, corps, battalion, and company, stationed with the troops, shall be considered the commander of the same, and reported as such. In all returns, the incidental or casual duties of such officers, as commanders of departments, posts, &c. will be added in the column of remarks.

Whenever a captain is attached to a company he is to be considered the commanding officer thereof, for all purposes relating to pay and clothing, accounts, and company returns. When relieved from such command, a regi-

mental or battalion order to that effect will be issued, assigning the company duties to the proper officer, who will be accountable accordingly.]

All military communications intended for the War Department, and not of a confidential nature, except from commanding generals, and where the delay would defeat the object, will be made through the office of the adjutant general of division, or the commanding officer of the department, and transmitted to the adjutant and inspector general's office, except in cases where a different mode is pointed out by regulation or special instruction.

[*Sept.* 1817. In addition to the returns which are to be made to the adjutant general of division, the commanding officer of every regiment or battalion will forward, direct to the adjutant and inspector general, monthly returns of the regiment or battalion, agreeably to the forms furnished by him.]

[*Jan.* 29, 1818. Double rations will be allowed to commandants of divisions, departments, and the posts, and arsenals, enumerated in the list annexed to these regulations.]

[*Feb.* 18, 1818. All officers, previous to their leaving the service, will settle their public accounts, and accompany their letters of resignation with a report of the proper auditor of the Treasury, to that effect, or a certificate on honor, that they have no unsettled accounts with the United States. Like reports or certificates will be required by paymasters and quartermasters, previous to the settlement of pay and transportation of officers who have resigned.]

[*Feb.* 21, 1818. All publications relative to transactions between officers of a private and personal nature, are prohibited. Any newspaper publication, or hand-bill of such character, will be cause for the arrest of an officer, and the foundation of charge against him. It is made the duty of all officers, having the power, to arrest and prefer evidence for charge on such publication; and whenever such charge is preferred, one specification of which will be the violation of this regulation, the proper authority will bring the officer to trial before a general court-martial.]

March 18. All officers furloughed for more than one month will be directed in the order granting the furlough, to report by letter with their address, monthly, to the adjutant and inspector general.

The receipt of all general orders, and all blank forms, will be promptly acknowledged by the officer to whom they are directed.

Duplicate discharges are prohibited, and no certificate will be given as a substitute for the original discharge, which will always be in the form prescribed.

[*May* 8, 1818. Brevet officers shall receive the pay and emoluments of their brevet commissions, when they exercise command equal to their brevet rank; for example, a brevet captain must command a company; a brevet major, and a brevet lieutenant colonel, a battalion; a brevet colonel, a regiment; a brevet brigadier general, a brigade; a brevet major general, a division.]

[*May* 19, 1818. When a recruit joins his regiment or corps, and is first mustered for payment, and when his retained bounty becomes due, the muster-roll shall contain in the column of remarks, opposite to the name of the recruit, who is entitled to retain bounty, the name of the officer by whom the man was enlisted; this will enable the accounting officer to compare it with, and check it by the account of the recruiting officer.]

Sept. 11, 1818. The commanding officer of every permanent post and garrison where the public lands will justify such measure, will annually cultivate a garden, by the troops under his command, equal to supplying the hospital and garrison with the necessary kitchen vegetables throughout the year; and he will be held accountable for any deficiency in the cultivation, preservation, and proper distribution of the same, on the report of the inspector, or any other commissioned officer.

Whenever an officer is removed or relieved from the command of such post, the general, or officer giving the order, will cause him to be furnished with duplicate certificates of the state of his garden, and the amount and condition of vegetables on hand, one of which he will immediately transmit to the commissary general of subsistence, and a copy will be entered in the orderly book of the garrison, for the inspection of the proper authority.

In addition to this arrangement, a more extensive cultivation will be commenced, as soon as practicable, at the following posts, viz: On Red river, near Natchitoches, at Belle Point, on the Arkansas, and the posts on the Missouri, above Belle Fontaine, and on the Mississippi, above Fort Armstrong, including that post, Green Bay and Chicago, and any posts that may be established in the vicinity of the upper lakes.

This cultivation of any public lands not otherwise appropriated, in the vicinity of the garrisons and posts, shall be carried on by the troops, under the direction of the several commanding officers of the posts, and will embrace the bread and other substantial vegetable parts of the ration.

The several commanding officers will report the measures which have been adopted under this order, by the 1st of July, and the prospect of the crops, on the 1st of October, in each year, to the commissary general of subsistence, that he may regulate his measures accordingly; and for any improper management or losses sustained within the control of the commanding officers they will be held responsible.

[*Nov.* 12, 1818. A report of all men under sentence to hard labor, will be regularly made to the adjutant and inspector general, with the quarterly reports of divisions, that a proper disposition may be made of the convicts, as well with a view to the good of the service as the punishment of the individuals. No sentence to hard labor, or confinement, will be carried into effect beyond the expiration of the term of enlistment, and making up the time lost by desertion.].

[*Feb.* 23, 1819. Regimental and battalion quartermasters, while performing the duties of assistant deputy quartermaster general, and regimental and battalion paymasters, belonging to the line, will, for the time being, except in cases of emergency, to be designated by commanding generals, be excused from all details in the line of the army.

Regimental and battalion paymasters, not of the line, are not subject to detail, or orders for any service out of their department.]

[*March* 22, 1819. The commanding officer of each garrison and post, where an assistant commissary of subsistence is stationed, will detail a suitable non-commissioned officer, or soldier, to be subject to such duties only, as the assistant commissary may require for the time being.]

[*Aug.* 10, 1819. The reward of thirty dollars will include all expenses of apprehending, securing, and delivering a deserter to an officer of the army, at the nearest or most convenient garrisons, post, or recruiting station. Evidence of desertion, and the receipt of the officer to whom a deserter may be delivered, will constitute the vouchers on which the reward will be paid.]

[*Sept.* 15, 1819. Seniority shall give precedence in the choice of quarters, other things being equal, but in regular cantonments, and where the barracks are constructed with that view, regard will be had to the location of companies, in determining the quarters of platoon officers, in which the discretion of the commanding officer will be exercised.]

The proceedings of all general courts-martial will be made on *letter paper*, to preserve a uniformity in the records, which will, in all cases, be transmitted to the adjutant and inspector general, according to regulation.

Whenever a soldier is sentenced capitally, the record will be reported separately, and the record of the trial of an officer will not include the record, in the case of a non-commissioned officer, musician, or private.

Officers and agents who receive and disburse public money shall keep their money in the bank on which the draught is given, unless otherwise permitted by the department, to which such officer or agent belongs.

All orders appointing general courts-martial, when a less number than thirteen are to be detailed, and when such court cannot be constituted without inferior rank to the officer to be tried, will state that more officers cannot be detailed, or that more rank cannot be designated for such duty, without manifest injury to the service, of which the officer ordering the court is always the proper judge.

Dec. 1819. Officers, when ordered to the seat of Government, in consequence of their own neglect in receiving or settling their own accounts, are not to receive the allowance for transportation of baggage.

No surgeon or mate will be allowed to leave his post, on furlough, unless he be relieved by an army surgeon, or procure a citizen to attend the sick during his absence.

No surgeon, or mate, shall apply for, or receive, a furlough for a period exceeding one month, without permission from the Secretary of War, to be obtained by the applicant through the surgeon general, to whom the reasons for such application will be reported.

Whenever an officer is relieved or is removed from a command in which he has been entrusted with public property, he will be furnished with duplicate receipts for the same by the officer who relieves or succeeds him in command; one of which he will forthwith transmit to the Second Auditor of the treasury; and before an officer's accounts are closed in the office of the Third Auditor, he will be required to produce a certificate from the Second Auditor, that all his accounts, *in kind*, are settled.

The date of the appointment and the date of removal from the office of aid-de-camp will be promptly reported to the adjutant and inspector general.

Colonels of regiments and commandants of battalions of artillery will promptly report the name, date of appointment, and the date of removal of an officer from any situation in the staff, not only to the adjutant and inspector general, but to the paymaster of the regiment or battalion. Quartermasters of regiments and battalions will also be reported to the quartermaster general, and the date of appointment and removal of conductors of artillery will be promptly reported to the ordnance department, by the commanding officers of the regiment of light artillery, and the several battalions of artillery, who are required to make the appointments.

The colonel or commanding officer of each regiment and corps shall, annually, on the 30th of September, make, in duplicate, a detailed report of the number and condition of the arms on hand belonging to his regiment or corps, and an estimate of the quantity required for the next year's issue; one copy of which will be promptly transmitted to the adjutant and inspector general, and the other to the ordnance department.

No division or department orders will supersede the returns and reports required to be made from regiments, corps, and individuals direct to the adjutant and inspector general.

Articles of clothing allowed to each non-commissioned officer, musician, and private soldier, for and during the period stated, viz:

One leather cap with plate, to last two years and a half, or two, during the period of enlistment.
One leather stock, to last two years and a half, or two, during the period of enlistment.
Two great coats, and three blankets, to each soldier, during the usual period of enlistment, (five years.)
One pompoon, one cap band, and tassel, annually.
One coat, annually.
One roundabout gray jacket, with sleeves, in lieu of a vest, annually.
Two pair of linen overalls, annually.
Two pair woollen ditto, annually.
One fatigue frock, annually.
One pair fatigue trowsers, annually.
Three pair of shoes, (best kind,) annually.
Two flannel shirts, annually.
Two cotton shirts, annually.
Two pair of socks, annually.
Two pair of half stockings, annually.
One pair of half gaiters, (black cloth,) annually.

Mittens to be furnished, and woollen or list mockasins, at the rate of eight pair for every company, annually; and two knapsacks, and two haversacks to each soldier, during the period of his enlistment, (five years.)

Cost of clothing for the army of the United States for the year 1820.

Leather cap	1 50	Epaulets, worsted	0 40
Cap plates	0 20	Pairs of cloth gaiters	1 20

A SYSTEM OF MARTIAL LAW,

Contained in a series of rules and articles; in conformity to a resolve of Congress of December 22, 1819.

AN ACT for the establishment of a system of martial law for the government of the armies of the United States.

SECTION 1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That, from and after the passage of this act, the following be the rules and articles by which the armies of the United States shall be governed.

ART. 1. It shall be the duty of all officers and soldiers of the armies of the United States to pay a decent respect to the rules and established usages of society, wherever they may be stationed, particularly such as are enjoined by morality and religion. It is earnestly recommended that they diligently attend divine service, and any officer or soldier who shall be convicted of indecent or irreverent behavior at any place of religious meeting shall be punished at the discretion of a court-martial.

ART. 2. It shall be the duty of all officers of the armies of the United States to manifest a good example of honor, patriotism, and subordination; to guard against and suppress dissolute and immoral practices among those under their command, and to punish all such as are guilty of them according to the rules and usages of military service. Any officer who shall be convicted of oppression, fraud, cruelty, falsehood, violence on the person of a brother officer, provoking speeches, or gestures to the same, profane swearing, drunkenness, or any other scandalous conduct, subversive of discipline and good morals, shall be cashiered or otherwise punished at the discretion of a court-martial. Should the like offences be committed by a soldier, he shall be punished, on conviction, at the discretion of a garrison, detachment, regimental, or general court-martial.

ART. 3. Every soldier who shall enlist himself into the service of the United States shall, at the time of his so enlisting, or within six days from it, have the articles for the government of the armies of the United States read to him, and shall, by some officer duly authorized, be taken before a civil magistrate, legally empowered to administer oaths, or where recourse cannot be had to a civil magistrate to the judge advocate, and in his presence shall take the following oath, viz: "I, ———, do solemnly swear, that I will bear true allegiance to the United States of America, and that I will serve them honestly and faithfully against all their enemies and opposers whatsoever, and observe and obey the orders of the President of the United States, and the orders of the officers appointed over me, according to the rules and articles for the government of the armies of the United States." Which magistrate or judge advocate is to give the officer a certificate, signifying that the man enlisted did take the said oath.

ART. 4. Any officer or soldier convicted before a court-martial of having deserted the service of the United States, or of having enticed another to desert shall suffer death, or such other punishment as a court-martial shall order to be inflicted. Any officer or soldier convicted of having deserted the service of the United States, from post or guard, or carrying with him in his desertion his own arms, or those of a comrade, or any other public effects, or convicted of having enticed another to do the same, shall suffer death, or other punishment at the discretion of a court-martial, not less, if the delinquent be an officer, than that of being cashiered; or if a soldier, than hard labor on the fortifications or other public works of the United States for the space of five years. Any officer or soldier who shall be convicted of having deserted to an enemy, or from a post or guard during a time of war, or of having enticed another to do the same, shall suffer death.

ART. 5. Any person not serving in the armies of the United States, who shall entice or assist any officer or soldier serving in the same to desert, or who shall harbor a deserter, knowing him to be such, shall, upon conviction of the same before a district court of the United States, for the district in which the offence was committed, be fined at the discretion of said court in any sum not exceeding one hundred dollars.

ART. 6. Any soldier who shall enlist himself in any corps without having been regularly discharged from that in which he last served, shall be considered as a deserter and suffer as such. Any officer who shall harbor or entertain a deserter, knowing him to be such, or who shall not, on ascertaining him to be such, immediately confine him and give notice thereof to the corps to which said deserter belongs, shall, upon conviction thereof before a court-martial, be cashiered.

ART. 7. All expenses incurred by the United States in the apprehension of deserters shall, on conviction of the offence, be defrayed by the individual so offending; if an officer, the amount shall be sued for and recovered in the name of the United States, in any court of competent jurisdiction; if a soldier, by suitable stoppages from his pay for the residue of his term of service. But all pay that may be due to any deserter shall, by the act of desertion, be forfeited to the United States.

ART. 8. Any officer who shall, without leave from his commanding officer, absent himself from his regiment, post, or command, shall, upon conviction, be punished at the discretion of a court-martial. Any soldier who shall, without leave of his commanding officer, absent himself from his troop, company, or detachment, shall be punished at the discretion of a court-martial.

ART. 9. No soldier enlisted in the army of the United States shall be arrested or subject to arrest for any sum under that of twenty dollars contracted before enlistment, nor for any debt contracted after enlistment.

ART. 10. After a soldier shall have been duly enlisted and sworn he shall not be dismissed the service without a discharge in writing, and no discharge granted to him shall be sufficient which is not signed by the commanding officer of the regiment or post to which he belongs. No discharge shall be given to a soldier before his term of service has expired but by order of the President of the United States; nor shall any officer be discharged the service but by order of the President of the United States, or in consequence of the sentence of a general court-martial.

ART. 11. Any officer or soldier who shall use contemptuous or disrespectful words against the President of the United States, against the Vice President thereof, against the Congress of the United States, or against the chief

Art. 1.—Altered from article 2 of the former rules.
Art. 2.—Includes the 3d, and renders more specific the 99th of the former articles. The preamble taken from a similar article in the rules for the navy, which was borrowed from the British articles.
Art. 3.—The 10th of the former verbatim, with one trifling exception.
Art. 4.—Enlarged from article 20 of the former, so as to define degrees of offence; 23d of the former included
Art. 5.—Not in the former articles, but revived from the act of May 30, 1796.
Art. 6.—22d of the former; principle the same, a slight change in language.
Art. 8.—21st of the former enlarged so as to include officers.
Art. 9.—Revived from the acts of March 3d, 1799, and March 16, 1802.
Art. 10.—11th of the former slightly altered.
Art. 11.—5th of the former verbatim.

magistrate or legislature of any of the United States in which he may be quartered, if an officer, shall be cashiered, or otherwise punished as a court-martial shall direct; if a soldier, he shall suffer such punishment as a court-martial may order to be inflicted on him.

ART. 12. Any officer or soldier who shall behave with contempt or disrespect towards his commanding officer shall be punished according to the nature of his offence by the judgment of a court-martial.

ART. 13. Any officer or soldier who shall strike his superior officer, or draw, or lift up any weapon, or offer any violence against him, being in the execution of his office, on any pretence whatever, or shall disobey any lawful command of his superior officer, shall suffer death or such other punishment as shall, according to the nature of his offence, be inflicted upon him by the sentence of a court-martial.

ART. 14. Any officer or soldier who shall excite, connive at, cause, or join in any mutiny or sedition in or among any of the troops of the United States, or cause mutinous letters to be circulated among the same, shall suffer death or such other punishment as by a court-martial shall be inflicted. Any officer or soldier who, being present at any mutiny, or sedition, does not use his utmost endeavors to suppress the same, or coming to the knowledge of any intended mutiny does not without delay give information thereof to his commanding officer, shall be punished by the sentence of a court-martial with death, or otherwise, according to the nature of the offence.

ART. 15. All officers of what condition soever have power to part and quell all quarrels, frays, and disorders, though the persons concerned should belong to another regiment or department of military service, and either to order officers into arrest or soldiers into confinement until their proper superior officer shall be acquainted therewith, and whosoever shall refuse to obey such officer, though of inferior rank, or shall offer violence to him, shall be punished at the discretion of a court-martial.

ART. 16. Instructions shall be issued under the sanction of the Department of War respecting the time and manner in which musters are to be made and muster-rolls signed; the time and manner in which returns are to be made, and the different authorities to which they are to be conveyed; the time and manner in which reports, estimates, requisitions, and other similar duties of military service are to be made, and the authorities to which transmitted; and whosoever shall be directed under such instructions to perform these duties or any thing in relation to them, and shall not perform the same, shall, on conviction, be cashiered or otherwise punished at the discretion of a court-martial. But where an officer shall, without satisfactory explanation, fail to convey to any of the different offices forming the Department of War any returns, reports, estimates, requisitions, or vouchers of any sort called for by the said Department, it shall be the duty of the President of the United States to dismiss him from the service.

ART. 17. Any officer who shall be convicted before a court-martial of having signed a false certificate relating to the absence of either officer or soldier, or relative to his or their pay, shall be cashiered.

ART. 18. Any officer who shall knowingly make a false return to the Department of War, or to any of his superior officers authorized to call for such returns of the state of the troops under his command, or of the arms, ammunition, clothing, or other stores thereunto belonging, or of the fortress or garrison wherein they may be stationed, shall, on conviction thereof before a court-martial, be cashiered.

ART. 19. Any officer who shall knowingly make a false muster of man or horse, and any officer who shall willingly sign, direct, or allow the signing of muster-rolls wherein such false muster is contained, knowing it to be such, shall, upon conviction before a court-martial, be cashiered, and shall be thereby disabled to have or hold any office or employment in the service of the United States.

ART. 20. Any officer who shall be convicted of having taken money or any other thing by way of gratification on mustering any troops, shall be dismissed the service, and shall be thereby disabled to have or hold any office or employment in the service of the United States.

ART. 21. Any officer charged with the inspection of the army of the United States, or any portion thereof, who shall wantonly misinform his superior respecting the state of the same, shall be cashiered.

ART. 22. Any soldier who shall be convicted before a court-martial of having sold, lost, or spoiled his horse, arms, clothes, accoutrements, or ammunition, or of having wasted the latter, shall be mulcted in a sufficient amount of his pay to make good the loss or damage to the United States, and be otherwise punished according to the nature of the offence; and any person not belonging to the armies of the United States who shall purchase of any soldier serving in the same any of the articles above mentioned, shall, upon legal conviction before any court having cognizance thereof, be fined in any sum, at the discretion of said court, not exceeding one hundred dollars for each offence.

ART. 23. Any officer of any rank or class whatsoever who shall be convicted before a court-martial of having sold, without a proper order for that purpose, embezzled, or misapplied the provisions, medicines, forage, clothing, ammunition, or other property of the United States, or of having wilfully or through neglect suffered the same to be spoiled or damaged, shall be cashiered; and nothing in this article shall be construed to interfere with any suit that may be commenced for recovery in behalf of the United States.

ART. 24. Any officer convicted before a court-martial of having embezzled, misapplied, or used in any way for his own benefit any money with which he may have been entrusted on behalf of the United States, for the payment of the forces of the same, or for enlisting men into the service, or for transmission from one place to another, or for any other public purpose, shall be cashiered; and nothing in this article shall be construed to interfere with any suit that may be commenced for recovery in behalf of the United States.

ART. 25. Any commanding officer who shall be convicted of abuse or exaction on the property of a sutler, shall be cashiered, or otherwise punished, at the discretion of a court-martial. On any march, or on any emergency whatsoever, it shall be the duty of the commanding officer to extend to the property of sutlers such means of protection and transportation as may not be inconsistent with the good of the service.

ART. 26. No officer shall, by his own authority, or for his private advantage, lay any duty or imposition upon, or be interested in, the sale of any victuals, liquors, or other necessaries of life, brought into any military post for the use of the soldiers, on penalty of being discharged from the service.

ART. 27. Any officer who shall borrow money from any soldier or recruit, or traffic with him, or extort money from him, shall be cashiered. In case any soldier should make his captain or commanding officer the depositary of his pay or other money, the said officer shall exactly return the same on application, under penalty of being punished at the discretion of a court-martial.

Art. 12.—6th of the former verbatim. Art. 13.—9th of the former verbatim.
Art. 14.—7th and 8th of the former with a slight alteration. Art. 15.—27th of the former with a slight alteration.
Art. 16.—Not in the former. Art. 17.—14th of the former verbatim. Art. 18.—18th of the former slightly altered.
Art. 19.—15th of the former, verbatim. Art. 20.—16th of the former, verbatim.
Art. 22.—38th of the former; the latter clause revived from the acts of May 30th, 1796, and March 2, 1799; penalty less severe.
Art. 23.—36th of the former, not exactly verbatim. Art. 24.—39th of the former, with a slight alteration.
Arts. 25 and 26, altered from 29, 30, and 31 of the former. The details are left to the valuable regulations found in General Scott's work.

ART. 28. During a time of war, should any officer fail to repair, according to order, to his post, or assign obviously false, or frivolous, or insufficient excuses for not doing so, it shall be the duty of the President of the United States to dismiss him from the service.

ART. 29. Any officer or soldier who shall misbehave himself before the enemy, run away, or shamefully abandon any fort, post, or guard which he may be commanded to defend, or by speech or other efforts induce others to do the like, or who shall cast away his arms or ammunition, or who shall quit his post or colors to plunder and pillage, shall suffer death, or other punishment, at the discretion of a court-martial.

ART. 30. If any commander of any garrison, fortress, or post shall be compelled by the officers and soldiers under his command to give up to the enemy, or abandon it, the officers or soldiers who shall be convicted of having so offended shall suffer death, or such other punishment as shall be inflicted upon them by the sentence of a court-martial.

ART. 31. When any officer shall be tried before a court-martial for the defeat, surrender, or rout of an army with the command of which he may have been entrusted, or for the abandonment or loss of any fortress, post, or posts, of which he may have been the commander; if it shall be proven that the said defeat, surrender, rout, abandonment, or loss arose from corrupt connexion with the enemy, from cowardice, or wanton and unjustifiable breach of orders, he, the said offender, shall suffer death. If it shall be proven that the same arose from incaution or gross mismanagement, he shall be cashiered, and rendered incapable of exercising any employment in the service of the United States. If it shall be proven that the same arose from fault of a less criminal character, he shall be punished at the discretion of a court-martial.

ART. 32. In case any portion of the army of the United States should be captured by an enemy in a disgraceful manner, it shall be competent for the President of the United States, on proper representation and proof, to order that, for the period of such captivity, the portion of the army so offending receive but half pay; such stoppage not to affect any penalty incurred by any individual thereof under these articles.

ART. 33. It shall be the duty of officers stationed in the vicinity of Indians to cultivate harmony with them. Any officer convicted of maltreating them, or allowing them to be maltreated, shall be punished at the discretion of a court-martial.

ART. 34. It shall be the duty of officers commanding armies of the United States in foreign countries, to confirm the peaceful inhabitants of the same in their accustomed legal rights and privileges, as far as may be consistent with the articles and the usages of war between civilized nations. All public stores taken from the enemy shall be secured for the service of the United States, under regulations from the War Department; and any commanding officer who shall dishonorably possess himself of any property whatever found in such countries, or who shall not restrain himself and those under his command from wanton oppression or violence, shall be cashiered, or otherwise punished, at the discretion of a court-martial.

ART. 35. Any officer who shall, without orders from his superior, waste or destroy the property not applicable to the purposes of war, belonging to the peaceful inhabitants of foreign countries occupied by the armies of the United States, or offer violence to the persons of the same, except from the pressing exigencies of war, shall be cashiered.

ART. 36. Any officer or soldier convicted of unauthorized abuse of a prisoner of war shall be punished at the discretion of a court-martial.

ART. 37. Any officer convicted before a general court-martial of conduct unbecoming an officer and a gentleman shall be dismissed the service.

ART. 38. Any officer convicted of inhumanity to those under his command shall be cashiered, or otherwise punished, at the discretion of a court-martial.

ART. 39. Any officer who shall dishonorably conspire with others against a broken officer shall be punished at the discretion of a court-martial: *Provided*, That nothing in this article be construed to forbid an open and decorous declaration of misconduct or injustice.

ART. 40. Any officer who, during a time of war, shall be entrusted by the commander-in-chief with any secret respecting military operations, and shall divulge the same, shall be cashiered.

ART. 41. Any officer who shall be found drunk on duty shall be cashiered. Any soldier so offending shall suffer such punishment as shall be inflicted by the sentence of a court-martial.

ART. 42. Any sentinel who shall be found sleeping upon his post, or shall leave it before he shall be regularly relieved, shall suffer death, or such other punishment as shall be inflicted by the sentence of a court-martial.

ART. 43. Any person belonging to the armies of the United States who shall make known the parole, countersign, or watchword, to any person who is not entitled to receive it according to the rules and discipline of war, or shall presume to give a parole, countersign, or watchword, different from what he received, shall suffer death, or such other punishment as shall be ordered by the sentence of a court-martial.

ART. 44. Any officer or soldier who, by any means whatsoever, shall wantonly occasion false alarms in any encampment or military position, shall suffer death, or such other punishment as shall be ordered by the sentence of a court-martial.

ART. 45. Whosoever belonging to the armies of the United States employed in foreign parts shall force a safeguard shall suffer death.

ART. 46. Whosoever belonging to the armies of the United States shall be convicted of holding correspondence with, or giving intelligence to, the enemy, either directly or indirectly, or of relieving the enemy with money, victuals, or ammunition, or of knowingly harboring or protecting an enemy, shall suffer death, or such other punishment as shall be ordered by the sentence of a court-martial.

ART. 47. Any officer or soldier who shall, either in quarters or on march, commit violence on the person, or waste or destruction of the property of any inhabitant of the United States, unless by the orders of the commander-in-chief of an army of the United States, shall, on conviction, be punished according to the nature and degree of the offence, by the judgment of a court-martial; and the said court may, at its discretion, order that, over and above other punishment, the individual so offending be mulcted in his pay, and the amount thus recovered be given as damages to the party injured; nor shall the delinquent be thereby released from any process before a civil tribunal.

ART. 48. It shall be the duty of every officer commanding in camp or garrison, or on a march, to maintain order, and, to the utmost of his power, to redress all abuses and disorders that may be committed by those under his command. Upon complaint made to him of any of the offences detailed in the foregoing article, or of the disturbance of fairs, markets, or legal assemblies, or of any riot disturbing the good order of society, he shall arrest the individuals so offending, and institute, or cause to be instituted, a court-martial for the trial of the same. Any

Art. 29.—52d of the former, and 59th included. Art. 34.—38th of the former, varied and enlarged.
Art. 37.—83d of the former. Art. 41.—45th of the former. Art. 42.—46th of the former.
Art. 43.—53d of the former. Art. 44.—49th of the former, slightly altered. Art. 45.—55th of the former.
Art. 46.—56th and 57th of the former. Art. 47.—54th of the former, altered. Art. 48.—32d of the former, altered.

officer failing to conform to any part of this article shall, on conviction, be cashiered, or otherwise punished, at the discretion of a court-martial.

ART. 49. When any officer or soldier shall be accused of a capital crime, or of having used violence or committed any offence against the person or property of any citizen of the United States, such as is punishable under the known laws of the land, and not under these articles, the commanding officer and officers of the regiment or garrison to which the person so accused shall belong, shall, upon application, legally made, use their utmost endeavors to deliver over such accused person or persons to the civil magistrate, and, likewise, to aid and assist the officers of justice in apprehending and securing the person or persons so accused, in order to bring him or them to trial. Any commanding officer or officers who shall wilfully neglect or refuse to conform to the injunction of this article, shall, on conviction of the same before a court-martial, be cashiered.

ART. 50. Should any civil officer pursue any individual attempting to flee from justice to any garrison or encampment of the forces of the United States, and be prevented by a sentinel from entering therein, he shall not force an entrance, but shall exhibit to the commanding officer his warrant. After such exhibition, should the said commanding officer resist or wantonly impede the search, so that the individual sought escape from justice, he shall, on conviction before any court of the United States having competent jurisdiction, be punished in the penalty set forth in the seventy-second section of "an act for the punishment of certain crimes against the United States," of the 30th of April, 1790, in the same manner, the said civil officer being under the authority of any particular State, as though he were under that of the United States. And, if the crime for which the said individual fled from justice be capital, the officer so offending shall be considered to have committed a rescue, and shall be punished in the penalty set forth in the twenty-third section of the said act, whether the individual thus rescued be pursued by the authority of any particular state, or of the United States.

ART. 51. There shall be two military courts having criminal jurisdiction; the one a regimental, garrison, or detachment court-martial; the other a general court-martial. The first shall consist of three officers, except as hereinafter provided, and shall have no power to try capital cases, or officers, nor to inflict on any soldier a fine exceeding one month's pay, nor to imprison or put to labor a soldier for a longer time than one month. The second class shall consist of any number of officers, not less than five, nor more than eleven, and shall have cognizance of all offences under these articles.

ART. 52. Any officer commanding a regiment, separate battalion, or post, or detachment, on a march, may appoint for his own regiment, battalion, post, or detachment, regimental, garrison, or detachment courts-martial, for the trial and punishment of offences not capital, and decide upon their sentences, and may pardon or mitigate any punishment which such courts may adjudge. Whenever there shall not be present at any post more than two officers besides the commanding officer, it shall be in the power of the said commanding officer, at his discretion, to detail a suitable non-commissioned officer to act as a junior member of said court. And whenever there shall not be present at any post more than one officer, besides the commanding officer, it shall be in the power of the said commanding officer, at his discretion, to constitute such court by detailing three suitable non-commissioned officers to be members thereof.

ART. 53. Any general officer commanding an army or department, and any colonel commanding a department, may appoint general courts-martial whenever necessary. But no sentence of a court-martial shall be carried into execution until after the whole proceedings shall have been laid before the officer ordering the same, or the officer commanding the troops for the time being; neither shall any sentence of a general court-martial, during a time of peace, extending to the loss of life, or the dismission of an officer, or which shall, either in time of peace or war, extend to a general officer, be carried into execution until after the whole proceedings shall have been transmitted to the Secretary of War, to be laid before the President of the United States for his confirmation or disapproval and orders in the case. All other sentences may be confirmed and executed by the officer ordering the court to assemble, or the commanding officer for the time being, as the case may be.

ART. 54. Every officer authorized to order a general court-martial shall have power to pardon or mitigate any punishment ordered by such court, except the sentence of death, or of cashiering an officer, which, in the cases where he has authority, as by the foregoing article, to carry them into execution, he may suspend until the pleasure of the President of the United States can be known; which suspension, together with copies of the proceedings of the court-martial, the said officer shall immediately transmit to the President for his determination.

ART. 55. At every court-martial there shall be a judge advocate, or person acting as such, whose powers and duties shall be defined in the regulations issued to that effect from the Department of War. He shall administer to the several members of a court-martial, before they proceed upon any trial, the following oath, which shall also be taken by all the members of regimental, detachment, and garrison courts-martial. "You ———, do swear, that you will well and truly try and determine, according to evidence, the matter now before you, between the United States of America and the prisoner to be tried, and that you will duly administer justice according to the provisions of 'An act for the establishment of a system of martial law for the government of the armies of the United States,' without partiality, favor, or affection, and if any doubt shall arise, not explained in said system, according to your consciences, the best of your understandings, and the customs of war in like cases; and you do further swear, that you will not divulge the sentence of the court until it shall be published by the proper authority; neither will you disclose or discover the vote or opinion of any particular member of the court-martial, unless required to give evidence thereof as a witness by a court of justice, in due course of law: so help you God." As soon as the said oath shall have been administered to the respective members, the president of the court shall administer to the judge advocate, or person officiating as such, an oath in the following words: "You ———, do swear, that you will faithfully discharge the trust of judge advocate, according to the instructions from the Department of War, and that you will faithfully record all and every part of the proceedings that may be had in the cause now in hearing: and you do further swear that you will not disclose nor discover the vote or opinion of any particular member of the court-martial, unless required to give evidence thereof as a witness by a court of justice, in due course of law; nor divulge the sentence of the court to any, but to proper authority, until it shall be duly disclosed by the same: so help you God."

ART. 56. Courts-martial shall be regulated as to process, the laws of evidence, and the mode of forming judgment thereupon, on principles as nearly consonant to those of civil courts as the difference of the two will admit. To effect this there shall be issued from the Department of War instructions under these articles, which shall

Art. 49.—33d of the former, altered very slightly.

Art. 51.—From the 51st to the 72d, inclusive. The former articles under this head were found so defective that I have abandoned the order and structure of them, 64th, 66th, and 67th of the former, in substance.

Art. 52.—Parts of the 66th and 89th of the former, with an essential alteration.

Art. 53.—65th of the former, verbatim, with a trifling exception.

Art. 54.—89th of the former, verbatim.

Art 55.—69th of the former, verbatim, except at the commencement, and in the oath of the judge advocate.

establish and regulate the forms and proceedings of such courts, the duties and powers of the several members thereof, the rights of the accused, and every thing directly or indirectly connected therewith.

ART. 57. A general court-martial shall have power to send for and procure public books and documents relating to the army of the United States, or attested copies of the same; to send for and procure such books and documents, in the possession of individuals in public employment, as treat of matters before it; to preserve order during its session; to punish at discretion any witness belonging to the army who may refuse to testify, or prevaricate in giving testimony; to coerce the attendance of its own members, of prisoners and witnesses, when they have been regularly summoned; and to exercise such other authority as may be requisite to put into effect the functions assigned to it by these articles.

ART. 58. In cases of the condemnation of a soldier a general court-martial shall have power to sentence to death, to imprisonment, to hard labor, to stoppages of pay, and to corporeal punishment, according to the nature of the offence, sanctioned by military usage, and not forbidden by the laws of the United States. In cases of the condemnation of an officer it has power to sentence to death; to sentence that the offender be cashiered, to the same with incapacity to serve the United States in a military station; to sentence to dismissal; to suspension of rank, pay, and emoluments, or any part of the same; to stoppages of pay in cases prescribed by these articles; to imprisonment, until the offender can be committed to the civil authority; to public or private reprimand; or such modifications of the foregoing as may not be inconsistent with the laws of the United States. But members of a court-martial shall be liable, according to their votes, to suit at law, before any court of the United States, for sentencing to illegal punishments, or for any manifest corruption.

ART. 59. A regimental or garrison court-martial shall have cognizance of all offences committed by soldiers, which do not require the intervention of a general court-martial, and shall have power to sentence to such punishment, according to the nature of the offence, as may be sanctioned by the usages of service, and not forbidden by the laws of the United States. But any officer who shall take the power of corporeal punishment into his own hands, when the same has not been ordered by the sentence of a general, regimental, detachment, or garrison court-martial, or who shall inflict violence on the person of a soldier of the United States, except in case of mutiny, or disobedience of orders tending to the same, shall be cashiered.

ART. 60. All persons who give evidence before a court-martial are to be examined on oath or affirmation, to be administered by the judge advocate, in the following form, viz: "You swear, or affirm, that the evidence you shall give in the case now in hearing shall be the truth, the whole truth, and nothing but the truth: so help you God."

ART. 61. In the trial of all delinquents for capital offences, where the judge advocate shall be duly satisfied that the testimony of any one not belonging to the army is essential to the trial, he shall issue a precept, countersigned by the president of the court, directing such person to appear and testify: said precept shall be given to the marshal of the district court of the United States, and should said witness, after being duly summoned, fail to appear, without a reasonable excuse, he or she shall be fined in the same sum as though the offence had been committed against the district court of the United States, and recovery shall be made in the name of the United States, by bill or information, in any court of competent jurisdiction. When the witness shall be unable to attend, in consequence of duress, the same writ shall be issued to procure his attendance, as would be provided his testimony were required in any higher court of the United States.

ART. 62. On trials of cases not capital before courts-martial, the deposition of witnesses not belonging to the army may be taken before some justice of the peace, and read in evidence; provided the prosecutor and person accused are present at the taking of the same, or are duly notified thereof.

ART. 63. When a prisoner arraigned before a court-martial shall stand mute, or answer foreign to the purpose, the court may proceed to trial and judgment, in the same manner as though the prisoner had regularly pleaded not guilty.

ART. 64. When a member shall be challenged by a prisoner, he must state his cause of challenge, of which the court shall, after due deliberation, determine the relevancy or validity, and decide accordingly. No challenge to more than one member at a time shall be received by the court.

ART. 65. No person shall be sentenced to suffer death but by the concurrence of two-thirds of a general court-martial, nor except in the cases herein expressly mentioned. No person shall be tried a second time for the same offence, nor shall any cause determined in a court-martial be sent back for revision more than once, unless new and important matter be discovered.

ART. 66. No person shall be liable to be tried and punished by a general court-martial for any offence which shall appear to have been committed more than two years before the issuing of the order for such trial; unless, from the nature of things, it was rendered impracticable to discover the offence before two years had transpired; or unless the person, by reason of having absented himself, or some other manifest impediment, shall not have been amenable to justice within that period. But any officer shall be liable to be tried and punished by a court-martial for offences committed while in the service of the United States, after he shall have voluntarily quitted the same; provided the offences were unknown at the period of such resignation, and the order for trial be issued within six months therefrom; and in case of the non-appearance of such delinquent, after being duly cited, the court-martial may proceed with his trial in the same manner as if he had appeared and pleaded not guilty to the charge.

ART. 67. No officer shall be tried but by a general court-martial, nor by officers of inferior rank, if it can be conveniently avoided. Nor shall any proceedings or trials be carried on except between the hours of eight in the morning and three in the afternoon, excepting in cases which, in the opinion of the officer appointing the court-martial, require immediate example; but the proceedings of a court-martial shall not be delayed by the absence of any member except the president, provided enough are present to constitute legally a court.

ART. 68. It shall be the duty of a court-martial, where an officer is cashiered for desertion, cowardice, or fraud, to direct that its sentence be published in the newspapers nearest to the camp, and of the particular State to which the offender belongs, after which it shall be deemed scandalous for any officer to associate with him.

ART. 69. In order to discountenance improper suits, it shall be the duty of a court-martial, on acquitting a prisoner, and finding the charges preferred against him to be frivolous, vexatious, and without foundation, to annex to its sentence, that the prosecutor, if an officer, be fined in his pay the amount of expense incurred by the United States to sustain the prosecution.

ART. 70. In case of demand from the parties, copies of the proceedings of courts-martial shall be given, under due attestation from the Department of War. To this effect, the Secretary of War shall cause to be forwarded, with all despatch, to some office of his Department, and there recorded, the original proceedings of all courts-

Art. 60.—73d of the former, verbatim. Art. 62.—74th of the former, verbatim. Art. 63.—70th of the former, verbatim. Art. 64.—71st of the former, verbatim. Art. 65.—87th of the former, verbatim. Art. 66.—88th of the former, enlarged and essentially altered. Art. 67.—74th of the former, verbatim; the last clause an addition. Art. 68.—85th of the former, slightly altered; desertion added. Art. 70.—90th of the former, altered and enlarged.

martial, as well those convened in the militia, when called into the service of the United States, as in the regular army. And in order to the prevention of crimes and abuses, and to ascertain whether the laws and regulations governing the armies of the United States have been duly enforced, it shall be the duty of the said Secretary to cause to be laid before him at stated periods, from the records of that office, an abstract of all crimes and punishments, and process of courts-martial, in such cases. And it shall likewise be his duty to direct, that where explanation is required of contested points of military law, certain trials where such principles have been rightfully adjusted be selected and announced as precedents.

ART. 71. It shall be the duty of every officer having power to order courts-martial, to issue such orders on suitable application, provided the nature of the complaint and the good of the public service require it. But in all applications to a commanding officer for redress of grievances inflicted by a superior, it shall be his duty, on request from the party aggrieved, in case he shall not deem it proper to order a court-martial, to give in writing his reasons for refusal.

ART. 72. All sutlers and retainers to the army, camps, regiments, posts, or detachments, shall be subject to these rules and articles.

ART. 73. All officers incidentally connected with the army, whatsoever may be their rank or denomination; all military agents, conductors, drivers, carriers, or other persons whatsoever, duly hired, and receiving pay from the United States, in the service of any of the regiments or corps, or departments of the staff, shall be subject to these rules and articles. It shall be the duty of all officers authorized to employ such persons, to set forth the provision of this article in their agreement with the same. But from the provision of this article shall be excepted the corps of cadets, the professors and assistant professors of the Military Academy, who shall be governed by special instructions from the Department of War, containing such parts of this act as the Secretary of the same may deem advisable.

ART. 74. Whenever an officer shall be arrested, he shall be deprived of his sword and confined within suitable limits, by his commanding officer. Any officer who shall violate his arrest by exercising command, except in case of mutiny, or by quitting his confinement before he shall be set at liberty by a superior officer, shall be cashiered.

ART. 75. It shall be the duty of every officer commanding a guard, and of every provost marshal, to receive and keep any prisoner committed to their charge by an officer belonging to the forces of the United States, provided that the prisoner be accompanied by a written accusation of a military crime, signed by an officer of the United States' army. Any officer commanding a guard, or any provost marshal, who shall refuse to perform this duty, or who shall release any person committed to his charge, without proper authority for so doing, or who shall suffer any person to escape, shall be punished at the discretion of a court-martial.

ART. 76. Every officer or provost marshal to whose charge prisoners shall be committed, shall, within twenty-four hours after such commitment, or as soon as he shall be relieved from his guard, make report, in writing, to his commanding officer, of their names, their crimes, and the name of the officer who committed them, under penalty of punishment at the discretion of a court-martial.

ART. 77. There shall be a military court, not having criminal jurisdiction, called a court of inquiry. It shall have power to examine into the nature of any transaction wherein the whole or any part of the army of the United States may have been engaged, or into any accusation or imputation against any officer or soldier, or to identify the person and conduct of any suspicious person. Said court shall consist of three officers and a recorder, and shall have the same power to summon witnesses as a court-martial, and to examine them on oath. The parties before it shall be permitted to cross-examine and interrogate the witnesses, but the court shall not give an opinion on the merits of the case unless thereto specially ordered.

ART. 78. The proceedings of a court of inquiry shall be authenticated by the signature of the recorder and the president, and delivered to the commanding officer, and may be admitted as evidence by a court-martial in cases not capital nor extending to the dismission of an officer, where oral testimony cannot be obtained.

ART. 79. Courts of inquiry may be ordered by officers having power to order general courts-martial, but only on their receiving direction to that effect from the President of the United States, or on demand of the party accused, except when the army of the United States may be employed, during a time of war, in foreign countries, when the foregoing power of the President of the United States may be exercised by the commander-in-chief of such army.

ART. 80. The recorder shall administer to the members of a court of inquiry the following oath, viz: "You shall well and truly examine and inquire, according to evidence, into the matter now before you, without partiality, favor, affection, prejudice, or hope of reward: so help you God." After which, the president shall administer to the recorder the following oath, viz: "You, ———, do swear that you will, according to the best of your abilities, accurately and impartially record the proceedings of the court and the evidence given in the case in hearing: so help you God." The witnesses shall take the same oath as witnesses sworn before a court-martial.

ART. 81. All officers serving by commission from the authority of any particular State, shall, in all cases wherein they may be employed in conjunction with the regular forces of the United States, take rank next after all officers of the like grade in said regular forces, notwithstanding the commissions of such militia or State officers may be older than the commissions of the officers of the regular forces of the United States.

ART. 82. Whenever it may be found convenient and necessary to the public service, the officers of the marine shall be associated with the officers of the land forces, for the purpose of holding courts-martial and trying offenders belonging to either; and, in such cases, the orders of the senior officer of either corps, who may be present and duly authorized, shall be received and obeyed.

ART. 83. The functions of the engineers being generally confined to the most elevated branch of military science, they are not to assume, nor are they subject to be ordered on, any duty beyond the line of their immediate profession, except by the order of the President of the United States; but they are to receive every mark of respect to which their rank in the army may entitle them, respectively; and are liable to be transferred, at the discretion of the President, from one corps to another, regard being paid to rank.

ART. 84. The officers and soldiers of any troops, whether militia or others, being mustered and in pay of the United States, shall, at all times and in all places, be governed by these rules and articles of war, and shall be subject to be tried by courts-martial, in like manner with the officers and soldiers of the regular forces, save only that courts-martial for the trial of offenders belonging to the regular forces shall be composed entirely of officers of the regular army; and courts-martial for the trial of offenders belonging to the militia shall be composed entirely of militia officers.

Art. 71.—Contains the substance of 34th and 35th of the former. Art. 72.—60th of the former, altered. Art. 73.—96th of former, altered and enlarged. Art. 74.—77th of the former, altered. Art. 75.—80th and 81st of the former. Art. 76.—82d of the former. Art. 77.—91st of the former, essentially altered. Art. 78.—92d of the former, in part. Art. 79.—Parts of the 91st and 92d, altered and enlarged. Art. 80.—93d of the former, verbatim. Art. 81.—98th of the former. Art. 82.—68th of the former, verbatim. Art. 83.—63d of the former. Art. 84.—97th of the former, altered.

ART. 85. It shall be the duty of the Secretary of War, when doubts shall arise not explained in this system, to explain and determine, for the government of courts-martial and for other purposes, the customs of war in like cases; to define, whenever there shall be occasion, the specific character of the acts enumerated as offences under these articles; and to specify such other offences, not capital, as may be prejudicial to the welfare of an army, and have been omitted herein. And all crimes not capital, and all disorders and neglects which officers and soldiers may be guilty of, to the prejudice of good order and military discipline, though not mentioned in these articles, are to be taken cognizance of by a general or regimental court-martial, according to the nature and degree of the offence, and be punished at their discretion.

ART. 86. All attempts to commit any of the crimes mentioned in the foregoing articles shall be punished according to their nature and extent, at the discretion of a court-martial, with reference to the punishment due to the crime had it been actually committed.

ART. 87. When any officer shall die or be killed in the service of the United States, and there be no legal representative of the deceased at hand, it shall be the duty of the quartermaster, or some other officer appointed by the commander immediately, in the presence of two other officers, to secure and make an inventory of all the effects of the deceased about him at the time of decease, which inventory, with a certificate on honor that the above injunctions have been strictly executed, shall be signed by the three officers, and transmitted to the Department of War for the information of the representatives of the deceased. For the same purpose, the quartermaster shall report the disposition made of the said effects for safe keeping. A like course shall be pursued in respect to the private effects of deceased soldiers by their respective captains, except that such effects may be converted into money at public sale, and the whole transmitted with the inventory to the Department of War.

ART. 88. In the foregoing articles the term enemy is meant to imply equally the terms enemy and rebel. The term soldier is meant to imply any person belonging to the armies of the United States, and not a commissioned officer.

ART. 89. The President of the United States shall have power to prescribe the uniform of the army.

ART. 90. These articles are to be read and published once in every six months to every garrison, regiment, troop, or company, mustered or to be mustered, in the service of the United States, and are to be duly observed and obeyed, at all times and in all places, by all officers and soldiers, who are or shall be in said service.

SEC. 2. *And be it further enacted*, That in time of war all persons not citizens of, nor owing allegiance to, the United States of America, who shall be found lurking as spies or emissaries from an enemy in or about the fortifications or encampment of the armies of the United States, or any of them, shall suffer death, according to the law and usage of nations, by sentence of a general court-martial.

ART. 2. Any commanding officer of an army, encampment, or garrison, during a time of war, who shall find any person lurking in a suspicious manner about the same, and have adequate reasons to believe that the said person is endeavoring to act as a spy, or is an agent of the enemy, shall cause him to be arrested and detained, until complaint can be made to the proper authority. Every officer thus arresting is required to cause such complaint to be made within twenty-four hours from the commencement of the arrest, under penalty of such punishment as a court-martial may adjudge. Should any officer suffer suit at law, in consequence of the exercise of the powers granted by this article, he may plead the general issue, and give this act and the special matter in evidence.

SEC. 3. *And be it further enacted*, That, if any officer, soldier, or follower of the army of the United States shall commit in any foreign country, wherein the armies of the United States may be employed, murder or any other offence which, if committed within the body of a country, would, by the laws of the United States, be punishable with death, such offender, on being thereof convicted, shall suffer death. And the trial of such murder or offences as aforesaid, committed by persons belonging to the armies of the United States in any foreign country wherein said armies may be employed, shall be in the district where the offender is apprehended, or into which he may first be brought.

ART. 2. Any officer, soldier, or follower of the army of the United States, who shall, in any foreign country wherein the armies of the United States may be employed, knowingly and wittingly aid and assist, procure, command, counsel, or advise any person or persons to do or commit any murder or crime, as aforesaid; and such person or persons shall, thereupon, do or commit any such murder or crime, as aforesaid, then all and every such person so as aforesaid, aiding, assisting, procuring, commanding, counselling, or advising, shall be, and are hereby declared, deemed, and adjudged to be accessary to such murder or other felony before the fact, and every such person, being thereof convicted, shall suffer death.

ART. 3. If any officer, soldier, or follower of the army of the United States shall, in any foreign country, wherein the armies of the United States may be employed, on purpose, and of malice aforethought, unlawfully cut off the ear or ears; or cut out or disable the tongue; put out an eye; slit the nose; cut off the nose or a lip; or cut off, or disable any limb or member of any person, with intention, in so doing, to maim or disfigure such person, in any of the manners before mentioned; then, and in every such case, the officer, soldier, or follower, so offending, his or their counsellors, aiders, or abettors, shall, on conviction, be imprisoned not exceeding seven years, and fined not exceeding one thousand dollars. And the trial of such offence of maiming, committed by any officer, or soldier, or follower of the army of the United States, in any foreign country wherein said armies may be employed, shall be in the district where the offender is apprehended, or into which he may first be brought.

SEC. 4. *And be it further enacted*, That the rules and regulations by which the armies of the United States have been heretofore governed, and the resolves of Congress thereunto annexed, and respecting the same; and that every act or part of any act of Congress now in force, contrary to the meaning of this act, be, and the same are hereby, repealed.

Art. 85.—99th of the former, enlarged. Art. 89.—100th of the former. Art. 90.—101st of the former augmented.
Sec. 2.—Sec. 2d of the former, verbatim, with one exception.

16th CONGRESS.] No. 200. [2d SESSION.

RECRUITING SERVICE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 2, 1821.

SIR: DEPARTMENT OF WAR, *December* 30, 1820.

In reply to the resolution of the House of Representatives of the 26th instant, requiring a statement from this Department showing the number of soldiers recruited for the army during the year 1820, indicating the fund from which the expenses of recruiting have been paid, and whether any unexpended balance of former appropriations has been used, and in what year said appropriation was made, I enclose reports of the Adjutant and Inspector General and the Second Auditor of the Treasury, showing the number of recruits and the expenses of the recruiting service.

It is deemed proper to observe that, although the number of recruits exceed three thousand, the army has not been so much increased since the last year; the difference between the enlistments and the increase is accounted for by the discharges, desertions, and other casualties, during the year, amounting to about half as many as have been enlisted.

I have the honor to be your obedient servant,

J. C. CALHOUN.

Hon. JOHN W. TAYLOR, *Speaker of the House of Representatives.*

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *December* 30, 1820.

In answer to that part of the resolution of the House of Representatives, requiring the number of soldiers enlisted during this year, which you referred to me, I take the liberty to make the following extract from my report to you of the 2d instant, viz: Abstract of the recruiting returns for 1820, whole number enlisted during the year, 3,211.

The number of recruits for this year is taken from the returns made to this office of the three first quarters, and an estimate for the present quarter.

I have the honor to be, with perfect respect, your obedient servant,

D. PARKER, *Adjutant and Inspector General.*

To the SECRETARY OF WAR.

SIR: TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *December* 28, 1820.

In compliance with a resolution of the House of Representatives of the 26th instant, I have the honor to transmit you herewith a statement of the funds out of which the expenses of recruiting for this year have been paid.

I have the honor to be, very respectfully, your obedient servant,

WILLIAM LEE.

The Hon. J. C. CALHOUN, *Secretary of War.*

Statement exhibiting the funds out of which the expenses of recruiting have been paid during the year 1820, *in obedience to a resolution of the House of Representatives, dated December* 26, 1820.

BOUNTIES AND PREMIUMS.

Balance unexpended in the hands of the Treasurer of the United States on the 1st January, 1820,	$3,197 92	
Amount appropriated for the year 1820,	21,000 00	
Amount refunded to the Treasurer of the United States by sundry persons during the year 1820,	3,441 01	
Amount brought to the credit of this appropriation on the books of this office, on settlement of accounts, being balances due thereon by sundry persons, arising out of advances made in 1819 and 1820,	26,917 54	
Amount brought to the credit of this appropriation from the books of the Third Auditor,	1,212 00	
Amount due by Robert Brent, late paymaster general, being part of the advance made him on account of bounties and premiums out of the appropriation for 1816, refunded in 1820, on settlement of his account,	35,364 56	
		91,133 02

EXPENSES OF RECRUITING.

Amount appropriated for the year 1820,		34,125 00
Amount available by the Secretary of War for the recruiting service of the year 1820,		$125,258 03

EXPENDITURES.

Amount of warrants issued by the Secretary of War to the 26th December, applicable to bounties and premiums,	38,610 17	
Amount disbursed by sundry persons applicable to bounties and premiums, and brought to the debit of that appropriation on settlement of their accounts, there being balances due by them to that amount on sundry specific appropriations,	9,030 41	
Amount disbursed to 26th December, on account of expenses of recruiting,	18,749 65	
Amount expended deducted,		66,390 23
Leaving a balance of appropriation on 26th December, 1820, of		$58,867 80

Under the following heads:

Bounties and premiums,	43,492 45	
Expenses of recruiting,	15,375 35	
		$58,867 80

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *December* 28, 1820.

WILLIAM LEE.

NOTE.—When we say Robert Brent, late paymaster general, refunded, in 1820, $35,364 56, it ought not to be understood that he refunded that sum in money; he refunded in settlement of account only; that is to say, a balance being due to him for disbursements on account of subsistence, and being a debtor under the head of bounties and premiums to a large amount, his account of subsistence was closed by carrying part of the balance, due by him on bounties and premiums, say $35,364 56 to his debit on that of subsistence, by which transaction bounties and premiums received a credit on our books, while subsistence was debited.

16th CONGRESS.] No. 201. [2d SESSION.

MILITARY ACADEMY AT WEST POINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 9, 1821.

SIR: DEPARTMENT OF WAR, *January* 8, 1821.

I have the honor to transmit herewith the information called for by a resolution of the House of Representatives, dated the 5th ultimo; that relating to expenditures at the Military Academy will be found in the statements of the Second and Third Auditors, marked B and C; and that concerning cadets is exhibited in the statement marked A.

I have the honor to be, sir, with great respect, your most obedient servant,

J. C. CALHOUN.

The Honorable JOHN W. TAYLOR,
Speaker of the House of Representatives.

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *January* 4, 1821.

SIR:

I have the honor to hand you herewith a statement, prepared in pursuance of a resolution of the House of Representatives of the United States, exhibiting the aggregate amount expended on the Military Academy at West Point to the 31st August last, ascertained from the accounts rendered to, and settled at, this office.

With great respect, your obedient servant,

WM. LEE.

Honorable J. C. CALHOUN, *Secretary of War.*

B.

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *January* 4, 1821.

A statement exhibiting the aggregate amount expended on the Military Academy at West Point, in the purchase, erection, and repairs of buildings and barracks; for stationary, books, mathematical instruments, and printing; for wood and hauling, transportation of stores and officers' baggage; and for expenditures of a contingent nature in the quartermaster's department for said institution; including the amount that has been expended in pay, subsistence, &c. of the teachers, officers, and cadets, as far as the same has been ascertained from the accounts of the disbursing officers, settled and rendered at the office of the Second Auditor. Furnished in pursuance of a resolution of the House of Representatives of the United States, 5th December, 1820.

Pay, subsistence, &c. of teachers, officers, and cadets,	$443,644 04
Wood and hauling,	9,251 67
Buildings purchased and erected, materials for ditto, and repairs,	26,128 91
Stationary, printing, books, and mathematical instruments, &c.	7,448 26
Transportation of materials, stores, and officers' baggage, &c.	146 59
Furniture, tools, expenses of the board of visiters, and other contingent expenses,	1,302 26
Aggregate amount,	$487,921 73

The foregoing statement is carried up to the 31st August, 1820, the latest period to which the accounts of the paymaster at the Military Academy have been received.

WM. LEE.

SIR: TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *January* 4, 1821.

I have the honor to hand you herewith a statement of the aggregate amount expended on the Military Academy at West Point, and for the pay, subsistence, &c. of the teachers, officers, and cadets, as far as the same has been ascertained from the accounts settled and rendered at this office: furnished in pursuance of a resolution of the House of Representatives of the United States, of the 5th December, 1820.

I have the honor to be, very respectfully, your obedient servant,

PETER HAGNER, *Auditor.*

Honorable JOHN C. CALHOUN, *Secretary of War.*

C.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *January* 4, 1821.

A statement exhibiting the aggregate amount expended on the Military Academy at West Point, in the purchase, erection, and repairs of buildings and barracks; for stationary, books, mathematical instruments, and printing; for wood and hauling, transportation of stores, officers' baggage; and for expenditures of a contingent nature in the quartermaster's department for said institution; including the amount that has been expended in the pay and subsistence of the teachers, officers, and cadets, as far as the same has been ascertained from the accounts of the disbursing officers, settled and rendered at the office of the Third Auditor. Furnished in pursuance of a resolution of the House of Representatives of the United States, of the 5th December, 1820.

Pay, subsistence, &c. of teachers, officers, and cadets,	$73,210 38
Wood and hauling,	26,612 36
Buildings purchased and erected, materials for ditto, and repairs,	141,824 82
Stationary, printing, books, and mathematical instruments, &c.	43,470 37
Transportation of materials, stores, and officers' baggage, &c.	4,166 11
Furniture, tools, postage, expenses of the board of visiters, and other contingent expenses,	5,014 69
Aggregate amount,	$294,298 73

It is proper to remark, that, prior to the act of the 3d March, 1809, no separate account was kept of the appropriation for the Military Academy; and up to the year 1812, inclusive, all the accounts of expenditures of the War Department, which had been settled and sent to the treasury for revision, were destroyed in the year 1814, with the public buildings; it is, consequently, impossible to furnish all the particulars required by the above mentioned resolution. It is also proper to add that the items of pay and subsistence, &c. are only such as have been collected from the accounts of the paymasters, settled since 1812, and up to July, 1815, and from such only in which it was supposed payments would appear. Other payments have, doubtless, been made within that period, but they are so distributed through the accounts (no separate account having been kept or rendered for the corps of engineers) that it will be impracticable to ascertain them, without particular examination of every paymaster's account through the war.

PETER HAGNER, *Auditor.*

A.

STATES.	The number of cadets that have been educated at the Military Academy since its first establishment from the District of Columbia, and the number from each State and Territory in the Union.	The number of cadets now in said Academy, from the District of Columbia, and from each of the States and Territories respectively. RECAPITULATION.

"And the number of orphans (if any) of those who have fallen in the defence of their country, or died in its service, who have been educated in said academy, or are now cadets in the same, and the district, State, or Territory, each is from. There are no data within the reach of the Engineer Department, which can supply the information required by this section of the resolution.

Total number of cadets actually educated at the academy, - - -	261
Total number of cadets now at the academy, - - - -	233
*In the navy, - - - - -	1
In the army, - - - -	161
Total number, -	162

All of which is respectfully submitted.

W. K. ARMISTEAD, *Colonel of Engineers.*

16th Congress.] No. 202. [2d Session.

NUMBER OF MILITIA CALLED INTO SERVICE IN THE YEARS 1812, 1813, 1814.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 17, 1821.

Sir: Department of War, *January* 16, 1821.

In obedience to a resolution of the House of Representatives, of the 15th April, 1820, directing the Secretary of War "to prepare a statement of the whole number of militia in service during the late war against Great Britain, showing the periods of their service, their pay, and from what States and Territories drawn, to be laid before the House at the next session of Congress," I have the honor to transmit herewith a report from the Third Auditor of the Treasury, which contains all the information the Department is enabled to furnish in relation thereto.

I have the honor to be, your most obedient servant,

J. C. CALHOUN.

Hon. J. W. Taylor, *Speaker of the House of Representatives.*

Sir: Treasury Department, Third Auditor's Office, *December* 12, 1820.

I have the honor to transmit, herewith, a statement of the whole number of militia in service during the late war against Great Britain, showing the periods of their service, their pay, and from what States and Territories drawn; prepared in obedience to a resolution of the House of Representatives of the 15th April, 1820.

From the lateness of the period at which this report is made, it may be proper to present an exposition of the causes of the apparent delay. Immediately after the receipt of your letter communicating the resolution of the House of Representatives, a competent number of clerks was employed on the subject. The investigations of these clerks extended to all the accounts of paymasters, both settled and unsettled, which contained payments for services during the late war, embracing not only the voluminous accounts of the several States which made payments to militia in their service, but to all the accounts of the paymasters of the regular army, as the accounts for the militia and regular service had not been kept distinct. In pursuing their examinations through such a multiplicity of various and bulky documents, great care and accuracy were requisite in noting down every roll that exhibited the services of militia, and ascertaining the connexion of payments in one account with payments for the same tour of duty in other accounts, so as to meet the terms of the resolution; forming, altogether, a considerable mass of tedious labor, of which the result is contained in the statement referred to.

I am, respectfully, sir, your obedient servant,

PETER HAGNER, *Auditor.*

The Hon. J. C. Calhoun, *Secretary of War.*

Statement of the whole number of militia in service during the late war against Great Britain, showing the periods of their service, their pay, and from what States and Territories drawn; prepared in obedience to the resolution of the House of Representatives of the 15th April, 1820.

In addition to the sums exhibited in the foregoing statement as paid to militia, the following sums have been advanced for the payment of the services of the militia from the several States named, and the District of Columbia, for which no accounts have been rendered, to wit:

Massachusetts,	$11,000 00	Kentucky,	20,248 00
New York,	8,720 00	Ohio,	3,860 00
Pennsylvania,	3,554 93	Tennessee and Mississippi,	14,070 00
Maryland,	2,012 65	District of Columbia,	9,451 19
Virginia,	38,890 45		
South Carolina,	703 34		$121,510 56
Georgia,	9,000 00		

NOTES.—In preparing this statement from the documents in the Third Auditor's office, it has been adopted, as the most accurate course, to estimate and enter the militia, according to the division, brigade, regimental, or company rolls, where the rolls have been rendered. Thus, in the sheets from which this condensed statement is formed, general officers and commandants of regiments have been entered with their staff, and captains with the subalterns and rank and file of their companies. The maximum number borne on these rolls has been carried into the statement, though that number would be diminished by death, or otherwise, in the course of the service; and hence the pay, as entered for a company or regiment, will not equal the estimated amount due, according to its aggregate numbers, for the given period.

In many instances the services mentioned in the statement to have been rendered in one year, have, in part, been rendered in another; as, for example, the service of a company may have commenced in November, 1813, and terminated in February, 1814, in such cases the rule has been to assign the company to the year in which the greatest length of service was performed.

It appears, in many instances, that the same troops, with slight variation of organization of officers, have performed several tours of duty in the same year. Such cases have most frequently occurred in sections of the country most exposed to the invasion of the enemy; as, for example, in the State of Maryland, the militia on the seaboard were called into service for short tours of duty, from six to ten times in 1813. It was also the case, to a less extent, in the States of New York, Connecticut, Pennsylvania, Virginia, and most of the Western States. In these cases the course could only be to enumerate the militia as often as their service was repeated.

It will be understood that the foregoing statement embraces only the pay of the militia, and the pay, subsistence, and forage of officers, so far as the rolls exhibited the same. The subsistence of the militia, the quartermasters' supplies, the transportation, ordnance stores, and all other expenses incident to their service, form no part of the estimate.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *December* 12, 1820.

PETER HAGNER, *Auditor.*

16th CONGRESS.] **No. 203.** [2d SESSION.

LANDS AND BUILDINGS ACQUIRED FOR MILITARY PURPOSES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 1, 1821.

SIR: DEPARTMENT OF WAR, *January* 31, 1821.

In compliance with the resolution of the House of Representatives of the 14th ultimo, directing the Secretary of War to lay before the House "a list of all the lands and buildings which have been purchased by the United States for military purposes, from the 1st day of July, 1800, to the present time; the cost of each site, and of the buildings, as far as practicable, together with the present estimated value; also, indicating those which, in the judgment of the Secretary, may be sold without injury to the public defence," I have the honor to transmit the enclosed list, and a letter from the Third Auditor of the Treasury, which contain all the information in the possession of the Department, required by the resolution.

The inquiry as to "the present estimated value of the lands," the Department has no means of answering satisfactorily; nor does it possess any information to enable it, at present, "to indicate those lands which may be sold without injury to the public defence." But it is believed, when all the sites for fortifications and other military purposes shall have been finally determined upon, that many of the tracts contained in the enclosed list will not be wanted, and may be sold without injury to the public defence; a particular inquiry in relation to which is intended to be instituted in the course of the present year.

I have the honor to be your most obedient servant,

J. C. CALHOUN.

Honorable JOHN W. TAYLOR,
Speaker of the House of Representatives of the United States.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *January* 16, 1821.

SIR:

I have the honor to return the "list of the lands which have been purchased by the United States for military purposes," &c. called for by the resolution of the House of Representatives of the 14th ultimo, prepared in your Department, and which you ordered to be transmitted to this office, to have affixed thereto the cost of the buildings erected thereon, in pursuance of said resolution. It is found, on examination, that it is impracticable to furnish that part of the information. No specific account having been kept of the expenditures on account of

the erection of buildings at the different military sites belonging to the United States, resort has been had to the accounts of the several disbursing officers, who it was known had made such expenditures since the year 1812, (those previously settled having been destroyed when the public buildings were burned, in the year 1814.) But it is found that they having made their expenditures for general objects of that description, without specifying the particular building to which the articles purchased have been applied, no probable data is presented by which any information to be relied upon can be furnished, as to the cost of the buildings erected on the lands belonging to the United States.

With great respect, your obedient servant,

PETER HAGNER, *Auditor.*

The Hon. JOHN C. CALHOUN, *Secretary of War.*

List of all the lands which have been purchased by the United States for military purposes, showing from whom purchased, date of conveyance, and consideration given for each site; arranged under the name of the State in which they are severally situated.

Situation and dimensions of each lot or tract.	From whom purchased, or by whom ceded.	Date of conveyance.	Consideration.
MAINE.			
Southwestern part of House island, situated near the entrance of the harbor of Portland, and within the limits of the town, containing 12 acres.	John G. Walden, -	Feb. 9, 1808,	$1,200 00

16th Congress.] No. 204. [2d Session.

LOANS OF GUNPOWDER AND LEAD.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 7, 1821.

Mr. Forrest made the following report:

The committee appointed by a resolution of the 4th of December last, to inquire "by whom and by what authority the loans of powder and lead munitions of the United States were made by the Ordnance Department, as detailed in the report made to the House of Representatives, by the Secretary of War, on the 20th of February, 1820," having had the subject referred to them under consideration, beg leave, in compliance with the direction of said resolution, to report:

That on application made to Lieutenant Colonel Bomford, of the Ordnance Department, a loan of twenty-three tons two quarters and ten pounds of lead, belonging to the Government of the United States, was made on the 16th of March, 1815, by the direction of that officer, from the public depot, to George W. Murray, who, it appears, was the proprietor of a white lead manufactory in the city of New York. This loan, which is represented to have been induced on the part of Colonel Bomford by the wish of aiding the public interest, by diminishing the price of white lead, "and at the same time by benefiting an important branch of manufacture," was for six months, with the election to the borrower, at the end of the term, of returning a similar quantity, or of paying for it at the current price for which the article should be then selling. At the expiration of the period agreed upon, Murray, having been called on by Captain Tyler, of the ordnance corps, for the fulfilment of his engagement, solicited Colonel Bomford for an extension of the time for repayment, which was granted by his direction; but neither the terms nor the time of this extension have been made to appear to the committee.

On the 25th of October following another loan of lead, amounting to twenty-eight tons four hundred three quarters and four pounds, it appears, was made to the same George W. Murray, upon no other authority, as the committee can discover, than that of Captain Tyler, who neglected to report the transaction to the head of the Ordnance Department, who remained ignorant of the fact until the month of November, 1819, when Captain Tyler (who has been dismissed the service) was superseded in his command at New York by another officer. Neither the inducements of this loan nor its terms have been discovered by the committee. They understand, however, that it is alleged by Murray to have been a private transaction between Captain Tyler and himself, and that he is not accountable to the United States for the property received. As respects the measures which have been taken

to recover the value of the property thus loaned, the committee are not informed that any prosecution or other legal measures have been resorted to by the Ordnance Department for the reclamation of the property, notwithstanding more than five years have elapsed since the liability of Murray arose; and, from the information they have obtained, they are inclined to believe that his pecuniary circumstances are now such as to preclude the expectation of obtaining, by legal process, any indemnity from him for the loss of property which has been sustained by these transactions.

On the 25th day of May, 1815, a loan of six hundred barrels of musket powder, containing sixty thousand pounds, was made to Stull & Williams, of Georgetown, District of Columbia, on their application to Lieutenant Colonel Bomford, as appears by the letter of the Secretary of War to the House of Representatives, under date of February 28, 1820. This loan was made under an agreement that a similar quantity of powder should be returned by the borrowers within sixty days after a requisition should be made upon them by the Government; for the performance of which agreement one Daniel Bussard became security. On the 23d of June following, less than thirty days after making the loan, the original agreement appears to have been converted into a sale by the parties concerned in the transaction, and a draught was given by John S. Williams, one of the firm of Stull & Williams, on his partner, John J. Stull, and in favor of John C. Williams, by whom it was endorsed for $21,600, being the value of the powder loaned, estimated at thirty-six cents a pound, payable ninety days after date. This draught was duly accepted by the drawer, but when it became due was protested for non-payment; soon after which, as appears to the committee, some verbal arrangement was entered into between the parties, in consequence of which the transaction was made to reassume its original character of a loan; under which new agreement two hundred barrels of cannon powder were returned to the Ordnance Department. The residue of the six hundred barrels of powder loaned not being returned or paid for, and Stull & Williams, the borrowers, having become insolvent, and some doubts being entertained as to the liability of Daniel Bussard, their original security, in consequence of the changed character of the transaction, a new agreement was entered into between him and Colonel Wadsworth, of the Ordnance Department, with the approbation and consent of the Secretary of War, on the 1st day of August, 1818, by which agreement the term of three years from the date was allowed to the said Daniel Bussard to return to the United States the balance of the powder not repaid by Stull & Williams, amounting to thirty-nine thousand five hundred and seventy-two pounds, one-fourth of which was to be of a quality suitable for small arms, and the remaining three-fourths of a quality suitable for cannon. In the same agreement there was another provision for the advance by the United States of $10,000 to the said Bussard, "to enable him to erect works on Paint creek suitable for manufacturing gunpowder;" for which advance he was to deliver to the United States, within three years from the date, forty thousand pounds of powder, to be in the proportions for small arms and cannon as before stated. This advance of $10,000, which "was taken from the funds appropriated for the ordnance service," was to have been secured by Daniel Bussard by a conveyance, in trust, of real estate. Since the arrangement was entered into, D. Bussard, as the committee have been informed, has delivered one hundred and eighty-seven barrels of powder, containing eighteen thousand seven hundred pounds, on account of the original loan to Stull & Williams.

The loans of powder which were made in June, July, and August, 1817, to Messrs. Dupont de Nemours & Co., of Wilmington, in the State of Delaware, and which amounted in the whole to three thousand five hundred and twenty-eight barrels, containing three hundred and fifty-two thousand nine hundred and two pounds, appear to have been made from different depots, by the order of Lieutenant Colonel Bomford, either with the consent or by the direction of George Graham, who was then acting Secretary of War. Part of these loans were made with conditions that the borrowers should return the quantity of powder loaned in sixty days after required; but the greater part was to be returned at the rate of twenty thousand pounds per month, commencing sixty days after previous notice should have been given by the Ordnance Department of its being required. The motives which are represented to the committee as having induced the War or Ordnance Department to make the loan were, the bad quality and deteriorating character of the property loaned, and the desire of aiding a domestic manufacture of great national importance. Of the quantity thus loaned, between three and four hundred barrels, as it appears by the communication of the Secretary of War of February 18, 1820, had been returned previous to that time; and of the remainder, forty-two thousand four hundred pounds have been received by the United States subsequent to that period; leaving now outstanding a quantity exceeding two hundred and seventy thousand pounds.

The committee do not understand that any measures are now taking for enforcing the repayment of this property; but they are informed that the borrowers are considered of sufficient responsibility, and that no apprehension is entertained of their ability to comply with any requisition which shall be made upon them for the fulfilment of their engagements.

The loan of fifty thousand pounds of powder to Peter Baudry, on the 21st of December, 1817, seems to have been made by the same persons, under similar circumstances, and from like motives, as the preceding loans to Dupont de Nemours & Co. For the security of this loan, Messrs. J. P. & V. M. Garesche became obligated with Baudry in a bond. No part of the property loaned appears to have been returned; and, as the principal has absconded to the Havana, and the sureties have become insolvent, there is little probability that any thing can be collected on the bond. No legal proceedings were ever instituted by the Ordnance Department, as the committee understand, to enforce the payment of the debt; nor are they apprized at what time a requisition was made on Baudry for the return of the property. The original receipt and bond of surety have been subsequently (on the 5th of January, 1820,) placed in the Treasury Department, where they now remain.

In addition to the preceding loans, the committee, since its appointment, accidentally has discovered that other loans of powder have been made by officers of the Ordnance Department, which were not communicated to the House in the report of the Secretary of War of the 18th of February last. One of these loans (of four hundred barrels) was made to Israel Whelan, of Philadelphia, by Captain Joseph H. Rees, and seems to have been reported to the head of the Ordnance Department in April, 1817. What the circumstances of the loans were, or whether the property has ever been returned, the committee is not advised.

Another loan of four hundred barrels of powder was made from the United States' arsenal on the Schuylkill, some time in May, 1817, to John R. Mifflin, of Philadelphia. This loan appears to have been negotiated by Captain J. H. Rees, who directed the military storekeeper, Archibald Steele, to deliver the property to J. R. Mifflin, upon his depositing his bond for the faithful return of the same, with two sufficient sureties. Owing to some misunderstanding, not properly accounted for to the committee, the military storekeeper declined receiving the bonds, but delivered the property, taking duplicate receipts therefor from J. R. Mifflin. Captain Rees, as he states, supposing, for some reason not very well explained, that the storekeeper had not delivered the property, omitted to make any inquiry into the fact, and remained, as he represents, for two years ignorant that the property had been delivered; and when afterwards he discovered accidentally that the military storekeeper had issued the powder on his order, he considered that it had been done on the responsibility of the storekeeper, and that it was not his duty to make any report of the fact to the commanding officer of the Ordnance Department, who, in consequence, remained ignorant of the transaction until within a very few days. What is the present situation of the borrower, the com-

mittee is not advised; but, judging by the length of time which has elapsed since the property was delivered, and the general appearance of the transaction, it is most probable that there is little or no chance of obtaining indemnity from J. R. Mifflin.

The committee having thus, in obedience to the resolution of the House, reported, so far as they have been able to ascertain, "by whom the loans were made," in compliance with that part of the resolution, which requires them to state "by what authority they were made," beg leave further to suggest: That they are ignorant of any law authorising officers of any department of the Government to loan, at their discretion, the property of the United States. To suppose this discretion to be incident to the nature of the trust reposed in them would be, in the opinion of the committee, a very dangerous doctrine, productive of consequences alarmingly injurious to the public interest. If the principle should be once established, it is inevitable that frequent and great abuses will flow from it, particularly when it is considered that the discretion is undefined as to persons, and unlimited as to extent. The most irresponsible may be, and indeed often are, charged with the care of public property of great amount. If the possible right of their disposing of it to individuals shall be admitted, innumerable frauds will result, which in many cases it would be difficult to detect, and almost in every one impossible to remedy.

The Ordnance Department is entrusted with property to the value of several millions of dollars. Should the right of loaning this property be recognized, even in the superior officers of the Department, it is obvious, that great losses might ensue, notwithstanding the most faithful and vigilant conduct. But still greater will be the danger, and more prejudicial must appear the consequences of this recognition, when it is considered that, as the discretion assumed is not conferred by any law, every subordinate officer of the Department, charged with the care of public property, possesses precisely the same right to exercise it as his superior. But this discretion, if it exists at all, is not confined to the Ordnance Department alone. Every officer of the Government, whether civil, military, or naval, who may happen to have in his charge or possession public property of any character or description whatever, may, under a real or affected view of expediency, dispose of it at his pleasure, and when the disposition shall have been made, plausible excuses will never be wanting to screen the persons who shall make it from the charge of a wanton violation of duty. The circumstances of the transactions detailed by the committee, perhaps, will more strikingly illustrate the correctness of the position they have taken than any argument which they can urge. The first loans of lead and powder appear to have been made by the order of a superior officer of the Department, and so far as the facts have been disclosed, from no improper motive. But no sooner is the right of loaning public property admitted to exist, than it is exercised by subordinate officers of the Department, without the concurrence, and, as it is represented, without the knowledge of their superiors. The loan of four hundred barrels of powder to J. R. Mifflin, by Captain Rees, is wholly disclaimed by the Department, as is also the second loan of twenty-eight tons of lead, by Captain Tyler. Yet both of these officers were probably induced to make these loans, by the circumstance of their having been previously directed to make similar loans to other persons. Another evil likely to arise, and which also is illustrated by the facts previously detailed, is, that when the power of officers to make loans of public property is once admitted, it cannot be confined to the loaning of powder or lead only, but may be extended even to the money of the Government. It appears from the statement furnished to the committee, that, in order to extricate the United States from the loss which seemed probable might result from the loan of powder to Stull & Williams, it was deemed advisable to make an advance or loan of ten thousand dollars to Daniel Bussard, their surety, for the purpose of inducing him to confirm his original liability to indemnify the Government. This advance was to be repaid at the expiration of three years, without interest, in powder, which it appears by the fact of the loans of that article, which had been previously made, and are still outstanding, was not required by the public service. Whether this arrangement, had it been entered into between individuals, would have been "the most eligible that could have been made in the circumstances" the committee do not feel that it is necessary to inquire, nor do they intend to express an opinion, but that it resulted from "a desire on the part of the agents of the Government to obtain the best security the nature of the case would admit."

But, in the opinion of the committee, this advance of money, like the transaction which it was intended to remedy, was not justified by any existing law, nor can it be considered as coming within the official discretion of those agents of the Government by whom it was made. The transaction, although it assumes the appellation of an advance, cannot be viewed by the committee in any other light than as a loan of so much public money to an individual, and as such, is subject to all the objections which may be made against the original loan of the powder, without affording the colorable excuse, that it was of an article "subject to constant deterioration." To admit that the large discretion assumed in this instance, of taking money from the public funds, to enable an individual to erect a powder manufactory, can be legitimately exercised by any Department of the Government, without a law authorizing the measure, in the opinion of the committee would be to impugn, if not utterly to defeat, that most salutary provision of the constitution, that "no money shall be drawn from the Treasury but in consequence of appropriations made by law." The multiplication of barriers against the dissipation of public funds, "by appropriating specific sums to every specific purpose, susceptible of definition," and "by disallowing all applications of money, varying from the appropriations in object or transcending it in amount," has long been a favorite theory, professed by the rulers, and cherished by the people of this country; and, although in practice it has been found difficult, and, perhaps, impossible, in all cases, to restrain the discretionary powers over public money within these circumscribed but salutary limits, yet, every departure from them into the undefined field of discretion, however imperious the apparent necessity, as it tends to lessen public security, by depriving a portion of the Government of its constitutional powers, affords a just subject, if not for apprehension, at least for regret.

Had the conditions of this advance to Daniel Bussard been, that he should have returned the money with interest, after one year, no doubt could be entertained of its illegality, and the committee think the circumstance, that the money was not to be repaid until the expiration of three years, and then without interest, and in an article not required by the public service, and at a price beyond its real value, cannot so far change the character of the transaction as to give it the stamp of legality. Advances of money by officers of Government, on contracts, are generally inexpedient, and not unfrequently productive of serious losses to the public, even in those cases where the advances seem to be incidents of the contracts; much more injurious must they be in cases like the present, where the contract appears to be a mere incident of the advance.

The character of this assumption of power derives no justification from the circumstance that it was intended to relieve the Government of a loss likely to result from a previous illegal transaction. The principle of confining officers of every department within the pale of their legitimate authority is, in the opinion of the committee, infinitely more important to preserve, than a sum of much greater amount than that which was supposed to be jeopardized in this case.

The committee, taking the view of the subject which they have now presented, and considering all the loans, whether powder, lead, or money, as extra official on the part of those persons by whom they were made, and not sanctioned by the Government, have not deemed it important to inquire very particularly into the motives which, in every instance, may have induced the transactions; nor into the profit or loss which might, in each particular

case, seem probable to result therefrom; more especially as it is far from their design of imputing improper or unworthy intentions to any officer who has been concerned. On the contrary, they are willing to believe that their conduct, in every instance, proceeded from a disposition of aiding the public interest, and a mistaken estimate of their own power.

In reply to that part of the resolution which directs the committee to inquire and report "how far and to whom the responsibility is attached, if a loss should be sustained," they can only observe, that if the views of the character of these loans which they have previously taken are correct, it will follow, as a necessary consequence, that the persons by whom they were made, are those to whom the Government must resort for an indemnity against any loss which has or may result. As to "the proper mode of proceeding, forthwith, against such delinquent, or delinquents," the committee, feeling some doubts whether the recommendation by the House of a legal prosecution, in such a case, might not be considered as trenching upon the powers of another Department, whose prerogative it is to supervise the conduct of inferior officers, and "to take care that the laws be faithfully executed," have not deemed it advisable to recommend the adoption of any resolution; but have contented themselves with submitting the facts contained in this report, together with their views upon them, leaving it to the discretion of the House to direct such further proceedings as it may consider necessary or expedient.

SIR: ORDNANCE DEPARTMENT, *December* 14, 1820.

In answer to the inquiries made by the committee of the House of Representatives, on the 10th instant, respecting the loans of powder and lead, I beg leave, in obedience to your orders, respectfully to state:

First. That the application for the loan of lead to Mr. George W. Murray, was not made by Captain Tyler, but by Mr. Murray personally, as will appear from a copy of a letter to Captain Tyler, herewith transmitted, bearing date the 25th February, 1815; from an extract from a second letter to him of the 6th March following; also, from Mr. Murray's letter of 25th September, same year, soliciting an extension of the time for returning the lead, and from my reply thereto, (addressed to Captain Tyler,) dated 9th October, 1815; all of which are contained in the paper marked A.

Secondly. That forty-two thousand four hundred pounds of powder have been returned by Messrs. Dupont de Nemours & Company, since the 12th February last.

Thirdly. That a copy of the receipt and bond given by Mr. Baudry is, as requested, herewith furnished in the paper marked B. That no part of said loan has been returned, and that the original receipt and bond of surety were placed in the hands of the Treasury Department on the 5th January last, in order that the same might be proceeded on for the recovery of the property.

Fourthly. That one hundred and eighty-seven barrels of powder, weighing eighteen thousand seven hundred pounds, have been received from Mr. Daniel Bussard, since the 12th February last, on account of the original loan to Stull & Williams.

I have the honor, &c.

GEORGE BOMFORD, *Lt. Colonel of Ordnance.*

The Honorable J. C. CALHOUN, *Department of War.*

A.

SIR: ORDNANCE DEPARTMENT, WASHINGTON, *February* 25, 1815.

We wish to be informed of the quantity of pig lead at your station. Mr. G. Murray, of New York, wishes a loan of about twenty-five tons, which Colonel Bomford is desirous of accommodating him with. He is, on a given time, to pay the current price at the time of delivery to him, or to return a similar quantity, at his option.

Respectfully, I am, sir, your obedient servant,

JOHN MORTON, *Deputy Commissary.*

Captain E. TYLER, New York.

Extract from letter of Captain E. Tyler, of ordnance, dated March 6, 1815.

Your letter of 28th February is received. Colonel Bomford states that Captain Campbell, in the changed state of affairs, will not require so large a supply of lead as on his application to you.* You can therefore furnish Mr. Murray with from twenty to twenty-three tons, on the conditions stated in my former letter respecting his application.

JOHN MORTON, *Deputy Commissary of Ordnance.*

Extract of a letter from G. W. Murray, dated New York, September 25, 1815, *to Colonel Bomford.*

A few days since, Captain Tyler called upon me to put me in mind that the time had come round for my decision whether I would return or keep the lead which you had so obligingly lent me.

I have stated to Captain Tyler that it is my intention to take the lead at the then current price, which he will be able to inform you was eleven dollars per cwt. sixty days credit.

The very heavy expense, and the unexpected delay which I have experienced in the completion of my white lead works, by the erection of a steam engine, have prevented me until within a few days from putting them in operation, by which causes the friendly intention of affording me a facility in my manufacturing establishment has been defeated; the whole quantity of lead having remained useless the greater part of the time. These unlooked for delays induce me to ask of you further indulgence by proposing to give my bond, or note, for the amount, payable in six months, as I presume it can be matter of little moment to the Government whether they receive this small sum in two or six months, provided the interest is paid; and I shall, in the event of your compliance, with pleasure add four months' interest, at six per cent. per annum, to the principal.

G. W. MURRAY.

* Captain Campbell, of the ordnance, who on the peace establishment would not require the supply.

Extract of a letter from the Ordnance Department, to Captain E. Tyler, dated October 9, 1815.

Respecting Mr. Murray's application for a further extension of the time for returning the lead borrowed of this department, Colonel Bomford directs me to observe that, if you are actually in want of the lead, it must be returned or paid for at the highest current prices. If you are not in actual want of it, you may allow him a further time to return it.

JOHN MORTON, *Deputy Commissary.*

DECEMBER 13, 1820.

I certify the foregoing to be true copies from the originals, on record in the Ordnance Office.

JOHN MORTON, *Captain of Ordnance.*

SIR: UNITED STATES' ARSENAL, NEW YORK, *November* 19, 1819.

With the public papers left me by Captain Tyler, there are two receipts of George W. Murray; one for 23 tons 2 quarters and 10 pounds, the other for 28 tons 4 hundred 3 quarters and 4 pounds pig lead; copies of the receipts I transmit herewith. It has been suggested to me, that from losses, &c. Mr. Murray is not likely to meet the demand when made, but that by taking it at such times, and in such manner as meets his convenience we might possibly get some part, or perhaps the whole.

One receipt is guarantied by F. H. Nicoll & Co., but as the time at which the lead should have been returned has long since expired, I am under the impression that they are exonerated, as the demand was most probably not made at the expiration of the time. Believing it probable that Captain Tyler has communicated with the Department, relative to this loan and delinquency of Mr. Murray, I have deemed it most proper to address you on the subject, before I apply to Mr. Murray, or Messrs. Nicoll & Co.

Very respectfully, &c.

J. D. HAYDEN, *Captain of Ordnance.*

Colonel D. WADSWORTH, *of Ordnance.*

SIR: ORDNANCE OFFICE, *December* 2, 1819.

Your communication of the 19th ultimo to Colonel Wadsworth has been duly received. I am directed by him to state to you, that he wishes you to make every exertion to obtain a return of the lead loaned by Captain Tyler to George W. Murray; the second parcel or quantity appears to have been totally unauthorized on the part of Captain Tyler.

In the opinion of Colonel Wadsworth, Messrs. Nicoll & Co. are not released from their obligation as surety for Mr. Murray. Surety must also have been given for the first parcel; and it will probably be found that Messrs. Nicoll & Co. gave their names on that occasion.

Under all the circumstances, now existing, you will endeavor to do for the best, in obtaining eventually a return of this property to the United States.

I am, very respectfully, your obedient servant,

JOHN MORTON, *Captain of Ordnance.*

Captain J. D. HAYDEN, *of the Ordnance, New York.*

SIR: UNITED STATES' ARSENAL, NEW YORK, *November* 2, 1820.

Mr. George W. Murray called on me last evening, and desired to know if I would receive the lead due on the first loan made him by Captain Tyler, in March 1815. I informed him that I could not give him a final answer until I had communicated with you, but that I presumed you would not consent to receive any part of the lead, unless he recognized the claim of the United States for the whole quantity loaned him by Captain Tyler, which he declined, stating that he still considered the second loan a private transaction between Captain Tyler and *himself*, consequently he did not feel *himself* bound to the United States for more than the residue of the first loan.

Be pleased to inform me if you will receive the quantity he proposes delivering.

Very respectfully, I am, sir, your obedient servant,

J. D. HAYDEN, *Captain of Ordnance.*

Colonel D. WADSWORTH, *of Ordnance.*

SIR: ORDNANCE DEPARTMENT, *November* 10, 1820.

Your letter of the 2d instant stating Mr. G. W. Murray's offer respecting a return of part of the lead due from him has been received.

As the claim against him has been placed in the hands of the Treasury Department, Colonel Wadsworth considers that any interference on his part would be out of order, and that the measures and decisions of the former must now be looked to in the case.

Very respectfully, I am, sir, your obedient servant,

JOHN MORTON, *Captain of Ordnance.*

Captain J. D. HAYDEN.

B.

Copy of receipt and bond of Peter Baudry for fifty thousand pounds of gunpowder.

Be it remembered, that I, Peter Baudry, have borrowed and received from the United States, (through the agency, on their part, of Captain Edwin Tyler, of the ordnance,) five hundred barrels of cannon powder, each barrel containing one hundred pounds, which I, the said Peter Baudry, engage to return or deliver to the United States within sixty days after the same shall be duly required from me, in good, hard-grained, glazed powder of the same description, of a quality and proof conformable to the regulations of inpection by the Ordnance Department, and in such casks as shall be approved by the said Department.

Dated New York, November 3, 1817.

PETER BAUDRY.

Witness, STEPHEN LUSH, Jun.

Know all men by these presents, that we, Peter Baudry, as principal, and J. P. & V. M. Garesche, Philadelphia, as sureties, are held and firmly bound unto the United States in the full and just sum of twenty-five thousand dollars, money of the United States, to which payment to be well and truly made, be bind ourselves, jointly and severally, our joint and several heirs, executors, and administrators firmly by these presents. Sealed with our seals, and dated at New York, this third day of November, one thousand eight hundred and seventeen.

The condition of the foregoing obligation is, that whereas the said Peter Baudry has received on loan from the United States five hundred barrels of cannon powder, as by the said Peter Baudry's receipt, and the duplicate thereof, bearing date the third day of November, one thousand eight hundred and seventeen, will fully appear. Now it is hereby understood, that if the said Peter Baudry shall and will, well and truly return and deliver to the United States the said quantity of powder, according to the stipulations contained in his receipt for the same, then this obligation shall be null and void; otherwise shall remain in full force and virtue.

PETER BAUDRY,
J. P. & V. M. GARESCHE.

Mr. Baudry executed this instrument in my presence on the 3d day of November, 1817, at the city of New York.

STEPHEN LUSH, Jun.

Messrs. J. P. & V. M. Garesche executed this instrument in my presence on the 22d November, 1817, at the United States' arsenal, on Frankford creek.

JOSEPH H. REES, *Captain U. S. Ordnance.*

TREASURY DEPARTMENT, SECOND COMPTROLLER'S OFFICE, *December* 14, 1820.

I certify that the foregoing is a true copy of the original now on file in this office.

RICHARD CUTTS.

SIR: ORDNANCE DEPARTMENT, *January* 17, 1821.

In answer to the call of the committee for information respecting the delivery of three hundred and fifty barrels of gunpowder from the depot on the Schuylkill, by Captain Joseph H. Rees, to John R. Mifflin, of Philadelphia, I beg leave to represent to you that the books of this office, and the correspondence with Captain Rees have been examined, and no record or authority discovered to warrant the transaction; and that this Department remained wholly ignorant of it, until communicated this day by Lieutenant Thomas, of the ordnance.

A letter has in consequence been addressed to Captain Rees, calling for prompt explanation preparatory to such military investigation as his case, and that of the parties previously acquainted with the transaction, may require. It is proper, however, to remark, that the conduct of Captain Rees, in whom this Department formerly had the highest confidence, for the last eighteen months has been such that the most rigorous measures would have been pursued, and were only suspended but from his low and enfeebled state of health.

With regard to the second inquiry of the committee I can only observe, that in very few instances has more than verbal authority been required, in consequence of the ordnance having been considered as a branch of the War Department, (with which daily and almost hourly communication was held,) and subject to obey the orders, whether written or verbal, emanating from that Department, which, at the time alluded to by the committee, was directed by Mr. George Graham. And further, that no contract or agreement has been at any time entered into by this Department, within my knowledge, without the sanction of such authority.

I have the honor to be, sir, very respectfully, your most obedient servant,

GEO. BOMFORD, *Lt. Colonel of Ordnance.*

Hon. J. C. CALHOUN, *Department of War.*

SIR: UNITED STATES' ARSENAL, FRANKFORD, *January* 24, 1821.

In answer to Captain Morton's letter of the 16th instant, stating that a committee of Congress appointed to inquire into the loans of gunpowder, &c. had applied to the Department of War for information respecting certain powder said to have been loaned by me to Mr. John R. Mifflin, and delivered by the military storekeeper at the arsenal on the Schuylkill, in May, 1817, I now beg leave to report:

That, at the close of the late war, and during the years 1816 and 1817, several orders were issued to the officers of the ordnance directing them to make sale of such portions of the public stores which, from their nature, were subject to decay or waste, or which might no longer be considered necessary for public service. A general order of this nature, issued by the Secretary of War in 1815 is hereto annexed, not as specially applicable to this subject but as illustrating the tenor of the instructions at that period. Subsequently to this, it was deemed expedient to dispose of the surplus powder on hand, inasmuch as the greater part thereof was damaged, and all of it subject to continual depreciation. The officers of the ordnance were accordingly directed, both by written and verbal orders, to make loans of powder to manufacturers and others who might apply for the same, upon their giving bonds with sufficient sureties, to return an equal quantity of powder of the United States' standard proof and quality. Numerous loans of this kind were made by the Ordnance Department when directly applied to, and by subordinate officers, whose acts were afterwards sanctioned and recognized by the Department. I beg permission, inasmuch as Captain Morton's letter of the 16th instant states that the records of the office contain no authority for these loans, to refer to my previous correspondence. In my letter of April 11, 1817, I reported to the Ordnance Department as follows: "I have loaned to Mr. Israel Whelan, of this city, four hundred barrels of cannon powder, to be returned when called for. He is a manufacturer and to be depended upon. Mr. Dupont has applied for the loan of five hundred barrels of the same, which I have promised him." Captain Morton's letter, April 16, 1817, in which the receipt of mine of April 11, 1817, is acknowledged, contains the following paragraph, which is the only reply to my communication on the subject of these loans that I have ever received. "On the subject of the loans of gunpowder the best bonds and security should be required to return the same within three months from the time of application, under the penalty of double the value so loaned; also, that the powder returned should be of standard proof and quality, and in good and sufficient casks," &c.

On the 18th of May, 1817, I received a letter from Captain Morton, of which the following is a copy, and the original is in my possession.

SIR: ORDNANCE DEPARTMENT, *May* 18, 1817.

Mr. P. Baudry, of Wilmington, Delaware, has applied to this Department for a loan of gunpowder of two to four hundred barrels, as may be required for the object he has in view. Lieutenant Colonel Bomford is disposed to comply with his request, and you will therefore be pleased to arrange this business with him. He offers any security in the city of Philadelphia that the powder shall be returned conformably to the stipulations which may be required, and you will therefore conform therein agreeably *to the instructions before given respecting loans of that nature.* You will of course not loan any powder otherwise appropriated, or that may be considered necessary to retain for the public service.

Respectfully, sir, your obedient servant,

JOHN MORTON.

Captain JOSEPH H. REES, *Philadelphia.*

On the 24th of May, 1817, I also received the following, since which period I have not loaned a single pound of powder:

SIR: ORDNANCE DEPARTMENT, *May* 21, 1817.

I am directed to request that, in the event of your having loaned the powder to Mr. Baudry, as authorized in our former instructions, you will please to forward the bonds of surety to this office. If the business should not have been concluded, you had better consult with the commissary general as to the security offered, in order that the form of the bond be proper, and the persons offered of the most unexceptionable responsibility. It should stipulate the powder returned to be of the United States' standard proof and kind. It is also recommended not to loan the *best* powder, as the United States ought to receive something as a kind of equivalent or interest for the accommodation. You are also directed not to loan any more than now authorized. You will keep copies of the bonds, and send the originals.

I am, respectfully, sir, your obedient servant,

JOHN MORTON, *Captain of Ordnance.*

Captain JOSEPH H. REES.

P. S. You will understand that the loans are made by Government with the sole view of aiding the manufacturers of our country. The Government should, therefore, be put beyond the possibility of incurring any loss by the accommodation so afforded.

J. M.

I have taken the liberty, sir, of stating these circumstances before reporting the supposed loan to Mr. Mifflin, because Captain Morton's letter seems to deny any authority whatever to loan at any time, but, more particularly, because I am called upon, by a letter of the 18th instant, from the chairman, to report directly to the committee of Congress on this subject.

Such being my view and construction of the orders I had received, I was applied to in the beginning of May, 1817, (a fortnight after my previous loans to Messrs. Whelan and Dupont had been thus sanctioned by the Department,) by Mr. John R. Mifflin, who was connected with the manufacturers in the vicinity of Philadelphia, for a loan of four hundred barrels of cannon powder. His application was supported, and himself recommended by Major Thomas Biddle of the United States' army, and by several gentlemen of Philadelphia of high respectability and credit. I informed Mr. Mifflin of the bonds required by the Department on such loans, and was told that they would be given. Sureties were offered, of whose ability and credit there could not be a moment's doubt. In acceding to the proposal on these terms, I conceived myself acting in strict conformity to the orders and instructions which I had received, and to the views of the Department. Believing the bonds executed and ready for delivery, I accordingly issued an order to Mr. Archibald Steel, military storekeeper at the arsenal on the Schuylkill, to deliver to Mr. John R. Mifflin four hundred barrels of cannon powder, upon his depositing his bonds for the same, with two sureties in double the value of the powder, for the faithful return of the same when called for by the United States. On the 24th May, 1810, Mr. Steel addressed the following letter to me, the original of which is in my possession:

SIR: UNITED STATES' ARSENAL, *May* 24, 1817.

Your order in favor of Mr. Mifflin for four hundred barrels of cannon powder is received. The powder will be delivered to him by giving me duplicate receipts for the same; *as for bonds* I have nothing to do with it.

Respectfully, &c.

ARCHIBALD STEEL, *Military Storekeeper.*

Captain JOSEPH H. REES.

Upon the receipt of this letter, I understood the whole transaction to be at an end. I could not believe that a storekeeper would disregard a positive order, and, notwithstanding his letter, I supposed that the powder never was or would be delivered. It was not until two years afterwards that I found it had actually been delivered.

The facts previously stated of themselves answer the question why the transaction never was reported to the Department. If my order had been obeyed and the bonds obtained, I should have reported the loan and forwarded the securities as in former cases. When, at a distance of time, I accidentally discovered that the military storekeeper had seen fit to issue the powder in his own manner, and of course on his own responsibility, I did not conceive it my duty to report upon the matter unless called upon to explain this order when presented in the storekeeper's accounts.

Upwards of three years since these accounts were filed, and I am now for the first time called upon to explain my part in them, for which purpose I beg leave to offer the preceding statement.

Very respectfully, sir, your obedient servant,

JOSEPH H. REES, *Captain of Ordnance.*

Lieutenant Colonel BOMFORD, *United States' Ordnance.*

Be it remembered that E. R. Dupont and Briscoe & Partridge have borrowed and received from the United States, through the agency, on their part, of Nehemiah Baden, first lieutenant of ordnance, thirty-three barrels of cannon, and three barrels of rifle, powder, containing three thousand six hundred pounds; which E. R. Dupont and

Briscoe & Partridge hereby engage to return or deliver to the United States, within sixty days after the same shall be duly required from E. R. Dupont and Briscoe & Partridge, in good hard grained glazed powder of the same description, and of a quality and proof conformable to the regulations of inspection by the Ordnance Department, and in such casks as shall be approved by the said Department.

In testimony whereof we have hereunto set our hands and affixed our seals, this 24th day of June, 1817.
(Given in duplicates.)

E. R. DUPONT,
BRISCOE & PARTRIDGE.

A. CARDON, } *Witnesses.*
R. DUPLANTE, }

Be it remembered that we, E. R. Dupont de Nemours & Co., have borrowed and received from the United States, through the agency, on their part, of the Ordnance Department, two hundred barrels of cannon powder, containing twenty thousand pounds, which we engage to return or deliver to the United States, within sixty days after the same shall be duly required from us, in good hard grained glazed powder, of the same description, of a quality and proof conformable to the regulations of inspection by the Ordnance Department, and in such casks as shall be approved by the said Department.

Signed triplicates this 16th August, 1817.

E. R. DUPONT DE NEMOURS & Co.

Be it remembered that we, E. R. Depont de Nemours & Co., have borrowed and received from the United States, through the agency, on their part, of Captain J. H. Rees, of the United States' ordnance at Philadelphia, eleven hundred and eighty-four barrels of cannon powder, containing in all one hundred and eighteen thousand four hundred and twenty pounds of powder; four hundred and forty-nine barrels of musket powder, containing in all forty-four thousand nine hundred and sixty pounds of powder; and fifty-nine barrels of rifle powder, containing in all five thousand nine hundred and twenty-two pounds of powder. And have also borrowed and received from the United States, through the agency of Lieutenant James Livingston, at Norfolk, three hundred and seventy barrels of musket powder, containing in all thirty-seven thousand pounds of powder; and two hundred and thirty barrels of rifle powder, containing in all twenty-three thousand pounds of powder: which we, the said E. R. Dupont de Nemours & Co., engage to return and deliver to the United States at the rate of twenty thousand pounds of powder per month, to commence within sixty days after previous general notice shall have been given by the United States' Ordnance Department of its being required, in good hard grained glazed powder, of the same description, of a quality and proof conformable to the regulations of inspection by the Ordnance Department, and in such casks as shall be approved of by said Department.

Dated at Philadelphia, this 6th day of February, 1818.

E. R. DUPONT DE NEMOURS & Co.

Be it remembered that we, E. R. Dupont de Nemours & Co. have borrowed and received from the United States, through the agency, on their part, of Captain Edwin Tyler, United States' ordnance, nine hundred and eighteen barrels of cannon powder, twenty-five barrels of musket powder, and fifty-seven barrels of rifle powder, each barrel containing one hundred pounds of powder, which we, E. R. Dupont de Nemours & Co., engage to return and deliver to the United States at the rate of twenty thousand pounds of powder per month, to commence within sixty days after previous general notice shall have been given by the United States' Ordnance Department of its being required, in good hard grained glazed powder, of the same description, of a quality and proof conformable to the regulations of inspection by the Ordnance Department, and in such casks as shall be approved of by said Department.

Dated at Philadelphia, this 6th day of February, 1818.

E. R. DUPONT DE NEMOURS & Co.

Bonds of surety, to nearly double the amount, were taken for the foregoing deliveries.

ORDNANCE DEPARTMENT, *December* 18, 1820.

I do hereby certify the foregoing to be true copies from the originals on record in the Office of Ordnance.

JOHN MORTON, *Captain of Ordnance.*

SIR: ORDNANCE DEPARTMENT, *July* 18, 1818.

Presuming you may be ignorant of the circumstances, I think it necessary to state that a large loan of gunpowder was made from the public magazines, about a year ago, to Messrs. Dupont de Nemours & Co., amounting to upwards of three thousand five hundred barrels, conditioned to be returned in sixty days after demand.

The value of the powder, at present prices, would be upwards of one hundred thousand dollars. The only security given is the bond of Dupont de Nemours & Co., and of V. & Chs. Dupont, of Wilmington.

Without questioning in the least the solvency of the parties, it is easy to imagine such a state of things as would make it quite impossible for them to comply with their engagements in the return of the powder, as well as the embarrassments to the public service arising from such a disappointment. The loaning of munitions of war, in such large quantities, from our magazines and arsenals, is viewed by me as a measure highly impolitic and hazardous; and it is hardly necessary for me to add, that I have had no agency in the transaction.

The consequences resulting from a similar transaction ought to put us on our guard against placing public property on so precarious a footing. The circumstances are as follows:

Stull & Williams, of Georgetown, borrowed six hundred barrels of powder, giving Daniel Bussard as surety. By a subsequent agreement the loan was converted into a sale, and Stull & Williams gave their note for twenty-one thousand six hundred dollars, or rather a bill of exchange in favor of John C. Williams, and endorsed by him. Before the bill became payable, another verbal agreement was made, to take the value of the bill in powder, of which only about one hundred and fifty barrels have been received from Bussard. His powder works having been lately destroyed at Bladensburgh, by an explosion, renders him incapable of fulfilling the engagement. I understand he now contends the converting the original loan into a sale has exonerated him from responsibility; and Stull & Williams, it is said, have made an assignment of property for the benefit of their creditors.

It seems extremely probable now, that this loan, made for the mere accommodation of individuals, without any prospect of advantage to the Government, will eventuate in a loss of four hundred and fifty out of six hundred barrels lent.

I have the honor to be, very respectfully, sir, your obedient servant,

DECIUS WADSWORTH, *Colonel of Ordnance.*

The Hon. JOHN C. CALHOUN, *Secretary of War.*

HEAD-QUARTERS, FOURTH MILITARY DEPARTMENT, BALTIMORE, *August* 1, 1815.

DEPARTMENT ORDER.

Captain Rees, of the Ordnance Department for the city of Baltimore, Fort McHenry, and its dependencies; Captain Villard, of the artillery for Fort Warburton; Captain Campbell of the artillery for Carlisle; and Lieutenant Reed, of the artillery for Philadelphia, Fort Mifflin, and its dependencies, are detailed and ordered, in conjunction with such persons as may be authorized by the commissary general of purchases, faithfully to execute the following general order from the War Department, of the 26th July, 1815. A duplicate of the inventories and reports will also be forwarded to the commanding officer of this department.

G. MITCHELL,
Colonel commanding Fourth Military Department.

DEPARTMENT OF WAR.

GENERAL ORDER.

It having been deemed expedient to ascertain with precision, as well the quantity of public stores now on hand at the several depots, as that portion of them which, from their nature, being subject to waste or decay, or which may no longer be considered as necessary for the public use, it would be advisable to dispose of, I have therefore to request that you will detail an officer of the Ordnance Department, who will, in conjunction with such person as shall be authorized by the commissary general of purchases to act with him at the respective depots, proceed to take an accurate inventory of all the public stores in charge of the several military storekeepers, and which have been deposited there by the commissary general of purchases or his deputies, within your military department, designating such of them as the public interest may, in their opinion, require to be sold. This inventory will be returned to the office of the superintendent general; and they will forthwith proceed, jointly, to sell at public sale those articles which they may designate as proper to be sold, on the following terms: the price must be the fair market price of the article, according to its quality and condition, and payment must be made either in approved bank notes or in the notes of individuals with approved endorsers. A credit of sixty or ninety days may be allowed.

The money or notes, the proceeds of the sale, must be deposited in such convenient bank as the public money is usually deposited in, to the credit of Thomas T. Tucker, Treasurer of the United States, as agent for the War Department; and receipts for the deposites must be transmitted to the Treasury, duplicates or copies of which must be returned to this Department. Care will be taken to designate the several heads of appropriation that ought to be credited with the amount of articles sold. A special report of each sale will be made to this office, specifying the time, place, price, quantity, and name of the purchasers.

Should the officer detailed by you, and the person nominated by the commissary general of purchases, differ as to the propriety of selling any particular article, they will make a special report on the case to this Department, and transmit a copy of their report to the commissary general of purchases.

The officer detailed by you for this service will receive an extra allowance of one dollar a day, when actually engaged in the performance of it, provided he is not already in the receipt of such extra allowance.

You will perceive the necessity of selecting an officer for this service whose judgment and integrity can be entirely confided in, and your selections will therefore not be confined to the Ordnance Department, but be made from the line, should you in any case deem it advisable. Your prompt attention to this business is particularly requested.

A. J. DALLAS, *Acting Secretary of War.*

[NOTE.—See Nos. 186, 190, and 192.]

16th CONGRESS.] No. 205. [2d SESSION.

EXTRA PAY TO OFFICERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 13, 1821.

Mr. COCKE made the following report:

The Committee on Military Affairs, to whom was referred the resolution of the House of Representatives, instructing them to inquire whether any officers of the army of the United States are employed as clerks, or in any other capacity, in any of the departments, or in the office of the surgeon general or apothecary general; and whether such officers, if any, have received any other compensation than their pay as officers; if so, what are their names, and what extra compensation have they received; submit the following report:

The committee directed a letter to the Secretary of War requiring information on the several subjects of the resolution, and received sundry statements which are annexed, and to which they invite the attention of the House.

It appears from the statements furnished by the Second and Third Auditors of the Treasury Department, that Captain George Bender was detailed to perform duty in the War Department; that, in addition to his pay and other emoluments, he has received $623 50 for acting as a clerk, first in the office of the adjutant and inspector general, and then in the office of the quartermaster general, from the 1st of January, 1818, to the 31st of March, 1819. That Lieutenant Thomas Johnson has been employed in the office of the quartermaster general, from the 16th of June, 1818, to the 31st of December, 1820, and has received extra compensation amounting to the sum of $1,160 50. That Captain John L. Gardner has been employed in the War Department, from the 28th of April to the 9th August, 1818, and in the office of the quartermaster general, from that date to the 31st of October, 1820; during which time he has received extra compensation to the amount of $1,160 50. That Major Truman Cross has been employed in the quartermaster general's office, from the 5th of October, 1818, to the 30th of September, 1820, and has received extra compensation to the amount of $908 75. That Captain John Morton has been employed in the ordnance office, from the 1st of January, 1818, to the 30th of September, 1820, and has received extra compensation to the amount of $1,210 25. That Lieutenant T. T. Stephenson has been employed in the ordnance office, from the 10th to the 31st August, 1818, and received extra compensation of $27 50. Lieutenant George Bladey has been employed in the office of the Engineer Department, from the 17th of April, 1818, to the 6th of May, 1819, and has received $738 75 extra compensation. Captain John L. Smith has been employed in the same department, from the 1st of April, 1819, to the 30th of September, 1820, and has received $566 25 extra compensation. Major Isaac Roberdeau was permitted, on the 1st of January, 1820, to take charge of the mathematical instruments, maps, &c. belonging to the United States, and for his services, in this respect, he has been paid $418 75, up to the 30th of November, 1820. Lieutenant W. T. W. Tone has been employed in the Engineer Department, from the 12th of July to the 30th of September, 1820, and has been allowed $100 extra compensation. Lieutenant Samuel Cooper has been employed in the adjutant and inspector general's office from the 1st of August, 1818, to the 30th of November, 1820, and has received $1,055 extra compensation. Captain James H. Hook has been employed in the office of the commissary general of subsistence, and has received $888 75 extra compensation; and, however strange it may appear, Captain Hook, in addition to his pay and emoluments, and extra compensation, is employed as superintendent of the recruiting service near Baltimore, but the particular amount paid for this service does not appear. In the same department, Lieutenant W. P. Yonge, from the 12th July to the 31st of August, 1820, and received $63 75 extra compensation. In the office of surgeon general, Lieutenant George Templeman, from the 17th of April to the 30th of October, 1819, and has received $286 25 extra compensation. And Lieutenant James Lovell, in the same department, from the 1st of November, 1819, to the 30th of November, 1820, and has received $495 extra compensation.

The committee discover that Lieutenant W. S. Colquhoun is employed in some of the public offices, but are unable to state how, or where, or what extra compensation has been allowed to him.

The above are the officers of the army that have been employed in the several departments of the Government, in the city of Washington, most of whom yet remain, as the committee are informed. The statements furnished them show, that, in addition to the pay and emoluments, and extra compensation, each of the above named officers have received payment for clothing. The committee are unadvised of any law to justify it, especially when they see neither of them has employed a private servant, and for the clothing of whom only, is an officer permitted to receive money in lieu of clothing.

In addition to the foregoing brief extracts from the statements of the Second and Third Auditors of the Treasury Department, they have received a letter from the Secretary of War, dated the 6th instant, explanatory of the principles upon which these extra allowances have been made. He remarks, that it appears to have been the practice of the Government, at all times, to allow, under some *shape or another*, extra compensation to officers detailed to perform such extra duties at the seat of Government. The committee are constrained to observe, that however long this practice may have continued they have no hesitation in saying it appears to them highly improper. For when an officer is detailed to perform duties in the departments, such as have been described, they cease to render any other; when they perform no duties as officers, but merely act as clerks, it seems unreasonable to pay them as officers, and at the same time compensation as clerks. When they cease to perform the functions of officers, but yet receive their pay and emoluments, the committee believe they should be content; that they have no legal or equitable claim for extra compensation, because extra payment is predicated on a supposition that additional duties are performed. In the present case the supposed additional duty is the only service required of them, and that, in reality, they perform no duty whatever as officers of the army.

Major Roberdeau, for example, took charge of the mathematical instruments in the department to which he belonged, and kept them in his office for less than one year, and for this service received from Government $418 75 on the supposition that he had rendered important extra duties.

The committee do think, that while this officer continued in the exercise of this trust, however important and responsible it may be thought, and he, performing no other duty that the committee are apprized of, he ought to have been satisfied with his pay and emoluments; they are at a loss to know by what rule of law or equity it is, that he has received, first, his pay and emoluments as an officer when he performed no duty as such, and then extra compensation for the only duty he did perform. The committee are fully persuaded, that either the pay and emoluments as an officer, or the extra compensation for keeping the mathematical instruments, should have been omitted, and that both ought not to have been paid.

The committee thought it incumbent on them to extend their inquiry to the compensation allowed the surgeon general in addition to his salary fixed by law. They find, from the statement furnished by the Third Auditor, that Doctor Joseph Lovell, the surgeon general, has been paid, in addition to his annual salary, from the 1st of October, 1818, to the 30th of September, 1820, for quarters $864, and for fuel for the same period $452 25, making an aggregate of $1,316 25. The act of Congress, establishing the office of surgeon general, provides that he shall be allowed a salary of $2,500, making no provision whatever for any other or extra compensation. The committee are surprised that a construction should be given to this law by which the surgeon general should be enabled to receive compensation beyond the limits of his salary, unless they bring to their aid the practice, which appears at all times to have prevailed, "in some shape or another to allow the officers at the seat of Government extra compensation."

If the word salary has an appropriate meaning, it certainly must be a stated or settled hire to the person who performs the duties of the office to which the salary is attached: no authority in this Government, except the Legislature, is deemed competent either to increase or diminish it. The committee are of opinion, that no precedent contrary to law ought or can have a binding influence. The case of the physician and surgeon general, adverted to by the Secretary of War, was erroneous in the beginning, and not an example worthy of imitation.

It is alleged by the Secretary of War, in justification of the extra allowance made the surgeon general, that it hardly admits of a doubt that he, who is liable to be ordered into active service, would be entitled to claim public quarters if there were such where he might be stationed, and that it is clear, he, in common with other officers, has

a right to the allowance for them, if he should be stationed where quarters cannot be furnished by the public. It appears to the committee this argument is more specious than solid; the law provides, that other officers shall receive pay and emoluments, and enumerates quarters and fuel as articles included in the provision intended to be made, but in the case of the surgeon general, the law provides a salary of $2,500, which the committee think, and which they believe, the Legislature thought should be in full for all services. If the surgeon general would be entitled to quarters and fuel when ordered into active service, it is not understood by the committee how his liability to be ordered into active service could entitle him to compensation for them before that liability had attached. If an officer is entitled to either pay or emoluments upon the contingency of being ordered into active service, it seems an arbitrary construction to grant him either before the happening of that contingency.

In no point of view can the committee perceive the propriety of this allowance, which as yet does not appear to be supported even by the authority of precedent, and therefore submit the following resolution:

Resolved, That no officer or other person employed by the Government of the United States, ought, under any circumstances or pretext whatever, be allowed and paid any other or greater compensation than is authorized by law, and that the practice which has heretofore prevailed, to make extra compensation in certain cases, without such authority, is incorrect, and ought to be abandoned.

SIR: DEPARTMENT OF WAR, *February* 6, 1821.

I enclose a statement containing a list of the officers who have been detailed to perform extra duty in the several branches of the War Department, since the 1st of January, 1818, with a statement of the sums under the various heads which have been paid to them respectively, and the nature of the duty which they have performed. I also enclose the regulations under which they have been allowed extra compensation while so employed; and the regulation of this Department with the decision of the Second Comptroller, by which the surgeon general has been allowed fuel and quarters, and the amount in value of such allowance.

It may be proper to observe, that it appears to have been the practice of the Government at all times to allow, under some shape or another, extra compensation to officers detailed to perform such extra duties at the seat of Government.

After the passage of the act of the 14th April, 1818, regulating the staff of the army, the head of the several branches of the staff being concentrated at the seat of Government, it became necessary to detail as many officers in the several branches as would render their administration minute and effective. This course was preferred to increasing the number of clerks, as it was believed to be more economical, and better calculated to secure the objects contemplated by the act. The number of officers detailed for extra duty being thus considerably increased, it became necessary to establish some rule as to the extra compensation, and that of the 10th of August, 1818, was adopted as being equitable. It reduced the rate of compensation twenty-five cents per diem, as previously fixed in the case of Captain Bender, who was allowed by the then Secretary of War, Mr. Monroe, $1 50 extra compensation, to which an allowance for fuel and quarters was made under an order of Mr. Crawford, when Secretary of War. It is believed, in a pecuniary point of view, without taking into consideration the nature of the service, that the officers so detailed are not much, if any, benefited, as the expense of being here is considerably greater than at the military posts; while the officer is deprived of the saving which he might make by living in messes, as is usual at the posts.

In the case of the surgeon general, he was allowed fuel and quarters, in conformity to the precedent established in the case of the physician and surgeon general, whose salary was fixed at $2,500 per annum, by the act of the 3d March, 1813, and who by the regulation for the army, sanctioned the 28th June, 1814, by the then President, and recognized as of force by the act of the 24th of April, 1816, was allowed fuel and quarters. The question whether he is entitled to fuel and quarters, was submitted to the decision of the Second Comptroller of the Treasury, whose decision confirmed that of this Department, and while the case was pending before the Comptroller the Attorney General was verbally consulted, and concurred in the principles of the decision.

Fuel and quarters, in contemplation of law and the regulations, ought to be furnished in kind, and no pecuniary compensation is ever allowed to an officer for them, unless he is ordered to do duty where they cannot be furnished by the public, which is the case as it respects quarters at the seat of Government.

As it hardly admits of a doubt that the surgeon general, (who is liable to be ordered into active service) would be entitled to claim public quarters, if there were such where he might be stationed, it seems clear, that he, in common with other officers, has a right to the allowance for them, if he should be stationed where quarters cannot be furnished by the public. The same considerations are applicable to the allowance for fuel. In addition to these facts, it is proper to observe, that the allowance for fuel and quarters to the surgeon general was contained in the detailed estimates of the quartermaster general, laid before the military committee in 1819, and that the extra compensation to the officers detailed to perform extra duty has been annually laid before Congress in the statement of the contingent disbursements of the army.

Enclosed are statements of the heads of the subordinate departments, showing the services performed by the officers detailed for extra duty.

I have the honor to be, your obedient servant,

J. C. CALHOUN.

Hon. SOLOMON VAN RENSSELAER, *of the Military Committee.*

SIR: TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *February* 5, 1821.

I have the honor to hand you, herewith, a statement of the pay, subsistence, forage, clothing, and extra compensation, received by sundry officers of the army while employed in the several branches of the War Department, at the seat of Government, between the 1st of January, 1818, and the 31st December, 1820; prepared in pursuance of a letter from the Committee on Military Affairs, of the 28th January, 1821, addressed to the Secretary of War.

Where the compensation does not commence as early as the first mentioned date, it is because the officer was not detailed for extra duty until subsequently; and where it is not extended to the close of the last year, it is owing to the accounts of the disbursing officers not having been received for a period later than that noted in the statement, or of their not continuing on extra duty.

I have the honor to be, sir, with high respect, your obedient and very humble servant,

WM. LEE.

The Hon. JOHN C. CALHOUN, *Secretary of War.*

Statement of the pay, emoluments, and extra compensation, received by the following officers of the army, while employed in the several branches of the War Department, at the seat of Government, between the 1st of Jan. 1818, and the 31st of Dec., 1820; furnished in pursuance of a letter from the Committee on Military Affairs, of the 28th Jan. 1821, addressed to Secretary of War.

NAMES.	PERIODS OF SERVICE.	PAY AND EMOLUMENTS AS OFFICERS.				Extra allowance.	Whole am't of extra allowance.	Whole am't of pay and emolum'ts.	Total am't of pay and emoluments & extra pay.	REMARKS.

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, *February* 5, 1821.

WM LEE.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *February* 3, 1821.

The Third Auditor of the Treasury has the honor to hand to the Secretary of War a statement of the fuel, quarters, &c. received by the officers therein named, in pursuance of the letter of the Military Committee of the House of Representatives, dated January 23, 1821.

Statement of quarters, fuel, forage, transportation, and per diem allowance, as far as the same has been paid through the quartermaster general's department, and settled at this office, from 1st January, 1818, to 31st December, 1820, to certain officers at the seat of Government; furnished in pursuance of the letter of the Committee on Military Affairs, of the 23d of January, 1821, addressed to the Secretary of War.

Names of officers.	Period.	Dols. Cts.	Quarters.	Fuel.	Forage.	Transportation.	Per diem allowance	Aggregate.
Major Isaac Roberdeau,	For allowance for quarters, from August 10, 1818, to September 21, 1819, and from October 9, 1819, to August 15, 1820,	-	$564 60					
	For fuel, in kind, from August, 1818, to December 31, 1820,	-	-	415 95				
	For forage, in kind, for same period,	-	-	-	693 55			
	For transportation of baggage from New York to Newark and back, in 4th quarter, 1819,	2 80						
	For transportation of baggage from Washington city to the northern frontier and returning,	285 60						
	For transportation of baggage from New York to Washington,	31 78						
		-	-	-	-	320 18		
	For per diem allowance whilst employed in survey in New York, in 4th quarter, 1819, from September 21 to November 30, 1819, and from 1st to 28th December, 1819—99 days, at $1 50 per diem,	-	-	-	-	-	148 50	2,142 78
Captain George Bender,	For an allowance for quarters, from January 1 to April 30, 1818,	34 00						
	For an allowance for quarters, from May 1, 1818, to April 30, 1819,	132 60						
			166 60					
	For fuel, in kind, from January 1, 1818, to March 31, 1819,	-	-	121 15	-	-	-	287 71
Captain John Morton,	For an allowance for quarters, from August 10, 1818, to September 30, 1820,	-	308 00					
	For fuel, in kind, from September 1, 1818, to December 31, 1820,	-	-	204 04	-	-	-	512 04
Captain Trueman Cross,	For an allowance for quarters, from October 1, 1818, to July 12, 1820,	256 00						
	For an allowance for quarters, from September 1 to December 31, 1820,	78 40						
			334 40					
	Fuel, in kind, from October, 1818, to December 31, 1820,	-	-	210 40				
	Forage, in kind, as assistant inspector general, for December, 1820,	-	-	-	18 23			
	Transportation, in second quarter, 1819, from Washington city to Baltimore and back,	9 12						
	Transportation from Washington city to New York, Albany, Niagara, Sackett's Harbor, Plattsburg, Boston, and back to Washington, in 3d quarter, 1820,	247 56						
		-	-	-	-	256 68	-	819 71
Captain James H. Hook,	For an allowance for quarters, from October 21, 1818, to September 30, 1820,	-	280 50					
	Fuel, in kind, from October, 1818, to December 31, 1820,	-	-	200 17				
	Transportation from Washington city to Philadelphia and back, in December, 1818,	32 38						
	Transportation from Washington to Baltimore and back, in 3d quarter, 1820,	9 12						
		-	-	-	-	41 50	-	522 17
Captain John L. Gardner, assist. dep. quarterm'ter gen.	For an allowance for quarters, from August 1, 1818, to December 31, 1820,	-	348 00					
	Fuel, in kind, for the same period,	-	-	209 32	-	-	-	557 32
Captain John L. Smith,	For an allowance for quarters, from March 8, 1819, to September 30, 1820,	225 60						
	For an allowance for quarters, from November 1 to December 31, 1820,	24 00						
			249 60					
	Fuel, in kind, from March, 1819, to December 31, 1820,	-	-	136 00				
	Transportation, in 3d quarter, 1819, from Washington city to Havre-de-Grace and back,	19 00						
	Transportation from Washington to New York and back,	45 40						
	Transportation from Washington to Old Point Comfort and back, in 4th quarter, 1820,	51 12						
		-	-	-	-	115 52	-	501 12
Lieutenant Thomas Johnston,	For an allowance for quarters, from June 16, 1818, to December 31, 1820,	-	366 00					
	Fuel, in kind, for the same period,	-	-	212 57	-	-	-	578 57

STATEMENT—Continued.

Doctor J. Lovell, surgeon gen'l,	For an allowance for quarters, from October 1, 1818, to September 30, 1820,	-	864 00					
	Fuel, in kind, from October, 1818, to September 30, 1820; allowed under the decision of the Second Comptroller of the Treasury,	-	-	452 25	-	-	-	1,316 25

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *February* 3, 1821.

PETER HAGNER, *Auditor.*

SIR: QUARTERMASTER GENERAL'S OFFICE, *Washington, February* 3, 1821.

It will be recollected that when the office of the Quartermaster General was established at Washington, that officer urged the necessity of having officers from the line of the army to assist in the performance of his office duties: in wishing to effect this arrangement he was influenced by many considerations. His duties were not to be those of an accountant, involving the mere addition and examination of vouchers; but were to embrace, in addition to a military and administrative control of every branch of the department throughout the Union, the making of military estimates, reports, and statements, and a strict military scrutiny into disbursements of every character; he foresaw the necessity of having men acquainted with the casualties of active service, and military usages, to enable him to effect the objects for which the office was established. The duties of the department are so multifarious, and the allowances and expenditures depend so much upon contingencies, that a volume of laws and regulations would not embrace instructions sufficiently explicit to form a standard of reference: the peculiar circumstances of the case; the condition of the troops; and the nature of the service in which they should be engaged, (points on which military men alone were competent to decide,) were, in a great measure, to determine the propriety of various items of expenditure. Hence he was opposed to the employment of men who were *professionally clerks*, and who, he was aware, could be of but little service to him beyond the mere casting of accounts, and the copying of letters; and insisted on being permitted to select officers from the army, sufficiently qualified as clerks for that part of their duty relating to the desk, and, at the same time, sufficiently versed in the details of military service to make them useful and efficient. But, important as these considerations were, he had a different and a higher object in view; which was, that his office should become a school of instruction, in which young gentlemen of the army, at the same time that they might be usefully employed, should have an opportunity of acquiring habits of business, and of educating themselves for the various duties of the staff.

Three officers were selected. The papers marked A and B will furnish some idea of the duties which each performs. Captain Cross has, in addition to his office duties, disbursed about forty thousand dollars per annum; and, in the absence of the quartermaster general on public business, has discharged the duty as chief of the office.

I have the honor to be, sir, your obedient servant,

THOMAS S. JESUP, *Quartermaster General.*

The Hon. J. C. CALHOUN, *Secretary of War.*

A.

Distribution of the duties of the Quartermaster General's office.

1. Captain Cross will assist in the correspondence of the office; keep up the register of letters received, and place them on file; keep the register of summary statements; assist the quartermaster general in making the regular reports, estimates, and statements, for the Secretary of War; and such others as he may, from time to time, require; and make the disbursements of the department at Washington.

2. Lieutenant Gardner will keep the register of letters written, and orders received; make the quarterly report of moneys distributed to the disbursing officers; keep up the register of reports and estimates made for the Secretary of War; attend weekly at the Adjutant and Inspector General's office, and take the general orders; and will attend to the topographical department.

3. Lieutenant Johnson will examine the money accounts and property returns of the disbursing officers, and transmit them, when in form, to the proper accounting office. He will make the semi-annual return of stores; the quarterly report of the rate of exchange; keep up the register of moneys required, and draughts accepted; the register of stores on hand; and the journal and leger. He will file the prices current, and attend to the filing of all returns and reports designed for the office.

In addition to the regular duties assigned to the several officers, they will be subject to the casual duties of the office, as the quartermaster general, or the chief of the office, may direct.

THOMAS S. JESUP, *Quartermaster General.*

April 1, 1819.

B.

Books of the office.

1. An order book, in which shall be recorded all regulations for the government of the department; and all orders of the War Department, and of the general officers, relating to its duties.
2. A letter book, containing a fair copy of all letters written.
3. A register of letters received.
4. A register of estimates and reports; containing copies of all estimates and reports made for the War Department, the Treasury Department, or for Congress.
5. A register of moneys required, and draughts accepted.
6. A register of stores on hand.
7. A journal of all pecuniary transactions; in which are detailed the state of all accounts of the department.
8. A leger, presenting a summary view of all accounts of the department.
9. A register of contracts, into which are copied all contracts made by the department.
10. A register of monthly summary statements; exhibiting a monthly state of the accounts of all officers of the department.

SIR: SURGEON GENERAL'S OFFICE, *February* 6, 1821.

I have the honor to state, that the officer detailed for duty in this office is employed in keeping the books of the office, in copying letters, reports, &c. and generally in performing the usual duties of a clerk. He is required in consequence of the surgeon general having necessarily been made the immediate accounting officer of the medical department, from the nature of medical returns, accounts, &c.; and for this reason Dr. Brereton, who had been a surgeon in the navy, and afterwards engaged in the business of an apothecary, is employed, the accurate examination of such accounts requiring one well acquainted with army or navy practice, as well as the quality and use of all medical supplies, and their price in various parts of the country.

As every account relating to the medical department, whether of money or property, is critically examined by him, his time is so fully occupied, that it would be impossible for him to perform the ordinary duties of clerk, especially as these duties are most urgent at that part of the year when the estimates, requisitions, and returns, require all his attention.

Respectfully, your obedient servant,

JOSEPH LOVELL, *Surgeon General.*

Hon. J. C. CALHOUN, *Secretary of War.*

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *February* 6, 1821.

In answer to your inquiry, relative to the detail of officers of the line for extra duty in this office, I have the honor to state, that there has always been one or more officers on duty in the office since the year 1810. During the war there were sometimes four commissioned officers, exclusive of the adjutant and inspector general, and the citizen clerks; since the peace, however, there has never been but one commissioned officer at a time—his principal duties have been such as are strictly military; examining recruiting papers, and tracing the military history of officers and soldiers, preparatory to answering the inquiries which are constantly made relative to their situation and service.

The allowance for such extra duty, both before the war and since, has been one dollar and twenty-five cents per day.

I have the honor to be, sir, with perfect respect, your obedient servant,

D. PARKER, *Adjutant and Inspector General.*

To the SECRETARY OF WAR.

SIR: OEFICE OF THE COM. GEN. OF SUBSISTENCE, *Washington, February* 6, 1821.

I have the honor to state, that Captain Hook was detailed for duty in this office, in October, 1818, the period at which the department first went into operation. He aided in organizing the commissariat; is charged with a portion of the correspondence of the office, the regulating the deliveries of contractors, collects the materials and makes the calculations on which estimates and contracts are predicated, and is charged under the commissary general with regulating and superintending the duties of the clerks in the office.

In addition to his duties in this office, Captain Hook has, since October, 1819, to the present time, performed the duty of superintending the recruiting for his regiment, and has recruited, organized, and sent to the regiment, two companies; and he has at this time forty men and two subalterns near Baltimore.

Lieutenant Colquhoun was brought into the office, as an assistant commissary of subsistence, to receive instruction, and to make himself conversant with the forms, returns, accounts, &c. with the view of imparting information to the assistants in the south division. Since his entrance into the office, to the present time, his services were found necessary, as, from the increased business of the office, an additional clerk or assistant had become absolutely necessary. While in the office he has received no other pay than that of an assistant commissary.

I have the honor to be, your most obedient servant,

GEORGE GIBSON, *Com. Gen. of Subsistence.*

Hon. JOHN C. CALHOUN, *Secretary of War.*

SIR: ENGINEER DEPARTMENT, *February* 6, 1821.

The officers now on duty in the engineer department are, Major Roberdeau, topographical engineer; Captain Smith, of the corps of engineers; and Lieutenant Tone, of the light artillery.

Major Roberdeau, besides his topographical duties, which are numerous and arduous, has in charge the topographical bureau, which involves a responsibility for the safety and preservation of the maps, the charts, books on engineering, and the instruments belonging to the War Department, of which it is the depository. Among the instruments are those imported for an observatory, and for the service of the triangulation survey of our coast, which were collected and fabricated under the superintendence of Mr. Hasler, who was during Mr. Madison's administration sent to Europe for the purpose, and which cost $17,167 61. These, on account of intricacy and delicacy of construction, have been especially confided to Major Roberdeau, who, by long experience in the use, together with a mechanical knowledge of instruments, is fully qualified to understand and preserve them.

The station filled by Captain Smith, of assistant to the chief engineer, has been co-existent with the establishment of the engineer department. The object in view at the time of its creation was to ensure at all times the presence of an officer acquainted with the details of service, who could supply the place of the chief engineer when absent casually, or on tours of inspection, as well as to divide with him the administrative duties of the department when more than ordinarily multiplied and pressing.

Lieutenant Tone has been recently detailed on extra duty, and temporarily attached to the engineer department, for the purpose of condensing voluminous reports, from his peculiar fitness for making calculations and tabular statements, as well for the engineer department as for the service generally.

I have the honor to be, sir, with the highest respect, your obedient servant,

W. K. ARMISTEAD, *Colonel of Engineers.*

Hon. J. C. CALHOUN, *Secretary of War.*

TREASURY DEPARTMENT, SECOND COMPTROLLER'S OFFICE, *November* 9, 1820.

The Second Comptroller has considered the reasons offered by the Third Auditor for charging the surgeon general with the amount paid to him for quarters and fuel by the quartermaster's department. The act entitled "An act regulating the staff of the army" authorizes the appointment of a surgeon general, and fixes his salary, which clearly shows that he belongs to the staff of the army. His salary has been paid to him. As other officers, he is liable to be called into active service, which distinguishes his case from that of a fixed salary officer of the civil Government.

The act of the 3d of March, 1813, required the Secretary of War to prepare regulations for the army, which, when approved by the President and laid before Congress, were to govern until revoked by the same authority. The act of the 24th April, 1816, provides for retaining those regulations, subject to such alterations as the Secretary of War may adopt with the approbation of the President; and a regulation having been made by the Secretary of War on the 10th August, 1818, allowing to the surgeon general quarters and fuel, the accounts for such allowances are legal, and must be passed.

RICHARD CUTTS.

January 30, 1821. A true copy from the original filed in this office.

RICHARD CUTTS.

Regulations and decisions of the War Department upon which extra compensation has been allowed.

JANUARY 2, 1815.

Let Captain Bender be allowed one dollar and fifty cents per day while employed on extra duty in the Adjutant and Inspector General's office.

JAMES MONROE.

Extract. JUNE 1, 1816.

Allowed, provided it does not exceed the same allowance when furnished by the quartermaster. When officers are stationed at any place where there is no quartermaster, and whose quarters are not found, such allowances will be made by the accountant without reference to the Secretary.

W. H. CRAWFORD.

MAY 12, 1818.

The officer whom General Swift may detail to aid in performing the duties of the engineering department will be allowed one dollar and fifty cents per day in lieu of quarters and fuel.

J. C. CALHOUN.

JULY 17, 1818.

An allowance of one dollar and fifty cents per day was made to the officer detailed to perform extra duty in the ordnance department, on the following endorsement on his account: "Allowed in lieu of fuel and quarters."

J. C. CALHOUN.

AUGUST 10, 1818.

Officers detailed to perform duties in the office of chief engineer, quartermaster general, adjutant and inspector general, or the chief of the ordnance, will be allowed, while performing such duties, at the rate of one dollar and twenty-five cents per day, in addition to their usual pay and emoluments. The quartermaster general will allow officers so detailed fuel and quarters, agreeably to their respective ranks.

J. C. CALHOUN.

WASHINGTON, *May* 4, 1820.

Major Roberdeau, of the topographical engineers, will be allowed one dollar and twenty-five cents per day, from the 1st of January last, for extra duty, in taking care of and preserving from injury the mathematical instruments, maps, and plans in the engineer department, agreeably to the regulation of the 10th of August, 1818.

J. C. CALHOUN.

16th CONGRESS.] **No. 206.** [2d SESSION.

FORTIFICATIONS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 15, 1821.

SIR: DEPARTMENT OF WAR, *February* 12, 1821.

In compliance with a resolution of the House of Representatives of the 9th instant, directing "that the Secretary of War report to that House the progress which has been made by the Board of Engineers in determining the sites and plans of fortifications of the coast of the United States; the sites which may have been selected; the estimates of the expense in completing the several works; the number of troops necessary to garrison them in peace and in war; the progress made in erecting the fortifications; the advantages resulting from the system when completed, particularly in reducing the expense of defending the Atlantic frontier;" I have the honor to enclose a report of the Board of Engineers, marked A, and a report of the Engineer Department, marked B, which give the information required by the resolution.

It may be proper to observe, that the projected fortifications have been distributed into three classes, according to their relative importance, and that it is determined to erect those of the first class previous to the commencement

of the second and third classes, with the exception of the works at Mobile Point and Dauphin Island. These works were commenced in preference to those projected at Bayou Bienvenue and Fort St. Philip; for, although the latter are placed in the first class, it was not, however, deemed proper to commence with them, as they were much less extensive than the two former, and could be completed in a short time, should the state of our relations with other Powers render it necessary.

The contractors for the works at the Rigolets were, by the arrangements with them, to have erected those contemplated at Chef Menteur; but so many impediments have been encountered, that it has been necessary for them to confine their operations wholly to the former.

I have the honor to be your obedient servant,

J. C. CALHOUN.

Hon. JOHN W. TAYLOR, *Speaker of the House of Representatives.*

A.

SIR: CITY OF WASHINGTON, *February* 7, 1821.

The following summary of the operations of the Board of Engineers, called for by your order, is respectfully submitted.

The commission charged with reconnoitring the frontiers of the United States has completed the three most important sections of the maritime boundaries, viz: The coast of the gulf of Mexico, the coast between Cape Hatteras and Cape Cod, and the coast between Cape Cod and the river St. Croix. The coast between Cape Hatteras and Cape Fear has likewise been surveyed; and the only section which remains to be examined, to complete the reconnoissance of the coast, is South Carolina and Georgia.

The reports presented in 1818, 1819, 1820, and 1821, to the honorable Secretaries of the War and Navy Departments, were accompanied by every necessary plan, table, &c. and embrace every naval and military consideration, both as to the attack and as to the defence of the frontier, as to fixing the sites for the great naval depots, and as to protecting, by the general system of defence, the general system of internal navigation. We must refer to the details of these reports to show the importance of establishing a complete system for the protection of the frontiers, and the necessity of building this system upon principles harmonizing with the modern system of warfare. It will be seen that most of the existing forts only defend single points, and satisfy only a few essential conditions; and that they have not been planned with a view to the defence of the frontiers, considered as one great and combined system, whose several parts should be connected, and should mutually support each other. The navy yards (excepting that of Charlestown, near Boston) have all been improperly placed; the conveniences for the erection of the necessary establishments having alone been taken into consideration, while all the other requisites for points so important, such as security against attack by sea or land, facility for receiving all kinds of building materials in time of war as well as in time of peace, vicinity to a place of rendezvous, have been overlooked.

A defensive system for the frontiers of the United States is therefore yet to be created; its bases are: first, a navy; second, fortifications; third, interior communication by land and water; and fourth, a regular army and well organized militia: these means must all be combined, so as to form a complete system.

The navy must, in the first place, be provided with proper establishments for construction and repair, harbors of rendezvous, stations, and ports of refuge. It is only by taking into view the general character, as well as the details of the whole frontier, that we can fix on the most advantageous points for receiving these naval depots, harbors of rendezvous, stations, and ports of refuge.

On these considerations, Burwell's bay, in James river, and Charlestown, near Boston, have been especially recommended by the commission as the most proper sites for the great naval arsenals of the south and of the north. Hampton roads and Boston roads as the chief rendezvous, and Narraganset bay as an indispensable accessary to Boston roads. (See reports of 1819 and 1820.)

It is also from an attentive consideration of the whole maritime frontier, of the interior, and of the coastwise navigation, that Mobile bay on the gulf of Mexico, St. Mary's in the Chesapeake, the Delaware, New York bay, Bayard's bay, New London, Marblehead, Portsmouth, Portland, the mouths of the Kennebec and Penobscot, and Mount Desert bay, have been fixed upon as stations and ports of refuge, as necessary and essential to our merchant vessels as to our navy.

Smithville and Beaufort, North Carolina; Annapolis and Baltimore, Maryland; New Haven, Connecticut; Salem, in Massachusetts; and Wiscasset, in Maine; have likewise been examined with attention, with a view to secure them from attack by sea or land. (See reports of 1819, 1820, and 1821.)

St. Mary's river and Savannah, in Georgia; Beaufort, Charleston, and Georgetown, in South Carolina, will be examined and surveyed in the course of this year.

After determining the general and connected system of naval depots, harbors of rendezvous, stations, and ports of refuge, the commission in the next place traced the scheme of fortifications necessary to protect this system, and at the same time to guard the whole frontier against invasion. The forts projected by the commission for this purpose satisfy one or more of the following conditions:

1. To close important harbors to an enemy, and secure them to the navy of the country.
2. To deprive an enemy of strong positions, where, protected by his naval superiority, he might fix permanent quarters in our territory, maintain himself during the war, and keep the whole frontier in perpetual alarm.
3. To cover our great cities against attack.
4. To prevent as much as possible the great avenues of interior navigation from being blockaded by a naval force, at their entrance into the ocean.
5. To cover the coastwise and interior navigation, and give to our navy the means necessary for protecting this navigation.
6. To cover the great naval establishments.

A rapid review of the works which have been projected by the commission will exhibit with sufficient distinctness the advantages which must result from their construction.

In Louisiana, the forts projected at the Turn of Plaquemines, at the Bayou Bienvenue, at the Chef Menteur, at the Rigolets, form altogether a system of defence, not only covering New Orleans, but preventing an enemy from taking and holding his position at the northern point of the delta of the Mississippi, where, presenting a small front, easily fortified in a few days, and impossible to turn, he might defy all the forces of the West. Supposing

even that he were expelled from it, he might, in his retreat, pillage and burn all the habitations, and carry off the slaves, from both sides of the river, for a length of one hundred and fifty miles. This whole projected system of works will cost a little more than one million of dollars—a sum small indeed to avert such calamities, and which bears no sort of proportion to the effects which it will produce. The fortifications projected at the mouth of Mobile bay prevent, as far as practicable, its blockade, secure the communication of the Tombigbee and Alabama with the ocean, as well as that which is proposed to connect these rivers with the Tennessee; protect also the communication between Mobile bay and Lake Pontchartrain by the interior channel, lying between the main and the chain of islands bounded by Cat island to the west and Dauphine island to the east, and deprive an enemy of a station whence he might act either against New Orleans or the establishments which the United States may form hereafter in Pensacola. At present, Fort Boyer, at Mobile Point, which could not hold out three days against a regular attack, and Fort St. Philip, which is much too small and weak to defend the Mississippi, are the only protection for Louisiana.

The forts which will be projected at St. Mary's river and Savannah, in Georgia, Beaufort, Charleston, and Georgetown, in South Carolina, will have for object to secure the communication between the sea and the interior; to prevent the blockade of the rivers and harbors of these States; to secure naval stations, necessary in guarding the coasting trade; and to cover the great commercial cities against attack by land or sea.

The forts of Smithville and Beaufort, North Carolina, will have for object to close the only two important issues by which the interior of that State communicates with the ocean; they defend the access to the interior navigation, which, sooner or later, will be opened between the Chesapeake and Cape Fear river, and which, by means of canals, will secure in time of war the arrival of naval approvisionments at the maritime depot of Burwell's bay; while, in time of peace, it will give to the commerce of the country in general, and of North Carolina in particular, great facilities for avoiding the dangerous and difficult navigation of Albemarle and Pamtico sounds.

In the Chesapeake, the projected works at the entrance of Hampton roads have for object to close this road against an enemy, and to secure it to the United States; to secure the interior navigation between the Chesapeake and the more southern States; to make sure of a naval place of arms, where the navy of the United States may protect the Chesapeake and the coasting trade; to cover the public docks, &c. at Norfolk, and those which may be established in James river; and to prevent an enemy from making a permanent establishment at Norfolk.

While on this subject we will observe, that an enemy might land in Lynnhaven bay, and, in one day's march, reach the narrow position which lies to the east of Suffolk, bounded on one side by the Dismal Swamp, and on the other by Bennett's creek, near the mouth of the Nansemond; this position cannot be turned, and may easily be fortified. An enemy might there defy all the forces of Virginia and North Carolina. Secure of a retreat as long as his fleet occupied Hampton road, he would compel the United States to make the greatest possible sacrifices, both in men and money, before he could be driven out. But if Hampton road is fortified, he will only be able to anchor in the open road of Lynnhaven bay; his march thence upon Suffolk may be turned by our forces crossing at Hampton road, and he will, therefore, find it impossible to take permanent quarters in the country. The expense at which these results will be obtained is one million eight hundred thousand dollars—a trifling sum, if compared with the magnitude of the advantages which will be procured and the evils which will be averted.

At Baltimore, the forts projected at Hawkins's Point and on the shoal of Soeller's Point cover the harbor; and the last mentioned work will force an enemy to land, if he intends attacking the town, at a greater distance from it, and will thus prevent him from turning the defensive position which our forces might take against him. The batteries at St. Mary's secure a good station to the vessels of war charged with guarding the Chesapeake; protect an anchorage accessible by vessels of the largest class; and, as do also the batteries at Annapolis, offer a safe asylum to merchant vessels which might find it impossible to reach Baltimore. St. Mary's is not at all defended, and Fort McHenry, at Baltimore, has no influence whatever over an attack by land, and cannot even secure the city and harbor from bombardment.

In the Delaware, the fort on the Pea Patch island, and the one on the Delaware shore opposite, defend the water passage as far below Philadelphia as localities will permit: they force an enemy to land forty miles below the city to attack it by land, and thus afford time for the arrival of succors; they secure to the forces of the country successive defensible positions, where part may delay an enemy, while part file upon his flanks, or cross the river in his rear, and cut him off from his fleet. At present, Fort Mifflin, seven miles below the city, is the only obstacle an enemy would encounter; he might therefore land very near the city, and attack it within a few hours of his landing. The two projected forts will also have the advantage of covering the canal destined to connect the Chesapeake with the Delaware, if the junction of the canal be, as in all probability it must be, to the north of the Pea Patch.

The projected works on the waters of the Hudson and East rivers have for object to cover the city of New York against an attack by land or sea; to protect its numerous shipping; to prevent, as much as possible, the blockade of that immense river, which will soon have added to the wealth of its own shores the productions of the boundless regions on the northern and western lakes; and to cover the interior navigation which is projected to connect the waters of the Delaware with those of the bay of New York, by a canal from the Rariton. The forts projected at the Narrows, and at the pass of Throgg's Neck, on the East river, while they defend entrances into the bay, force the enemy to land in the Sound at a great distance from the city, and place Brooklyn heights at the bottom of an interior curve of the frontier of which these works occupy the extremities, in rear of an enemy moving upon Brooklyn, and afford time, by their resistance, for the militia to assemble and march to the relief of the city; thus greatly diminishing the chances of success to the enterprise. The expense of these works will be about $ 1,800,000.

As to the forts projected for the East Bank and Middle Ground, they will complete the defence of the city, by depriving an enemy of the landing place in Gravesend Bay, the only spot on the south shore of Long Island where he can safely land to march on Brooklyn. They will also deprive him of the possibility of establishing himself on Staten Island; and thus reduce the points of attack to one in the Sound. Besides thus strengthening the defences of the city, they will prevent an enemy from anchoring in the outer harbor to blockade the Hudson, alarm the country, and intercept the interior communication by the Raritan.

The harbor of New York, in its present state, is scarcely at all defended against a sea attack; and the city is not at all defended against an attack by land. An invading enemy might reach the city within two or three days, either by the Sound or harbor, and, after accomplishing his object, would find his retreat secure.

The batteries projected for New Haven protect that city against depredations, and secure a port of refuge in the Sound to merchant vessels escaping from privateers. The existing batteries are too small to offer any resistance.

The forts at New London will secure to the largest vessels a safe and excellent anchorage at all seasons: as the Thames never freezes, they protect a good station, whence our navy can, at all times, keep good watch over the coasting merchant vessels, and, especially, over the navigation of Long Island Sound.

The projected defences of Narraganset bay will deprive an enemy of the possibility of occupying that excellent roads tead, and secure it to the United States. The possession of this bay will be to us of inestimable advantage. It is the only one on the coast which vessels can enter with a N. W. wind, and as the same winds serve for entering both New York and Boston harbors, (N. N. W. to S. S. W. round by the east) while Narraganset bay is accessible with all winds from N. W. to E. round by the W.; it follows, that, on this part of the coast, vessels may be certain of making a harbor with every wind of the compass, except for the four points from N. W. to N. N. W. Narraganset bay and Hampton Roads are also the only harbors from Cape Hatteras to Cape Cod, which are proper for naval rendezvous. This bay is besides a most important station for protecting the transit of vessels from the Vineyard into Long Island Sound. If Narraganset bay was left in its existing state, as to defence, an enemy would seize it without difficulty, and by the aid of his naval supremacy, form an establishment in Rhode Island for the war. For this purpose it would be sufficient for him to occupy the position of Tiverton heights, opposite Howland's Ferry, which is of narrow front, easy to secure, and impossible to turn. He might then defy all the forces of the Eastern states; drive the United States to vast expense of blood and treasure; and, while his troops would thus put in alarm and motion all the population of the East, feigned expeditions against New York, by Long Island Sound, would equally alarm that State and the neighboring ones; and, if he merely contented himself with menacing the coast, it is difficult to calculate the expenses into which he would drive the Government. The advantages which the United States will derive from the occupation of this bay, and those of which this occupation will deprive an enemy, seem to us of infinitely more importance than the sum of $1,600,000, which will be required to close and fortify it completely.

The forts projected to cover Boston will have for object to defend the channel at its junction with the ocean, to cover Nantasket road against an attack by sea, to render any attempt against the naval depot and arsenal at Charlestown and the city of Boston impracticable, and to secure and facilitate the sailing out and in of the fleets of the United States.

The works projected for Plymouth, Provincetown, and Marblehead, will deprive an enemy who might attempt to blockade Boston of important anchorages; and, whilst the occupation of these points will render a blockade of that port almost impossible, it will secure, at the same time, a refuge to our own vessels which may be prevented by contrary winds from entering Boston harbor. These works will also deprive an enemy of landing points whence he might march upon Boston and Charlestown, and thus secure these important positions against an attack by land.

The works projected at Salem protect that city and its commerce from the depredations of a hostile naval force, and deprive the land forces of an enemy of a landing place whence the whole country might be alarmed, and the naval depot of Charlestown be menaced.

The forts projected at Portsmouth and Portland secure to the Union these ports, important both to the commercial and naval interest of the country; they protect the sailing in and out of the ships destined to guard the coasting trade. The defence of these harbors by proper forts will enable the Government to form under their cover victualling and repairing establishments, and thus convert these harbors into ports of refuge for the navy.

The works projected at the mouths of the Kennebeck, Sheepscut, and Penobscot, will secure the entrance of these rivers, protect the navy stationed on the coast to guard the coasting trade, and afford asylums to our privateers and merchant vessels when chased, and safe points whence the privateers can keep watch upon, and act against the commerce of an enemy.

The forts to be erected for the defence of Mount Desert bay will deprive an enemy of an important station whence he might menace and paralyze all the navigation of the coast of the State of Maine, and by which he would shorten the line of his operations against that of the coast of New Hampshise and Massachusetts. These forts will secure to the United States a position from which will result the following advantages: 1st, a nearer and better point of departure for operations in time of war, against the British establishments in New Brunswick and Nova Scotia, and against the commerce of those provinces. 2d. This position will protect, as far as the local circumstances of the country will allow it, the eastern extremity of the maritime frontiers of the Union, being that nearest the possessions of another Power. 3d. It will secure a port of refuge for our navy and privateers in the vicinity of a much frequented cruising ground.

From this rapid sketch we may deduce the urgent reasons and the almost absolute necessity for fortifying each of the points designated. But we refer to the reports of the commission in 1818, 1819, 1820, and 1821, for ampler information; as well as to give exact ideas of the manner in which these several points depend upon and support each other, of their mutual relations, and, in short, of all the naval and military properties of the frontier both defensively and offensively considered.

To give, however, an idea of the chain of reasoning by which the commission directed its researches, and which governed its plans, we shall select one of the plainest cases of all those which came under its consideration. We will trace, for this purpose, the attack and defence of one of our cities, in its actual state of defence, and then on the supposition that the works projected by the commission have been executed. It matters not where our choice falls; for, unhappily, all our cities are in the like predicament of total insecurity; and, as to the projected works, we believe they will place every important point of our frontier equally above every species of attack, whether by surprise or by force. We shall select Philadelphia, because its attack in neither case involves any complication in the movements for defence. We suppose an enemy to have arrived at Fort Mifflin within a very few hours of the annunciation of his appearance off the capes. His attack will be instantly made by one or other of these methods:

1st. He will transfer the troops to the row boats of the squadron and pass them by the forts, hugging the Jersey shore, while the fire of the forts is engaged by an attack of his numerous heavy ships and bomb vessels; land just below the city; seize and destroy the Schuylkill bridges, and take position north of the city, where he can only be assailed in front. His retreat will be conducted like his advance.

2d. He may land upon the Pennsylvania shore, and by a rapid march seize the Schuylkill bridges.

3d. He may land in Jersey, and cannonade the city from Camden; covering his incendiary batteries with his troops.

4th. He may assault the forts in the first place, (and he would hardly fail of capturing them,) and there will remain no further impediment to his advance upon the city, and nothing to interrupt his retreat from it. Arriving suddenly from the ocean, as he may, with an army of twenty thousand men, an able enemy *must* succeed by either of these methods, and perhaps by others more complicated; and his retreat can be effected, too, before a sufficient force can come in to jeopardize his forces. It must be remembered that an enemy has so many points of attack amongst which to choose on the instant, that our forces, divided upon them all, can offer but a slight resistance at the particular point he may prefer.

We will not suppose the lower defences completed, and an enemy suddenly arrived before them. The numerous and well covered artillery possessed by these works, and covering the obstructions which it is proposed to fix in the channel during a war, must render hopeless every attempt to force the water passage to Philadelphia, and leave him only the chance of reaching the city by land. His march will be either through Delaware or Jersey, or

by dividing his forces along both shores of the river. The defence must be nearly the same in all these cases: two corps, one in Delaware and one in Jersey, each of about two thousand men, will be prepared to meet his advance under cover of the first natural obstacles: whether these corps continue to act on different sides of the river, or unite, which, having the navigation of the river secured to them by the forts below, they are at liberty to do, will depend upon whether or not the enemy divides his forces. These corps will have improved every natural advantage beforehand by the addition of field works, and they will now defend them vigorously; every disposition they make for defence, whether feigned or real, will oblige corresponding arrangements for attack, and thus, though too inferior to resist long at any one point, their repeated efforts produce that delay which is finally to defeat the enemy's design. Considering the rapidity with which, by their command of the river, they can send detachments to strike at the rear of the enemy's columns; considering that they have constructed works of strength upon positions naturally strong; that they have destroyed the bridges and obstructed the roads; considering their superiority over the enemy in a perfect knowledge of the country, and that their forces are hourly augmenting; we cannot doubt that the march which would without resistance have consumed four days will be extended to six. The enemy, arrived at last before the city, will find all means of communicating with it destroyed or removed; and, if it be not even now too late, must instantly begin his retreat. For, should he attempt to cannonade with incendiary batteries, they can hardly begin to produce effect before he will be surrounded by greatly outnumbered forces. The tables give a concentration at Philadelphia in six days of 83,991 militia. (See report of 1820.)

From the general exposition which we have given, it will be seen that all the fortifications projected by the board are not of the same pressing necessity, nor of like importance; that some are required immediately, and that the commencement of others may be delayed. In classing them, we shall observe that the works of the most urgent necessity are those which are destined to prevent an enemy, in time of war, from forming a permanent establishment, or even a momentary one, on the soil of the Union; those which defend our great naval arsenals; and those which protect our chief commercial cities.

In the second grade we will place those which defend stations for our navy, and commercial cities of secondary importance, which, either from natural or artificial defences, existing works, &c., are not entirely without protection, and can wait until the chief and more important points are secured, at least against a first attack.

Finally, in the third class, we will range the works which will complete the defensive system in all its parts, but whose construction may, without imminent danger, be deferred until the frontier has received all the successive degrees of strength which the gradual erection of the forts of the first and second class will give to it.

The table A, joined to this report, has been drawn up on this principle, and shows:

1st. That the works to be erected during the first period will cost $8,010,054; will require 2,540 men, at most, to garrison them in time of peace, and 20,305 in case of siege.

2d. That the works of the second class will cost $4,711,031; will require 1,030 men, at most, to garrison them in peace, and 8,615 in case of siege.

3d. That the expense of the works belonging to the third class will amount to $5,073,970; their garrisons, in time of peace, to 1,120 men, and, in case of a siege, to 9,042 men.

4th. That the total expense of completely fortifying the maritime frontier will amount to $17,795,055; the troops necessary to guard these fortifications, in peace, to 4,690 men, at most, and 37,962 men in time of war; supposing them, which is beyond all probability, all besieged at once.

The time required to construct these works must depend entirely upon the annual appropriations which the nation may grant to this branch of the public service. All that can be said upon this subject is, that, in an undertaking of such vital importance to the safety, prosperity, and greatness of the Union, there should not be an instant's relaxation of effort and perseverance. A work of such magnitude must, with every possible effort, be the work of years; but each year, with *limited* means, will produce its fruit, and the final result is to endure for ages. However long it may be before sensible effects are produced, the result will be certain; and should no danger threaten the republic in our own days, future generations may owe the preservation of their country to the precaution of their forefathers. France was at least fifty years in completing her maritime and interior defences; but France, on more than one occasion since the reign of Louis XIV., has been saved by the fortifications erected by his power, and by the genius of Vauban. However slow the progress of this system may be, from the necessity of a sparing application of the public funds to this purpose, it is essential to disburse something in this way each year, so as to give to the frontier an annual increase of strength. We must therefore insist upon the advantage of dividing the construction of the works into several periods, according to their more or less immediate urgency, and of beginning them successively in that order. By these means, satisfactory results as to the augmentation of the strength of the frontier will be obtained as early as possible; whilst, if we were to begin them all at once, we should be a great while without defence upon any one point.

We shall now enter into the question of the expense of erecting these forts, and garrisoning them for war, and compare it with the expense of defending the coast in its present state. To render this question as clear as possible, we shall only examine it with respect to New Orleans, Norfolk, Baltimore, Philadelphia, New York, and Narraganset bay.

Supposing that an enemy had concentrated about twenty thousand men at Halifax or Bermuda; the United States must, on hearing of this force, at once prepare to receive them at all the points mentioned above. As it will be impossible to foresee on which of these points the first blow will be struck, it will be necessary to have troops encamped at each of them; and to meet an attack with a force at least numerically equal to that of the assailant, the force kept constantly under arms in these camps must be at least equal to one-half of the hostile expedition, whilst as many more must be kept in readiness, and within call. The points are so immediately accessible in some cases, and so remote from succor in others, that, after the point of attack is known by the appearance of the enemy before it, there will remain no time for reinforcements to arrive. By manœuvring in front of any of these places, he will induce us to concentrate our forces there, when, suddenly profiting of a favorable breeze, he will sail to another, which he may reach in a few hours and seize, if a force is not stationed there likewise at least equal to his own. Neither, in such a case, can reinforcements be directed against him in time; for all the forces under march will have received a direction upon the point he has just quitted. Our whole coast will thus, by a single expedition, be kept in alarm from Louisiana to Maine; and such is the extent and exposure of the maritime frontier, that an enemy may ruin us by a war of mere threatenings. If our cities are not garrisoned, they will become his prey at once; if they are, the treasury will be gradually emptied, the credit of the Government exhausted, the wearied and starving militia will desert to their homes, and nothing can avert the direful consummation of tribute, pillage, and conflagration.

The table B, joined to this report, shows that, to be in readiness on every vulnerable point, it will be necessary to maintain 67,000 men encamped and under arms at the six places above mentioned, and 53,000 ready to march, and within call. This number is really below that which would be required; for these points being exposed, according to our hypothesis, to an attack from 20,000 regular and disciplined troops, 20,000 militia would not be

able to repel them, unless aided by entrenchments, requiring a time to perfect them which would not be allowed us, and involving expenses which we have not comprised in our estimates. Besides, to have 20,000 men, and especially new levies, under arms, it will be necessary, considering the epidemics which always attack such troops, to carry the formation of this corps to at least 25,000 men. The State of Louisiana, being more remote from all succor, requires a larger force under arms than the other points; we have fixed this force at 17,000, considering that the State might furnish 3,000 within call.

These premises considered, and taking in all expenses, 1,000 regular troops, including officers, cost $300,000 per annum, and $150,000 for a campaign of six months; 1,000 militia, including officers, cost $400,000 per annum, and $200,000 in a campaign of six months, or $200 per man for six months.

But if we take into consideration the diseases which infallibly attack men unaccustomed to a military life, the expense of hospitals in consequence, the frequent movement of detachments from the camp to their homes, and from the interior to the camp, and the first cost in camping utensils, accoutrements, &c., which is the same for a campaign of six months as for a year, this expense cannot be rated at less than $250 for every militia man, and $250,000 for every 1,000 men for six months.

From these bases, the 67,000 men of the militia necessary to guard the above mentioned points, in the present situation of the maritime frontier, will cost, in a campaign of six months, $16,750,000.

In strict justice, we should add to this expense, which is, we believe, greatly undervalued, amongst many other things, the loss of time, and the interruption of the labor of the citizens who have left their business to assume arms for their defence. This is a real loss to the nation, and a heavy tax on individuals. And while reflecting on the dreadful mortality which rages in the camps of men unaccustomed to the fatigues and privations of a military life, we cannot help remarking how much greater the loss of a citizen is than of a soldier.

The latter is generally an isolated being; he has prepared the sacrifice of his life by entering the army; it is the peculiar and constant duty of his profession. The former is a man of business, the father of a family, and his loss involves with it a large circle of domestic sorrow and suffering.

The total expense of constructing the works at New Orleans, Norfolk, Baltimore, Philadelphia, New York, and Narraganset bay, will amount to $11,147,695. (See table B, and the reports presented in 1818, 1819, 1820.) Their garrisons might consist of the same number of regular troops in time of war as in time of peace; and the remainder might be furnished by the militia held in readiness to throw themselves into the forts on the first appearance of an enemy. By these means, 2,720 regulars, and 21,000 militia, either in the forts or in small corps upon advantageous positions, making 23,720 men, would suffice after the erection of these works, and 36,280 might be kept in readiness to march when called upon. We should have only 23,720 to pay and support, instead of 67,000; and the expense would be $5,658,000, instead of $16,750,000. The difference $11,092,000 being about equal to the expense of the forts, it follows that the cost of their erection will be compensated by the saving they make in a single campaign of six months. It is proper to add that though the expense of these works be great, that expense is never to be renewed; while with troops, on the contrary, the expense is annually repeated, if not increased, until the end of the war. Besides, the disbursements for fortifications are made in time of peace, slowly, and to an extent exactly correspondent with the financial prosperity of the country. Armies, however, are most wanted, and must be paid in periods of great emergency, when the ordinary sources of revenue are dried up, and when the treasury can only be kept supplied by a resort to means the most disagreeable to, and the most burthensome upon, the people.

The defence of our maritime frontier by permanent fortifications, and even the expense of erecting these fortifications, will thus be a real and positive economy. The points of attack being reduced to a few, instead of awaiting an attack on every point, and holding ourselves every where in readiness to repel it, we shall force an enemy to direct his efforts against these few points, with which we shall be well acquainted beforehand, and which we shall have disposed to withstand all his attempts. There is no doubt but that such circumstances will render an enemy more backward in risking his expeditions, and that we shall not only therefore be better able to resist attack, but that we shall also be less frequently menaced with invasion.

Some prominent military writers have opposed the principle of fortifying an extensive land frontier; but no military or political writer has ever disputed the necessity of fortifying a maritime frontier. The practice of every nation, ancient and modern, has been the same in this respect. On a land frontier, a good, experienced, and numerous infantry may dispense with permanent fortifications, although they would prove excellent auxiliaries and supports when properly disposed and organized; but though disciplined troops can, rigorously speaking, without their aid, cover and protect a frontier, undisciplined troops never can. On a maritime frontier the case is totally different. Troops cannot supply the place of the strong batteries which are disposed along the important places. The uncertainty of the point on which an enemy may direct his attack, the suddenness with which he may reach it, and the powerful masses which he can concentrate at a distance out of our reach and knowledge, or suddenly, and at the very moment of attack, are reasons for erecting defences on every exposed point, which may repel his attack, or retard it until reinforcements can arrive, or the means of resistance be properly organized. By land we are acquainted with the motions of an enemy, with the movements and directions of his columns; we know the roads by which he must pass. But the ocean is a vast plain without obstacles; there his movements are performed out of our sight and knowledge, and we can receive no intelligence of his approach until he has already arrived within the range of the eye. In a word, the vulnerable points of a seacoast frontier are left to their fate, if they are not covered by permanent fortifications; and their only chance of safety must then depend upon the issue of a battle, always uncertain, even when regular and well-disciplined troops, inured to danger, have been assembled beforehand, and have made all possible preparation for the combat.

If we overlook for a moment the many points of the maritime frontier which the enemy might invade with the most serious consequences to the United States; if we suppose that there exists no object on that frontier worth the trouble and expense of a great expedition, these fortifications will even yet be highly necessary; for we still have one great object to attain—the security of our navy. This cannot be protected without fortifications, especially in struggling with an adversary superior in numbers and jealous of a supremacy on which may ultimately depend his political importance. A navy can neither be augmented nor secured without fortifications, nor can it enjoy without them the advantages which the localities of the frontier might otherwise afford. Accidents may and must happen to it; and it is only in closed and fortified harbors that it can repair the losses and disasters of a course of war, and from them, when refitted and refreshed, recommence its operations. England herself, notwithstanding the great naval superiority which she possesses at this moment over the rest of the world, and the excellent organization of her militia, strengthens and augments the fortifications of her frontier every day; and no nation of Europe, France excepted, possesses a stronger and more complete system of permanent defences along its coast.

Lastly, the defensive system of our seacoast by permanent fortifications being completed, and the Union being protected against all danger of invasion from that quarter, she can direct all her resources towards her navy. Her national quarrels will then all be decided upon the ocean, and no longer upon her own territory; her wars will all

be maritime; a species of warfare in unison with the institutions of the country, less costly in men and money, and which, by keeping off all aggressions from her own territory, will preserve untouched her industry, her agriculture, her financial resources, and all the other means of supporting a just and honorable war.

As for the garrisons which these forts will require in time of war, a small portion of them, equal in number to the garrisons necessary in time of peace, may be composed of regular troops; the surplus, of militia practised to the manœuvres of artillery; for the greatest part of the troops required for the defence and service of these great coast batteries should be composed of artillery.

To this end every state might organize a certain number of battalions of militia artillery, proportioned to the exigencies and armament of the forts upon its coast, or within the sphere of activity of its military force. These battalions should be within call of the forts as long as no invading expedition is announced; but as soon as some operation of an enemy should menace the frontier, they should throw themselves into the forts, and remain there as long as the precise point of attack should remain uncertain. This system of defence for the coast was established in France, where it succeeded very well. It appears to us to harmonize as well with the institutions and spirit of the country, as with the principles of economy which should direct and govern all the expenses of the Government.

In the present report we have taken no account of the interior and land frontiers of the Union; they have not yet been sufficiently reconnoitred to enable us to give an exact idea of the system of defensive works which they may require. All that we can say by anticipation is, that, from their general topographical features, these frontiers can be covered at a very moderate expense, by such a defensive system that no enemy will be able to invade them without exposing himself to disasters almost inevitable; and that the armies of the United States, supposing all her warlike preparations well organized beforehand, will be enabled, at the very opening of the first campaign, to carry the theatre of war beyond her own territory.

If to our general system of permanent fortifications and naval establishments we connect a system of interior communications by land and water, adapted both to the defence and to the commercial interests of the country; if to these we add a well-constituted regular army, and perfect the organization of our militia, the Union will not only completely secure its territory, but preserve its national institutions from those violent shocks and revolutions which, in every age and in every nation, have been too often incident to a state of war.

Accompanying this report is a general map of the United States.

All which is most respectfully submitted.

BERNARD, *Brigadier General.*
J. D. ELLIOTT, *Captain U. S. Navy.*
JOSEPH G. TOTTEN,
Major of Engineers, Brevet Lieut. Col.

A.

Division of the proposed fortifications for the defence of the maritime frontiers of the Union, in three classes, according to the urgency of their construction, exhibiting the strength of their required garrisons in time of peace and in time of war, and the expense of erecting them.

FIRST CLASS—TO BE ERECTED DURING THE FIRST PERIOD.

DESIGNATION OF FORTS.	GARRISONS.		EXPENSE OF CONSTRUCTION.
	For a siege.	For peace establishment.	
In Louisiana.			
Fort St. Philip,	400	80	77,810
Fort at Plaquemines,	750	100	392,927
Fort at Chef Menteur,	400	80	260,517
Fort at Rigolets,	400	80	264,517
Fort at Bayou Bienvenue,	224	25	94,582
	2,174	365	1,094,353
In Virginia.			
Fort at Old Point Comfort,	2,625	600	816,814
Fort at the Rip Raps,	1,130	200	904,355
	3,755	800	1,721,169
In Pennsylvania.			
Fort at the Pea Patch Island,	1,560	150	258,000
In New York.			
Fort at New Utrecht Point,	1,140	100	424,995
Fort at Tompkins's Point,	970	100	485,988
Fort at Wilkins's Point,	1,336	100	456,845
Fort at Throgg's Point,	1,540	100	471,181
	4,986	400	1,839,009
In Rhode Island.			
Fort at Bronton's Point,	2,400	200	730,166
Fort at Dumpling's Point,	1,850	200	579,946
Fort at Rose Island,	580	25	82,411
Dyke on the N. W. passage,	-	-	205,000
	4,830	425	1,597,523
In Massachusetts.			
Fort on the channel of Boston harbor,	2,000	300	1,000,000
In New Hampshire.			
Fort at Portsmouth,	1,000	100	500,000
Total,	20,305	2,540	$8,010,054

A.—Continued.

SECOND CLASS—TO BE ERECTED DURING THE SECOND PERIOD.

DESIGNATION OF FORTS.	GARRISONS. For a siege.	GARRISONS. For peace establishment.	EXPENSE OF CONSTRUCTION.
In Alabama.			
Fort at Mobile Point,	900	100	693,292
Fort at Dauphine Island,	900	100	693,292
	1,800	200	1,386,584
In Georgia.			
Fort at Savannah,	1,000	100	700,000
In South Carolina.			
Fort at Charleston,	1,000	100	700,000
In North Carolina.			
Fort at Smithville,	400	50	100,000
Fort at Beaufort,	400	50	100,000
	800	100	200,000
In Maryland.			
Fort at Soeller's Point,	835	60	673,205
Fort at Hawkins's Point,	845	120	244,377
	1,680	180	917,582
In Pennsylvania.			
Batteries opposite the Pea Patch Island fort,	760	100	347,257
In Connecticut.			
Fort Hale,	220	25	31,815
Fort Wooster,	155	25	27,793
	375	50	59,608
In Massachusetts.			
Fort at Marblehead,	400	50	100,000
Fort at Salem,	400	50	100,000
	800	100	200,000
In Maine.			
Fort at Portland,	400	100	200,000
Total,	8,615	1,030	$4,711,031

THIRD CLASS—TO BE ERECTED DURING THE THIRD PERIOD.

In Louisiana.			
Fort at Grand Terre,	400	80	264,517
Tower at Passe aux Herons,	36	10	16,677
Tower at Bayou Dupré,	36	10	16,677
	472	100	297,871
In Georgia.			
Fort at St. Mary's river,	400	50	100,000
In South Carolina.			
Fort at Beaufort,	400	50	100,000
Fort at Georgetown,	400	50	100,000
	800	100	200,000
In Maryland.			
Fort at St. Mary's,	380	60	203,602
Fort at Annapolis,	380	60	100,000
	760	120	303,602
In New York.			
Fort on the Middle Ground,	1,760	150	1,681,411
Fort on the East Bank,	1,760	150	1,681,411
	3,520	300	3,362,822
In Connecticut.			
Fort Trumbull,	460	75	77,445
Fort Griswold,	830	75	132,230
	1,290	150	209,675
In Massachusetts.			
Battery at Plymouth,	200	50	100,000
Battery at Provincetown,	200	50	100,000
	400	100	200,000
In Maine.			
Fort on the Kennebeck,	300	50	100,000
Fort on Wiscasset,	300	50	100,000
Fort on Penobscot,	400	50	100,000
Fort at Mount Desert Bay,	400	50	100,000
	1,400	200	400,00
Total,	9,042	1,120	$5,073,970

A.—Continued. RECAPITULATION.

	GARRISONS.		EXPENSE OF CONSTRUCTION.
	For a siege.	In time of peace.	
First period,	20,305	2,540	8,010,054 00
Second period,	8,615	1,030	4,711,031 00
Third period,	9,042	1,120	5,073,970 00
Total,	37,962	4,690	$17,795,055 00

NOTE.—Although all the works to be erected in the first period are indispensable to the defence assigned to that class, it is proper to give a list which will show, by the order in which they stand, the relative importance of the works, in anticipation of such a state of the treasury as may not permit their simultaneous commencement, viz:

1st. Fort at Chef Menteur,
Fort at Rigolets,
Fort at Bayou Bienvenue,
Fort at Old Point Comfort,
Fort at Rip Raps,
Fort at Pea Patch.
2d. Fort at Brenton's or Dumpling's Point,
Dike over Narraganset passage.
3d. Fort St. Philip,
Fort at Plaquemines.
4th. Fort Tompkins,
Fort at Throgg's Point.
5th. Fort at Narrows, Boston.
6th. Fort at New Utrecht Point.
7th. Fort Portsmouth, New Hampshire.
8th. Fort at Dumpling's or Brenton's Point.
9th. Fort at Wilkins's Point.
10th. Fort at Rose Island.

Where the places are in *italic*, in the foregoing table, either the projects are as yet unfinished, or they have not as yet been commenced. The war and peace garrisons, and the expense, exhibited by the table in those cases, are, therefore, very uncertain approximation.

B.

SIR: ENGINEER DEPARTMENT, *February* 10, 1821.

So much of the information required by the resolution of the House of Representatives of yesterday's date as is contained in the following sentence, "the progress made in erecting the fortifications," will be found in the following extract from a report on the same subject, made on the 9th ultimo, for the use of the Committee of Ways and Means:

Extract.

Fort Delaware is about five-sixths finished, and will be completed in the course of this year.

Fort Washington is still further advanced, and will be finished in the course of the ensuing summer.

Fort Monroe has progressed two-fifths towards completion. Its appearance would not indicate that state of advancement, and yet the operations so far have been advantageously conducted. The reason is, that in this work, as in all works of magnitude, the operations have been mostly confined to the collection of materials, depositing them in the places where they will be used, and maturing arrangements preparatory to the commencement of constructions, and therefore make no show. The constructions of masonry were commenced last summer, in the course of which was completed a casemated work capable of presenting to the channel of entrance a battery of forty 32 pounders. The masonry, in future, by reason of the preparations above stated, in which are included immense excavations, part of them applied to the opening of a canal following the course of the ditch around the work, having locks, &c., from the use of which great facilities and economy in transportation of materials, &c. may be expected, will be carried on with rapidity. The fort will be completed in five years.

Fort Calhoun has received one-half of the stone intended for the formation of the breakwater, or that part of its foundation to be below the surface of the water; the remainder will be deposited in the course of next year; after which it should be permitted to settle one or two years before the superstructure be commenced, the completion of which will occupy three years more.

The fort on Mobile Point exhibits but little advancement. The impracticability of procuring the requisite materials by purchase obliged the contractor to fabricate them; and the means by which even that could be effected were difficult of attainment, in some instances it having become necessary to create them. Under such embarrassments much delay was unavoidable; nevertheless, extensive arrangements for the preparation and transportation of materials have been matured. According to the terms of the contract, this fort should be completed on or before the 1st of next July; but the difficulties above stated will no doubt protract the completion to at least two years beyond that period.

The fort on Dauphin island, although in all respects situated similarly to that on Mobile Point, is in better condition. The period limited in the contract for its completion will expire on the 1st December next, but the fort will not be finished until some time in the following year.

The fort on the Rigolets Pass, under circumstances not materially differing from those stated in reference to the two works last noticed, has been more successfully managed than either of them. The contract will expire on the 1st December next, and the work will probably be completed within that time, or shortly after.

All which is respectfully submitted.

W. K. ARMISTEAD, *Colonel of Engineers.*

The Hon. J. C. CALHOUN, *Secretary of War.*

B.

Statement exhibiting the cost of the projected fortifications for sea-coast defence; the forces necessary to protect them with the existing works; the forces necessary for perfect security, with the aid of the proposed defences; and the expense of the troops in both cases.

PLACES.	Aggregate cost of the proposed works.	Comparison of the force necessary to defend them without or with the projected works.						Expense of the troops kept under pay, with the existing works. N. B. Supposing them all militia, and serving six months, and costing, on average, $250 per man.	Expense of the troops kept under pay, with the proposed works.		
		Number of troops necessary with the existing works.		Number of troops required with the projected works.

		Total, 120,000		Total, 60,000							

RECAPITULATION.

Expense for defending the above mentioned points during a campaign of six months, with the existing works,	$16,750,000
Expense for defending the above mentioned points during a campaign of six months, with the projected works,	5,658,000
Difference,	$11,092,000

N. B. In one campaign of six months the difference of expense between the two systems will amount, within a few thousand dollars, to the whole cost of the projected works. The expense of the troops above stated results from a calculation which gives the expense of a regular soldier $300 per annum, and the expense of a militia soldier $500 per annum; the expense of officers being, in both cases, included. No attempt to estimate the enormous contingent expenses in assembling, organizing, and providing, militia forces, of hospitals, waste of property, loss of time, &c. will avail. The above estimate is, undoubtedly, below the real cost. The forces under pay, necessary for defence with the proposed works, consist of the peace establishment, garrisons of forts, (for which see the reports of 1818, 1819, 1820,) doubled by additions of militia, and moveable corps of militia, stationed upon the approaches of an enemy.

16th Congress.] No. 207. [2d Session.

MILITIA FINES.

COMMUNICATED TO THE SENATE, FEBRUARY 16, 1821.

SIR: DEPARTMENT OF WAR, *February* 14, 1821.

In compliance with the resolution of the Senate of the 15th of May, 1820, that the President of the United States be requested to cause to be laid before the Senate, at their next session, a statement of the number of militia from each State, that were called into the public service by orders of the President of the United States, of the number furnished by each State, the number recognized by the United States from each State, and the period of their service; of the amounts of fines imposed for neglect of duty, distinguishing the number of persons on whom fines have been imposed, the sums collected by the respective marshals, the sums paid by them respectively into the Treasury of the United States; the expenses of the courts-martial in the several States; and the number and amount of fines so imposed that have been remitted within the States respectively. I have the honor to transmit extracts of Executive orders to governors of States and Territories, officers commanding districts, &c., calling out militia during the late war with Great Britain, marked A; statements from the third Auditor of the Treasury, of the numbers of the militia of each State and Territory in service during the late war, and of advances and expenditures on account of general courts-martial held for the trial of militia delinquents, marked B and C; and a report of the First Comptroller of the Treasury in relation to the fines imposed for neglect of duty, and the collection of the same, marked D; which comprise all the information which this department can furnish.

I have the honor to be, your most obedient servant,

J. C. CALHOUN.

The PRESIDENT *of the Senate.*

[NOTE. The statement A is omitted as immaterial.]

SIR: TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *December* 14, 1820.

Pursuant to the resolution of the Senate of the United States, passed on the 15th of May last, I have the honor to transmit herewith a statement of the numbers of the militia of each State in service during the late war, [see No. 202,] and also a statement of advances and expenditures on account of general courts-martial for the trial of militia delinquents called into the United States' service. The former of these statements, it may be proper to observe, does not exhibit, as required by the resolution, the number of militia from each State that were called into service by the orders of the President of the United States; the documents on file in this office not affording any evidence on that point. The information can, however, it is presumed, be derived from the records of the Department of War. Other information is also required by the resolution, which cannot be furnished from this office.

With great respect, your most obedient servant,

PETER HAGNER, *Auditor.*

The Hon. J. C. CALHOUN, *Secretary of War.*

[For the statement to which the following notes refer, see No. 202.]

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *December* 15, 1820.

NOTE.—It cannot be ascertained from the documents on file in this office, what portions of the militia mentioned in the foregoing statement, were called into service by orders of the President of the United States. The numbers exhibited therein are those of all the militia, which by the accounts rendered, are shown to have been furnished by the several States, and whose services have been recognized by the United States. The services of the militia of the State of Connecticut were not recognized by the United States after the 12th September, 1814, the day on which they were withdrawn from the command of the United States' officer; and of some called out prior to that time, the services were not recognized by the United States, because the terms on which the United States officer proposed to accept them, were not acceded to by the State. The militia called out by the authority of the State of Connecticut, whose services were not recognized by the United States, were, one general officer, five general staff, seven field officers, ten regimental staff, eight non-commissioned staff, seventeen captains, forty-nine subalterns, one hundred and ninety-three non-commissioned officers, fifty-seven musicians, and one thousand one hundred and twenty-four privates. The State of Massachusetts appears, by a claim presented, to have had in pay sundry regiments of militia, whose services, it is understood, were not authorized by the General Government: the claim being unaccompanied by the rolls of these militia, their numbers or the periods of their service cannot be designated. And advances, amounting to $121,510 56 cents, appear to have been made by the United States, to paymasters and others, for pay of militia in service in several of the States, the numbers or periods of service of which cannot be stated, the accounts not having yet been rendered.

The course pursued in ascertaining the numbers inserted in the preceding statement has been, to take the total number of individuals mustered on each roll, whether of a company, or of the field and staff of a regiment, brigade, or division, without regard to any decrease occasioned by death or otherwise, during the period of service therein expressed.

In cases (which were of frequent occurrence,) where the commencement of service was in one year, and the termination in another, the rule has been to enter the numbers as of that year in which the militia were longest in service.

The same troops, with some variation of officers or organization, appear, in many instances, to have been several times in service during the same year: this was oftenest the case in sections of country most exposed to the incursions of the enemy, in the States of New York, Connecticut, Pennsylvania, Virginia, Kentucky, Tennessee,

Ohio, Mississippi, and especially Maryland. In the State last mentioned, during each of the years 1813 and 1814, short tours of duty appear to have been performed by the same militia, from six to ten different times. In these and all similar cases, the militia have been enumerated and entered, as often as they were found to have been in service.

PETER HAGNER, *Auditor.*

C.

Statement of advances and expenditures on account of general courts-martial held for the trial of militia delinquents, called into the service of the United States in the late war with Great Britain.

STATES.	YEARS.				Total Amount.
	1812.	1813.	1814.	1815.	
New Hampshire, - - - -	233 88	- -	- -	- -	$233 88
New York, - - - -	- -	$4,754 05	$16,867 14	$33,807 30	55,428 49
Pennsylvania, - - - -	- -	234 33	4,988 40	36,309 04	41,531 77
Amount, - -	- -	- -	- -	- -	$97,194 14

The above statement exhibits the sums advanced and disbursed for services and expenses attending the trial of militia delinquents, so far as the same have been ascertained from the accounts of the several disbursing officers settled and rendered at this office; other expenses for that service have doubtless been incurred, the accounts for which have either not been rendered, or are so ingrafted in the accounts of disbursing officers as not to be ascertained, from the circumstance of its not being stated that the officers paid were on court-martial duty.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *December* 15, 1824.

PETER HAGNER, *Auditor.*

D.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *February* 10, 1821.

I had the honor to receive your note of the 10th of October last, enclosing a copy of a resolution of the Senate of the United States, passed on the 15th May preceding, and requesting me to report to you upon such part of the resolution as referred itself to this office, at as early a period as practicable.

In reply, I have to state that, on the 30th October last, a circular was written by this Department to the marshals concerned, a copy of which is enclosed, numbered 1; together with the following statements, which comprise all the information I am able, from the returns made to me, to give on the subject-matter of the resolution, viz:

No. 2. Is a statement exhibiting the number of persons fined in each State, and the total amount of fines assessed.

No. 3. Is a copy of a letter from the marshal of New Hampshire, showing the disposition of the money collected by him for militia fines.

No. 4. Is a copy of a letter from the present marshal of Vermont dated the 9th November, 1820, from which it appears he never received moneys on account of militia fines. From his predecessor it does not appear that any return was received.

No. 5. Is a copy of a communication received from the marshal of New York, under date of the 26th November last, in reply to the circular from this Department on the subject-matter of the resolution of the Senate.

No. 6. Is a return made by the marshal of New York, showing the amount of fines collected and from whom collected. (Omitted because its results are stated in No. 5.)

No. 7. Is a statement made by the same marshal, showing the disposition of the money collected by him. (Omitted because its results are stated in No. 5.)

No. 8. Is a copy of a letter received from the present marshal of Pennsylvania, dated January, 1821, showing the disposition of the militia fines collected by his deputies.

No. 9. Is an abstract rendered by the same marshal, showing the amount of fines collected by his deputies, and specifying the names of the persons from whom collected. (Omitted; see No. 8 for aggregate.)

No. 10. Is an abstract rendered by the same marshal, showing the remissions and mitigations of fines by the Governors of the State of Pennsylvania, from the 20th January, 1815, to the 25th December, 1820, inclusive, the names of the persons in whose favor the remissions and mitigations were made; the amount of fines, and the amount remitted and mitigated. (Omitted; amount remitted and mitigated is $26,156 49.)

No. 11. Is a copy of a letter from the former marshal of Pennsylvania, dated the 21st December, 1815, stating that his disbursements, on account of courts-martial, exceeded the amount of fines collected by him by the sum of $3,742 34.

No. 12. Is a copy of a letter received from the present marshal of Maryland, stating that no militia fines had been collected by him, and that he did not expect to receive any account of militia fines.

No. 13. Is a copy of a letter received from the former marshal of Maryland, dated the 23d August, 1817, stating the difficulties he had to encounter in endeavoring to make collections of militia fines; subsequently to which no further information was communicated by him.

No. 14. Is a copy of a letter addressed to the marshal of Virginia, which will show the footing on which the collection of fines in that State has been placed. This marshal has made no return in compliance with the circular of this Department, under date of the 30th of October last.

No. 15. Is a copy of a letter received from the marshal of Ohio, dated the 8th November last, from which it appears probable that no militia fines were collected in that State.

No. 16. Is a copy of a letter received from the marshal of East Tennessee, dated the 6th November, 1817, from which it appears that the courts had decided against the legality of the militia fines imposed in that State; that some collections had been made, and were deposited in bank, but that the persons who had paid their fines had made application for a return of the same, which would, probably, have to be done.

No. 17. Is a copy of a letter received from the same marshal, showing the amount of fines collected by him, and stating that the money still remains deposited in bank.

No. 18. Is a copy of a letter from J. Childress, former marshal of West Tennessee, dated the 15th November, 1817, from which it appears that no militia fines were collected in his district.

No. 19. Is a statement of the Register of the Treasury, showing the amount of moneys paid into the Treasury of the United States, arising from militia fines.

From the marshal of Kentucky no return has been received.

I have the honor to be, with great respect, your obedient servant,

JOSEPH ANDERSON, *Comptroller.*

Honorable JOHN C. CALHOUN, *Secretary of War.*

No. 1.

Circular to certain marshals.

TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *October* 30, 1820.

In the circular from this Department, of the 5th May, 1818, is the following request:

"You will be pleased to keep a specific account of all the moneys you have received or shall receive on account of said fines, (alluding to militia fines,) and render a statement thereof to this Department, together with the names of the persons, the place of residence, and the amount of the specific sum received by you."

By a resolution of the Senate of the United States, passed on the 15th of May, 1820, the President of the United States is requested to cause to be laid before that branch of the Legislature, at the next session, a statement comprising, among other things, the amount of fines imposed for neglect of duty; the number of persons fined; the sums collected by the respective marshals; the sums paid by them respectively into the Treasury of the United States; the expenses of the courts-martial in the several States; and the number and amount of fines so imposed, that have been remitted within the States respectively.

Not having received any returns from the marshals, embracing any of the objects of inquiry in the resolution of the Senate, I have to call your immediate attention to the subject, and to request that the information wanted may be forwarded without delay.

Respectfully, JOSEPH ANDERSON, *Comptroller.*

To Michael McClary, marshal of New Hampshire; Heman Allen, marshal of Vermont; Thomas Morris, marshal of New York; John Conard, marshal of Pennsylvania; Paul Bentalou, marshal of Maryland; Andrew Moore, marshal of Virginia; John Hamm, marshal of Ohio; John T. Mason, marshal of Kentucky; Charles T. Porter, marshal of East Tennessee; Robert Purdy, marshal of West Tennessee.

No. 2.

Statement exhibiting the number of persons fined in each State, and the amount of fines assessed.

STATES.	Number of persons fined.	Amount.
New Hampshire	3	$120 00
Vermont, (no return received.)		
New York,	3,393	188,114 00
Pennsylvania,	5,837	243,609 41
Maryland,	227	15,154 00
Virginia,	204	15,377 00
Ohio,	5	456 00
Kentucky,	115	7,144 00
East Tennessee,	121	10,703 00
West Tennessee,	40	3,008 00
Total	9,945	$483,685 41

No. 3.

SIR: EPSOM, *November* 13, 1820.

Your letter of the 30th ultimo is received, and for answer I make the following statement: That, sometime in the fall of the year 1812, I received three receipts directing me to collect three fines of militia delinquents, of forty dollars each, against the following persons, viz. Edmond Roberts, Gilman Leavitt, Jun., and Joseph Lowe, Jun. all of Portsmouth, in the State of New Hampshire; early in the year 1813 I collected said fines, and soon after wrote the Comptroller for directions how to appropriate the money; and by his letter to me in answer, of the 14th of December, 1814, he directed me to "retain" the money in my hands towards defraying the expenses of courts; to forward a receipt to the Secretary of the Treasury of the amount, and also to credit the said sum in my account as marshal; all of which I complied with, and in my next account for the expenses of courts, (after deducting five per cent. commissions for collecting, the whole amount being $120,) I credited the United States with the sum of $114, and have been charged with the same at the Treasury. This is all the money for fines assessed on the militia I have ever received since being in office, and all I believe that has been collected in this district. The amount of the expenses of the court-martial I know nothing of, as no return was ever made to me. In my letter to you of the 18th May, 1818, in answer to your circular of the 5th of the same month, I made nearly the same statement to you that I now have.

I am, very respectfully, your humble servant,

MICHAEL McCLARY.

JOSEPH ANDERSON, Esq.

No. 4.

SIR: BURLINGTON, *November* 9, 1820.

I have the honor to acknowledge the receipt of your favor of the 30th ultimo, and to inform you that I have never received any moneys on account of militia fines, or had in my hands any process for the collection of any such fines.

Your circular of the 5th of May, 1818, must have been received by my predecessor in office, and never delivered over to me.

I am, respectfully, your obedient servant,

HEMAN ALLEN.

Hon. JOSEPH ANDERSON, *Comptroller of the Treasury.*

No. 5.

SIR: NEW YORK, *November* 26, 1820.

Your circular of the 30th of last October has been duly received, and, in conformity to it, I now enclose a statement showing that the amount of court-martial fines, collected by me, is $25,541; that, out of this sum, fines to the amount of $8,475 have been remitted by the President of the United States, and repaid to the parties; and that the sum of $15,794 54 has been paid to the members of the court, and to counsel employed, with the sanction of the President of the United States.

As the resolution of the Senate of the United States calls, among other things, for a statement of the amount of fines paid by the marshal into the Treasury, it may not be improper to remind you that those collected by me have been disposed of in conformity to the instructions of your Department, and that of the Secretary of War, to whom you directed me, in your letter of the 6th of May, 1818, to account for the receipt and expenditure of such moneys as I might collect, and to pay the same to the members of the court, agreeable to such instruction as I might receive from him.

The number of court-martial delinquents, against whom certificates have been deposited with me, is two thousand and seventy-five, and the total amount of fines imposed is $125,622.

I have frequently stated to the War Department the difficulties attending the collection of these fines; the time which has elapsed since they were imposed, the death of many of the parties, the insolvency of others, the scarcity of money, and total inability to raise it even among many of those who have property, and the spirit of litigation which, in some countries, has been infused into the delinquents, who have been taught to believe that the proceedings of the Government and of the court-martial have been illegal and irregular, have all united to embarrass and delay the collections, and have given rise to a variety of suits against the deputy marshals, which will ultimately be attended with considerable expense.

I have the honor to remain, sir, your obedient servant,

THOMAS MORRIS.

Hon. JOSEPH ANDERSON, *Comptroller.*

No. 8.

SIR: MARSHAL'S OFFICE, PHILADELPHIA, *January*, 1821.

Agreeably to the instructions contained in your letter of the 30th October last, I send herewith an abstract of militia fines collected by my deputies, as far as returns have been made to me, prior to the 1st instant, amounting to the sum of - - - - - - - - - - $3,671 30

Deducting therefrom 5 per cent., say - - - - - $183 56

Paid to the members of a court-martial, held in Chester county, for 2d brigade, 3d division, for their services and contingent expenses, agreeably to your instructions of the 31st March, 1819, - - - - - - 3,407 00——3,590 56

Leaving a balance in my hands of - - - - - - $ 80 74

There are some collections made that are not returned, and some account of moneys paid for defending several suits which had long been depending against some of the officers, most of which are now finally settled. As soon as these returns come to hand they shall be forwarded.

I have also at length obtained a list of all the fines that have been remitted and mitigated by the Governors of this State since the late war, up to the 25th day of December last, an abstract of which is also herewith enclosed. Of the whole amount of the expenses of the courts-martial in this State I have no knowledge, owing to the papers having never been restored to this office by the late marshal and his deputies, of which I have heretofore informed you.

If it is the intention of Government to prosecute the collection of the remaining fines, I would suggest the necessity of my being furnished with copies of the proceedings of the courts-martial from your office, with the exception of those of the 1st brigade, 2d, 3d, 5th, and 6th divisions, and the 2d brigade, 6th and 7th divisions, which are the only papers in my possession or my deputy's. If I had those papers, I think I could in a short time make a final settlement of this unpleasant business.

I have not forwarded those vouchers of the court-martial for the 2d brigade, 3d division, to the War Department for adjustment, not knowing to which of the auditors to direct them.

Respectfully, your obedient servant,

JOHN CONARD, *Marshal Eastern Dist. of Penn.*

The Hon. JOSEPH ANDERSON, *Comptroller of the Treasury.*

No. 11.

SIR: MARSHAL'S OFFICE, PHILADELPHIA, *December* 21, 1815.

You have herewith a copy of a communication made to me by members of a court-martial, together with my answer. I can add little more for your information than that I have paid, for expenses and claims of compensation, the sum of $2,742 34 more than has been collected in this division; and, under existing circumstances, to enforce payments would involve me in a great many suits, perhaps equal to the number of delinquents.

The difficulty arises, as it is stated by the delinquents, from the irregularity and illegality of the proceedings.

Most respectfully I am, sir, your obedient servant,

JOHN SMITH, *Marshal.*

The COMPTROLLER OF THE TREASURY.

No. 12.

SIR: BALTIMORE, *November* 3, 1820.

I hasten to acknowledge the receipt of your letter dated 30th ultimo, but post-marked 1st instant, and to assure you that I have not received any moneys, nor do expect to receive any, on account of militia fines, as nothing of that nature has come to my knowledge since my appointment. If there has been any thing of the kind within this district, it must have taken place during the time of my predecessor; and I do not know any person from whom I could obtain satisfactory information upon that subject.

The only apology I can offer for my remissness in not answering your circular of the 5th of May, 1818, is, that having received it shortly after my appointment, inexperienced as I then was, I probably thought that, as I had nothing to account for of what was demanded, no answer was required.

Very respectfully I am, sir, your most obedient servant,

PAUL BENLATON, *Marshal Dist. of Maryland.*

The Hon. JOSEPH ANDERSON, *Comptroller of the Treasury, Washington.*

No. 13.

SIR: BALTIMORE, *August* 23, 1817.

I have received yours of the 13th instant, respecting the militia fines. I began the collection of those fines last summer, but soon found it attended with so many difficulties, that I thought it best to suspend any further collections for the present. When I seized their property, they got a replevin out of Baltimore County Court, and took the property out of my possession. I then seized their persons; to prevent their going to jail they paid me the fine, but immediately brought suit in the County Court to recover it back again. Some of the Society of Friends went to jail; they were pardoned by the President. Mr. Monroe, while acting as Secretary of State, directed me not to execute any more of the Society of Friends, or others whose families would be distressed by the payment of the fines. There is another class of people who have been improperly fined; they had removed their families into the country; at the time the militia was called out the officers in the country enrolled them, and levied fines, at the very time they were serving in the city militia in companies they had belonged to before they were called into service. I saw a number of them on the battle ground, and one man lost his leg at Fort McHenry; yet he is fined forty dollars. The Society of Friends, the very poor people, and those improperly fined, take in nearly the whole, for there were very few fines levied; out of nine regiments in Baltimore city and county, only three have laid any fines. General Winder and some of the other attorneys have given an opinion that none of the fines can be legally collected, on account of the courts-martial not being legally instituted; the objection, as I understand, is, that the court-martial was not ordered until they were all discharged from the service of the United States, and then it consisted of officers some of whom had never been called into service. I am waiting the issue of the suits in Baltimore County Court, and, if I am not obliged to refund, I will immediately account to you for what I have received.

I am, with respect, your obedient servant,

THOMAS RUTTER.

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury, Washington.*

No. 14.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *June* 14, 1815.

After a consultation with the President and Secretary at War, and a deliberate consultation of the subject of militia fines, &c., I have to advise you, that where the opinion of Judge Marshall, as stated in the case of William Mead, applies, you will suspend the collection of fines; but where they have been regularly imposed, in the course suggested by the Chief Justice, they may be collected.

I have written to Mr. Hay, the district attorney, somewhat more fully. You will be pleased to consult with him in your further proceedings in this business.

As it will be convenient for you to obtain a copy of the opinion in the case of Mead, I have declined enclosing one.

With due respect,

JOSEPH ANDERSON, *Comptroller.*

ANDREW MOORE, Esq., *Marshal of Virginia, Richmond.*

No. 15.

SIR: MARSHAL'S OFFICE, DISTRICT OF OHIO, ZANESVILLE, *November* 8, 1820.

I have received your circular of the 30th ultimo, on the subject of militia fines in this district. I wrote to you on the 6th April, 1816.

This business has been altogether performed by the State officers. The Legislature, by a special act, as I am informed, directed the levy and collection to be made by the sheriffs of the respective counties, so that no money has ever been by me collected as *militia fines* in this district; added to which, upon consultation at that time with the attorney of the district, he gave it to me as his opinion, that, owing to the informality and illegality of their proceedings, it was impracticable for the marshal to collect the fines if undertaken by him.

I have the honor to be, sir, yours, very respectfully,

JOHN HAMM, *Marshal.*

Hon. JOS. ANDERSON, *Comptroller.*

No. 16.

SIR: NOVEMBER 6, 1817.

Those of the militia who were ordered into the service of the United States during the late war, and failed to obey the requisitions of the President of the United States, were fined by courts-martial, composed of officers not in the service of the United States at the time fines were assessed, and I was directed to collect such fines. I proceeded so to do, and collected from a number, and deposited such sums in the State bank of Tennessee. From a late decision in the Supreme Court of Tennessee that the courts-martial had not the power to assess the fines, (therefore illegal;) that being the case, those of the delinquents who had paid these fines have demanded of me such sums as have been paid. You will be so good as to advise whether the money collected is to be paid or not back to those tories. I am fully impressed that the decision of our courts will be in their favor.

I am, with due respect,

CHAS. T. PORTER, *Marshal East Tennessee.*

Hon. JOSEPH ANDERSON, *Comptroller.*

N. B. Jacob Peck, Esq. informed me he would transmit to you a decision of the Supreme Court on the illegality of the late militia fines; you will be so good as to transmit such directions as are to be my government respecting these deluded people.

C. T. P.

No. 17.

SIR: CHEEK'S CROSS ROADS, *December* 26, 1820.

In compliance with your request annexed, I transmit you the amount of militia fines collected and deposited by me in the bank of Tennessee, in Knoxville, specifying the precise time of the deposites, of which I advised you at the time they were made, and from whom they had been received; but at present I am not able to ascertain their names and residences correctly, owing to the proper documents in which they were entered having been lost or mislaid, but presume you have them in your office.

February 22, 1815, deposited,	$ 508 25
March 11, 1815, deposited,	47 50
April 18, 1815, deposited,	912 00
October 22, 1815, deposited,	225 00
April 18, 1816, deposited,	100 00
	$1,792 75

Also, the further sum of $2,665, deposited from the sale of the barrack's lot in the town of Knoxville, on the 21st August, 1816; which several sums are in the said bank of Knoxville, subject to order from the proper Department. I trust that the above statement will be found satisfactory and correct, as the above sums deposited for delinquent militia are the whole sums collected, except five per centum retained for my fees in the collecting the same; also, thirty-five dollars for the sale of the barrack's lot in the town of Knoxville, as before stated.

I am, respectfully, your obedient servant,

CHAS. T. PORTER, *Marshal East Tennessee.*

Hon. JOSEPH ANDERSON, *Comptroller.*

No. 18.

SIR: DISTRICT OF WEST TENNESSEE, NASHVILLE, *November* 15, 1817.

I have the honor of enclosing to you for your inspection copies of two letters from the Comptroller of the United States, dated March 20, 1816, and August 13, 1817, on the subject of militia fines; and also copies of the returns sent to me of the proceedings of the courts-martial who assessed those fines. The object of laying these documents before you is to obtain your instructions how I am to act on this subject. Soon after the returns were placed in my hands, I proceeded to the collection, and did actually levy on property, but the owner brought the subject before the judge of the District Court of the United States, and he decided the proceedings of the court-martial illegal. In consequence of this decision, and the instructions of the Comptroller, I stopped the collection without having received one cent on those returns, and no new courts-martial have been ordered or held to my knowledge; and, indeed, I think it would be useless to attempt the collection, or order other courts-martial, as the persons subject to fine were of the lowest class of citizens, had very little property, and no settled places of residence, and four-fifths of them have since dispersed to the Missouri and the Alabama Territories and other parts unknown; and what few yet remain in my district would, were I to proceed with the collection, commence suits against me, and I should be harassed with law-suits and involved in much expense.

I have the honor to be, sir, your obedient servant,

J. CHILDRESS, *Marshal.*

The Hon. the SECRETARY OF WAR.

No. 19.

Statement of the sums paid by the marshals into the Treasury of the United States on account of militia fines collected under the act of Congress of February, 2, 1813.

John Smith, late marshal of the district of New York, for warrant No. 3,117, drawn on him, dated December 31, 1818, being the nett amount of fines levied and collected by William Hoyt, deputy marshal, under a warrant dated March 1, 1814, issued by James Talmadge, Jun., president of a court-martial, in pursuance of the second section of "An act entitled an act supplementary to an act to provide for calling for the militia," &c. passed February 2, 1813, - - - - - - $577 60

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, REGISTER'S OFFICE, *February* 10, 1821.

16th CONGRESS.] **No. 208.** [2d SESSION.

THE MILITIA.

COMMUNICATED TO THE SENATE, FEBRUARY 26, 1821.

To the Senate of the United States: WASHINGTON, *February* 24, 1821.

I transmit to Congress a letter from the Secretary of War, enclosing "an annual return of the militia of the United States, prepared by the adjutant and inspector general, conformably to the militia laws on that subject."

JAMES MONROE.

SIR: WAR DEPARTMENT, *February* 17, 1821.

I have the honor to enclose an annual return of the militia of the United States, which has been prepared by the adjutant and inspector general, conformably to the militia laws on that subject.

I have the honor to be, your most obedient, humble servant,

J. C. CALHOUN.

To the PRESIDENT OF THE UNITED STATES.

SIR: ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *February* 15, 1821.

I have the honor to lay before you the annual abstract of the returns of the militia of the several States and Territories for the year 1820, with an account of arms, accoutrements, ammunition, and ordnance belonging to each, as far as the returns for that year have been received at this office.

The first section of the act of March 2d, 1803, for establishing a uniform militia throughout the United States, provides "that it shall be the duty of the adjutant general of the militia, in each State, to make returns of the militia of the State to which he belongs, with their arms, accoutrements, and ammunition, to the President of the United States, annually, on or before the first Monday in January, in each year; and it shall be the duty of the Secretary of War from time to time to give such directions to the adjutant general of the militia as shall, in his opinion, be necessary to produce a uniformity in the said returns; and he shall lay an abstract of the same before Congress on or before the first Monday of February, annually." The dates of the several returns show how far the law has been regularly complied with.

I have, for many years, endeavored to keep up a correspondence with the adjutants general of States and Territories, and have found them always disposed to discharge their duties. A defect appears to exist in some of the State laws, as the enclosed copies from the adjutants general of Maryland and Delaware will show.

I have delayed the report to this time, expecting further returns.

I have the honor to be, with perfect respect, your obedient servant,

D. PARKER, *Adjutant and Inspector General.*

To the SECRETARY OF WAR.

SIR: ADJUTANT GENERAL'S OFFICE, ANNAPOLIS, *November* 11, 1819.

Your letter of the 26th of August last, having been mislaid during my absence from town, has remained so long unanswered. I have now to acknowledge its receipt, as also the forms it covered. It is impossible for me to say when a return of the militia of this State may be expected. I have exerted myself to procure a return ever since my appointment, but have not yet succeeded, nor is it probable that I shall, while our militia laws remain so defective.

I have the honor to be, very respectfully, your obedient servant,

RICHARD HARWOOD, OF THOS., *Adj. Gen. Md. Militia.*

DANIEL PARKER, *Adj. and Insp. Gen., City of Washington.*

SIR: SMYRNA, *December* 22, 1820.

An act of Congress, approved March 2, 1803, entitled "An act more effectually to provide for the national defence, by establishing a uniform militia throughout the United States," enjoins the duty on the adjutants general of the respective States to make returns of the force of the militia, of the arms, accoutrements, and ammunition, to the President of the United States, on or before the first Monday of January in each year.

In obedience to the above recited act of Congress, I have the honor to inform you that the Legislature of Delaware passed an act at Dover, February 2, 1816, entitled, "An act to repeal military fines for non-attendance on days of parade, and for other purposes," rendering entirely inoperative "An act to establish a uniform militia throughout this State," passed August 10, 1807, and supplements thereto of May 25, 1812, and January 30, 1813. The consequences naturally flowing from that law have been a total neglect of every appearance of military duty; for, in removing the obligation to muster, on the part of the private, every incentive having a tendency to urge the officer to the performance of his duty ceases to exist: and if, in addition to these causes, we take into consideration the circumstance of the vacation of almost all of those officers by death, resignation, or the expiration of the term of office, and no new appointments being made by the Executive authority, the utter inability of the adjutant general to comply with the requisition contained in the above act of Congress will appear clear and evident.

The existence of similar difficulties prevents the returns being made, with the most distant prospect of correctness, of the arms, accoutrements, and ammunition.

All of which I have submitted to his excellency Jacob Stout, Esq., Governor of this State, who will most probably lay the same before the Legislature at their next session, the ensuing month. If the Legislature choose to remove the difficulties under which I labor, their utmost despatch would not enable me to comply with the above act of Congress in time for your returns to be made to that honorable body. on the first Monday of February next. Indeed, I am not sanguine in my anticipation of receiving any relief from the State Legislature, and believe that the militia of the Union will continue disorganized and undisciplined until Congress shall interpose their strong arm in support of the militia and its friends, and by their fostering care preserve from annihilation those pillars of our national safety.

I have the honor to be, &c. &c.

W. KENNEDY, *Adjutant General of the Delaware Militia.*

General D. PARKER, *Adjutant and Inspector General.*

Abstract of the annual returns of the militia of the United States, by States and Territories, taken from the last returns on file in this office.

ADJUTANT AND INSPECTOR GENERAL'S OFFICE, *February* 14, 1821.

D. PARKER, *Adjutant and Inspector General.*

16th Congress.] No. 209. [2d Session.

TRANSPORTATION ON THE YELLOW STONE EXPEDITION.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, MARCH 1, 1821.

Mr. Cocke, from the committee to whom were referred the documents and award relative to the transportation of the troops, ordnance, and military stores, to the expedition ordered to the Yellow Stone river, reported:

That a contract was entered into on the 2d of December, 1818, between the United States, and Colonel James Johnson, of Kentucky, by which Colonel Johnson stipulated to furnish two steamboats, calculated to navigate the Mississippi and its waters, and place them subject to the orders of Government, by the 1st of March, 1819; and further agreed, in case he should be required, that he would in a reasonable time furnish one other or more steamboats, all of which were designed for the transportation of provisions, ordnance, and other military stores, to an expedition destined for the Mandan villages, or the Yellow Stone river; to this agreement the committee invite the attention of the House. It appears, by said agreement, that the rate of transportation was not definitively settled and ascertained, but, in case of disagreement as to the rate of compensation, it was to be fixed and determined by arbitrators indifferently chosen; a disagreement, as might have been expected, did arise, and referees were chosen. From the evidence submitted to them, it appears that the two steamboats were not placed subject to the orders of Government until some time in May following, and that on the arrival of the first boat at Belle Fontaine, the place from which the expedition was to have sailed, the bank of St. Louis sued out an attachment against the property of Colonel Johnson, and delivered the writ to the proper officer to execute. It appears that he was not only inclined to prevent, but determined to resist with force, and called on the commanding officer at that station for a corporal's guard and arms, to enable him to oppose its execution with success; this, the committee are informed, was promptly refused. Colonel Johnson, on discovering this determination, came to anchor on the east side of the Mississippi, within the State of Illinois. The committee have thought proper to advert to those facts, believing that in some degree they contributed to the delay of the expedition, but are far from believing this the only cause. To illustrate more fully the views of the committee, and to enable the House to judge how far justice has been done the Government, they think it incumbent on them to state, that Colonel Johnson was the sole contractor to this expedition, and bound to transport the military stores and ordnance from Pittsburg, in the State of Pennsylvania, to Belle Fontaine, on the Missouri, and also the contractor to furnish the necessary provisions. The committee discover, from the documents referred to them, that, owing to the failure on the part of Colonel Johnson to deliver the stores and munitions of war, it would have been impracticable for the expedition to have moved before the —— of June, at which time the Jefferson steamboat reached Belle Fontaine, on board of which were the stores before mentioned, together with the clothing for the soldiers employed on the Yellow Stone expedition. The committee think it due to Colonel Johnson to state that this delay was occasioned by the breaking of the piston head of this boat, and not from wanton neglect. It is, however, a strong reason, in the opinion of the committee, why the United States should not pay Colonel Johnson for detention of his boats, when there was no failure on their part. It appears that a sufficient quantity of provisions had not reached the garrison at Belle Fontaine, even on the arrival of the steamboat Jefferson; that the subsistence for this expedition was partly on board another of Colonel Johnson's boats, called the Calhoun, and from the feebleness of her machinery she was unable to resist the current of the Mississippi, and never reached the garrison on the Missouri, where the troops were to embark; thus creating a deficiency of provisions which was not remedied by Colonel Johnson until about the 28th of June, and not until Colonel Atkinson, the commanding officer, called on him to complete the number of rations required, and assured him, if he did not, that the agent of the United States would be ordered to purchase, and he, Colonel Johnson, charged with them. For a more minute detail on this part of the subject, the committee refer to the evidence submitted to the arbitrators, which they have thought proper to lay before the House, together with the arguments of counsel, on the investigation before the referees. The committee will be content with a cursory examination, and notice only a few prominent facts. The clause in the agreement of the 2d of December, 1818, and on which the claim of Colonel Johnson, of indemnity, for detention of his boats, is founded, provides "that if, in the arrangements and operations of Government, the said steamboats should be detained in their destination from the want of concentration of the articles to be transported or otherwise, and not imputable to the negligence of Colonel Johnson, the quartermaster general obliged himself, on the part of the Government, to make from time to time *advances*, which are reasonable, on account of his transportation." The *advance* of money, by this provision in the contract, the committee believe, was esteemed by Colonel Johnson not only convenient, but of great importance, and a sufficient indemnity for all expenses incident to the detention; to justify this opinion they refer to an obligation executed by Colonel Johnson, of equal date with the agreement, of which the above is an extract. This obligation expresses the intention and views of the parties, and recites the previous agreement; an extract of which is submitted. "And whereas, by the terms of the said contract or agreement, the said Thomas S. Jesup, hath engaged to make *advances* of money from time to time to the said James Johnson, on account of transportation, &c.: Now, therefore, for the faithful performance of the several conditions and obligations contained in the said contract or agreement, on the part of the said James Johnson, and for the repayment and final adjustment of all and singular such *advances* as may be made to him by virtue of this contract," &c. From this it is evident that neither party contemplated more than a liberal *advance* of money, if perchance there should be any detention of the expedition; and it would have been proper in Colonel Johnson to require *advances, in proportion to the time*, but they cannot believe his claim is just as exhibited; if in this, however, they are mistaken, they must say, no operations of the Government caused the detention of Colonel Johnson's boats, while up the Missouri, and for which pretended claim the sum of $41,275 13 cents was awarded him. They find, from the evidence submitted to the referees, that the boats were detained solely in consequence of their inability to complete their voyage. The Jefferson was too feeble in machinery to stem the current, but for a short distance, when she was compelled to halt, and her cargo was chiefly transported by the boats of the United States. The Expedition and Johnson steamboats also failed, and that neither reached the Council Bluffs that season. The committee are unable to discover even an apology for this allowance of $41,275 13 cents, and are satisfied no principle of justice will sanction it; they cannot admit for a moment the idea, that when an accident happens to Colonel Johnson's boats, and over which the Government had no control, it is proper to make the United States responsible for detention, whilst the delay is indispensable to repair damages. The committee can perceive no rule of equity that will support this award; every award must be reasonable, and it is contrary to the duty of an arbitrator to do any thing that would be unjust between the parties. They also award Colonel Johnson the further sum of $5,875 39 cents, including, they

say, nothing but the actual expenses, wear and tear, and loss of time, throwing out all allowance for risk, which they supposed compensated in the freight for the detention of two boats before the expedition moved from Belle Fontaine, and for the detention of three of Colonel Johnson's boats, after they were damaged, unladened, and unable to proceed further; they say, after making due allowance for the actual expenses, the loss of time and employment, the wear and tear, and the risk of wintering in so exposed a situation, they award the further sum of $41,275 13; thus the United States has paid Colonel Johnson $47,249 51, for the detention of his boats, under the notion that, in the operations and arrangements of Government, the articles to be transported were not concentrated. The committee feel it their duty to state, that it appears, for the transportation actually furnished by Government, there has been paid Colonel Johnson, in obedience to the award, the sum of $14,969 28, for the transportation of articles not conveyed by him, or at his expense; and also the sum of $13,700 for the passage of troops in his boats to the Council Bluffs, when, in fact, the said boats never reached there, and were compelled to halt as before stated; the payment of those sums, under all the circumstances, in the opinion of the committee, cannot be sanctioned, and are not supportable, consistent with equity and justice. They feel constrained to remark, that the charge for detention of those boats up the Missouri, and for which there is awarded the sum of $41,275 13, did not make an item in the account of Colonel Johnson, when first exhibited, and must have been conceived after Congress refused an appropriation further to prosecute the expedition up the Missouri. The committee have attentively examined the account of Colonel Johnson as regards the claim for transportation of military stores and provisions; by his contract of the 2d of December, 1818, he agreed to receive a reasonable compensation for his services, and use of boats employed in transportation, and fixes as the basis the ordinary rates of transportation for such allowance. The committee can see no good reason why the sum of sixteen and one-fourth cents per pound should be paid Colonel Johnson for all articles conveyed by keel-boat navigation, when it is evident that the ordinary rate of transportation by this mode of conveyance did not exceed five and a half cents per pound; and in fact this was the sum paid by the United States to others performing at the same time similar services. In order that the House might have all the means of judging of the merits of this transaction between the Government and Colonel Johnson, and to enable the nation fully to understand how far economy has been consulted, a comparison between the prices now allowed, and those given by the arbitrators to Colonel Johnson, was considered somewhat important. The committee called on the quartermaster general for information on this point; the answer is, that Colonel Johnson became a bidder to transport military stores, &c., to the Council Bluffs, during the year 1821, at the rate of three and three-fourth cents per pound, as has been observed. The arbitrators allowed Colonel Johnson for similar services performed in 1819 sixteen and one-quarter cents per pound. It further appears, that, among fourteen or fifteen bidders for transportation to that post for the year 1821, but one required over four cents per pound, and he less than five cents per pound: what are the causes for such a change of prices the committee are unable to conjecture. That the present scarcity of money may make some difference is admitted; but the navigation of the Missouri river is the same; the same means of transportation existed which are now used. A reduction in price from sixteen and one-fourth cents to three and three-fourth cents, about one-fifth of the price heretofore given, affords some ground, at least, for the opinion, that what once was alleged to be prudent and economical now appears to be profuse and extravagant.

If the committee are correct in their construction of the contract between the United States and Colonel Johnson, and their views relative to the advances from time to time being esteemed by Colonel Johnson equivalent to any delay that might happen by the operations of the Government, they have no hesitation in saying the advances have not only been liberal, but profuse, and, in one instance, not guarded by such security as will, in all probability, secure the Government against the loss of a sum of more than $50,000. The only security taken for this advance, as the committee believe, is a mortgage on Colonel Johnson's steamboats, which appear to have been broken, feeble, and subject to constant decay. The committee find that, after giving Colonel Johnson credit for every allowance awarded, there is still due from him to the United States the sum of $76,372 65 cents, and which the arbitrators did not award he should pay, although justly due. From a full view of this subject the committee think the award ought to be set aside, and, to this end, recommend the following resolution:

Resolved, That the Attorney General of the United States be directed to use all legal means in his power to set aside the award made between the United States and Colonel James Johnson; and, also, use the legal means to recover, for the United States, whatever may be due from said Colonel James Johnson.

17th CONGRESS.] No. 210. [1st SESSION.

ARMING THE MILITIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 16, 1822.

Mr. SMITH, of Maryland, from the Committee of Ways and Means, to whom was referred a resolution of the 11th December last, directing an inquiry to be made "into the expediency of increasing the annual appropriation for arming the militia," reported:

That they have received from the Secretary of War an answer to the inquiries of the committee, together with a report from the Ordnance Department, accompanied by four statements, marked A, B, C, and D, which the committee submit as part of their report; by which it appears that there was an unexpended balance in the Treasury, of the appropriation for arming the militia, on the 31st day of December last, of $48,508 18. The statement A shows the whole number of arms procured under the act since the 1st day of January, 1816. Statement B shows the number of field artillery, small arms, and accoutrements delivered to the several States since that day; an account of balances due to the States on the said 1st January, 1816; and an account of the period subsequent to that day. Statement C shows the number of each description of arms and accoutrements now ready for delivery, under the act, to the several States, and which it is contemplated to issue early in the spring. Statement D shows the number of field-pieces, arms, and accoutrements, which have been contracted for and not delivered on the 31st day of December last.

Your committee, after a full consideration of the subject, submit the following resolution:

Resolved, That it is inexpedient at this time to increase the annual appropriation for arming the militia.

SIR: DEPARTMENT OF WAR, *January* 14, 1822.

In reply to your letter of the 21st ultimo, I have the honor to transmit, herewith, a report of the Ordnance Department, with accompanying returns, marked A, B, C, and D, which furnish the information required by the committee.

I have the honor to be your obedient servant,

J. C. CALHOUN.

Hon. SAMUEL SMITH, *Chairman of Committee of Ways and Means.*

SIR: ORDNANCE DEPARTMENT, *January* 12, 1822.

I have the honor to communicate, herewith, the information required by the Committee of Ways and Means, relative to "the annual appropriation for arming and equipping the whole body of the militia."

Statement A exhibits the "number of field-pieces, arms, and accoutrements, which have been procured under the act," since the 1st of January, 1816.

Statement B shows "the number of each which has been delivered to the States respectively," during the same period.

Statement C exhibits "the number of each description of arms and accoutrements now ready for delivery."

Statement D shows "the number contracted for, and not yet delivered, of each.",

In answer to the fifth question I have to state that "the sum applicable to the object of the act, and unexpended," is forty-eight thousand five hundred and eight dollars and eighteen cents, being the unexpended balance of the appropriation remaining in the Treasury on the 31st December, 1821.

The foregoing statements commence on the 1st January, 1816; the execution of the act for arming the militia, not having been connected with the duties of this Department anterior to that date. In January, 1816, an account of the arms issued to the several States and Territories was prepared by the late Superintendent General of Military Supplies, which account was taken as the basis of the settlements with each State up to that period. In effecting these settlements it has been found, in some instances, that balances were at that time due to the States; to adjust which arms have since been issued to them by this Department. The amount of such issues is shown in statement B.

In making the apportionments of arms it has been usual to assign the respective quotas in *muskets*. But it has been left optional with the State authorities, either to receive their full quota in muskets, or to take a limited proportion of it in field artillery, or in rifles, pistols, sabres, or accoutrements. As it could not be foreseen what description of arms would be chosen by the State authorities, it became necessary to deposite all the arms procured under the act for arming the militia in the arsenals, as common stock with those which had been procured from other sources; and, when issues were made to the militia, to draw upon the general stock, without confining the issues to those particular arms which had been procured under the act.

I have the honor to be, sir, very respectfully, your obedient servant,

GEO. BOMFORD,
Lieutenant Colonel on ordnance duty.

Hon. J. C. CALHOUN.

A.

Statement of the field artillery, arms, and accoutrements, which have been procured since the 1st *of January,* 1816, *under the law of* 1808, "*for arming and equipping the whole body of the militia.*"

17th CONGRESS.] No. 211. [1st SESSION.

MILITIA FINES IN PENNSYLVANIA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, JANUARY 16, 1822.

SIR: TREASURY DEPARTMENT, *January* 12, 1822.

In obedience to a resolution of the House of Representatives of the 2d instant, directing the Secretary of the Treasury to report to the House "how much of the fines imposed on the militia of Pennsylvania for non-performance of military duty in the late war with Great Britain has been received by the marshals of the several districts of the said State, and their deputies, respectively; how much of the sums so received has been paid into the Treasury, or to the use of the United States; in whose hands any sums thus received, and not paid into the Treasury, or to the use of the United States, have been retained; who are the sureties of such delinquents, and what the amount of their respective bonds; what instructions have been given to the officer or officers prosecuting on behalf of the United States, in relation to the said delinquents and their sureties; whether suits have thereupon been instituted against them for the recovery of the sums so retained, and what has been the result of those suits;" I have

the honor to submit the enclosed report and documents, which contain all the information required by the said resolution that is in the possession of this Department.

It does not appear that any action has been instituted against the late marshal or his deputies, for the recovery of money received of them on account of militia fines improperly retained in their hands. No money arising from militia fines in the State of Pennsylvania has been paid into the Treasury of the United States.

I have the honor to be, very respectfully, sir, your obedient servant,

WM. H. CRAWFORD.

The Hon. the SPEAKER *of the House of Representatives.*

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *January* 11, 1822.

Having referred to me, for the information therein required, a resolution of the House of Representatives of the United States, passed the 2d instant, of which the following is a copy:

"*Resolved*, That the Secretary of the Treasury be directed to report to this House how much of the amount of fines imposed on the militia of Pennsylvania for non-performance of military duty in the late war with Great Britain, has been received by the marshals of the several districts of said State, and their deputies, respectively; how much of the sums so received has been paid into the Treasury, or to the use of the United States; in whose hands any sums thus received, and not paid into the Treasury, or to the use of the United States, have been retained; who are the sureties of such delinquents, and what the amount of their respective bonds; what instructions have been given to the officer or officers prosecuting on behalf of the United States, in relation to said delinquents and their sureties; whether suits thereupon have been instituted against them for the recovery of the sums so retained; and what has been the result of said suits:"

I have the honor to state, in reply, that no returns were made by Mr. Smith, the former marshal of Pennsylvania, as to the specific amount of militia fines collected by him and his deputies.

In a communication, however, received from him, under date of the 21st December, 1815, he observes, that he had paid for expenses and claims for compensation of courts-martial, the sum of $2,742 34 beyond the amount collected in his division; and that to enforce payments under the then existing circumstances would involve him in a great many suits, perhaps equal to the number of delinquents.

From a return made by Mr. Conard, the present marshal for the eastern district of Pennsylvania, it appears, that, according to accounts rendered to him by his deputies, they had collected, up to the 1st of January, 1821, the sum of $3,671 30, for which he accounts as follows, viz:

Amount of commission for collection, - - - - - -	$183 56
Amount paid to members of courts-martial in Chester county, for their services and contingent expenses, - - - - - - -	3,407 00
Balance in hands of the marshal, - - - - - -	80 74
	$3,671 30

As, from the want of the requisite returns from Mr. Smith, the former marshal of Pennsylvania, definite information on all the points embraced in the resolution of the House of Representatives cannot be given, I take leave to furnish you with copies of the following correspondence, as containing a general view of the subject, viz:

No. 1. Copy of a letter from John Smith, the former marshal, dated the 29th of December, 1813, to Mr. Rush, on the subject of applying the funds from militia fines to the payment of the expenses of courts-martial.

No. 2. Copy of Mr. Comptroller Rush's reply, sanctioning the application of the funds of the above object.

No. 3. Copy of a communication from the same marshal, dated the 26th March, 1814, on the subject of suits instituted against him for enforcing the fines, the proceedings of the courts-martial which assessed the fines, being alleged to be illegal.

No. 4. Copy of Mr. Comptroller Bacon's reply, dated the 30th March, 1814, stating that he did not consider it as coming within his province to give any directions on the subject of those suits, or to advise to the employment of counsel to aid in their defence.

No. 5. Copy of a communication from me to Mr. Ingersoll, district attorney, dated the 18th of July, 1815, enclosing to him a copy of the opinion of Chief Justice Marshall, in the case of William Mead, and directing that, in those cases in which the principles laid down in the opinion might be deemed to apply, the collection of the fines should not be enforced; but, in other cases, the marshal should proceed to collect.

No. 6. Copy of my letter to Marshal Smith, dated the 27th December, 1815, stating that the district attorney had, long before, been instructed on the subject of the militia fines, and would be able to judge whether, under the then circumstances, it would be advisable to attempt a further collection; and that the members of the courts-martial ought to be paid for their services; but, in case it should be found that the courts were ordered by an improper authority, and the fines not well laid, it might be questionable whether the United States should be held answerable for the payment of the expenses of the courts-martial, and, therefore, no further authority would be given to him to make further payments to the members of courts-martial.

No. 7. Copy of a circular from this Department, dated the 20th March, 1816, stating that new courts-martial would be instituted under the direction of the War Department, in those cases in which the sentences had been declared illegal, and that the marshals had better apply to that Department as to the expenses of the courts-martial.

No. 8. Copy of a circular from this Department, dated the 13th August, 1817, directing the marshals to proceed, without delay, in the collection of the militia fines, and containing instructions in relation to the disposition of the money.

No. 9. Copy of my letter to you, dated the 5th January, 1818, in which the opinion is expressed that the payment of the expenses of courts-martial, out of the militia fines, was incorrect, and that they should have been paid by the War Department.

No. 10. Copy of a circular from this Department, dated the 5th May, 1818, directing the marshals to continue paying the courts-martial out of the militia fines collected, an arrangement having been made with the War Department to refund the amount as, in strictness, those fines ought to be paid directly into the Treasury, and requesting the marshals to keep a specific account of all the moneys received on account of said fines, and render a statement thereof to this Department, together with the names of the persons, the place of residence, and the amount of the specific sum received from each; the accounts and vouchers for payments to members of courts-martial to be rendered to the War Department.

No. 11. Copy of my letter to Mr. Conard, dated the 31st March, 1819, stating that, as his predecessor probably had not delivered over to him the instructions from this Department, on the subject of the collection of the

militia fines, the manner of accounting for them, &c., copies of those instructions were enclosed to him for his information and government. Mr. Conard was also requested to apply to his predecessor for a list containing the names of the members of the courts-martial, who had been paid by him, and the amounts paid to each, and for the moneys remaining in his hands for militia fines, collected by himself or his deputies.

No. 12. Copy of a letter received from Marshal Conard, dated 13th April, 1819, stating that he had received no lists from Mr. Smith, his predecessor, of militia fines, nor any official information of the original amount of fines levied and due, or the amount collected; and that there was no prospect of recovering any money from him or any of his deputies, with the exception of two, in remote counties of the State, on whom he had given him orders for small sums, which could not probably be collected very soon.

No. 13. Copy of my answer to Mr. Conard, dated 22d January, 1820, stating that I had not, at any time, received any returns whatever from Mr. Smith, of militia fines which had been collected by him, or his deputies; and that, having received information from a source entitled to the confidence of the Department, that some of the deputies of Mr. Smith had received large sums of money, on account of militia fines, which sums, it was believed, had never been paid over to him, Mr. Conard was requested to give all the information in his power on the subject.

No. 14. Copy of a letter from Mr. Conard, dated the 26th January, 1820, stating that he had received no definite information from Mr. Smith, relative to militia fines; that the orders for small sums on his deputies had not been paid; that Mr. Smith had frequently promised, but had neglected to give up the bonds of his deputies, who had generally refused to pay over the balances in their hands; that, among the papers received from Mr. Smith, and from other sources, it appeared that Lewis Deffebach, one of Mr. Smith's deputies in Bucks county, had a balance in his hands of $3,546 60; that similar abuses, he had learnt, were committed by other deputies of Mr. Smith, but to what extent he had not been able to ascertain.

No. 15. Copy of my letter to Mr. Smith, dated the 1st March, 1820, directing him to deliver over to Mr. Conard all the returns respecting militia fines, and to pay over the moneys remaining in his hands.

No. 16. Copy of my letter to Mr. Conard, dated 1st March, 1820, stating that, by a decision of the Supreme Court of the United States, in the case of Houston *vs.* Moore, the collection of the militia fines in Pennsylvania had been sustained, and directing him to proceed with the collections, and to obtain from Mr. Smith and his deputies all the requisite returns, and the moneys remaining in their hands, in default whereof he was to report the delinquents, and the amount of each delinquency, in order that the district attorney might be instructed to institute suits for the recovery of the money thus improperly retained.

No. 17. Copy of my letter to Mr. Conard, dated 26th June, 1820, stating that his instructions would, on the same day, be given to the district attorney, to bring suit against Lewis Deffebach, one of Mr. Smith's deputies, who had retained moneys in his hands arising from militia fines, and requesting Mr. Conard to furnish the district attorney with the requisite documents to sustain the suit, and to report any further delinquencies which might come within his knowledge.

No. 18. Copy of my letter to the district attorney, dated 26th June, 1820, to bring suit against Mr. Deffebach, above alluded to.

Some time after the preceding letter was written to Mr. Ingersoll, an answer was received from him, stating some legal difficulties, which, he considered, would attend the bringing of a suit against the deputy marshal. This letter got mislaid, either when the agency of the Treasury was transferred to the Fifth Auditor, Stephen Pleasonton, Esq., to whom all the papers appertaining to suits were delivered, or was not among the papers so delivered, so that it cannot now be found. I am, therefore, unable to furnish a copy of it, and I do not sufficiently recollect the difficulties, stated by Mr. Ingersoll, to present a view of them. It does not appear, from the records of my office, that any further instructions were given to him after the receipt of the letter above referred to.

No. 19. Copy of my letter to the agent of the Treasury, dated the 7th instant, requesting him to furnish me with information as to the case of Lewis Deffebach, and as to the present state of the suit against him, if any was brought by Mr. Ingersoll, and the present state of the suits against John Smith, late marshal.

No. 20. Copy of the answer from the agent of the Treasury, dated the 7th instant.

No. 21. Copy of my letter of instructions to Mr. Ingersoll, dated the 30th of June, 1820, to bring suits against Mr. Smith, not only for certain specified balances, but, also, for all moneys collected by him on custom-house bonds, and all moneys arising from militia fines, for which he might not have accounted.

I take leave, further, to report, that no moneys arising from militia fines have been paid into the Treasury by John Smith, late marshal for the eastern district of Pennsylvania, or by Mr. Conard, his successor; that there is no information in this Department as to the amount of such moneys which have been applied to the payment of the expenses of courts-martial, by either of these marshals, or as to the persons who have retained such moneys in their hands, except what has already been stated; that deputy marshals give bond for the faithful discharge of their duties to the marshals, and the bonds of the latter, according to the act of the 10th of April, 1806, entitled "An act relating to bonds given by marshals," are to be filed and recorded in the office of the clerk of the district courts or circuit courts, sitting within the districts for which such marshals shall have been appointed; under which circumstances this Department possesses no information as to the sureties of deputy marshals, or of marshals, or as to the amount of the bonds given by them respectively.

By an act of the 20th of April, 1818, the State of Pennsylvania was to be divided into two districts, and William B. Irish was appointed the marshal for the western district. I have recently seen him, and, upon inquiry, he informed me that no militia fines had been collected by him, but that measures were about to be taken for the collection of such fines within his district.

Agreeably to your request I return, herewith, the resolution of the House of Representatives.

With considerations of high respect, I have the honor to be your obedient servant,

JOSEPH ANDERSON, *Comptroller.*

Hon. WILLIAM H. CRAWFORD,
Secretary of the Treasury.

No. 1.

SIR: MARSHAL'S OFFICE, PHILADELPHIA, *December* 29, 1813.

Having corresponded with the Governor of this Commonwealth, on the subject of militia fines emanating from the act of 1795, I have been referred by him to the brigade inspectors, respecting courts-martial to be held by virtue of that act. It is required by the inspectors, that the expenses attending courts-martial should be defrayed from the funds which may be collected and paid into my hands. I have, therefore, to request from you such information as will govern me in this respect, so far as I may be authorized to pay the claims that may be presented to me.

I am, sir, very respectfully, your obedient servant,

JOHN SMITH.

RICHARD RUSH, ESQ.

No. 2.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *January* 18, 1814.

In answer to your letter of the 29th of last month, I have to state that, in my opinion, the proper and reasonable expenses attending the courts-martial to which you refer may be deducted from, and paid out of, militia fines paid over to you.

I have the honor to be, &c.,

RICHARD RUSH.

JOHN SMITH, Esq., *Marshal, Pennsylvania.*

No. 3.

SIR: MARSHAL'S OFFICE, PHILADELPHIA, *March* 26, 1814.

A number of courts-martial have been held in this district, under the act of Congress of 28th of February, 1795; their proceedings of fines assessed have been reported to me, duplicates of which, I presume, have been forwarded to your Department. This measure has excited much attention and irritation on the part of the delinquents; they aver the proceedings illegal, and have instituted a suit against me for having committed one of them to prison, there being no property on which to levy, and, also, on the president and judge advocate of the court-martial, for having signed the warrant. There being no specific provision for compensating the district attorney, or requiring his services in cases of this kind, make it necessary for me to request that you would authorize him to appear at the suit instituted against me, and the president and judge advocate, for the performance of our public duty; and what compensation I may be authorized to pay him from the fines collected, or to compensate him in such other manner as you may be pleased to direct. The written opinion of the district attorney, together with that of the attorney general of this State, was communicated to the Governor previous to any measure adopted in holding the courts-martial.

As the fines are considerable, and it being of much importance that the law of 1795 should be enforced, I would beg to call your early attention to this subject, and more particularly as the Secretary of the Commonwealth has officially informed me that there will be great difficulty to obtain any further draughts of militia from this State, unless the delinquents are proceeded against. I am, &c.,

JOHN SMITH.

The COMPTROLLER.

No. 4.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *March* 30, 1814.

Your letter of the 26th instant, relating to certain suits, which have been instituted against you by persons who have been committed to jail in execution of the sentence of a court-martial, has been received.

In reply I have to observe, that, as the general powers and duties of the Comptroller extend only to the direction of suits for the recovery of debts due to the United States, and to those which are incident to the execution of the laws for the collection of the revenue, it is apprehended that I should not be authorized to assume any direction of the suits in question, or to advise to the employment of counsel to aid in their defence.

I am, &c.

EZEKIEL BACON, *Comptroller.*

JOHN SMITH, Esq., *Marshal, Philadelphia.*

No. 5.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *July* 18, 1815.

I have received your letter of the 15th instant, and, agreeably to your request, transmit a copy of the opinion of Chief Justice Marshall, in the case of Wm. Mead. Mr. Hay, of Richmond, has been requested, if it can be done, to bring up this case, to have the decision of the Supreme Court of the United States thereon. Should the marshal of Pennsylvania apply to you for information on this subject, you will be pleased to give him your advice, conforming to the principles laid down by Judge Marshall, where those principles may apply to the cases which may come before you for consideration and advice. Although the Chief Justice decides a case before him on its own particular circumstances, yet it may embrace principles which may apply to other cases. It would be well not to enforce the collection of fines where the principles laid down in the opinion given in the case of Mead, may be deemed to apply; but, in other cases, to proceed to collect. The course which is now contemplated to be pursued relative to the collection of these fines, is the result of a consultation on the subject, both with the President and Secretary of War. With great respect,

JOSEPH ANDERSON.

CHARLES J. INGERSOLL, Esq.,
Attorney for the United States, Pennsylvania, Philadelphia.

No. 6.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *December* 27, 1815.

Your letter of the 21st instant, enclosing one from Anthony Simmons to you, and your answer thereto, have been received. You state that you have already paid $2,742 34 more than you have received of militia fines, in the division in which you reside, and that, under existing circumstances, to enforce payments would involve you in a great many suits.

The attorney of the district of Pennsylvania has been long since written to upon the subject of the collection of militia fines, and, from the knowledge he may have acquired of the manner in which most of the fines may have been imposed, he is better able to judge whether any further collection ought to be attempted, under present circumstances.

It will be admitted that the members of the courts-martial ought to be paid for their services; but, if it shall be found that the courts were ordered by an improper authority, and the fines, consequently, not well laid, it may be doubted whether the United States should be held answerable for the payment of the expenses of the courts-martial, and, under such circumstances, it may be questioned whether you have not already paid more money upon that account than you were legally authorized. I cannot, therefore, under existing circumstances, authorize you to make further payment to any of the members of the militia courts-martial.

With due respect,

JOSEPH ANDERSON.

JOHN SMITH, Esq., *Marshal, Pennsylvania, Philadelphia.*

No. 7.

Circular to the following named marshals.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *March* 20, 1816.

I am informed, by a letter of the 2d ultimo, from the Secretary of War, that, on the subject of militia fines, new courts-martial will be instituted where the sentences have been declared illegal, and that the President is of opinion that the marshals, in all such cases, ought to be directed to refund the money already collected, upon application by the parties. As soon as the names, &c., of the militia officers, who were called into service, can be ascertained, courts-martial will be constituted for the trial of all who take advantage of any real or alleged irregularity of the proceedings of the courts-martial which have already passed upon their cases. You will, therefore, govern yourself accordingly. You had best apply to the Secretary of War as to the expenses of the courts-martial.

I would further remark, with a view of impressing it particularly on your recollection, that, under the second section of the act of 2d February, 1813, (entitled "An act supplementary to an act, entitled 'An act to provide for calling forth the militia to execute the laws, suppress insurrections, and repel invasions,' and to repeal the act now in force for those purposes, and to increase the pay of volunteer and militia corps,") the only duty imposed upon the Comptroller is to give notice to the district attorneys of the United States to proceed against the marshals, in case of failure to pay over fines into the Treasury, as therein directed. The Comptroller has nothing to do with the preliminary steps of ordering and organizing the courts-martial, &c. Indeed, I conceive that all information to be sought for on this subject is most properly to be looked for from the Department of War. You will, therefore, be pleased, for any directions which you may require on the subject of courts-martial, to apply to that Department.

With due respect,

JOSEPH ANDERSON.

Andrew Moore, Virginia.
Robert Crockett, Kentucky.
Charles T. Porter, East Tennessee.
John Childress, West Tennessee.
John Hamm, Ohio.
John Smith, southern district of New York.
John W. Livingston, northern district of New York.
Thomas Rutter, Maryland.
John Smith, Pennsylvania.

No. 8.

Circular to marshals.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *August* 13, 1817.

It being deemed expedient by the administration, that the fines which have been imposed upon delinquent militia who were called into the service of the Government during the late war, should be collected, it becomes my duty to direct that you will, without delay, proceed to collect the fines which have been thus imposed.

In making these collections it is deemed proper to advise that no person be committed to close confinement, or taken into custody for want of property out of which to make the money for payment of the fine. Where cases of this kind occur, you will please to remark, in writing, whether the party, upon whom the fine has been imposed, was, at the time he was called into service, single or married, and whether single or married at the time of making your remark. You will please make out a special list of such delinquents, and report to this Department, together with whatever you may do in making the general collection. Out of the moneys which you may receive for the fines, you are authorized to apply so much thereof as may be necessary for the payment of the members of the several courts-martial who may not have been paid, taking proper receipts therefor, which you will of course transmit with your accounts under this head. With due respect,

JOSEPH ANDERSON.

No. 9.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *January* 5, 1818.

I have the honor to enclose you a copy of my letter to the marshals of the United States, agreeably to your communication to me, as conformable to the views of the President.

I take leave to observe, that the instructions to the marshal to pay the members of the courts-martial out of the fines collected, are not conceived correct. The law which authorizes the collection of such fines requires that, when collected, they shall be paid into the Treasury. The members of the courts-martial should, I respectfully conceive, receive their pay from the War Department, where their accounts ought to be settled; and I have to request that I may receive authority to advise the marshals accordingly.

I have hitherto felt some delicacy in making such communication, because the letter I had written to the marshals was conformably to your instructions to me, as received by you from the President, to whom the subject-matter respecting these courts-martial, and the fines levied by them, was submitted.

All the documents received at this Department respecting militia fines are transmitted herewith.

I have the honor, &c.

JOSEPH ANDERSON, *Comptroller.*

The Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

No. 10.

Circular to certain marshals.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *May* 5, 1818.

You were heretofore instructed by this Department to apply so much of the money which you had collected from the delinquent militia, as might be necessary to pay the members of the several militia courts-martial, who might not have been paid, and to take proper receipts therefor, which you were requested to transmit with your accounts under this head.

These instructions were given by this Department, previous to any specific arrangement having been made between the Treasury and War Departments. This being done, and having been advised that instructions from the War Department had been communicated to you, as to the payment of the several members of the militia courts-martial, it is deemed proper to advise you that you are to continue to pay the members of the courts-martial agreeably to the instructions you have received, or may receive, from the Secretary of War; and that you continue to make such payments out of the moneys which you have collected, or may collect, from militia fines. You will be pleased to keep a specific account of all the moneys you have received, or shall receive on account of said fines, and render a statement thereof to this Department, together with the names of the persons, the place of

residence, and the amount of the specific sum received from each. The sums which have been, or may be paid out by you, together with the proper vouchers, must be rendered to the War Department, where your accounts for these expenditures will be settled.

It may be proper to observe, that the moneys which have been collected, or may be collected, for militia fines, are required by law to be paid into the Treasury; but these moneys being in the hands of the marshals, an arrangement has been made between the Treasury and War Departments, to apply them to the payment of members of the several militia courts-martial. This has been done in order to save trouble and risk, in transmitting the moneys to the marshals by the War Department, to meet the payment of the members of the courts-martial who may not have received their pay. These moneys will be reimbursed to the Treasury by the War Department, out of the moneys appropriated by Congress for the payment of courts-martial: hence, you will perceive the necessity of being very particular in the manner of keeping and rendering your accounts.

With due respect,

JOSEPH ANDERSON.

Michael McClary, New Hampshire.	Andrew Moore, Virginia.
David Robinson, Vermont.	John Hamm, Ohio.
Thomas Morris, New York.	John T. Mason, Kentucky.
John Smith, Pennsylvania.	John Childress, West Tennessee.
Paul Bentalou, Maryland.	Charles T. Porter, East Tennessee.

No. 11.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *March* 31, 1819.

Apprehensive that your predecessor may not have delivered the circular instructions of this Department to certain marshals, relative to the collection of militia fines, the manner of accounting for them, and the payment of the sums due to the members of the courts-martial, I enclose you a copy of them for your information and government, and take leave to request your early attention to the subject; pressing applications having been recently made by members of those courts for the amounts due them for their service.

To enable you to act correctly in this business it would be proper that you should apply to your predecessor for a list containing the names of the members who have been paid by him, and the amount paid to each. He should also pay over to you any moneys remaining in his hands for militia fines, which have been collected by him or his deputies. I enclose an order on him for that purpose.

Respectfully,

JOSEPH ANDERSON, *Comptroller.*

JOHN CONARD, Esq., *Marshal.*

No. 12.

SIR: MARSHAL'S OFFICE, PHILADELPHIA, *April* 13, 1819.

I have the honor to acknowledge the receipt of your letter of the 31st ultimo, with the circular from the Treasury Department of the 5th May last.

I have received no papers of any description from my predecessor in office. My commission was not received for some time after his had expired; in the interval of which he had the books and papers of the office removed, alleging they were private property and belonged to him personally. I have, therefore, no list of militia fines nor any official information of the original amount of fines levied and due in this district, or the amount collected.

On the receipt of your letter I immediately enclosed a copy to the late marshal, with a request that he would give me the necessary information on the subject, and, also, to inform me if he had any money remaining in his hands from the collection of militia fines, and I have this day received his answer, promising an early attention to its contents, without, however, giving me a decided answer as to moneys in his hands; but I infer from its contents, and from other authority, that there is no money to be expected either from him or his deputies, with the exception of two in remote counties of the State, on whom he has given me orders for small sums, which cannot, probably, be collected very soon.

Having understood, verbally, that the collection of the militia fines had been suspended, to wait the event of a question of law pending in the Supreme Court of the United States, in which the right of collecting those fines was involved, I have thought it advisable to wait for special instructions from the Treasury Department before I should proceed with the collections. I have, therefore, no funds at present, to meet the payments due to members of the courts-martial. If, however, it is the intention of Government to pursue the collection, without any delay, I shall make every effort in my power to accomplish it. There has been much hostility manifested by the delinquents against the payment of their fines at all times, and now, more especially, (as the impression is generally gone forth that it would be suspended until the termination of the law question,) it will be still more difficult to collect. Positive instructions, however, from the Treasury Department to the marshal to proceed in the collection would put down the opposition, and tend very much to facilitate the collection.

Very respectfully, your obedient servant,

JOHN CONARD, *Marshal.*

JOSEPH ANDERSON, Esq., *Comptroller.*

No. 13.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *January* 22, 1820.

In your letter to this Department in answer to one addressed to you, enclosing a copy of the instructions to your predecessor in office, upon the subject of collecting militia fines, you observed "that, on receipt of my letter, you immediately enclosed a copy to the late marshal, with a request that he would give you the necessary information on the subject, and, also, to inform you if he had any money remaining in his hands from the collection of militia fines," and that you received his answer promising an early attention to its contents, without, however, giving you a decided answer as to moneys in his hands; but you say you "infer from its contents, and from other authority, that there is no money to be expected either from him or his deputies, with the exception of two in remote counties of the State, on whom he has given you orders for small sums, which cannot, probably, be collected very soon." As I have not at any time received any returns whatever of militia fines which have been collected by Mr. Smith or his deputies, and having received information from a source entitled to the confidence of the Department, that some of the deputies of Mr. Smith have received large sums of money from delinquents on account of militia fines, which, it is believed, these deputies have never paid over to the marshal, and which they consequently must have in their possession, it becomes, therefore, my duty to call your attention to this subject, and to request that you will give me any information which you have received from Mr. Smith since your letter to me, or which may

have come to your knowledge through any other channel, respecting any militia fines that may have been collected by any of the deputies of Mr. Smith, and retained in their possession.

I will thank you for as early an answer as you can give, in order that I may be enabled to take such measures as the information I have received, if it should be correct, may require.

Respectfully,

JOSEPH ANDERSON, *Comptroller.*

JOHN CONARD, Esq., *Marshal, Philadelphia.*

No. 14.

SIR: MARSHAL'S OFFICE, PHILADELPHIA, *January* 26, 1820.

In answer to your letter of the 22d instant, requesting information relative to the militia fines said to be in the hands of the late marshal's deputies, &c., I have the honor to state that I have received no definite information from Mr. Smith since my answer to your letter of the 31st March last; at that time, as I then informed you, he had given me orders on two of his deputies, which I was then induced to believe were the only sums in the hands of his deputies that were likely to be collected. These sums were said to be small; but I could never learn the amount, nor have I been able to collect either of them. From one I have received no answer, and the other refuses to pay until his bond is given up by Mr. Smith, who has frequently promised to give up all the bonds in order that I might be enabled to collect them, but he has never yet complied.

The only step he has taken towards transferring these accounts to me, was to address a circular dated the first of October last, to his deputies, requesting them to settle all accounts relative to militia fines with me. From some of these I have received answers, some of whom allege they have no moneys in their hands, others admit they have small sums, without, however, specifying the amount in any one case; and they uniformly object to paying until the law-suits which have been commenced against them by the delinquents shall be settled, or until the question pending in the Supreme Court of the United States shall be decided in favor of the collection of the fines.

Among some of the papers I received from the late marshal, I find a return made to him by Lewis Deffebach, one of his deputies in Bucks county, dated the 3d of October, 1818, admitting a balance in his hands at that time of $416; and I have also an official report from my present deputy in that county, stating that receipts given by the said Deffebach to other delinquents for fines collected by him, and not returned in the above account, have been exhibited recently, amounting to the sum of $3,130 60, which, together with the above sum, make the amount of $3,546 60, which appears to be retained by him, unless a part has been paid over to the late marshal very lately. I understand, also, from my deputy in Montgomery county, that the same game has been played there by the late deputies of returning a part only of the fines they have collected; and it is said that great abuses have been committed in the city and county of Philadelphia, but to what extent, and in whose hands, I have not yet ascertained, detached parts only of the returns having been put into my hands by the late marshal, and if I have the whole of his papers I presume there would be no other mode of ascertaining those abuses but to go round and collect the receipts.

It has been suggested by some of the clerks of the late marshal that there are probably very considerable sums in the hands of other deputies, particularly in the counties of Lancaster, Berks, Mifflin, and others, but of these I have no official information, nor can my informants specify any probable sums; such, therefore, is the only information I can give on the subject. But, I presume, if the late marshal was directed by you, he would furnish such materials as would enable you to pursue this business to a final settlement. Any commands you may think proper to honor me with in the premises shall be cheerfully and promptly attended to.

In your letter of the 31st of March last is the following paragraph:

"He should pay over to you any moneys remaining in his hands for militia fines which have been collected by him or his deputies. I enclose an order on him for that purpose."

There being no order enclosed to me by that letter, or any other, I conclude that the order was forwarded to Mr. Smith, but having never heard any thing more on the subject, I should be glad to be informed if I misapprehended that part of the letter; if so, there must have been a mistake at your office in omitting to enclose the order.

Very respectfully, your obedient servant,

JOHN CONARD, *Marshal.*

Hon. JOSEPH ANDERSON,
Comptroller of the Treasury of the United States.

No. 15.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *March* 1, 1820.

On application to you by Mr. Conard, your successor in office, you are requested to deliver to him all the returns which you or your deputies may have received from courts-martial, of the fines which they have assessed, and to pay over to him all such moneys as may have been collected by you or your deputies, and which yet remain in your hands, after deducting the fees allowed by law for collecting, and his receipt therefor shall be an exoneration to you and your deputies.

Respectfully,

JOSEPH ANDERSON, *Comptroller.*

To JOHN SMITH, Esq.,
Late Marshal for the State of Pennsylvania.

No. 16.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *March* 1, 1820.

The case of Houston against Moore, deputy marshal, which was brought up to the Supreme Court of the United States from the Supreme Court of Pennsylvania, by writ of error, has lately been decided, and the opinion of the Supreme Court of Pennsylvania affirmed. Shortly after this decision was pronounced by the court, I addressed a letter to the clerk of the Supreme Court of the United States, requesting him to send me a certified copy of the opinion of the court, as I wished to communicate copies of that opinion to the marshals; but I have not yet received it; Mr. Caldwell, the clerk, being, I suppose, so much pressed with business during the sitting of the court, that he has not had time to attend to it. Thus circumstanced, I have deemed it proper, in order to prevent longer delay, to advise you that the Supreme Court of the United States having, by their decision, sustained the collection of the militia fines in Pennsylvania, it will be expedient to proceed to collect them in every case where the delinquency has been reported to you, except in cases where the delinquent may be able to produce evidence that the fine has been remitted by the President. You will also be pleased to obtain from the late marshal Smith and his deputies, all the returns which they have received from the courts-martial, and all the

moneys which they, or any of them, shall have collected for militia fines, and retain the moneys so obtained in your hands until you shall be specially instructed how to dispose of it, which will be in a very short time. If the late marshal, or any of his deputies, should decline or refuse to pay over to you the moneys they have received on account of militia fines, you will please report the fact to this Department, and the amount of money which they have respectively withheld, after deducting from the sums they may have received the per cent., which they are allowed by law for collecting. This information is necessary in order that the requisite instructions may be given to the district attorney to bring suits against the late marshal, or such of his deputies as shall not have paid over or fully accounted for the moneys they have collected for fines. In every case in which you may require legal advice in this business, you must apply to Mr. Ingersoll, district attorney. Should you be compelled to report the late marshal, or any of his deputies, for refusing to pay over the moneys they have collected, it will be necessary to ascertain the names of the persons from whom they have collected the fines, and the amount collected from each. In fact, a settlement cannot be made with the late marshal, or his deputies, without such knowledge; and should the Government be compelled to bring suits, this specific information will be indispensable to sustain them. It will be proper to make regular reports to this Department of the moneys which you, or your deputies, may collect for militia fines, and from whom. I enclose you an order on the late marshal Smith, to deliver to you all the returns which he, or his deputies, may have received from courts-martial, of the fines which they have assessed, and to pay over to you all such moneys as may have been collected by him or his deputies, which yet remain in their hands, after deducting the fees allowed by law for collecting, as herein before observed.

Respectfully,

JOSEPH ANDERSON, *Comptroller.*

JOHN CONARD, Esq., *Marshal Pennsylvania.*

No. 17.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *June* 26, 1820.

In consequence of the information contained in your letter of the 9th instant, I have this day instructed the district attorney of Pennsylvania to bring suit without delay against Lewis Deffebach, late deputy marshal under John Smith, on account of moneys collected by said Deffebach for militia fines. I have informed Mr. Ingersoll that you will furnish him with the necessary evidence to support the suit. Whenever you shall obtain further information respecting the fines collected by the late marshal or his deputies be pleased to inform me of it without delay, and immediate instructions shall be given to the district attorney to bring suit. I am extremely sorry that the late marshal Smith has evinced so much unwillingness to give up the bonds against his deputies, especially after he had promised you that he would.

Agreeably to your suggestion I will again write to Mr. Smith, and request him to give up those bonds to you. I cannot conceive what motive he can have for withholding them.

Respectfully,

JOSEPH ANDERSON, *Comptroller.*

JOHN CONARD, Esq., *Marshal Pennsylvania, Philadelphia.*

No. 18.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *June* 26, 1820.

I have recently been advised by John Conard, Esq., marshal for the district of Pennsylvania, that Lewis Deffebach, of Bucks county, late a deputy marshal under John Smith, had collected considerable sums of money from delinquent militiamen, on account of fines imposed upon them by courts-martial, which moneys, so collected, the said Deffebach has hitherto refused to pay, and still refuses to pay, to the marshal of the district of Pennsylvania, who has been authorized by this Department to receive all moneys which may have been collected by the late marshal, or his deputies. I have, therefore, to request that you will, without delay, bring suit against the said Lewis Deffebach, deputy marshal as aforesaid.

Mr. Conard informs me that he is prepared to furnish you with the necessary proof to support the suit.

Respectfully,

JOSEPH ANDERSON, *Comptroller.*

C. J. INGERSOLL, Esq., *District Attorney, Philadelphia.*

No. 19.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *January* 7, 1822.

I would thank you to inform me, as early as practicable, whether a suit has been instituted by Mr. Ingersoll, district attorney for the eastern district of Pennsylvania, against Lewis Deffebach, formerly a deputy under Mr. Smith, late marshal for that district, for the recovery of militia fines collected by him, and retained in his hands; if so, be pleased to state the time when it was brought; the amount for which brought, and the present state of it.

I would also thank you to inform me of the date of the suits against John Smith, late marshal of the district of Pennsylvania, and of the present state of the suits.

With great respect,

JOSEPH ANDERSON, *Comptroller.*

STEPHEN PLEASONTON, Esq., *Agent of the Treasury.*

No. 20.

SIR: TREASURY DEPARTMENT, FIFTH AUDITOR'S OFFICE, *January* 7, 1822.

I have the honor to state in reply to the inquiry contained in your letter of this day's date, relative to "Lewis Deffebach, late deputy marshal for the eastern district of Pennsylvania," that it does not appear from the records of this Department, or the returns for that district, that any suit has been instituted against him for the recovery of militia fines.

To your inquiry respecting the date of the suit against John Smith, late marshal for the district of Pennsylvania, I have to add that there were two suits ordered against him on the 30th of June, 1820: one for $157 61, in relation to taking an account of manufactures; the other for $4,529 15, for expenses in holding courts, &c., in both of which cases he was discharged from imprisonment by the President of the United States.

I have the honor to be, your most obedient servant,

S. PLEASONTON,
Agent of the Treasury.

HON. JOSEPH ANDERSON.

No. 21.

SIR: TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, *June* 30, 1820.

I enclose, herewith, for suits, transcripts of the following accounts of John Smith, late marshal for the State of Pennsylvania:

1. His account in relation to taking an account of manufactures, &c., according to which there is a balance of this sum due from him to the United States, - - -	$157 61
2. His account for expenses in holding courts, &c., according to which there is a balance of this sum due from him to the United States, - - -	4,529 15
	$4,686 76
3. His account in relation to prisoners of war, according to which a balance of 972\frac{85}{100}$ is due to him, which deducted from the above balances - - -	972 85
Leaves this sum due from him to the United States, exclusive of interest, - -	$3,713 91

From the collector of the customs you can, I presume, ascertain the amount collected by Mr. Smith on duty bonds, which has not been accounted for by him.

It is, also, probable that he collected some militia fines which have not been accounted for by him, but what amount is not known to this Department.

The precise amount for which suit is to be instituted cannot, therefore, be stated.

With great respect,

JOSEPH ANDERSON, *Comptroller.*

CHARLES J. INGERSOLL, Esq., *District Attorney, Philadelphia.*

17th CONGRESS.] No. 212. [1st SESSION.

ORDNANCE AND ORDNANCE STORES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 7, 1822.

To the House of Representatives: WASHINGTON, *February* 7, 1822.

In compliance with a resolution of the 17th ultimo, I transmit a report from the Secretary of War, which, with the accompanying documents, contain the information requested.

JAMES MONROE.

DEPARTMENT OF WAR, *January* 31, 1822.

The Secretary of War, to whom was referred the resolution of the House of Representatives, of the 17th ultimo, "that the President of the United States be requested to cause to be laid before this House a statement, showing the number of battering cannon, mortars, and howitzers, with the several calibers of the cannon, and size of the mortars and howitzers, within each fortification of the United States; the number of shot and their several weights, and the number of shells and their size within the same; the number of gun and howitzer carriages, and mortar beds, fit for service, within the same; the number of battering cannon, their respective calibers, not in service, including those contracted for and not yet delivered; the number of mortars and howitzers, and their dimensions, not in service; the quantity of shot and shells in store for the same, their respective sizes and diameters; the number of caissons fit for service; the number of new carriages constructed for the guns in the forts, or for the new fortifications; the number of cannon, mortars, and howitzers, their calibers and size, required for the old fortifications, and fully to supply the new fortifications lately finished, and those now building; and an estimate of the amount required to provide all the cannon, mortars, howitzers, their shot and shells, carriages and beds, for the same, and for caissons for the present army, that may be deemed necessary; the number of field-pieces in service, with their several calibers, and the shot prepared for the same; and whether any addition to those are deemed necessary; and, if so, what number, their several calibers, and an estimate of their cost;" has the honor to transmit, herewith, a report of the Ordnance Department, with its accompanying statements, marked A to G, which contains the information requested; which is respectfully submitted.

J. C. CALHOUN.

THE PRESIDENT OF THE UNITED STATES.

SIR: ORDNANCE DEPARTMENT, *January* 29, 1822.

I have the honor to communicate, herewith, sundry statements, prepared in obedience to your order, and containing the information required by the resolution of the House of Representatives, the 17th ultimo, viz:

Statement A exhibits the number of battering cannon, mortars, howitzers, shot, shells, gun and howitzer carriages, and mortar beds, with the several denominations of each, within each fortification of the United States.

Statement B shows the number of the same description of ordnance and stores, deposited at the arsenals and not in service, including those contracted for and not yet delivered.

Statement C contains the number of cannon, mortars, and howitzers, together with their carriages, required fully to supply the new fortifications lately finished, and those now building.

The paper marked D exhibits, in a condensed form, the results of the foregoing statements, with a full statement of the additional supply required; to which is appended the data upon which the calculations are founded.

The paper marked E contains an estimate of the amount required to provide all the cannon, mortars, howitzers, shot, shells, gun carriages, and mortar beds, which are deemed necessary for the public service.

Statement F shows the number of field-pieces on hand, with the number contracted for and not yet delivered; together with the caissons, travelling forges, and shot, prepared for the same.

The paper marked G contains a statement of the field artillery, which is deemed necessary, in addition to the supply now on hand, together with an estimate of its cost.

I have the honor to be, sir, very respectfully, your obedient servant,

GEO. BOMFORD, *Colonel, on ordnance duty.*

The Hon. J. C. CALHOUN.

Number which remains to be provided,	1,012	180	11	1,279	193	20

REMARKS.

The armament required for the new fortifications, as given in the foregoing statement, is derived from the reports of the Engineer Department, which have been heretofore communicated to Congress.

This statement gives no estimate of the number of cannon required for the *old* fortifications. By the report of the Board of Engineers, it appears to be in contemplation to suppress some of the old works when the new fortifications are completed, and to enlarge others. No precise information can now be had of the extent of such modifications. It is judged, however, that the ordnance which may be taken from the fortifications which are to be suppressed, will be equal to the additional supply required for those which may be augmented. This basis may be assumed as sufficiently accurate in regard to *cannon;* but not so as it respects *heavy mortars.* None of our seacoast defences are adequately supplied with the latter. It is recommended, therefore, to provide as many seacoast mortars for the old fortifications as are required for the new.

GEO. BOMFORD,
Lieutenant Colonel, on ordnance duty.

ORDNANCE DEPARTMENT, *January* 29, 1822.

D.

Recapitulation, exhibiting the total quantity of ordnance and ordnance stores on hand in the fortifications and in depot; also an estimate of the additional quantity for the old fortifications, and fully to supply the new works lately finished and now building.

ORDNANCE DEPARTMENT, 29*th January*, 1822.

GEORGE BOMFORD, *Lieutenant Colonel on ordnance duty.*

Remarks in explanation of the estimate contained in statement D.

Battering cannon. In order to simplify the service of our batteries in future, it has been recommended to furnish cannon all of the same caliber, for the supply of both the old and the new fortifications; therefore, no other battering cannon than twenty-four pounders have been named in the estimate. It is proper to remark, that the cannon now on hand consists of a great variety of patterns of English, French, and American manufacture; some of those procured during the revolutionary war are still on hand, and included in the returns of the present time. It is probable that, upon a rigid inspection of these cannon, which is now in progress, many of them, from the irregularity of their model and inferior quality, will be found unfit for the service of permanent works. It therefore becomes the more necessary to make provision for the whole number stated in the reports of the Engineer Department as necessary for the fortifications, and also to provide an adequate siege train. For this purpose ninety pieces are added to the estimate. This number it is intended to mount upon travelling carriages, to serve at sieges, and to aid in the defence of the coast, or of temporary works raised to cover cities or other important points.

Mortars. It is not deemed necessary to provide any mortars in addition to the number stated in statement C.

Howitzers. Our stock of eight inch howitzers is believed to be entirely inadequate to the future wants of the service. This arm is indispensable in sieges, and is important also in the defence of places. It is employed in the defence of permanent fortifications and temporary field works, in both of which it is considered an important arm. For these reasons one hundred are added to the estimate.

Shot. The stock of shot on hand is thought to be sufficient for all the calibers except the twenty-four pounder. One hundred rounds of shot for each gun are deemed an adequate supply during the existence of peace. The estimate for twenty-four pounder shot is founded upon this calculation.

Shells. Ten inch shells for the siege and seacoast service are the same, though the mortars from which they are projected are very different. Shells of this denomination have, therefore, to be provided for both. Sixty shells for each mortar is the base upon which the estimate is predicated.

Of eight inch shells the present supply is deemed sufficient.

The estimate for twenty-four pounder shells is founded upon the calculation that one hundred are necessary for each howitzer. The twenty-four pounder howitzer is always mounted on travelling carriages, and is strictly a part of the field train. It is, however, employed in the defence of fortified places, and in sieges, as well as in the field.

Garrison and seacoast carriages. There have been no new carriages constructed for the guns in the old works, or for the new fortifications, for several years past. All those now on hand were constructed during or before the late war; many of them were made upon the pressing emergencies incident to that period, from unseasoned timber, and without that care and attention necessary to their greatest duration. Consequently, they are now mostly unfit for service; there are but few (if any) of them that could be relied upon with confidence. It is, therefore, thought indispensably necessary to make provision for that number at least which are required for the new fortifications, and to add a small number for the supply of the old works.

Mortar beds. The mortar beds are in a situation similar to the seacoast carriages; the same observations will, therefore, apply in the one case as well as the other.

Howitzer carriages. The same considerations which induced an addition of eight inch howitzers to the estimate call for the provision of a like number of carriages. The number of twenty-four pounder howitzer carriages on hand is deemed sufficient for the service in the fortifications only; it remains, therefore, to provide the number requisite for service in the field. Twenty divisions, or one hundred and twenty pieces, are recommended for this branch of service.

Siege carriages. No siege carriages have been made since the late war; most of those reported on hand were in service during the war, and are not now in a condition for active service. It is, therefore, judged proper to provide new carriages for the full number of siege guns required.

In reference to the carriages generally, it is proper to remark, that it is not contemplated to complete them until the period approaches when occasion to use them may be expected. The provision now contemplated extends no further than the preparation and seasoning of the necessary materials.

GEO. BOMFORD,
Lieutenant Colonel on ordnance duty.

ORDNANCE DEPARTMENT, *January* 29, 1822.

E.

Estimate of the amount required to provide all the cannon, mortars, howitzers, their shot and shells, carriages and beds for the same, which are deemed necessary for the service, per statement D.

		Tons.	Cwt.	Price per ton.	Amount.	
1,102	twenty-four pounder cannon, weighing each 48¼ cwt., are - 2,672 tons, 7 cwt.	2,996	7	*at* $110 00	$329,598 50	NOTE.—The prices at which the castings are estimated are considerably lower than those paid for similar articles heretofore. But it is believed that they are not reduced in a greater proportion than the price of labor and materials generally throughout the country, and that they will not be found to vary materially from the proposals which may be obtained by public advertisement.
180	seacoast mortars, weighing each 36 cwt., are - - 324 tons, -					
111	eight inch howitzers, weighing each 13 cwt., are - - -	72	3	125 00	9,018 75	
92,694	twenty-four pounder shot, weighing - - - -	993	3	80 00	79,452 00	
5,906	ten inch shells, weighing each 85 pounds, are - - - -	224	2	125 00	28,012 50	
9,110	twenty-four pounder shells, weighing each 16 pounds, are - - -	65	1	135 00	8,781 75	
	Total tons, -	4,350	16		454,863 50	The cost of the carriages cannot be precisely stated. Those for the seacoast, especially, will differ in form and dimensions, in order to adapt them to the particular construction of the fortifications for which they may be intended. The materials for their construction, including the bar iron and castings, and all the timber necessary to provide for seasoning, and also the labor requisite to prepare the materials in a rough state, so far as to admit of their being readily put together, may be averaged at $260 each.
1,279	twenty-four pounder seacoast carriages.					
130	eighteen pounder seacoast carriages.					
193	ten inch seacoast mortar beds.					
120	eight inch howitzer carriages.					
120	twenty-four pounder howitzer carriages.					
90	twenty-four pounder siege carriages.					
1,932	carriages, the materials for which are estimated at $260 each, are - -	-	-	-	502,320 00	
	Total amount, -	-	-	-	$957,183 50

Total, -	413	94	735	61	170	16	224	22	133	36	20	54,884	17,536	105,750	15,508	2,834	4,481

ORDNANCE DEPARTMENT, *January* 29, 1822.

GEORGE BOMFORD, *Lieutenant Colonel on ordnance duty.*

G.

Statement of the field artillery which is deemed necessary in addition to the quantity now on hand, and also an estimate of its cost.

In the present military peace establishment there are thirty-six companies of artillery, which, if fully equipped for active service, would require one division, consisting of six pieces, to each company, amounting to two hundred and sixteen pieces for the supply of the regular troops. But it is conceived that a number just sufficient for the supply of the regular troops would be inadequate to the permanent defence of the country. During a state of war the country is divided into military districts, each forming a separate and independent command. It is conceived that each of these districts should be provided with a separate train of artillery, and which should be sufficient for its defence, without drawing upon the resources of other and distant districts. The calculations for determining the amount of artillery necessary to provide for any district are founded upon the *maximum* force which it may at any time be deemed necessary to have embodied for its defence.

An estimate of the number of troops necessary for the defence of each district, in time of war, must, in a great degree, be conjectural. A report made by this department, and communicated to Congress in January, 1817, gives an aggregate of from one hundred and fifty to two hundred thousand men. A report made by the Board of Engineers in February last states, that, for the defence of six points of our frontier, with the present fortifications, one hundred and twenty thousand men will be necessary. During the late war, the total regular force (exclusive of militia) authorized by law exceeded sixty-two thousand; if to this be added the number of militia constantly in service, it is believed that the total number of troops in actual service, and under pay, was seldom less than one hundred and fifty thousand. That number is, therefore, assumed as a basis upon which to estimate the quantity of field artillery required.

In armies composed of regular and well-instructed troops, it is usual to allot a half division (three pieces) of artillery to one thousand men. But for newly raised troops, or militia, the proportion of artillery is increased in a ratio varying from a half to a full division for each thousand.

The circumstances under which our troops have frequently been called out for the defence of important positions, the sudden emergencies which make it necessary to assemble large bodies of militia, and the difficulty and delay attending the transport of artillery from distant depots, make it important to be at all times provided with a numerous and well-organized train of field artillery. The highest ratio is, therefore, recommended as a basis for determining the quantity required. From this calculation it results that the quantity of field artillery necessary for the permanent defence of the country amounts to one hundred and fifty divisions, which, it is conceived, should be composed as follows, viz:

	12 pr. cannon.	6 pr. cannon.	12 pr. carriages.	6 pr. carriages.	Caissons.	Travelling forges.	12 pr. shot.	6 pr. shot.
100 divisions of 6 prs. (equal to 600 pieces,) - - -	-	600	-	600	600	50	-	120,000
30 divisions of 12 prs. (equal to 180 pieces,) - - -	180	-	180	-	360	15	36,000	
20 divisions of 24 pr. howitzers (equal to 120 pieces,) - -	-	-	-	-	240	10		
Total, 150 divisions (900 pieces,) - - - -	180	600	180	600	1,200	75	36,000	120,000
Deduct the amount on hand, see statement F, - -	268	577	93	98	109	18	54,884	105,750
Amount yet required fully to complete 150 divisions, - -	-	23	87	502	1,091	57	-	14,250

The twenty-four pounder howitzers, their carriages and shells, are included in the statements D and E, therefore only their due proportion of caissons and forges is introduced in this statement. In the above statement of "the amount on hand," the six and twelve pounder cannon and carriages, which are in the fortifications, are omitted, because all which are in the forts are believed to be necessary there; independent of which, most of the carriages are old, and not in a condition for active field service. For the number of these see statement F.

By the foregoing statement it appears that our stock of cannon and shot for field service on hand corresponds nearly with the quantity supposed to be necessary; but that we are greatly deficient in the gun carriages, caissons, and travelling forges. The latter only are, therefore, embraced in the following

ESTIMATE.

87	twelve pounder travelling carriages, at	$320	each,	- - -	$27,840
502	six pounder, do. do.	280	"	- - -	140,560
1,091	caissons, - - -	240	"	- - -	261,840
57	travelling forges, - -	240	"	- - -	13,680
1,737	carriages, - - - - - -			Total cost,	$443,920

It may be proper to remark, that gun carriages and caissons cannot be hastily constructed. It would require several years to complete the supply to the extent stated in the above estimate, even after a sufficient stock of seasoned timber had been provided. It therefore becomes the more important that early provision be made for this branch of service.

GEO. BOMFORD,
Lieutenant Colonel on ordnance duty.

ORDNANCE DEPARTMENT, *January* 29, 1822.

17th Congress.] No. 213. [1st Session.

ACCOUNTABILITY OF AGENTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES, FEBRUARY 12, 1822.

SIR: DEPARTMENT OF WAR, *February* 11, 1822.

Since I received your letter of the 14th December, written by the instruction of the Committee on Public Expenditure, I have carefully reviewed "the existing laws for establishing the Department and for prescribing the duties of the several offices therein," in relation to its expenditures; and I am of the opinion that the organization of the Department, with the exception of that portion which relates to Indian affairs, is well calculated to enforce accountability and introduce a high degree of economy. The present organization originated in the act of Congress of 14th April, 1818, and has been long enough in operation to be tested by experience; and though it has not yet attained, in its operation, all of the perfection of which it is susceptible, yet it is believed that under no other system has there been greater punctuality in rendering and settlement of accounts, or economy in the disbursements of the Department. The committee will have a full view of the present system and its operation by reference to the regulations of the army, a copy of which I herewith transmit. They will perceive that the regulations propose to carry a minute and rigid responsibility into every branch of the military disbursements—with what success a reference to the expenditures under their operation will best illustrate. The committee will perceive, by referring to the regulations, that one principle pervades the whole organization—to hold the head of each subordinate department responsible for the disbursements of his department. All advances are made on his recommendation, founded on precise estimates; and all accounts are rendered to him, and, before they are audited, are minutely examined by him and approved. It is thus that responsibility is extended to every item of disbursements, and regularity and economy introduced.

To give the same perfection to the disbursements of the Indian Department, a similar organization ought to be extended to it, which may be effected with very little additional expense, by attaching the office of superintendent of Indian trade to this Department, as superintendent of Indian affairs, to have under his direction, liable to the control of this Department, the trade and intercourse with the Indians and the disbursements of the Indian Department. At present the office of superintendent of Indian trade is not connected with or under the control of any of the Departments of the Government, though in its operations it is so intimately blended with the management of Indian affairs as to render it desirable that it should be under the same general control with that department. So much of the disbursements of the Indian Department is made through the superintendent of Indian trade, that if no other cause for the union of the two existed, that alone would render it desirable. Even if the present trading system should not be continued, the arrangement which has been proposed would still be proper. Should the Government discontinue the trading houses with the Indians, the whole trade would be placed in the hands of individuals, which would require on the part of the Government increased vigilance and attention, to give to that mode of carrying on the trade a salutary direction, and would render it the more necessary that this important branch of our public affairs should be placed under the direction of a distinct subordinate head. Such an arrangement of the Indian Department would render it analogous in its organization to that of the other branches of this Department, and would doubtless be attended with the same desirable results. An officer specially charged with a single department would have leisure to superintend its affairs and examine its disbursements carefully and minutely; while the Secretary of this Department, freed from details, to attend to which he has so little leisure, would have more time to give to the general superintendence of the various important duties imposed on him; without such an organization, which, as has been stated, would be attended with very little additional expense, it will be impossible to introduce into the disbursements of the Indian Department a high degree of regularity, accountability, and economy.
